F

OREWORD

By building a solid foundation for sustainable tax-revenue growth, SARS continues to fund a large portion of government expenditure, as highlighted in this 18th edition of the *Tax Statistics* publication.

SARS's mandate is to collect all tax revenue due by ensuring optimal compliance with tax and customs legislation. The unprecedented improvement in tax-revenue collection after the enactment of the SARS Act, 1997 (Act 34 of 1997), is hailed as one of the developments that laid the foundation for South Africa's prudent and sustainable fiscal policy trajectory. SARS continues directly to contribute to nation building and sustain the country's democracy, which is now more than 30 years old.

Over the past 30 years, tax collections have increased from R113.8 billion in 1994/95 to R1 855.3 billion in 2024/25, at a compounded annual growth rate of 9.8% and an average tax-to-GDP ratio of 22.3%. Since 1997/98, SARS has collected R23.0 trillion for the country's social and economic development. In the 2024/25 fiscal year, SARS collected a record gross amount of R2.303 trillion, and refunded taxes worth R447.3 billion, the highest amount ever in refunds (versus R413.9 billion in the prior year), representing growth of 8.1%.

The 2024/25 revenue collections recorded a sizeable tax-to-GDP ratio of 25.1%, reflecting the country's fiscal health and efficiency in revenue generation. In the same vein, the tax-buoyancy ratio for the fiscal year 2024/25 was at 1.6, indicating the robust response of tax revenue relative to economic growth. The buoyancy ratio is a crucial indicator of how effectively a government can adjust its revenue-collection methods in response to shifts within the economy.

In the fiscal year 2024/25, the performance of key taxes has been a main indicator of economic stability. South Africa demonstrated uneven economic recovery, exhibiting both positive advancements and enduring difficulties. The *Finance; Community; Wholesale; and Construction* sectors had robust gains, contributing to the 6.6% year-on-year growth in revenue collections and 4.2% in GDP. Tax revenues in 2024/25 were driven by a notable shift in revenue streams, influenced by a combination of market dynamics, trade patterns, and consumer behaviour.

In 2024/25, growth in net PIT was mainly as a result of above-inflation growth in the *Financial Intermediation, Insurance, Real-estate and Business Services* as well as the *Community, Social and Personal Services* sectors' pay-as-you-earn (PAYE), and the gains from two-pot retirement-fund withdrawals (which were higher than expected). In the 2024/25 fiscal year, Company Income Tax (CIT) collections were higher than in the prior year and whose growth was mainly due to the *Financial Intermediation, Insurance, Real-estate, and Business Services* sector, which was buoyed by improved profits. The *Mining and Quarrying* sector continued to contract mainly as a result lower commodity prices. Domestic Value-Added Tax (VAT) growth for the 2024/25 fiscal year owed to improved consumer sentiment, lower interest rates, contained inflation, and early pension-fund withdrawals, all of which have bolstered household consumption in the last quarter of 2025.

SARS is determined to make it hard and costly for taxpayers who wilfully fail to meet their tax obligations. The SARS Compliance Programme interventions secured R304.0 billion in compliance revenue as compared to R260.5 billion secured in 2023/24, marking a 16.7% year-on-year increase. A portion of this revenue could be attributed to cash-collection initiatives, amounting to R156.1 billion. Strategies to prevent revenue

FOREWORD

The use of tax and customs administration data for improved policy formulation is crucial. There is no doubt that the effective use of tax data can increase compliance levels, enhance revenue collection, and help to identify new revenue opportunities. Effective use of tax data provides opportunities to grow the tax base and make it easy and simple for taxpayers and traders to comply with their obligations.

The recognition of the use of data generated through tax and trade administrative activities has led to increased interest by international bodies such as the African Tax Administration Forum (ATAF), the International Centre for Tax and Development (ICTD), the International Monetary Fund (IMF), the Organisation for Economic Cooperation and Development (OECD), and the United Nations University's World Institute for Development Economics Research (UNU-WIDER). SARS participates in the African Tax Outlook (ATO) and the Revenue Statistics in Africa publications and collaborates on platforms such as the International Survey on Revenue Administration (ISORA), Spatial Economic Activity Data South Africa (SEAD-SA), and MzansiXchange platform.

This publication also illustrates that the role of SARS is not limited to the domestic economy, but also extends to neighbouring countries through the Southern African Customs Union (SACU), which includes Botswana, Eswatini, Lesotho, Namibia ("BELN"), and South Africa. A SACU Agreement has been concluded under which goods that are grown, produced, or manufactured in SACU are, on importation from one of the member states to another, free of customs duties and quantitative restrictions.

SARS and National Treasury are committed to improving the *Tax Statistics* publication and encourage feedback and engagement.

Commissioner: South African Revenue Service

Dr Duncan Pieterse
Director-General: National Treasury

ABOUT THIS PUBLICATION

The 2025 edition of the *Tax Statistics* publication reviews tax-revenue collections and tax-return information for the 2021 to 2024 tax years as well as the 2020/21 to 2024/25 fiscal years.

The objective of this publication is to present comprehensive tax-revenue data to complement and help contextualise economic and demographic data provided by other publications. It contains more detailed and varied tax-revenue data that supplements publications such as the National Treasury's Budget Reviews and SARS's Annual Reports. The following tables are new additions in this publication:

- *Table A2.1.1(b): Assessed Provisional Taxpayers on Register: Taxable Income and Tax Assessed by Taxable Income Group, 2021–2024*
- *Table A2.1.4 (b): Assessed Provisional Taxpayers on Register: Taxable Income and Tax Assessed by Age Group, 2021–2024*
- *Table A2.1.5(b): Assessed Provisional Taxpayers on Register: Taxable Income and Tax Assessed by Gender, 2021–2024*

The publication follows the same format as in previous years and is set out as follows:

- *Chapter 1: Revenue Collections* summarises aggregate tax-revenue collection trends from 2020/21 to 2024/25.
- *Chapter 2: Personal Income Tax (PIT)* reviews assessed Personal Income Tax revenues of registered individual taxpayers. In addition, information about taxable income by income group, age, gender, municipality of residence, and source of income, as well as fringe benefits, allowances, and deductions is provided.
- *Chapter 3: Company Income Tax (CIT)* gives an overview of Company Income Tax revenues. Information about taxable income by income group, sector, and type of business entity as declared in the tax returns is also provided.
- *Chapter 4: Value-Added Tax (VAT)* provides a breakdown of VAT liabilities, receipts, and refunds by sector and tax-period category type, as well as an overview of data on input and output VAT as derived from VAT returns submitted by vendors.
- *Chapter 5: Import VAT and Customs Duties* provides information about the customs value of imported goods by product type, according to the Harmonised System (HS) at chapter and tariff level, as well as Import VAT, customs duty, and ad valorem excise-duty revenues on imported goods.
- *Chapter 6: Other Taxes and Collections* covers taxes such as Capital Gains Tax (CGT), Transfer Duty, Diesel Refunds, Mineral and Petroleum Resources Royalty (MPRR), as well as Southern African Customs Union (SACU) payments.
- The *Glossary* and *Index* contain definitions of terms and abbreviations as well as a list of all tables and figures in the publication.

Readers of the publication are also encouraged to use the explanatory content or guides that are published by SARS, in terms of the Tax Administration Act No. 28 of 2011. These publications offer practical guidance on the interpretation of the law and can be accessed on the SARS website: <https://www.sars.gov.za/legal-counsel/legal-counsel-publications/>.

METHODOLOGY

- All statistics are based on the income, expenses, deductions, and items as reported by taxpayers and traders in tax returns and assessment documents.
- Data has been evaluated for reasonability and any identified outliers have been excluded from these statistics.
- Nominal figures are used throughout the publication.
- Disaggregated income-tax data is based on assessed PIT and CIT returns as extracted from SARS's systems in September 2025 and August 2025, respectively. Given the time delay in the submission of tax returns by some taxpayers, and the time taken to assess such returns, statistics for later years tend to be less complete than those of earlier years.
- Given the time-lag between the end of a tax year and the filing of returns for that tax year, an estimate is applied to determine the proportion of expected tax returns to be filed for a specific tax year. More detail about how this estimate is determined is provided in Chapters 2 (PIT) and 3 (CIT).
- Declarations data for VAT, as discussed in Chapter 4, was extracted in August 2025.
- Declarations data for import VAT and Customs Duties in this document, mainly discussed in Chapter 5, was extracted at the end of August 2025.
- Declarations data for customs taxes by Tariff Code in *Table A5.5* of this document, was extracted in September 2025.
- Information about the sector (industry) in which taxpayers operate is drawn from taxpayer returns and is determined according to their main source of income. Trade classification data is based on the classification as declared by traders and is based on the Harmonised System.
- Figures have been rounded, therefore discrepancies may occur between the numbers of the component items and the totals in the tables.
- A hyphen ("-") in the tables represents zero while a zero symbol ("0") indicates the rounding of a numerical value that is greater than 0 and less than 0.5.
- The tax year for individuals starts on 1 March and finishes at the end of February the following year. The tax year for companies coincides with the financial year of the company for financial reporting.
- A distinction is made between a tax year and a fiscal year. The former is shown as a single year (e.g. 2024) while the latter is displayed with a forward slash (e.g. 2024/25).
- Tables numbered with an "A" (e.g. *Table A1.1.1*) are included at the end of the relevant chapter.

A full electronic version of this publication (including the Excel tables) is available for download on the SARS website — <https://www.sars.gov.za/about/sars-tax-and-customs-system/tax-statistics/> — and that of National Treasury: <https://www.treasury.gov.za/publications/tax%20statistics/default.aspx>.

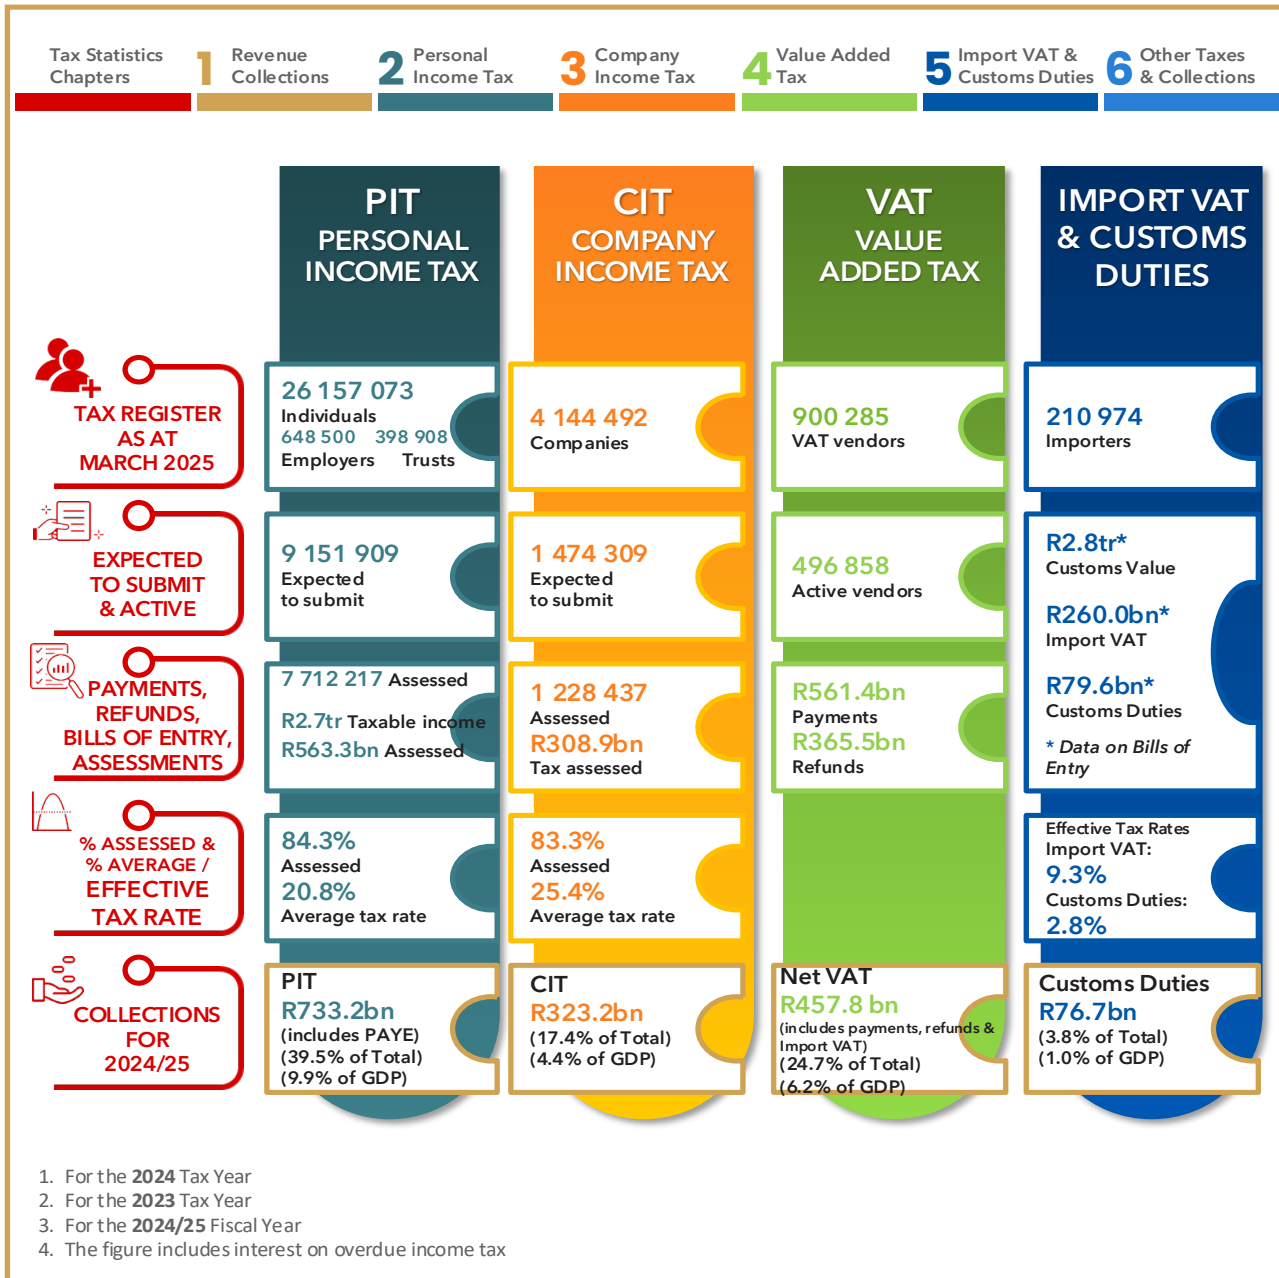

We welcome comments and suggestions to enhance the value of the publication for policy evaluation and that provide further insights into South Africa's social and economic contexts. Please email such comments and suggestions to taxstatistics@sars.gov.za.

2025 | TAX STATISTICS AT A GLANCE

REVENUE COLLECTIONS

For the 2024/25 fiscal year...

*Negative value indicates tax relief

1 REVENUE COLLECTIONS

KEY FACTS

In the 2024/25 fiscal year:

- Tax revenue collected amounted to R1 855.3 billion, an annual increase of R114.4 billion (6.6%).
- Personal Income Tax (PIT) remains the largest contributor to tax revenue with a contribution share of 39.5%.
- The tax-to-GDP ratio showed an increase from 22.3% in 2020/21 to 25.1% in 2024/25.
- The cost ratio of revenue collection decreased from 0.85% in 2020/21 to 0.72% in 2024/25.
- The number of individuals registered for Income Tax decreased to 26.2 million in 2024/25 from 27.1 million in 2023/24, representing a decline of 3.3%.
- On 31 March 2025, 867 337 (20.9%) of the 4.1 million registered companies were assessed for the 2024 tax year, and 496 858 (55.2%) of the 900 285 registered VAT vendors were active.

INTRODUCTION

The South African Revenue Service (SARS) is the official authority responsible for collecting taxes in the Republic of South Africa. Established under the provisions of the South African Revenue Service Act No. 34 of 1997 as an autonomous entity, SARS is mandated with the administration of the national tax system and the provision of customs services.

The SARS Act, 1997, requires SARS to:

- Collect all revenue due.
- Ensure optimal compliance with tax and customs legislation.
- Provide a customs service that optimises revenue collection, protects our borders, and facilitates legitimate trade.
- Advise the Minister of Finance and the Minister of Trade and Industry.

SARS is driven by the aspiration to contribute directly to the economic and social development of the country. By collecting revenue, SARS enables government to deliver on its constitutional obligations, policy, and service-delivery priorities in pursuing a better life for all in South Africa. By encouraging tax and customs compliance, SARS also aspires to help build fiscal citizenship practised by a law-abiding society.

It is the organisation's vision to build a smart, modern SARS with unquestionable integrity that is trusted and admired. The nine strategic objectives which underpin SARS's Vision 2024 and strategic intent are to:

1. Provide clarity and certainty for taxpayers and traders of their obligations.
2. Make it easy for taxpayers and traders to comply with their obligations.
3. Detect taxpayers and traders who do not comply and make non-compliance hard and costly.
4. Develop a high-performing, diverse, agile, engaged, and evolved workforce.
5. Increase and expand the use of data within a comprehensive knowledge-management framework to ensure integrity, drive insight and improve outcomes.
6. Modernise our systems to provide digital and streamlined online services.
7. Demonstrate effective resource stewardship to ensure efficiency and effectiveness in delivering high-quality outcomes and performance excellence.
8. Work with and through stakeholders to improve the tax ecosystem.
9. Build public trust and confidence in the tax-administration system.

SARS's values are:

- Uncompromising regard for taxpayer confidentiality.
- Unquestionable integrity, professionalism, and fairness.
- Exemplary public service.
- Incontestable insights from data and evidence.

For the financial year ending 31 March 2025, SARS realised net revenue collections amounting to R1 855.3 billion. This figure is derived from gross revenue collections of R2 302.6 billion, offset by refunds issued totalling R447.3 billion. This outcome signifies a year-on-year net revenue-collection growth of R114.4 billion, representing an increase of 6.6%. The primary sources of tax revenue were PIT, CIT, and VAT, which constituted the majority of total tax receipts. Specifically, PIT accounted for approximately 39.5% of total revenue, VAT contributed 24.7%, and CIT 17.4%.

The total tax revenue collected, expressed as a proportion of gross domestic product (GDP), is an indicator of the nation's overall tax burden. For the 2024/25 fiscal year, the tax-to-GDP ratio was recorded at 25.1%.

This chapter reviews:

- South Africa's tax system
- Tax register
- Tax policy
- Budget and consolidated revenue
- Main indicators of revenue performance
- Tax revenue by main category
- Cost of revenue collection

SOUTH AFRICA'S TAX SYSTEM

South Africa operates a residence-based tax system, whereby residents are liable for tax on their worldwide income — subject to specified exclusions — regardless of the jurisdiction in which such income is earned. In contrast, non-residents are subject to tax solely on income derived from sources within South Africa. Foreign taxes paid may be credited against the South African tax liability on foreign income. The principal source of state revenue is income tax, encompassing both personal and corporate tax; however, a substantial portion of national government tax revenue — approximately one-third — is generated from indirect taxes, notably VAT.

TAX REGISTER

SARS acknowledges that the provision of accessible, professional, and efficient services enables voluntary tax compliance. A service framework that facilitates compliance throughout the taxpayer and trader lifecycle — encompassing registration, filing, declaration, payment, and deregistration — ensures that statutory obligations can be met with relative ease, affordability, and convenience.

To achieve this objective, the SARS has implemented a policy of continuous improvement, systematically reviewing and refining its service offerings through structured consultations internally and with external stakeholders. The organisation places particular emphasis on offering equitable access to all service channels and achieving seamless integration across various service touchpoints. SARS has increasingly prioritised digital transformation, with a strong focus on expanding online self-service platforms. This strategic direction is intended to modernise operations, enhance efficiency, and reduce compliance costs for taxpayers.

Table 1.1 below illustrates the change in the SARS tax register over the period 31 March 2020 to 31 March 2025.

SARS has observed the following trends in the number of individuals, companies, trusts, employers, VAT vendors, and importers:

- The number of individuals registered for PIT decreased by 3.3% from 27.1 million in 2023/24 to 26.2 million in 2024/25. This reduction is primarily attributed to a register clean-up that removed active cases that had changed to estates.
- The number of companies registered for income tax has increased from 3.6 million in the 2023/24 fiscal year to 4.1 million in the 2024/25 fiscal year. The increase can be partly attributed to the Companies and Intellectual Property Commission (CIPC), which has significantly improved service delivery by digitising company registration processes. This simplification reduces the administrative burden on businesses and creates a more accessible and efficient business environment. The integration of CIPC systems with SARS's systems also ensures that companies are adequately registered for tax with SARS.
- The number of registered trusts increased by 2.5% from 389 302 in 2023/24 to 398 908 in 2024/25.
- The number of employers registered for PAYE grew by 0.7% to 648 500 in 2024/25.

- The number of vendors registered for VAT decreased by 6.1% to 900 285 in 2024/25 as a result of a systematic VAT register clean-up project during March 2025.
- The number of registered importers and exporters decreased to 210 974 and 185 145, respectively, for the year under review. This significant shift in numbers is attributed to the suspension of customs traders on the registration system that occurred during 2023/24. These suspensions were updated to the single registration data during 2024/25.

Table 1.1: Tax register, 31 March 2021–31 March 2025

Number as at	Individuals ^{1,2}	Companies (CIT) ^{1,3}	Trusts ¹	Employers ¹ (PAYE)	VAT Vendors ¹	Importers	Exporters

**These figures may differ from Table 1.1 due to timing differences in extraction dates*

As of 31 March 2024, the number of individuals on the active register was 27 051 072, which declined to 26 155 263 by 31 March 2025. During the 2023/24 financial year, 1 090 058 new taxpayers were registered, while 27 040 were deregistered. These newly registered taxpayers contributed a net revenue inflow of R605.6 million, with refunds amounting to R33.0 million paid out. In the 2024/25 financial year, 1 083 635 new taxpayers were registered, and 40 970 deregistrations were recorded. The newly registered taxpayers contributed a net revenue inflow of R657.6 million, against which R41.7 million in refunds were paid.

By 31 March 2024, 643 948 employers were on the active register. In the 2023/24 financial year, 39 941 new employers were registered and 13 864 deregistered. These new employers contributed a net revenue inflow of R2.6 billion. In 2024/25, 36 805 new employers were registered, contributing a higher net revenue inflow of R2.9 billion.

Corporate Income Tax (CIT) registrations increased modestly, with 411 437 new registrations in 2023/24 and 550 835 in 2024/25. These new registrations supported SARS's CIT collections by contributing R214.0 billion toward net revenue in 2023/24 and R621.9 billion in 2024/25.

Value-Added Tax (VAT) registrations also showed a marginal increase, with 57 725 new registrations in 2023/24 and 39 352 in 2024/25. These registrations contributed R2.4 billion to net VAT revenue in 2023/24, and R2.9 billion in 2024/25.

TAX POLICY

Since 2020, the government has maintained stable tax rates despite a succession of economic disruptions, including the COVID-19 pandemic, civil unrest, rising inflation, increases in fuel prices, and ongoing electricity-supply challenges. Temporary tax-relief measures were introduced to support individuals and businesses during this period of heightened uncertainty. Nevertheless, economic conditions have remained subdued and the deceleration in commodity prices has suppressed revenue growth, intensifying fiscal pressures.

The government's long-term strategy centres on broadening the tax base, enhancing compliance, and improving administrative efficiency to secure sustainable revenue without resorting to frequent increases in tax rates. Nevertheless, it remains imperative to balance revenue generation with expenditure reductions to mitigate the risk of unsustainable debt accumulation. Postponing necessary tax adjustments at present could result in the need for more substantial increases in the future. Personal income tax, recognised for its stability and resilience, continues to be a principal area of focus to build a reliable revenue stream. In the 2024 Budget, tax increases totalling R15 billion — derived primarily from direct taxes — were introduced for the 2024/25 fiscal year to alleviate fiscal pressure and accelerate debt stabilisation.

Main tax proposals announced for 2024/25:

- PIT was increased by not adjusting the tax brackets for inflation. Primary, secondary, and tertiary rebates also remained unchanged, meaning the tax-free ceiling remained at R95 750. This was estimated to raise an additional R16.3 billion. This move allowed government to raise additional revenue without changing the tax rates. Furthermore, monthly medical tax credits were not adjusted for inflation, which was projected to raise an additional R1.9 billion. In total, PIT adjustments were estimated to bring an additional R18.2 billion in revenue.
- General Fuel Levy has remained unchanged since 2022 as a measure to mitigate the effect of higher inflation and rising fuel prices on consumers. In the 2024 Budget, fuel levies were once again not increased and resulted in R4 billion forgone revenue.
- Specific excise duties on alcohol were increased by above-inflation rates of between 6.7% and 7.2% and increased on certain categories of tobacco products between 4.7% and 8.2%, estimated to raise R0.8 billion in additional revenue.

Table 1.2 shows the effect of tax proposals over this period, with negative values indicating tax relief.

Table 1.2: Summary: Effects of Tax Proposals, 2020/21–2024/25

Rmillion	Direct taxes				Indirect taxes				Other	Net effect of Tax
	PIT	CIT	Other	Total	Excise	Fuel levy	Other	Total		
2020/21	-2 000	–	–	-2 000	–	–	2 000	2 000	–	–
2021/22	-2 200	–	–	-2 200	1 800	–	400	2 200	–	–
2022/23	-2 200	–	–	-2 200	500	-3 500	–	-3 000	–	-5 200
2023/24	-4 000	-5 000	–	-9 000	–	-4 000	–	-4 000	–	-13 000
2024/25	18 200	–	–	18 200	800	-4 000	–	-3 200	–	15 000
Total	7 800	-5 000	–	2 800	3 100	-11 500	2 400	-6 000	–	-3 200

Two long-term reforms were implemented in 2024/25: the two-pot retirement system and the global minimum corporate-tax rate for large multinational groups of companies. An estimated R5 billion was expected to be raised in 2024/25 because of tax collected as retirement-fund members access once-off withdrawals via the two-pot retirement reform.

More details on the Budget tax proposals for each fiscal year can be found in the Budget Review documents available on National Treasury's website:

<http://www.treasury.gov.za/documents/national%20budget/default.aspx>.

Tax Rates

The maximum marginal tax rates across the main tax types are shown in *Table 1.3* below. During the past six-year period, maximum marginal tax rates remained unchanged across most tax types. The exception was the standard VAT-rate increase from 14% to 15%, effective 1 April 2018. From 31 March 2023, the CIT tax-rate decreased from 28% to 27%.

Table 1.3: Maximum Marginal Tax Rates, 2020/21–2024/25

Percentage	PIT ¹	CIT ²	DT	VAT	Transfer duty
01 Apr 2020 – 31 Mar 2021	45.0%	28.0%	20.0%	15.0%	13.0%
01 Apr 2021 – 31 Mar 2022	45.0%	28.0%	20.0%	15.0%	13.0%
01 Apr 2022 – 30 Mar 2023	45.0%	28.0%	20.0%	15.0%	13.0%
31 Mar 2023 – 31 Mar 2023	45.0%	27.0%	20.0%	15.0%	13.0%
01 Apr 2023 – 31 Mar 2024	45.0%	27.0%	20.0%	15.0%	13.0%
01 Apr 2024 – 31 Mar 2025	45.0%	27.0%	20.0%	15.0%	13.0%

1. An individual's tax year starts on 01 March and ends at the end of February the following year.

2. CIT rate decreased from 28% to 27% as from 31 March 2023.

BUDGET AND CONSOLIDATED REVENUE

Main budget revenue includes all revenue streams into the fiscus — both tax revenue and non-tax revenue — excluding payments made to Botswana, Eswatini, Lesotho, and Namibia (“BELN” countries) in terms of the Southern African Customs Union (SACU) agreement. SACU disbursements are determined according to a revenue-sharing formula described in Chapter 6.

Consolidated revenue also includes revenue collected by the provinces, selected public entities, and social-security contributions as illustrated in Figure 1.3.

Figure 1.3: Illustration of Budget Revenue and Consolidated Revenue

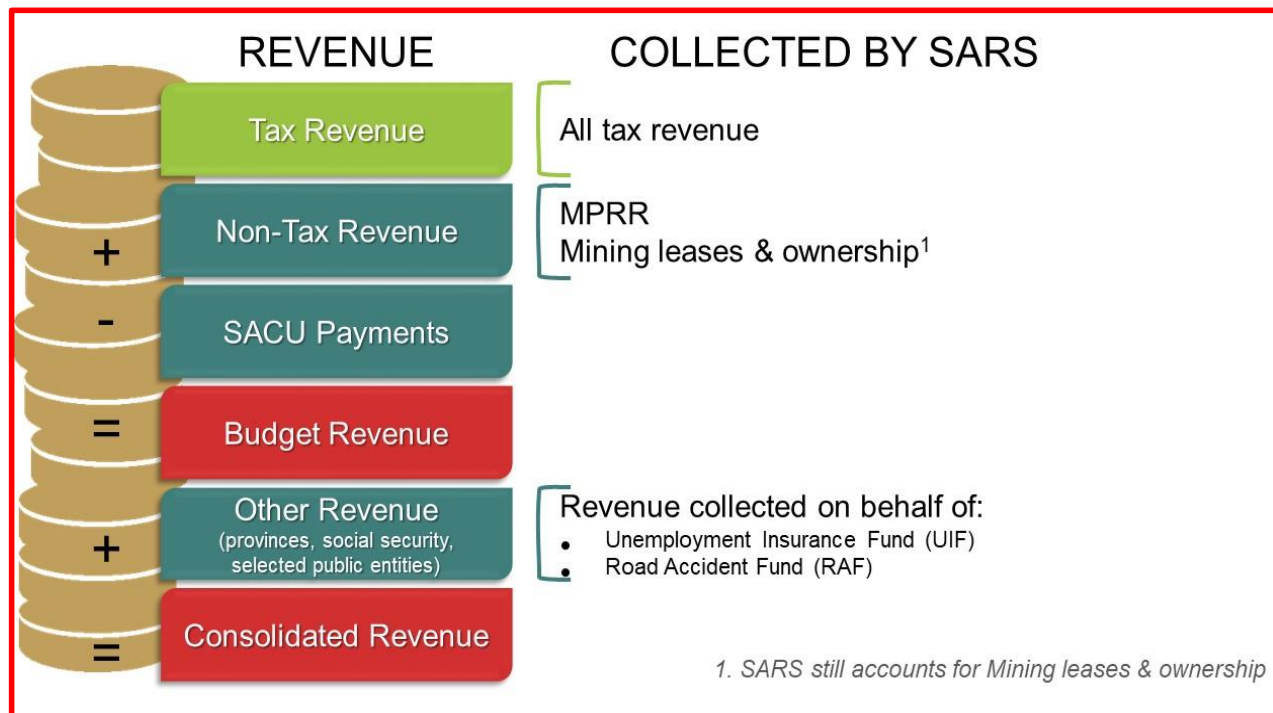

Table 1.4 shows the total budget revenue and consolidated revenue over the past five fiscal years.

Table 1.4: Total Budget Revenue and Consolidated Revenue, 2020/21–2024/25

R million	Tax revenue	% of budget revenue	% of consolidated revenue	Non-tax revenue ¹	Total tax and non-tax revenue	Less: SACU payments	Budget revenue	Other ²	Consolidated revenue	Y/Y growth
2020/21	1 249 711	100.9%	88.6%	52 053	1 301 765	-63 395	1 238 369	171 548	1 409 918	-7.8%
2021/22	1 563 754	100.0%	89.3%	46 485	1 610 239	-45 966	1 564 273	187 385	1 751 657	25.1%
2022/23	1 686 697	99.3%	88.9%	56 205	1 742 902	-43 683	1 699 219	197 189	1 896 407	7.9%
2023/24	1 740 870	101.1%	89.4%	61 423	1 802 293	-79 811	1 722 482	223 974	1 946 456	3.2%
2024/25	1 855 270	102.5%	90.9%	44 394	1 899 664	-89 874	1 809 790	231 671	2 041 461	6.6%

1. Includes interest, dividends, rent on land, sales of goods and services, fines and penalties, sales of capital assets, financial transactions in assets and liabilities, MPRR as well as extraordinary receipts.

2. Includes provinces, social security and selected public entities.

In addition to tax revenue, SARS collects Mineral and Petroleum Resources Royalties and Mining Leases and Ownership, which are included in non-tax revenue. SARS also collects revenue on behalf of the Road Accident Fund and the Unemployment Insurance Fund.

MAIN INDICATORS OF REVENUE PERFORMANCE

The **compound annual growth rate (CAGR)** calculates the annualised rate of growth over a specific time period. Total tax revenue collected by SARS grew at a CAGR of 10.4% from R1 249.7 billion in 2020/21 to R1 855.3 billion in 2024/25, significantly higher than the 2.2% CAGR recorded during the previous period of 2016/17 to 2020/21. This elevated growth rate can be attributed largely to the low-base effect caused by the sharp decline in collections during the 2020/21 fiscal year, which was heavily impacted by the COVID-19 pandemic.

Table 1.5: Nominal Tax Collections, 2008/09–2024/25

Rmillion	Individuals ²	CAGR ¹	Companies ²	CAGR ¹	Value - added Tax	CAGR ¹	Tax Revenue	CAGR ¹
2008/09	195 146		165 539		154 343		625 100	
2012/13	275 822	9.0%	159 259	-1.0%	215 023	8.6%	813 826	6.8%
2016/17	424 545	11.4%	204 432	6.4%	289 167	7.7%	1 144 081	8.9%
2020/21	487 011	3.5%	202 123	-0.3%	331 197	3.5%	1 249 711	2.2%
2024/25	729 911	10.6%	318 739	12.1%	457 789	8.4%	1 855 270	10.4%

1. Compounded annual growth rate (percentage)
2. Excludes interest on overdue income tax as in Table A1.4.1.

The **tax-to-GDP** ratio measures the overall tax burden for a given period. The share of a country’s output that is collected by the government through taxes — the tax-to-GDP ratio — is an important indicator to measure the tax effort of government. The International Monetary Fund (IMF), World Bank, Organisation for Economic Co-operation and Development, and African Tax Administration Forum use this ratio to analyse and compare the tax systems and economic performance of countries. South Africa’s tax-to-GDP ratio for the 2024/25 fiscal year rose to 25.1%, up from 24.5% in 2023/24, reflecting a stronger pace of tax revenue growth relative to economic activity. The higher ratio also reflects improved administrative efforts in collecting tax revenue, despite subdued economic growth. These efforts, particularly through compliance-revenue initiatives, played a significant role in boosting tax collections.

Figure 1.4: Tax Revenue Collections, GDP and CAGR, 2020/21–2024/25

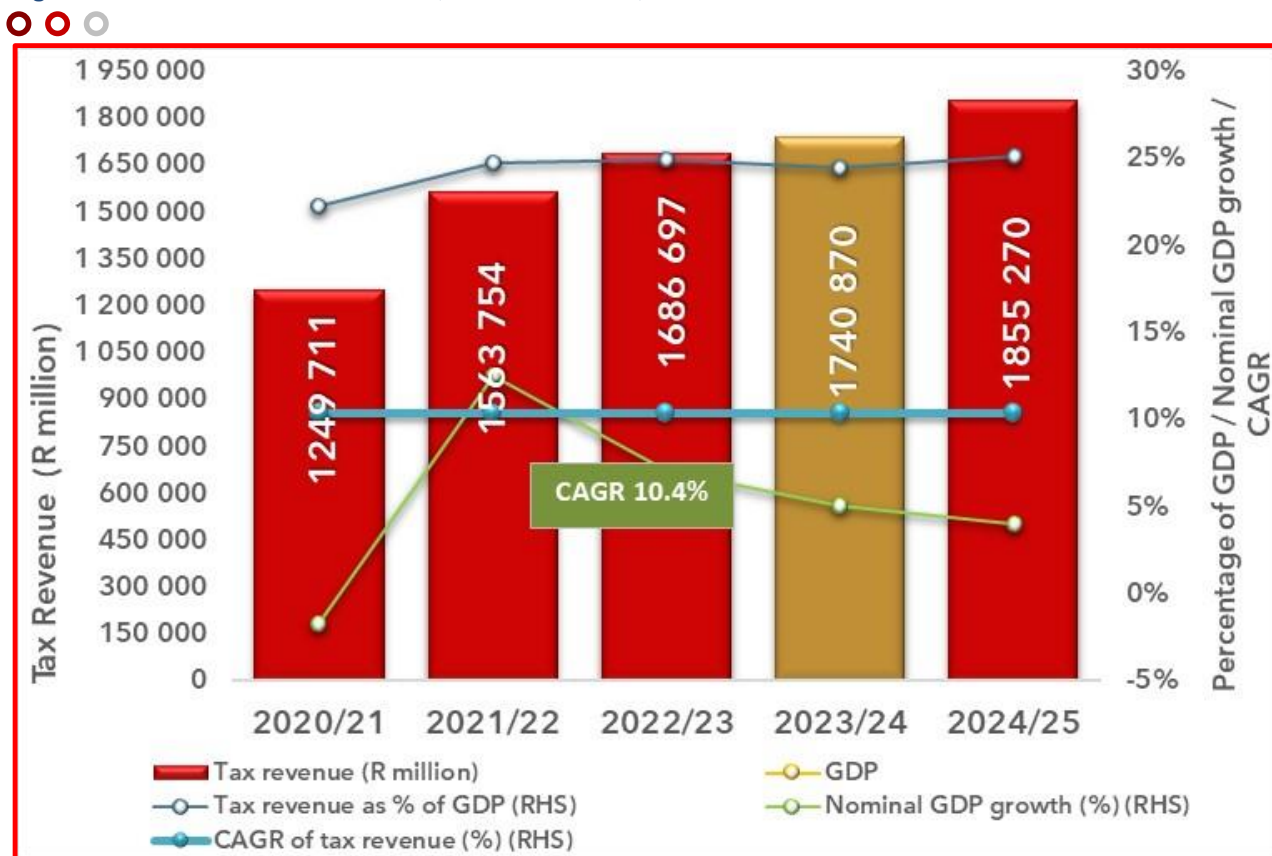

Table 1.6: Tax Revenue as a Percentage of GDP, 1994/95–2024/245

1. Source: Statistics South Africa; Gross Domestic Product (GDP), Quarter 3-2025. Statistical release contains revised estimates for Gross Domestic Product (GDP) for select historical periods. Released 02 December 2025

Tax buoyancy measures the responsiveness of tax revenue to changes in economic growth over a given period. As a key indicator of tax-revenue performance, it measures the sensitivity of tax revenue to changes in economic growth. Buoyancy of tax revenue reflects the effect of both automatic stabilisers and discretionary fiscal-policy changes. A buoyancy ratio greater than one over the long-term signals that tax revenue is growing faster than the economy, supporting the sustainability of fiscal policy. In contrast, short-term buoyancy ratios tend to fluctuate more due to the stage of the business cycle, tax-policy changes, and efficiency of tax administration.

Since 1994/95, the long-term average buoyancy ratio of total tax revenue to GDP is 1.2, indicating that South Africa's tax system has generally been responsive to changes in economic activity over the years. In 2024/25, the buoyancy ratio rose to 1.6, a sharp increase from 0.6 in the previous year and

well above the long-term average. The higher buoyancy ratio indicates that tax revenue grew significantly faster than the economy, driven primarily by strong performance in PIT, particularly pay-as-you-earn (PAYE), as well as additional gains from two-pot retirement fund system withdrawals.

Figure 1.5: Revenue Buoyancy, 1994/95–2024/25

Main sources of Tax Revenue and Tax-to-GDP ratio

In the 2024/25 fiscal year, PIT, CIT, and VAT together accounted for 81.6% of total tax revenue, underscoring their central role in South Africa’s revenue system. The Fuel Levy, in combination with specific excise and customs duties, contributed a further 11.3%, while the remaining 7.1% was derived from other taxes.

Over the period 2020/21 to 2022/23, the share of PIT in total revenue declined from 39.1% to 35.7%. However, in the year under review, PIT rebounded to 39.5%, reaffirming its position as the single largest source of tax revenue. By contrast, CIT’s contribution rose over the period 2020/21 to 2022/23 but subsequently moderated, declining to 17.4% in 2024/25. The contribution of VAT has followed a gradual downward trajectory, decreasing from 26.5% in 2020/21 to 24.7% in 2024/25. (See Figure 1.6 and Table A1.2.1).

Figure 1.6: Relative Composition of Main Sources of Tax Revenue, 2020/21–2024/25

CIT collections for the 2024/25 financial year increased slightly from those achieved in 2023/24 by R6.4 billion (2.0%). The year-on-year growth was caused by a surge in CIT Provisional Tax payments for the *Financial Intermediation, Insurance, Real-estate, and Business Services; Electricity; and Wholesale and Retail Trade* sectors, which recorded the largest year-on-year gains of R13.5 billion (11.3%), R5.7 billion (91.2%), and R2.1 billion (4.8%) versus the 2023/24 financial year.

The *Financial Intermediation, Insurance, Real-estate, and Business services* sector's performance was boosted by the financial-services companies within both the large business and international, and small, medium, and micro-enterprise segments, with profitability buoyed by the Gross Operating Surplus, which recorded consecutive year-on-year growth of 0.6% in Q1-2025 following another year-on-year growth of 5.0% in Q4-2024. Furthermore, interest rates started to decline from September 2024, which also contributed positively to the finance sector's performance. An interest-rate reduction to 11.00% in January 2025 provided much-needed relief to companies and consumers, following stability in the inflation rate, which has remained on average at 4.4% for the whole 2024 calendar year. The inflation rate subsequently declined to 2.7% in March 2025, remaining below the South African Reserve Bank's (SARB) 3% to 6% target range at the time (the range has been revised to 2–4%).

The positive performance in the *Electricity* sector was due mainly to the payments from a new generation company paying provisional taxes for the first time and a positive performance from the renewable-energy companies. An increase in alternative energy production (generation) companies,

following the high frequency of load-shedding of previous years, also contributed to the growth. These companies continue to capitalise on power cuts which affect household and business activities.

Growth in the *Wholesale and retail trade* sector was despite retail trade sales, which recorded a year-on-year contraction of 2.1% in March 2025, following a revised contraction of 7.5% in February 2025. The growth comes after months of no loadshedding since April 2024, as well as the continuous decline in both interest and inflation rates.

Despite volatility in commodity prices — mainly driven by fluctuations in global demand and geopolitical conflicts affecting major consuming countries such as China and the United States — the 2024/25 financial year has seen numerous economic developments, such as improved electricity supply since April 2024 and more effective logistics networks, which provided much-needed relief to producers. However, this growth was partially offset by the negative performance of the *Mining and Quarrying* sector, which contracted year-on-year by R12.5 billion (28.7%).

The *Mining and Quarrying* sector's negative trajectory started in the 2023/24 fiscal year and continued in the 2024/25 fiscal year. Contraction in this sector owes to softening commodity prices for palladium, iron ore, and coal; volatility in the value of mineral sales, which has continued in the first half of the 2025 calendar year from the 2024 calendar year; and mining input costs rising year-on-year by 3.4% in March 2025. The *Mining and Quarrying* sector continued to suffer from a sharp decline as platinum demand from China decreased because of shifts in motor-vehicle production from internal-combustion engines to electric variants. The changing demand patterns in global automobile markets are making it harder to trade platinum-group metals (PGMs) such as Platinum, Palladium, and Rhodium.

Figure 1.7: Main Revenue Sources as a Percentage of GDP, 1994/95–2024/25

TAX REVENUE BY MAIN CATEGORY

South Africa adopts the Government Finance Statistics (GFS) framework for the classification of revenue, as prescribed by the IMF.

- According to the GFS classification, tax revenue is categorised into six broad components: taxes on income and profits; taxes on payroll and workforce; taxes on property; domestic taxes on goods and services; taxes on international trade and transactions; and revenue allocated to the state miscellaneous category.

Table A1.3.1 presents the main categories of tax revenue. A more detailed breakdown of taxes on income and profits is provided in Table A1.4.1, whereas Tables A1.4.2 and A1.4.3 distinguish between taxes on individuals and taxes on companies. Comprehensive discussions of PIT and CIT are set out in Chapters 2 and 3, respectively.

- *Taxes on income and profits* represent the largest source of tax revenue, accounting for 59.3% of total collections in 2023/24. This category encompasses taxes on individuals and companies, including capital gains tax and withholding tax on royalties, as well as interest on overdue income tax, dividends tax, and withholding tax on interest. Figure 1.8 illustrates the main components of this category.

Figure 1.8: Taxes on Income and Profits, 2020/21–2024/25

- Taxes on payroll and workforce* comprise the Skills Development Levy (SDL). SDL is a compulsory levy imposed to encourage learning and development in South Africa and is determined by an employer’s salary bill. The funds are to be used to develop and improve skills of employees. SARS administers the collection of this levy in conjunction with the Department of Employment and Labour.
- Taxes on property*, as shown in *Table A1.5.1*, comprise donations tax, estate duty, securities transfer tax (STT), and transfer duties.

 - Donations tax* is levied on the value of a donation. A donation is any complimentary disposal of property, including any free waiver or giving up of a right. Until February 2018 it was levied at a flat rate of 20%. From 1 March 2018, donations tax is levied at a rate of 20% on the aggregated value of property donated not exceeding R30 million, and at a rate of 25% on the value exceeding R30 million. Donations tax applies to any person (for example: individual, company, or a trust) that is a **resident**. Hence, non-residents are not liable for donations tax.
 - Estate duty* is levied on the worldwide property and deemed property of a natural person who is ordinarily resident in South Africa, and on the South African property of non-residents. Various deductions under section 4 of the Estate Duty Act, 1955, are allowed to determine the net value of the estate. An abatement of R3.5 million is allowed against the net value of the estate to determine the dutiable value of the estate. Estate duty is levied on the dutiable value of an estate at a rate of 20% on the first R30 million and at a rate of 25% on the dutiable value of the estate above R30 million.

- *STT* is levied on every transfer of a security and was applied from 1 July 2008 under the Securities Transfer Tax Act, No. 25 of 2007, together with the Securities Transfer Tax Administration Act, No. 26 of 2007. STT is levied:
 - on every transfer of any security issued by:
 - a company or close corporation incorporated, established, or formed inside South Africa; or
 - a company incorporated, established, or formed outside South Africa and listed on a South African exchange.
 - on any reallocation of securities from a member's bank-restricted stock account or a member's unrestricted and security-restricted stock account, to a member's general restricted stock account.
 - at the rate of 0.25%.
- *Transfer duty* is the largest source of revenue in this category. It is levied on the acquisition of property as defined, at a progressive rate for all persons including companies, close corporations, and trusts. As of 1 March 2023, a marginal rate of 13% applies to the portion of the value of property exceeding R12.1 million.
- *Domestic taxes on goods and services* comprise VAT; specific excise duties; ad valorem excise duties; Universal Services Fund Levy; Turnover Tax on micro businesses; Fuel Levy; and environmental taxes. *Table A1.6.1* summarises the collections of domestic taxes on goods and services.
 - *VAT* is the largest source of revenue in this category, with a share of 72.9% in 2024/25 (*Figure 1.9*). VAT is levied at a flat rate on goods and services, with certain exemptions and zero-ratings, and is also levied on the importation of goods and services into South Africa. The VAT rate on the supply of goods and services was increased with effect from 1 April 2018 from 14% to 15%.

Figure 1.9: Value-Added Tax (VAT), 2020/21–2024/25

Table A1.6.2, at the end of this chapter, breaks down VAT collection by domestic VAT payments, import VAT, and VAT refunds. Chapters 4 and 5 provide further detail.

- *The carbon fuel levy (carbon tax on fuel)* applies from 5 June 2019. It is levied on imported and domestically produced fuel. From 5 April 2023, the carbon fuel levy for 2023/24 increased by 1c to 10c/l for petrol and 11c/l for diesel. Effective on 3 April 2024, the carbon fuel levy increased to 11c/litre for petrol and 14c/litre for diesel. The 2019 Budget indicated that diesel refunds cannot be claimed against this tax. See Table A1.7.2 for the contribution of the carbon fuel levy to the total fuel levy.
- *Environmental taxes*, as shown in Table 1.7, comprise Air Passenger Tax, the Tyre Levy, Plastic Bag Levy, Electricity Levy, Incandescent Lightbulb Levy, and CO₂ tax on motor-vehicle emissions. The South African government has responded to the serious global challenge of climate change by introducing several environmental taxes which aim to modify the behaviour of the country's inhabitants to aid sustainable development.
 - *Air Passenger Tax* is imposed on international air travel. It was introduced in November 2000 at a rate of R50 per passenger for passengers flying to BELN countries, and R100 per passenger flying to other international destinations. The latest increase became effective on 1 October 2011. Since then, passengers departing on flights to BELN countries are paying a departure tax of R100 per passenger, whereas passengers on other international flights are paying R190 per passenger.
 - *The Tyre Levy* was implemented on 1 October 2016 at a rate of R2.30/kg to curb disposed tyres littering the environment. New pneumatic tyres are subject to the payment of the

- Tyre Levy (an environmental levy) if used in South Africa, which is payable by manufacturers in South Africa. The levy is calculated on the net mass of the tyre.
- *The Plastic Bag Levy* was introduced in June 2004, at a rate of 3c per bag on some types of plastic shopping bags, to reduce litter and encourage plastic bag reuse. The levy was increased to 28c/bag on 6 April 2022. The most recent increase on 1 April 2024 took the Plastic Bag Levy to 32c/bag.
 - *The Electricity Levy* was introduced in July 2009 at a rate of 2c per kWh. It applies to electricity generated from non-renewable sources. The most recent increase in the rate of the levy was on 1 July 2012, when it was increased to 3.5c/kWh.
 - *The Incandescent Lightbulb Levy* was introduced on 1 November 2009 at a rate of R3 per bulb, to promote energy efficiency and reduce electricity demand by encouraging the use of energy-saving lightbulbs. Energy-saving lightbulbs last longer and require less electricity. The use of these lightbulbs helps reduce greenhouse-gas emissions. The levy increased to R15/bulb on 6 April 2022. Since 1 April 2024, the Incandescent Lightbulb Levy stood at R20/bulb. This complements the phase-out of inefficient lightbulbs and promotes compliance with the new energy-efficiency standards published in May 2023 by the Department of Trade, Industry, and Competition.
 - *CO₂ tax on motor-vehicle emissions* was introduced in September 2010 for passenger vehicles and in March 2011 for double-cab vehicles. This tax seeks to encourage owners of motor vehicles in South Africa to become more energy efficient and environmentally friendly. Effective 6 April 2022, the tax on emissions increased by R12 from R120 to R132 per g/km CO₂ for new passenger vehicles with emissions exceeding 95 g/km. For new double-cab vehicles with emissions exceeding 175g/km, the tax increased by R16 from R160 to R176 g/km CO₂. On 1 April 2024, the government increased the passenger motor-vehicle emissions tax rate from R132 to R146 per g/CO₂ for emissions exceeding 95 g/km, and from R176 to R195 per g/CO₂ for emissions exceeding 175 g/km.
 - *Carbon Tax* is a tax in response to climate change and aims to reduce greenhouse-gas emissions. Carbon Tax gives effect to the polluter-pays principle and prompts firms and consumers to account for the harm of climate change in their future production, consumption, and investment decisions. The Carbon Tax Act of 2019 came into effect on 1 June 2019 and is administered by SARS. Carbon Tax is assessed, collected, and enforced as an environmental levy in terms of the Customs and Excise Act, 1964, read with the relevant provisions of the Carbon Tax Act, 2019. The first phase has a Carbon Tax rate of R120 per tonne of CO₂-equivalent emissions. This rate increased annually by inflation plus 2% until 2022, and annually by inflation thereafter. Significant industry-specific tax-free emission allowances ranging from 60% to 95% result in a modest net carbon-tax rate ranging from R6 to R48 per tonne of CO₂-equivalent emissions. These allowances provide current emitters time to transition to cleaner, more efficient technology.
 - The carbon tax increased from R159 to R190 per tonne of CO₂ equivalent from 1 January 2024. Effective 1 January 2024, the carbon tax cost-recovery amount for the liquid-fuels sector increased from 0.66c/litre to 0.69c/litre.

Table 1.7 shows the environmental-taxes collections for the past five years.

1. The Carbon Tax was introduced with effect from 1 June 2019

- The Health Promotion Levy* was implemented on 1 April 2018. It is a levy imposed on sugary beverages to support the Department of Health’s objective to decrease the incidence of diabetes, obesity, and other lifestyle-related diseases in South Africa. *Table 1.8* shows levy collections. The Health Promotion Levy applies to beverages with more than 4 g of sugar per 100 ml. The rate is fixed at 2.1c per gram of the sugar content that exceeds 4 g per 100 ml. The first 4 g per 100 ml are levy free. Sugar content means both the intrinsic and added sugar and other sweetening matter. The levy is payable on sugary beverages manufactured in, or imported into, South Africa and is payable by the manufacturers of such beverages in South Africa. The Health Promotion Levy is a domestic consumption tax and is therefore not payable on sugary beverages that are exported or processed in the manufacture of other dutiable goods. Under this levy:

 - Identified imported products are taxed when they are cleared for home consumption.
 - Locally manufactured products are taxed at source.

Table 1.8: Health Promotion Levy, 2020/21–2024/25

1. Levy on locally manufactured products

- *Taxes on international trade and transactions* comprise import-related taxes and export duties. Import duties are duties imposed on goods imported into South Africa and are intended to protect local producers. This category also includes miscellaneous customs and excise receipts that have not yet been allocated to the appropriate import-tax types, as well as revenue from smaller subcategories. Also included in this category is the Diamond Export Levy that is imposed to stimulate the local diamond-polishing industry. Further details are contained in Chapter 5. *Table A1.7.1* summarises taxes on international trade and transactions.
- *State miscellaneous revenue* comprises revenue received by SARS that cannot be allocated to specific revenue types.

COST OF REVENUE COLLECTION

SARS is progressing the development of an advanced digital-administration platform, founded upon data science, artificial intelligence, and associated enabling technologies. This strategic undertaking is designed to strengthen institutional trust, promote operational efficiency, and improve transparency throughout the tax-administration system.

An established measure of administrative efficiency is the degree to which a revenue authority can control or reduce its operational expenditure, while sustaining or enhancing the quality of services provided to taxpayers. This efficiency is typically evaluated using the cost-to-revenue ratio, which is determined by dividing the authority's internal operating expenditure by the total tax revenue collected within a given fiscal year.

For purposes of comparability, this ratio excludes non-tax revenue and social-security contributions administered by SARS, Mineral and Petroleum Resources Royalties, Unemployment Insurance Fund contributions, and Road Accident Fund levies. Were such amounts to be included, the reported cost-to-revenue ratio would be correspondingly lower.

SARS continues to perform favourably against the international benchmark of 1.0% for developing economies. Over the past five fiscal years, the cost-to-tax-revenue ratio has ranged from 0.85% in 2020/21 to 0.72% in 2024/25. A persistent downward trajectory in this ratio may be interpreted as evidence of either improved cost efficiency (through the containment of operational expenditure), or enhanced effectiveness, through improved levels of taxpayer compliance.

This sustained performance underscores SARS's ability to maintain fiscal discipline by containing administrative expenditure, even as revenue collections have expanded. The observed cost containment has further been reinforced by successive reductions in grant allocations, which have necessitated continued improvements in operational efficiency.

Table 1.9: Cost of Revenue Collection, 2020/21–2024/25

R million	Tax revenue collected	Operating costs ¹	Cost of collection ²
2020/21	1 249 711	10 666	0.85%
2021/22	1 563 754	11 521	0.74%
2022/23	1 686 697	11 990	0.71%
2023/24	1 740 870	12 400	0.71%
2024/25	1 855 270	13 360	0.72%

1. Operating costs as disclosed in the Statement of Financial Performance for the controlling entity in the SARS: Own Accounts Annual Financial Statements.

2. Operating costs as a percentage of tax revenue.

DISTRIBUTION BY PAYMENT CHANNELS AND MONTHLY TAX REVENUE

Payment Channels for SARS Revenue Collections

SARS acknowledges that the provision of accessible, professional, and efficient services is central to fostering voluntary compliance. Accordingly, its service-delivery framework is structured to support taxpayers and traders across the full compliance lifecycle, enabling them to discharge their obligations easily and inexpensively.

In pursuit of this objective, SARS is committed to offering equitable access to its service channels and to delivering a seamless experience across all points of engagement, including registration, filing, declaration, payment, and deregistration. Increasingly, this is facilitated through the expansion of online self-service channels. During the period under review, SARS introduced additional platforms, notably the Self-Service Terminals, which were deployed to accelerate the migration of taxpayers onto digital platforms.

In addition to branch-based payments, taxpayers can use the following payment channels:

- **eFiling:** taxpayers registered as eFiling clients can effect electronic payments directly through the platform.
- **Bank payments:** taxpayers can pay either via internet banking transfers or through over-the-counter deposits at participating banks.

The eFiling channel remained the predominant mode of payment, accounting for most receipts processed by SARS. In the 2024/25 financial year, eFiling contributed 81.0% of the total value of taxpayer payments. The composition of the principal payment channels is reflected in *Figures 1.10* and *1.11*.

Figure 1.10: Composition of Main Channels of Payment (by Value), 2020/21–2024/25

Figure 1.11: Composition of Main Channels of Payment (by Number), 2020/21–2024/25

SARS observed growth in the use of electronic payment channels and a decline in payments made at branch offices. *Figure 1.11* and *Table A1.1.1* show the net monthly and quarterly trends in the collection of tax revenues. The peaks in June, August, September, December, February, and March are due mainly to provisional PIT payments from companies and individuals with year-ends that coincide with these months.

Municipalities
Statistics available on assessed tax for individual taxpayers for 213 local and metropolitan municipalities, using demarcation borders as available in June 2017.

2 PERSONAL INCOME TAX

KEY FACTS

- The Budget presented in February 2023 included:
 - Increases of 15.2% in the primary and in the secondary rebate each and an increase of 14.9% in the tertiary rebate to R17 235, R9 444, and R3 145 respectively from the 2021 to the 2024 tax years. This increased the minimum tax thresholds for taxpayers younger than the age of 65 years to R95 750, for those 65 to 74 years to R148 217, and 75 years and older to R165 689.
- SARS received more than 19.6 million employees' tax certificates (IRP5s and IT3[a]s) for the 2024 tax year that could be linked to nearly 13.8 million individuals.
- Of the 9 151 909 taxpayers expected to submit returns for the 2024 tax year, 7 712 217 (84.3%) taxpayers have been assessed (based on data available at 26 August 2025).
- A demographic and geographic analysis of the assessments when the data was extracted for release of this publication indicates that:
 - 2 929 742 (38.0%) of assessed taxpayers were registered in Gauteng.
 - 970 892 (36.0%) of assessed taxpayers in Gauteng lived in the Johannesburg Metro and were taxed on an average taxable income of R480 318.
 - 2 061 259 (26.7%) of assessed taxpayers were between 35 to 44 years old.
 - 4 064 846 (52.7%) of assessed taxpayers were male; 3 612 042 (46.8%) were female.
 - 35 329 (0.5%) taxpayers could not be identified in terms of gender.
- Assessed taxpayers reported aggregated taxable income of R2.7 trillion and tax liability of R563.3 billion. The average tax rate was 20.8% compared to 21.1% in the previous tax year.
- Income from salaries, wages, pension, overtime and annuities accounted for 75.1% of total taxable income.
- Vesting of equity instruments of R30.8 billion at 18.7% of total allowances was the largest share of the allowances assessed.
- Pension, provident and retirement annuity fund contributions paid on behalf of employees amounted to R158.3 billion, and made up the largest share of fringe benefits received by individuals. These benefits represented 58.0% of the total fringe benefits assessed.
- Contributions to retirement funding (pension, provident, and retirement annuity funds) were the largest share of deductions at R278.7 billion (83.7%) of total deductions assessed.
- By 31 March 2024, the Personal Income Tax register had grown on an annual basis by 4.3% to 27.1 million individuals.

INTRODUCTION

Personal Income Tax (PIT) is South Africa's largest source of tax revenue and contributed 37.4% of the total tax revenue collections in 2023/24, reflecting an increase of 1.7% compared to the contribution share of 35.7% in 2022/23 (*Table A1.2.1 in Chapter 1 of this publication*).

PIT is a tax levied on the taxable income (gross income less exemptions and allowable deductions) of individuals and trusts. It is determined for a specific year of assessment. Taxable capital gains form part of the taxable income for PIT.

PIT collections comprise three taxable tax payment streams:

- Employees' tax (PAYE) collected by employers and paid to SARS monthly.
- Provisional tax (payable every six months by any person who derives income other than remuneration, an allowance, or advance).
- Assessed tax, which is paid on the annual final assessment of tax payable.

Most individuals receive their income as salaries or wages, pension, annuity payments and investment income (interest, taxable dividends, or capital gains). Income from salaries, wages and other remuneration accounted for 75.1% of total taxable income for the 2024 tax year. Individuals who received business income are registered as provisional taxpayers.

This chapter reviews:

- IRP5 data for 2025;
- PIT rates;
- Provisional tax payments;
- Tax returns and individual taxpayers' data;
- Taxable income and tax assessed;
- Employment tax incentive (ETI);
- Assessed individual taxpayers with business income; and
- Assessed individual taxpayers' allowances, fringe benefits and deductions.

The statistics in this chapter are based on tax assessments issued and finalised by SARS. This chapter includes assessments finalised up to the 2024 tax year. Assessments for the 2025 tax year started on 7 July 2025 and were not finalised when the 2025 *Tax Statistics* publication was compiled. Individuals assessed refer to personal income taxpayers who submitted tax returns or taxpayers who were auto-assessed and whose returns have been assessed when the data was collated for the *Tax Statistics* publication.

IRP5 DATA FOR 2025

Preliminary IRP5 data for the 2025 tax year is included in this 2025 *Tax Statistics* publication. However, this chapter publishes statistics on tax assessments finalised for the 2021 to 2024 tax years.

In the 2025 tax year, SARS received more than 21.2 million IRP5 and IT3(a) certificates, showing a PAYE (tax withheld) collection of R645.8 billion. Because more than one IRP5 certificate can be issued to an individual, SARS applies a set of business rules to accurately identify taxpayers and, where necessary,

link all the IRP5 certificates issued to an individual. The unique tax certificate count can vary for each specific set of data viewed because a taxpayer may be included in more than one category selected.

SARS identified approximately 14.1 million unique taxpayers based on the tax certificates received. These unique taxpayers do not necessarily indicate the number of people working in the formal labour market. Some taxpayers who are not formally employed are also issued tax certificates. These include taxpayers who receive benefits from retirement funds or annuities. SARS could not link all the IRP5 certificates to specific taxpayers, because some certificates were incorrectly completed by employers or contained inaccurate information.

An analysis of the IRP5 certificates linked to the 14.1 million unique individuals that SARS identified revealed that 6.9 million (48.7%) taxpayers were female and 7.2 million (51.3%) were male.

The number of tax certificates received by SARS (unique count) for the 2022 tax year, increased by 1.9% since the 2021 tax year. The tax certificate count for the 2023 tax year showed an increase of 1.0%; the 2024 tax year increased by 2.1%; and the 2025 tax year increased by 0.6%. SARS expects the 2025 tax year preliminary number to increase as outstanding certificates are finalised.

The number of IRP5 and IT3(a) tax certificates received by SARS increased by 8.1% from 19.6 million for the 2024 tax year to 21.2 million for the 2025 tax year. The PAYE (tax withheld) collections increased by R67.3 billion (11.6%) between the same years. This increase could possibly be driven by the withdrawals from the Two-Pot Retirement System. The system launched on 1 September 2024, allowing retirement fund members to withdraw from their Savings Pot once per tax year. These withdrawals are taxed at marginal income tax rates, not the rate as per the preferential retirement lump-sum tax tables. These withdrawals increased taxable incomes, potentially moving some taxpayers into higher tax brackets.

For the 2025 tax year, 11.5 million taxpayers were issued certificates on which at least R1 or more of PAYE was deducted. 9.6 million individuals were issued certificates on which no PAYE was deducted (these taxpayers earned less than the tax threshold, derived income from independent contracting, or received other non-taxable amounts). See *Table A2.12.2*.

PAYE withheld on a tax certificate is not equal to final tax liability or the cash received by SARS.

PERSONAL INCOME TAX RATES

Personal income tax brackets and thresholds

The top marginal income tax rate (a marginal tax rate is a statutory imposed rate) of 40% for individuals applied for 13 years until this rate was increased to 41% from the 2016 tax year, and to 45% from the 2018 tax year. Income tax brackets have been adjusted to compensate for the effect of inflation (fiscal drag or bracket creep). To provide a larger percentage of tax relief to low-income earners, the income tax brackets for such earners have increased proportionally more than those in higher income tax brackets over the last several years.

Table 2.1 shows the adjustment of the PIT taxable income brackets between the 2021 and the 2024 tax years (rates for other tax years can be viewed in the annual Budget Reviews for the different years, issued by National Treasury). The taxable income level to which the 45% marginal rate applies increased from R1 577 301 in the 2021 tax year to R1 817 001 in the 2024 tax year. This increase represents a CAGR increase of 3.6%. During this period, the ceiling of the minimum 18% marginal rate

This resulted in a corresponding increase in the income tax threshold (the level of annual taxable income below which no income tax is payable) for individuals younger than 65 years from R83 100 to R95 750. The secondary rebate increased by 15.2% from R8 199 to R9 444. For individuals aged 65 to 74 years, the income tax threshold increased from R128 650 to R148 217. The tertiary rebate for taxpayers 75 years and older, increased by 14.9% from R2 736 to R3 145. The income tax threshold for these individuals increased from R143 850 to R165 689.

Table 2.1: Personal Income Tax (PIT) brackets, 2021 and 2024¹

Tax year Rand	2021	2024	Marginal PIT rates	Percentage increase in upper limit of bracket	Percentage increase

Age 65 to below 75	128 650	148 217			15.2%
Age 75 and over	143 850	165 689			15.2%

1. Rates for other tax years can be viewed in the annual Budget Reviews for the different years, issued by National Treasury.

2. Top marginal income tax rate of 40% applied for 13 years until the increase to 41% for the 2016 tax year. It increased again to 45% in the 2018 tax year.

3. Rebates are merely in existence to reduce the income tax due, but cannot result in a refund or credit.

Tax relief

The average tax rate across all taxpayers, as indicated by the tax assessed as a percentage of taxable income, increased from 21.2% in the 2021 tax year to 21.5% in the 2022 tax year. This rate decreased to 21.1% in the 2023 tax year and decreased again to 20.8% for the 2024 tax year. The extent of tax relief, including “fiscal drag/bracket creep relief”, is shown in *Figure 2.1* and illustrates the effect of tax relief over 27 years. For example, (see label 1 in *Figure 2.1*) an individual with taxable income of R100 000 in 1995 (2) paid tax at an average rate of 33.8%. (3) If the taxpayer’s taxable income had kept pace with inflation only, (4) the average tax rate would have increased to 41.2% in 2024 without adjustments to the income tax brackets. The actual income tax adjustments from 1995 for the same example (5) lowers the average tax rate to only 20.3%. However, it must be noted that this analysis does not include changes in the tax base, where a greater amount of income might be included in taxable income over time. For example, many fringe benefits were included in taxable income over this period.

PERSONAL INCOME TAX

Table 2.2 and Figure 2.2 show the tax relief granted to individuals since 1995 across a range of income levels. Tax relief is much more prominent in the lower income groups. Lower income groups receive proportionally greater tax relief when the tax thresholds are raised.

Figure 2.1: Example of tax relief granted to an individual with taxable income of R100 000 in 1995

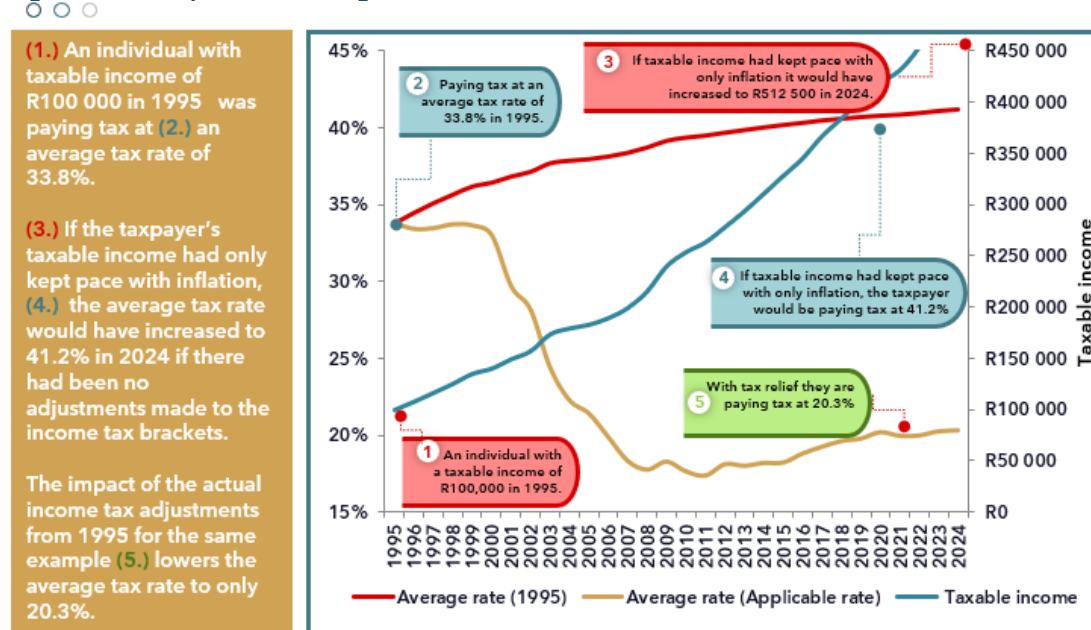

Table 2.2: Tax relief granted to individuals, 1995 and 2024

Taxable income		Tax at 1995 rates		Tax at 2024 rates	Average rates

Figure 2.2: Tax relief granted to individuals, 2024

PROVISIONAL TAX PAYMENTS

Persons who earn income other than remuneration, allowances, or advances as defined in section 8(1) of the Income Tax Act 58 of 1962, are regarded as provisional taxpayers if they conduct business or if their taxable income exceeds the prescribed threshold. Provisional tax is not a separate tax. It is an advance tax payment that ensures that the taxpayer does not have to pay large tax amounts on assessment (the tax liability is spread over the relevant year of assessment). It requires provisional taxpayers to pay at least two amounts in advance during the year of assessment. The amounts are based on estimated taxable income, and tax liability is determined after deducting employees' tax and tax rebates.

A third payment is optional after the end of the tax year, but before the assessment is issued. Final tax liability, however, is determined on assessment. The employees' tax and provisional tax payments made during the year, reduce the liability for normal tax for the applicable year on the date of assessment.

In 2023/24, provisional tax payments by individuals contributed 5.8% to net PIT collections (*Table A1.4.2 in Chapter 1 of this publication*). The "80% rule", as set out in the Fourth Schedule to the Income Tax Act, requires provisional taxpayers with taxable income of more than R1 million to settle at least 80% of their tax liability by the time they make their second provisional tax payment.

Table 2.3 shows the effect of the 80% rule on provisional tax payment trends. Although it is clear from this table that taxpayers adhere to the abovementioned rules, SARS follows processes to maintain the 80% rule. Insufficient payment or underestimation of taxable income may incur penalties and interest. Lower payments during the 2021 tax year can be ascribed to job losses and lower wages experienced as a result of the COVID-19 pandemic.

The percentage contribution of provisional tax payments shown in *Table 2.3* relates to the total provisional tax payments made for the applicable tax year. This percentage is not related to the tax liability because it still needs to be determined. The final tax liability will result in either a refund or an assessment payment.

Table 2.3: Provisional tax payments¹ by provisional period, 2021 – 2024

Period Tax year	1st Provisional period (R million)	Percentage change	2nd Provisional period (R million)	Percentage change	3rd Provisional period (R million)	Percentage change	Total
2021	7 257	-16.4%	14 205	-9.0%	1 089	15.0%	22 550
2022	8 737	20.4%	16 651	17.2%	1 163	6.8%	26 550

2022	32.9%		62.7%		4.4%		100.0%
2023	32.5%		63.7%		3.9%		100.0%
2024	31.9%		64.0%		4.1%		100.0%

1. Provisional tax payments above include only payments from individuals.

A total of 552 124 provisional taxpayers on register and who were assessed contributed to 7.2% of the overall number of taxpayers assessed for the 2024 tax year, a reduction from 609 832 (a contribution of 9.5%) who were assessed for the 2021 tax year. They earned R321.0 billion for the 2021 tax year, which increased to R373.7 billion for the 2024 tax year. On average, they contributed to almost 14% of the total for all assessed taxpayers, over the four years. Total tax assessed from this group of taxpayers increased from R103.4 billion for the 2021 tax year to R116.2 billion for the 2024 tax year, on average contributing to more than 20% of the total for all assessed taxpayers.

The taxable income and tax assessed by taxable income group, age and gender are available as *Tables A2.1.1(b), A2.1.4(b), and A2.1.5(b)*.

TAX RETURNS AND INDIVIDUAL TAXPAYER DATA

Tax register

During 2010, SARS changed its taxpayer registration policy and stipulated that every individual formally employed, regardless of their tax liability, must be registered for PIT. If employees are not registered, it is the duty of their employer to register them with SARS. If an individual is not registered for tax, and SARS detects economic activity through third party data, the person is automatically registered by SARS in terms of section 22(5) of the Tax Administration Act 28 of 2011. As a result, the tax register grew from 5.9 million active cases on 31 March 2010 (not reflected in the table below) to 27.1 million on 31 March 2024 (*Table 2.4*).

Not all registered individuals pay tax. For example, taxpayers with taxable income below the income tax threshold may not be liable to submit a return. Some individuals do pay tax in the form of Employees' tax (PAYE) collected by employers and paid to SARS. Individuals not liable to submit a tax return can submit a return, mainly to recover tax deducted. Such individuals may qualify for tax refunds owing to information not captured on the submitted tax certificates.

Table 2.4: Number of individuals, 2021 – 2024

Date	Registered ¹	Percentage growth in register	Tax year	Expected to submit returns ²	Assessed	Percentage assessed
31-Mar-21	23 850 668	4.1%	2021	7 272 892	6 447 984	88.7%
31-Mar-22	24 832 105	4.1%	2022	7 649 280	6 635 030	86.7%
31-Mar-23	25 944 562	4.5%	2023	8 283 043	7 077 689	85.4%
31-Mar-24	27 051 828	4.3%	2024	9 151 909	7 712 217	84.3%

1. Number of individuals registered at 31 March of each year (active cases excluding cases where status is in suspense, dormant, estate, insolvent, inactive or address unknown).

2. The number of taxpayers who are expected to submit a return for a specific tax year. Cases can be on the register and active for other years but not active for a specific tax year.

ADDITIONAL NOTES ON REGISTERED INDIVIDUALS

This publication includes only statistics on taxpayers with an assessment, whereas tables in the annual Budget Review, issued by National Treasury, are based on both IRP5 certificates and ITR12 tax-return information. *Table 4.6* of the 2023 Budget Review by the National Treasury (reproduced below) shows estimates of registered taxpayers with a positive taxable income. It also shows the tax liability expected (according to taxable income group) from individuals at different levels of taxable income for the 2024 tax year. The table indicates the estimated average tax payable before and after tax proposals, as well as the average net tax gain or relief by income group. According to this table, 7 545 020 individuals are estimated to receive taxable income below the income tax threshold of R95 750. By contrast, 7 122 113 taxpayers are estimated to receive taxable income above the income tax threshold.

Table 4.6 Estimates of individuals and taxable income, 2023/24

Taxable bracket R thousand	Registered		Taxable		Income tax payable		Income tax relief		Income tax payable

1. Registered individuals with taxable income below the income-tax threshold

Source: National Treasury

The table above estimates the individuals to be assessed and those who may not require assessment, whereas *Table 2.4* shows the actual individual assessments finalised. The difference in the number of registered individuals in *Table 2.5* (27 051 828), and the estimated lesser number of 14 667 133 in *Table 4.6* published by the National Treasury, is due to the National Treasury table including only individuals with taxable income that is greater than zero, whereas SARS’s table includes all registered individuals. The SARS register comprises those formally employed; those seeking employment; business owners and partnerships; pensioners; and foreigners receiving income in South Africa.

Refer to the overview of the personal income tax system for the 2019 to 2024 tax years at the end of this chapter for more information and analysis.

Expected submissions and assessed individual taxpayers

The proportion of tax returns that SARS has received is measured against the number of returns expected to be submitted by registered taxpayers. Some individuals are not required to submit a tax return because their earnings are below the income tax threshold, they are unemployed, or their taxable income is below the compulsory tax return submission threshold.

In February 2014, the International Monetary Fund (IMF) launched the Tax Administration Diagnostic Assessment Tool (TADAT) which defines the filing rate for CIT and PIT as the extent to which returns expected from registered taxpayers are filed. The 2025 *Tax Statistics* publication adopts a similar definition. Many individual taxpayers who fall below the compulsory tax return threshold are submitting tax returns. These taxpayers are not liable to submit a tax return, but chose to submit. The reason is usually to recover tax deducted if information was not captured on the submitted tax certificates.

Expected submission of tax return counts for each tax year include all taxpayers who have been assessed for a tax year, as well as taxpayers with an “active” status who were assessed in any of the two previous years. The number of individuals expected to submit income tax returns was 7.3 million for the 2021 tax year. This count increased to 7.6 million for the 2022 tax year, to 8.3 million for the 2023, and to 9.2 million for the 2024 tax years. These increases can be attributed to growth in the taxpayer register, partly driven by auto-assessments.

Taxpayers who were auto-assessed and not previously assessed, increased the number of expected submissions. During the 2020 Filing Season, SARS simplified the filing of income tax returns, thus making it easier for taxpayers to comply. SARS automatically assessed a significant number of taxpayers based on data received from third parties (e.g. medical schemes and financial institutions). The population of taxpayers who were identified to be auto-assessed in the 2020 Filing Season was significantly expanded to just more than 3.4 million. In the 2024 filing season, a notable increase of 30.05% was observed in the auto-assessment of standard taxpayers, with 5.02 million individuals processed versus the previous year’s 3.86 million.

Based on data available on 26 August 2025, 88.7% of expected tax return submissions were assessed for the 2021 tax year; 86.7% for the 2022 tax year; 85.4% for the 2023 tax year; and 84.3% for the 2024 tax year. In later years, the ratio of returns assessed for any given tax year increases as more outstanding returns are submitted and assessed.

TAXABLE INCOME AND TAX ASSESSED

Table 2.5 summarises the number of individual taxpayers assessed, taxable income, and the tax payable after assessment.

Table 2.5: Summary of assessed individual taxpayers, taxable income and tax assessed, 2021 - 2024

Tax year	Number of taxpayers assessed	Taxable income (R million)	Average taxable income (R)	Tax assessed (R million)	Average tax assessed (R)	Tax assessed as % of taxable income
2021	6 447 984	2 025 688	314 158	429 379	66 591	21.2%
2022	6 635 030	2 219 394	334 496	476 062	71 750	21.5%
2023	7 077 689	2 464 402	348 193	521 174	73 636	21.1%
2024	7 712 217	2 707 975	351 128	563 326	73 043	20.8%

Tax assessed as a percentage of taxable income increased from 21.2% in the 2021 tax year to 21.5% in the 2022 tax year. It decreased to 21.1% for the 2023 tax year and decreased again to 20.8% for the 2024 tax year. In the 2019 tax year, the average income-tax rate increased to 22.0% from 21.3% for the 2018 tax year (not depicted in *Table 2.5*), mainly because of the increase of the top marginal tax rate from 41% to 45%. The average income-tax rate was 21.2% in the 2021 tax year. This low rate could be due to job losses and lower income caused by the COVID-19 pandemic. The average income tax rate of 20.8% for the 2024 tax year is expected to increase as assessments are finalised.

The number of taxpayers assessed decreased from the 2018 to 2019 tax year because of the increase in the submission threshold of employment income from R350 000 to R500 000 for the 2019 tax year (not depicted in *Table 2.5*). The number of taxpayers increased by 2.9% in the 2022 tax year, by 6.7% in the 2023 tax year, and by 9.0% in the 2024 tax year. These increases were partly because auto-assessment resulted in finalisation of cases quicker and individuals who are not required to file were also auto-assessed. The number for the 2024 tax year is expected to increase as assessments are finalised.

The taxable income of taxpayers assessed increased by 9.6% in the 2022 tax year, increased again by 11.0% for the 2023 tax year and decreased again by 9.9% for the 2024 tax years. In the 2021 tax year, COVID-19 lockdown restrictions harmed taxpayers' earnings amid a struggling economy.

Average taxable income increased by 6.5% in the 2022 tax year from the 2021 tax year; increased by 4.1% in the 2023 tax year; and increased by 0.8% in the 2024 tax year.

Ceasing to be a South African tax resident, resignations, deaths, and similar changes to the status of individuals can imply permanent erosion or changes in the tax base. From the 2017 tax year individuals were required to indicate their tax resident status on the ITR12 tax return, but not the date on which it changed. From the 2021 tax year, individuals must indicate the date they ceased to be a tax resident of South Africa on their ITR12 tax return. A person who ceased to be a South African tax resident is, however, taxed on their South African sourced income.

Table A2.1.7 presents the distribution of the number of assessed individual taxpayers across major taxable income groups for individuals with a change in their tax residence status. The number of taxpayers is distributed by the year in which the change occurred as indicated on the ITR12 tax return. Analysis revealed that the number of taxpayers with a tax residence change who submitted tax returns to declare taxable income amounted to 5 898 individuals for the 2021 tax year, 5 086 in the 2022 tax year, 2 904 in the 2023 tax year, and 477 in the 2024 tax year.

Table A2.1.8 and *Table A2.1.9* present the taxpayers that have changed their residence status by age and gender. The number of individuals between the ages 18 to 44 made up an average of more than 61% of the number of taxpayers across all years. Most taxpayers were male.

From the 2017 to 2024 tax year, and according to the tax resident status indicator on the ITR12 tax return, more than 51 500 taxpayers indicated that they ceased to be a tax resident of South Africa.

Table A2.1.10 presents the taxable income and tax liability of individual taxpayers with a tax residence change over a ten-year tax period, who have been assessed since the 2015 tax year. For the 2015 tax year, 46 959 taxpayers declared taxable income of R38.7 billion on which the tax payable totalled R12.8 billion. For the 2024 tax year, this number of assessed taxpayers decreased to 37 706 or 19.7%. Taxable income decreased by 74.5% to R9.9 billion and tax payable decreased by 75.1% to R3.2 billion. These decreases in the value of taxable income and tax paid were realised mainly by the bracket above R500 000 taxable income, mainly individuals between 65 to 74 years old and males. *Table A2.1.11* and *Table A2.1.12* presents the same ten-year group of individual taxpayers by age and gender.

The number of taxpayers who changed residence with a taxable income of zero to R70 000 decreased by 31.1% from 27 561 to 18 986 taxpayers, followed by decreases from the taxable income the bracket above R500 000 (19.7%).

Figure 2.3 shows how these taxpayers' taxable income shifted across the tax brackets because of changes in taxable income.

Figure 2.3: Proportion by taxable income for individuals with change in residence status as indicated by taxpayer, 2015 – 2024

○ ○ ○

PERSONAL INCOME TAX CONCENTRATION CURVES

Concentration curves are graphical representations of data that determine the degree of inequality and differences of inequality over time. The key two variables in the concentration curves below are the share of taxable income and tax liability against the cumulative share for personal income taxpayers.

The concentration curves for taxable income for the tax years 2021 and 2024 are based on assessed taxpayers. They depict minute changes in the distribution of taxable income, with slightly more unequal distribution of taxable income for the bottom 70% share of taxpayers (see Graph 1). Tax policy measures over this period to broaden the taxable income base and increase the progressivity of the personal income tax system included retirement reform from the 2016 tax year; the increase in the effective capital gains tax rates; changes to fringe benefits on vehicles; increases in marginal tax rates; and partial adjustment for fiscal drag in several years during this period.

Graph 1: Cumulative share of taxable income

The cumulative share of tax liability against the cumulative share for personal income taxpayers is more unequal than the cumulative share of taxable income and mirrors the progressive nature of personal income tax, whereby taxpayers at higher taxable income levels are taxed at higher tax rates.

Graph 2: Cumulative share of tax liability

Distribution of tax liability across taxable income and income groups

Table 2.6 presents the distribution of assessed individual taxpayers, taxable income and tax assessed across major taxable income groups. The table shows that for the 2024 tax year, 80.4% of the assessed individual taxpayers had taxable income less than R500 000, i.e. most taxpayers fell below the amount of the tax return submission threshold for employment income. These taxpayers earned 44.1% of the total taxable income and contributed 23.0% to the tax assessed. A further 19.6% of the taxpayers earned taxable income above the R500 000 threshold in 2024 and were liable for 77.0% of the tax assessed.

The number of taxpayers assessed in the taxable income brackets below R500 000 increased by 826 463 taxpayers (15.4%) from the 2021 to 2024 tax year. The upper taxable income bracket grew by 437 770 taxpayers (40.7%) during this period.

From the 2021 to the 2024 tax years, taxable income for taxpayers within the taxable income tax bracket below R500 000 increased by 20.2%, while the taxable income for the group with taxable income higher than R500 000 increased by 46.7%. Over this period, tax assessed for taxpayers within the taxable income tax bracket below R500 000 decreased by 6.4% while the tax assessed for the group with taxable income higher than R500 000 increased by 41.0%.

Table 2.6: Distribution of assessed individual taxpayers over major taxable income groups, 2021 - 2024

Percentage	Taxable income group	2021	2022	2023	2024

Figure 2.4 shows the percentage distribution of assessed individual taxpayers, their taxable income, and the tax assessed according to taxable income group for the 2024 tax year. Greater detail is provided in Table A2.1.1.

Figure 2.4: Distribution of assessed individual taxpayers by taxable income group, 2024

Assessed losses for individuals do not only reflect the loss for a particular tax year, but also include accumulated assessed losses brought forward from previous tax years. If an individual had a taxable profit for the current year, it is possible that he or she could have offset an assessed loss brought forward from previous years against the assessed profit.

Table A2.1.2 shows “income” included in the final taxable income calculation as recorded on the assessment. Exempted interest and capital gains have not been taken into account. The income shown in this table is, therefore, based on taxable income minus deductions allowed only. Therefore, the income shown is not an indication of the gross income of taxpayers because exempt income and capital gains are not included.

Deductions granted as a percentage of income totalled 13.1% in the 2021 tax year, decreased to 12.6% in the 2022 tax year and to 12.2% in the 2023 tax years. It increased to 12.3% in the 2024 tax year.

Table 2.7 shows the distribution of income and granting of deductions in income groups (as opposed to taxable income groups). The largest portion of the R332.8 billion allowed as deductions for the 2024 tax year was granted to taxpayers in the income bracket that is higher than R500 000. Of their income, 12.0% was granted as a deduction.

Tracking of taxable income and tax liability of a cohort of taxpayers over ten consecutive years, 2015 - 2024

To track changes in the taxable income and tax liability of taxpayers over a ten-year tax period, SARS analysed the taxable income and assessed tax of all taxpayers who have been assessed every year since 2015. For the 2015 tax year, SARS assessed 5 890 455 taxpayers. Of these, 3 109 126 taxpayers (52.8%) had been assessed for each of the subsequent nine years (2016 to 2024).

The non-retention rate in the ten-year period of 47.2% was because:

- The taxable employment income return submission threshold introduced in 2008 stood at R120 000 per annum and remained at this taxable income level until it was increased in the 2013 tax year to R250 000 per annum. In the 2015 tax year, this threshold was increased to R350 000 per annum and in the 2019 tax year to R500 000 per annum. These tax return submission thresholds allowed taxpayers to elect whether to submit a tax return for assessment if they met the criteria.
- Some taxpayers assessed in the 2015 tax year have not submitted tax returns for 2016 and subsequent tax years. These taxpayers may have:
 - Died;
 - Ceased to be tax resident in South Africa;
 - Left the formal active workforce because of retrenchment, resignation, or retirement;
 - Became insolvent; or
 - Failed to submit returns.

PERSONAL INCOME TAX

For the 2015 tax year, of the 3 109 126 cohort taxpayers, 655 195 taxpayers (21.1% of those assessed) declared taxable income less than R120 000 per annum. For the 2024 tax year, the number of assessed taxpayers with taxable income that is less than the R120 000 taxable income per annum decreased to 381 101 (12.3% of those assessed).

The number of taxpayers in the income group above R350 000 taxable income per annum increased from 901 251 for the 2015 tax year to 1 802 002 for the 2024 tax year, while taxpayers in the income group above R500 000 taxable income per annum increased from 494 279 to 1 194 345.

Table 2.8 shows the increase in the taxable income group and tax assessed for the taxpayers assessed throughout the ten-year tax period. Further data on the ten-year cohort can be found in Tables A2.8.1 to A2.9.1.

Over this period, the average taxable income of *all* assessed taxpayers increased by a CAGR of 3.2%. Changes to tax legislation contributed to the growth in assessed tax. These changes included the tax changes to retirement fund deductions, fringe benefits and travel expenses.

The average taxable income for the 3 109 126 cohort taxpayers increased at a CAGR of 5.9% during the ten-year period. The recorded increase in taxable income of the cohort is higher than that of *all* individuals assessed, because of the latter group includes new registrations of personal income taxpayers.

Figure 2.5 shows how the approximately 3.1 million taxpayers' taxable income shifted across tax brackets because of changes in taxable income.

Figure 2.5: Proportion of the 3.0 million taxpayers by marginal tax rates, 2015 - 2024

PERSONAL INCOME TAX CONCENTRATION CURVES

Panel data, also known as longitudinal data or cross-sectional time series data, are data derived from a (generally small) number of observations over time on a (generally large) number of cross-sectional units like individuals, households, firms, or governments.

Panel tax data, in which the distribution of taxpayers and the annual changes in taxable income of those taxpayers are compared for the period 2015 to 2024, are depicted in the graph below. These taxpayers earned taxable income for each year under review and were assessed for the said period. The distribution of taxable income for these taxpayers has become more equal in this period. The more equal distribution is attributed to the changes in tax policy measures and the average increases in remuneration for the respective income groups. *Graph 3* below shows the cumulative share of taxable income. This data does not represent a measure of equality for the whole population because the data is confined to those with taxable income in this group.

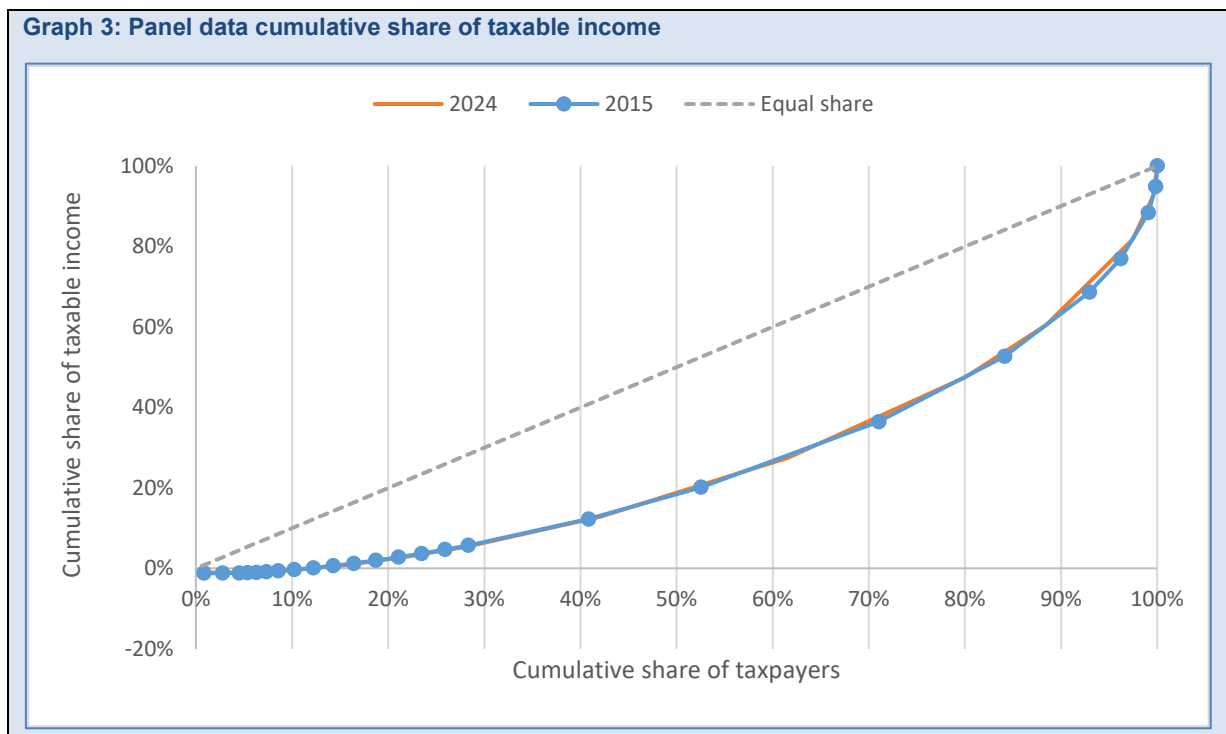

Table 2.9 shows assessed individual taxpayers, taxable income and average tax rates, according to the age brackets for the 2015 to 2024 tax year assessments.

Table 2.9: Assessed individual taxpayers: taxable income, tax assessed and average tax rate by age group (10-year cohort across 10 consecutive years), 2015 and 2024

The national average tax assessed per individual increased from R53 082 per individual in the 2015 tax year to R73 043 in the 2024 tax year, an increase of 37.6% (CAGR of 3.6%). The average tax assessed of the 3.1 million cohort taxpayers, however, increased from R74 796 per individual in the 2015 tax year to R143 139 in the 2024 tax year, an increase of 91.4% (CAGR of 7.5%).

The taxable income of assessed taxpayers younger than 55 years in the 2024 tax year (1.9 million taxpayers) increased by a CAGR of 3.8%. For taxpayers 56 years and older, it increased by 12.1%. Changes in growth in the different age groups can be attributed to taxpayers who:

- Retired or were retrenched during this period. Such taxpayers may have elevated taxable income for a specific year as a result of lump sum payments. However, thereafter, these taxpayers may experience a significant reduction in taxable income as salaries, their main source of income, were replaced with pension and investment income.
- Ceased to be tax resident and declaring Capital Gains result in higher taxable income for a particular year.
- Earned income from businesses, leading to varying taxable incomes because of economic conditions or business decisions.
- Realise annual increases in pensions. Usually, these increases only or partially compensate for inflation and are often less than increases received by persons earning salaries and those receiving annual bonus payments.

Distribution by province based on office of registration

The distribution of taxpayers, taxable income and tax assessed by province in 2024, determined according to the location of the SARS office at which the taxpayer is registered, reveals an increase of 0.3% for KwaZulu-Natal province and 0.2% each for North West and Limpopo, while Gauteng decreased by 0.7% compared to the previous year (Figure 2.6 and Table A2.1.3).

Figure 2.6: Assessed individual taxpayers and tax assessed by province (based on office of registration), 2024

Distribution by province based on taxpayers' residential information as submitted on income tax returns

The distribution of taxpayers, taxable income, and tax assessed by province and municipality, is determined using the residential address declared by taxpayers on their returns. A study of taxpayers

according to their place of residence provides a more accurate indication of the geographic distribution of taxpayers, as well as their taxable income and assessed tax, than an analysis that uses their office of registration. It also enables the distribution of taxpayers to be examined according to the municipality in which they reside.

1. Based on the province where the taxpayer resides.

Table 2.10 and Figure 2.7 show that, for the 2024 tax year, most assessed taxpayers were based in Gauteng and they had the highest average taxable income at R413 712. Gauteng was followed by the Western Cape at R347 669; North West at R322 045; Limpopo at R316 250; Mpumalanga at R314 644; Northern Cape at R307 687; KwaZulu-Natal at R302 840 and Free State at R296 560. The Eastern Cape had the lowest average taxable income at R292 061.

Figure 2.7: Average taxable income per assessed taxpayer by province (based on residential address), 2024

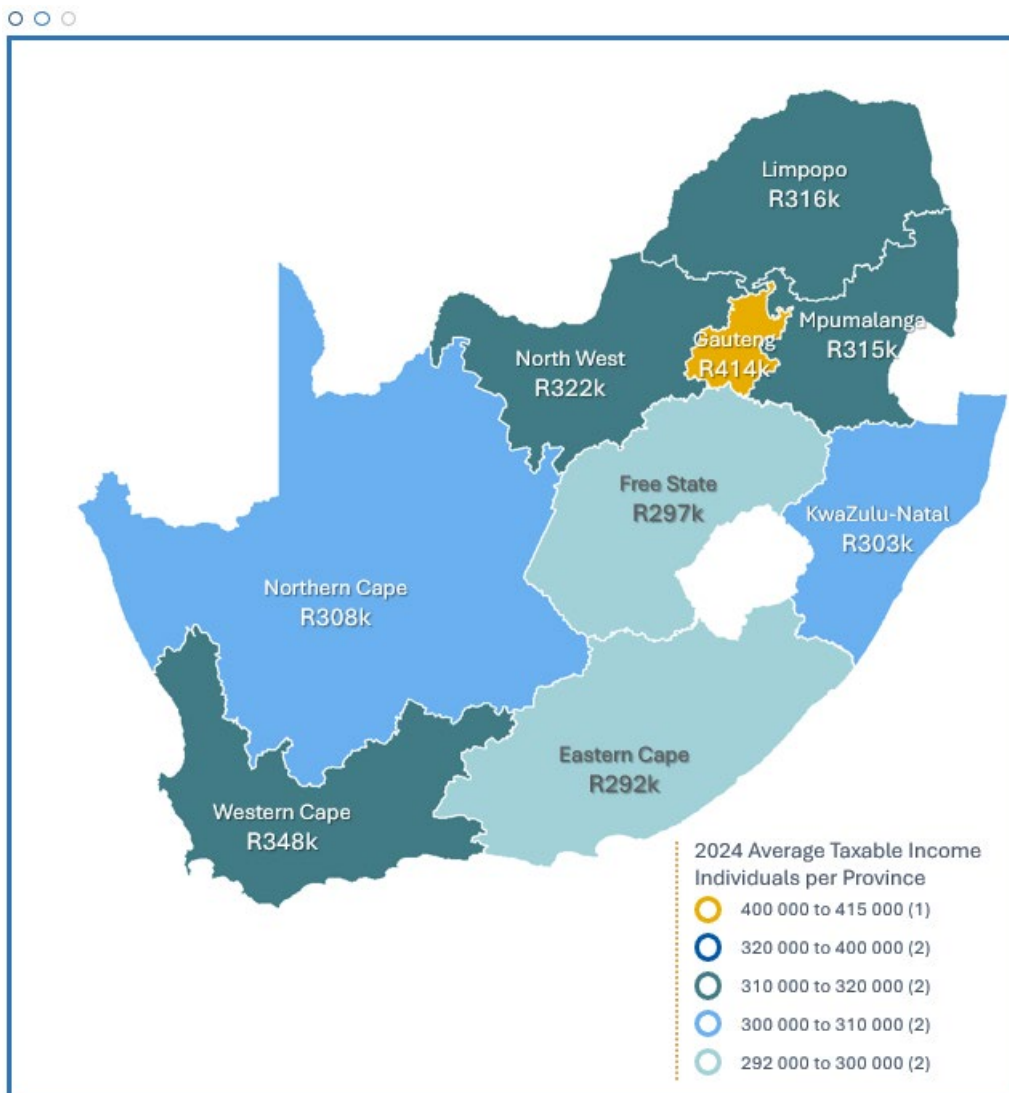

Figure 2.8 and Table 2.11 show the distribution of average taxable income by municipality for the Gauteng province. Tables and maps for all provinces can be found in Tables A2.10.1 to A2.10.9. Statistics on assessed tax are available for 213 local and metropolitan municipalities, using June 2017 demarcation borders.

Distribution by age group

Figure 2.9 and Table A2.1.4 break down assessed individual taxpayers by age group. The proportion of taxpayers in almost all the age groups decreased in the 2024 tax year, except for the representation of taxpayers for the age group from 18 to 24 years, which increased by 1.6%. This is likely due to changes in the submission threshold and taxpayers who were not previously being assessed receiving auto-assessments. As an increasing number of young adults enter the labour market, they begin to earn income that meets the criteria for taxation. 26.7% of assessed taxpayers are in the 35 to 44 years age group. This group earns nearly a third of the total taxable income and contributes almost a third of the total tax assessed.

Figure 2.9: Percentage of assessed individual taxpayers by age group, 2021 – 2024

Distribution by gender

The percentage of female taxpayers has been steadily increasing. For 2024, as shown in *Figure 2.10* and *Table A2.1.5*, females accounted for 46.8% of assessed individual taxpayers, earned 42.1% of the taxable income and contributed 37.3% to the tax assessed.

Taxable income for females totalled R1 139.3 billion for the 2024 tax year, with a liability for tax of R210.3 billion at an average tax rate of 18.5%. By contrast, taxable income for males totalled R1 541.9 billion, with a liability for tax of R344.2 billion at an average tax rate of 22.3%. On average, females earned 15.0% less than males, as measured by taxable income, and were on average liable for 24.2% less tax than males. 0.5% of taxpayers could not be identified by gender and are included under the male gender numbers in *Figure 2.10* below.

Figure 2.10: Male and female assessed individual taxpayers by main taxable income group, 2024

Table A2.1.6 shows that, on average males earn 8.6% more than females in the zero to R500 000 taxable income group. The proportion of females declined notably as taxable income increased. Only 39.1% of taxpayers with taxable income between R750 000 and R1 million in the 2024 tax year were females. This proportion declined further to only 17.9% of those with taxable income of more than R5 million. The proportion of females as a percentage of the total number of taxpayers assessed remained at 46.8% in 2021 and in 2024.

Demographic information such as race, ethnicity, qualifications, and language is not available on the ITR12 return.

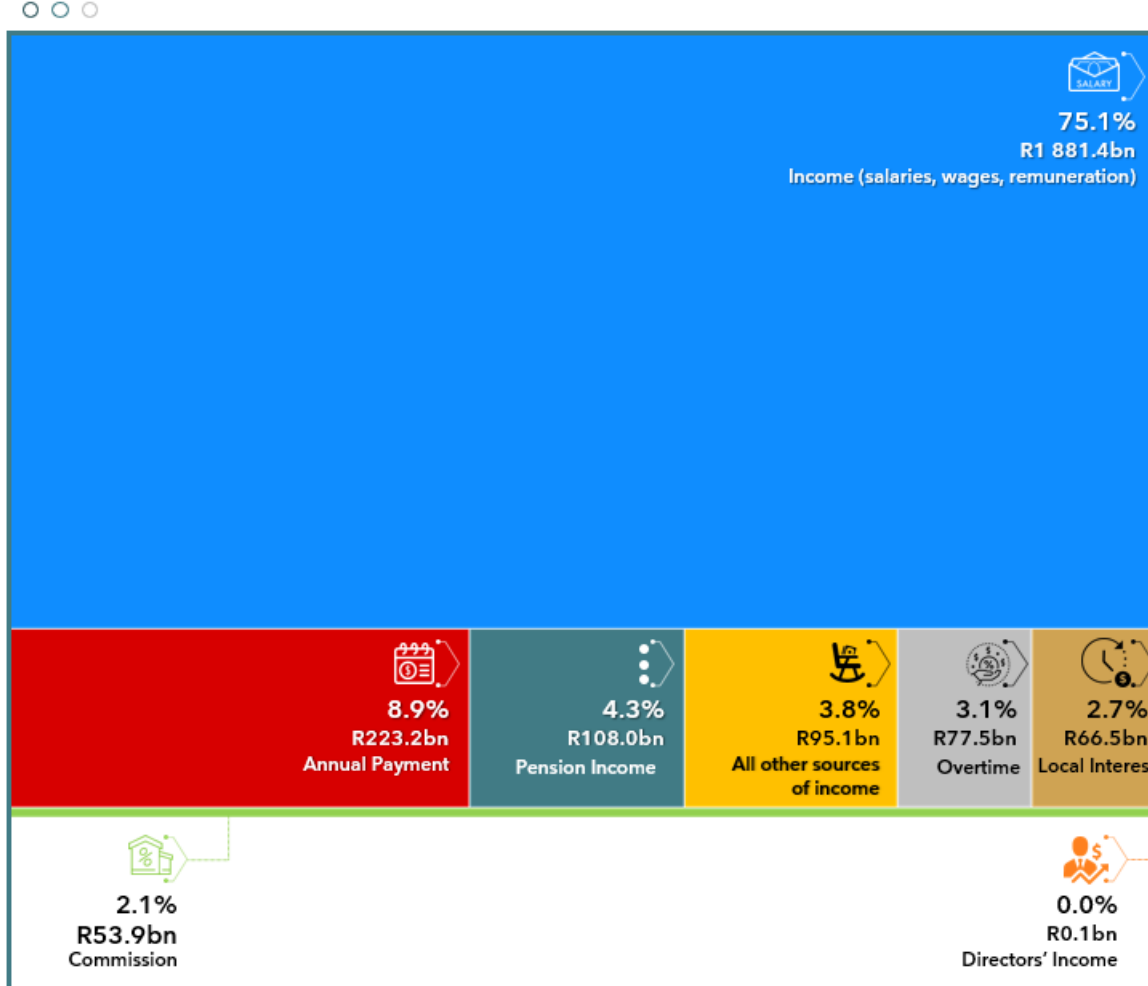

Distribution by source of income

Figure 2.11 and *Table A2.2.1* show taxpayers' sources of income. Approximately 6.5 million individual taxpayers received income in the 2024 tax year from remuneration, pensions, or annuities. More than 4.6 million of these taxpayers also received annual payments in the form of bonuses or leave pay.

In 2024, almost 637 000 individual taxpayers earned local interest income that exceeded the exemption limit applicable for interest. Interest from a South African source earned by any natural

person under 65 years of age, is exempt from taxation up to R23 800 per annum. Persons 65 years and older, are exempt up to R34 500 per annum. The taxable portion of local interest increased from R28.5 billion in 2021 to R66.5 billion for the 2024 tax year. The number of taxpayers with taxable foreign interest increased from 247 605 for the 2021 tax year to 316 244 for the 2024 tax year.

Figure 2.11: Assessed individual taxpayers' income by source of income, 2024

Distribution by economic activity

Figure 2.12 and Table A2.3.1 show PAYE payments received, identified according to the Standard Industrial Classification (SIC), rather than SARS sector codes. The source of income codes used by SARS are not aligned with the SIC system used by Statistics South Africa.

The *Financial Intermediation, Insurance, Real-estate and Business Services* sector employed the largest number of assessed individual taxpayers in 2024/25 (44.7%), followed by the *Community, Social and Personal Services* (27.8%), *Manufacturing* (6.8%), *Wholesale and Retail Trade, Catering and Accommodation* (6.4%) and *Mining and Quarrying* (5.2%) sectors. Employers in the *Financial Intermediation, Insurance, Real-estate and Business Services* sector contributed almost half of total PAYE.

PAYE payments for the 2020/21 financial year decreased by 5.5% (not depicted in this year's publication) since to the previous year. PAYE collections were under strain because of the COVID-19 pandemic and the consequent increasing unemployment levels and retrenchments. The crisis harmed business profitability and confidence levels, forcing companies to restructure their operations, by laying off workers and suspending bonuses or salary increases.

PAYE payments for 2021/22 increased by 12.2% from a low base in 2020/21 and increased again by 7.9% for 2022/23, but the growth decreased slightly by 7.3% in 2023/24. The contraction in 2023/24 was mainly from the *Mining and Quarrying* sector following continuous retrenchments in this sector. All sectors contributed to the growth (11.1% in 2024/25) with higher growth from the *Electricity, Gas and Water* sector.

Figure 2.12: PAYE payments received by economic activity, 2024/25

EMPLOYMENT TAX INCENTIVE (ETI)

Government introduced the employment tax incentive on 1 January 2014 to stimulate youth employment. The incentive reduces an employer’s cost of hiring younger, less experienced persons through a cost-sharing mechanism with government, while leaving the salary the employee receives unaffected. The employer can claim the ETI and reduce the amount of PAYE payable to SARS by the amount of the total ETI calculated in respect of all qualifying employees.

Figure 2.13, Table 2.12, and Table A2.12.1 show ETI claims from 1 March 2014 to 31 March 2025. Total claims amounted to R47.5 billion for the period 1 March 2014 to 31 March 2025.

The number of ETI claims utilised increased by 224.3% from 9 644 in the 2013/14 tax year (not depicted in the graph below) to 31 275 in the 2014/15 tax year, showing the uptake since the introduction of this incentive. It increased by 12.0% in the following tax year, but the growth slowed for the next two years to 2.9% and 1.4%. Employers can claim the incentive for 24 months for all employees who qualify, which explains the contraction. The number contracted by 17.3% in 2018/19 but increased by 5.2% in the 2019/20 tax year. In February 2019, the Minister of Finance announced that this incentive would be extended to February 2029. The significant increase of 54.9% in the

2020/21 tax year emanated from the extension of the tax relief measures in response to the COVID-19 pandemic in terms of age and the amount claimable. The number of claims contracted by 16.4% in the 2021/22 year, the year after the special COVID-19 tax relief measures ended. It contracted again by 21.7% in the 2022/23 year, by 7.7% in the 2023/24 year, and by 2.7% in the 2024/25 year.

Figure 2.13: Amount of ETI utilised and number of employers by year – March 2014 to March 2025

Employers in sectors represented by the *Wholesale* and *Retail* SETA claimed the highest amount of ETI, followed by the *Services* SETA.

Table 2.12: ETI by SETA, March 2014 to March 2025

The data in these summaries are based on monthly employer declarations received (EMP201).

ASSESSED INDIVIDUAL TAXPAYERS WITH BUSINESS INCOME

Table A2.4.1 breaks down the economic sectors in which assessed individual taxpayers with business income participated. Assessed individual taxpayers with business income composed 2.7% of the total number of assessed individual taxpayers in the 2024 tax year. This percentage decreased from 3.9% for the 2021 tax year to 3.4% the 2022 tax year, decreased to 3.1% for the 2023 tax year; and decreased further to 2.7% for the 2024 tax year. It is expected that the number of cases for the 2024 tax year will increase once assessments are finalised (not all cases were finalised when data was extracted for this publication).

The *Financial Intermediation, Insurance, Real-estate and Business Services* sector contributed 40.0% to the **total taxable income** of assessed individual taxpayers with business income. This sector contributed 33.7% of the **total number of assessed individual taxpayers** with business income, followed by *Agencies and Other Services* (7.9%) and *Medical, Dental and Other Health and Veterinary Services* (6.1%) sectors.

Assessed individual taxpayer allowances

Allowances on vesting of equity instruments are the largest allowance received by individuals. This allowance increased in monetary value from R17.7 billion in the 2021 year to R30.8 billion in the 2024 year (Figure 2.14).

Travel allowance has become the second largest allowance received by individuals, following the “all other” allowance, which includes allowances such as subsistence, entertainment, tools, and computer allowances. The travel allowance has steadily decreased in relative terms from 22.0% in 2021 to 18.5% in the 2024 tax year. The decreases are due to changes to the tax rules and tax treatment of the reimbursive travel allowance since the 2018 tax year.

Figure 2.14: Assessed individual taxpayer allowances, 2024

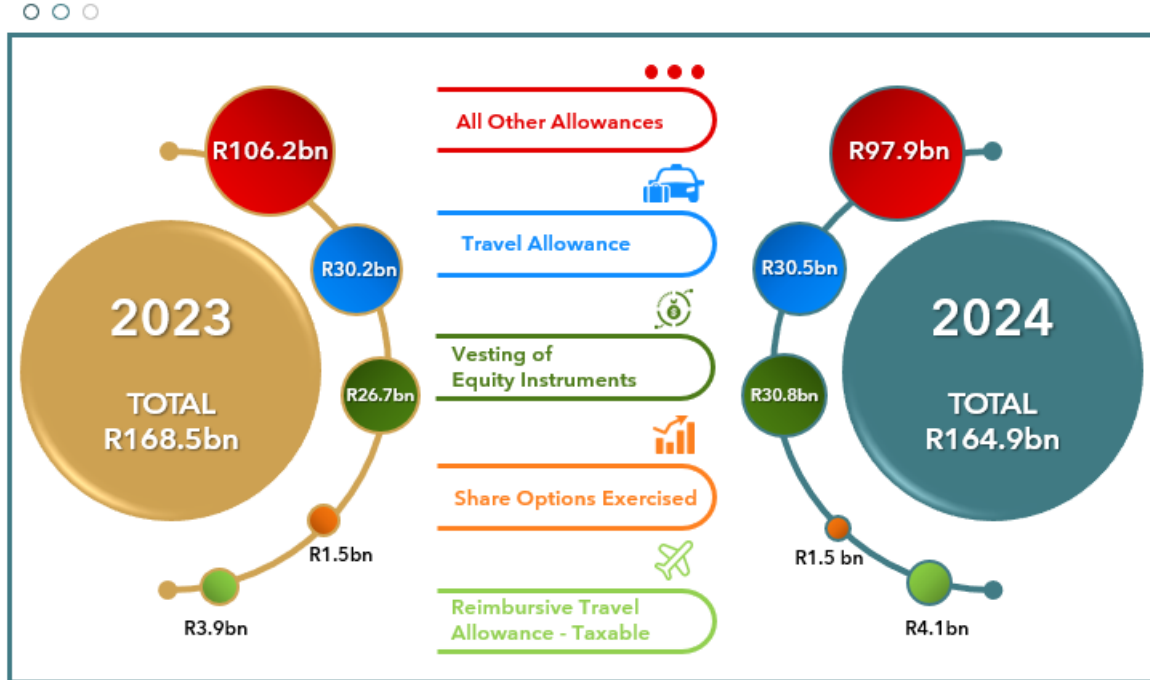

Table A2.5.1 compares the aggregated allowances for the 2021 to 2024 tax years. The most significant allowances are shown according to taxable income group in Tables A2.5.2 to A2.5.4.

Assessed individual taxpayer fringe benefits

Table A2.6.1 summarises assessed individual taxpayers’ fringe benefits. These benefits increased from R222.0 billion in the 2021 tax year to R272.8 billion in the 2024 tax year.

The pension, provident, and retirement annuity fund contributions of R158.3 billion were the largest benefit received for the 2024 tax year, followed by medical scheme contributions paid on behalf of employees. For the 2024 tax year, medical scheme contributions amounted to R86.5 billion. The most significant fringe benefits are shown by taxable income group in Tables A2.6.2 to A2.6.5.

Assessed individual taxpayers’ deductions

Table A2.7.1 summarises deductions allowed to individual taxpayers on assessment.

The monetary value of deductions allowed increased from R265.9 billion in the 2021 tax year to R332.8 billion in the 2024 tax year. Deduction amounts allowed for home office expenses decreased from R0.9 billion in the 2021 tax year to R0.5 billion in the 2024 tax year as a result of claims from individuals working from home during the COVID-19 pandemic lockdown restrictions. The number of taxpayers for whom home office expenses were allowed decreased from 47 649 in the 2021 tax year to 33 120 for the 2022 tax year and decreased to 28 219 for the 2023 tax year. It decreased again to 24 975 in the 2024 tax year.

The deductions for retirement fund contributions as a proportion of total deductions, decreased from 85.1% in the 2021 tax year to 83.7% in 2024 (*Figure 2.15*). In monetary value, it increased from R265.9 billion in the 2021 tax year to R332.8 billion in the 2024 tax year. The assessed return amounts may increase as outstanding returns are submitted and assessed.

Since the 2015 tax year, deductions for medical expenses no longer appear on assessments because medical expenses tax credits are treated as rebates against tax payable and not as a deduction in determining taxable income.

Tables on tax credits for medical scheme fees and additional medical expenses credits allowed have been added for more complete information.

The amount allowed for medical scheme fees tax credits increased from R22.8 billion for the 2021 tax year to R28.4 billion for the 2024 tax year.

Additional medical expense tax credits allowed amounted to R8.0 billion for the 2021 tax year and increased to R10.5 billion allowed for the 2024 tax year. The number for the 2024 tax year should increase as returns are being finalised.

The most significant deductions are shown by taxable income group, in *Tables A2.7.2 to A2.7.8*.

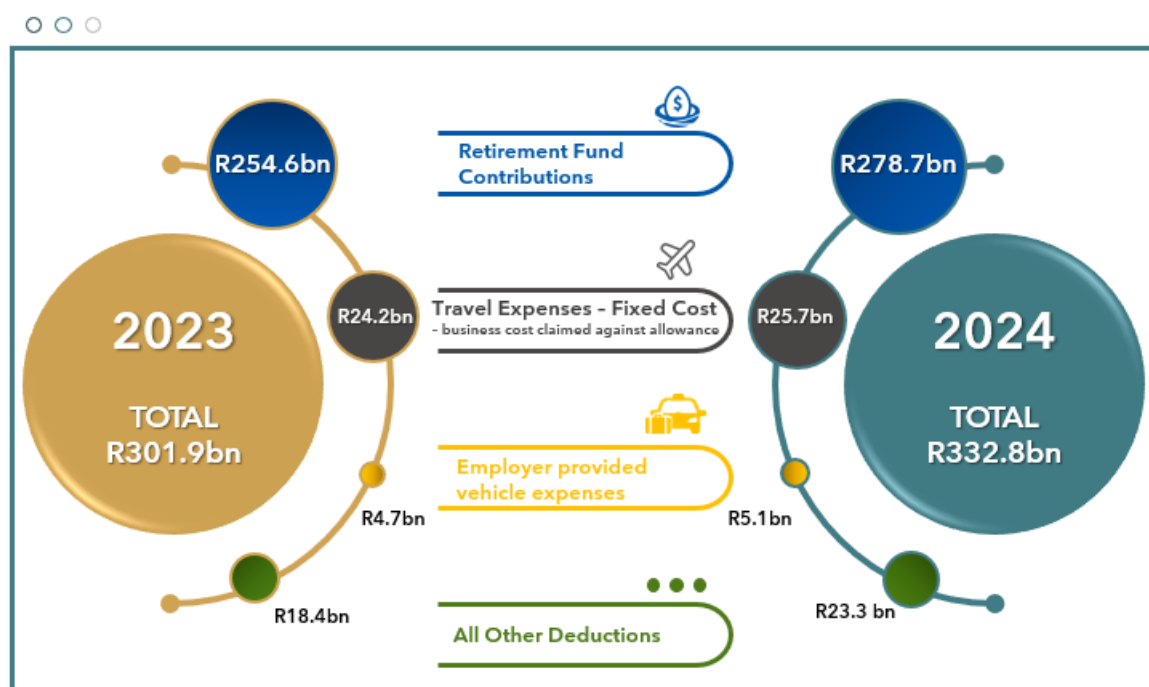

CONTRIBUTIONS THAT DO NOT QUALIFY FOR A MEDICAL SCHEME FEES TAX CREDIT

Certain medical arrangements are entered into between taxpayers and entities that are not regulated by the Medical Schemes Act No. 131 of 1998. Products offered by long-term or short-term insurers, which can include gap cover or hospital insurance, do not qualify for a medical tax credit because they are not paid to a registered medical scheme. Certain bargaining councils established and operated medical scheme funds. If these funds are not registered under the Medical Scheme Act, the contributions do not qualify for a medical tax credit.

For the expenses to qualify for the medical tax credit, they must not have been recoverable by the taxpayer from any cover, such as the taxpayer's medical scheme or an insurer under a medical gap cover insurance plan.

Contributions paid by the taxpayer to any other fund registered under provisions similar to the provisions of the Medical Schemes Act under the laws of any other country, may also be taken into account in the calculation of the medical tax credit. If a foreign fund is not regulated under legislation that is similar to the Medical Schemes Act, it will not qualify for a medical tax credit.

Figure 2.15: Assessed individual taxpayers' deductions, 2024

Tables A2.7.9 to A2.7.13 show the significant deductions allowed by value of the deduction. For the 2024 tax year:

- **Travel expenses (fixed cost - business cost claimed against travel allowance):** 34.7% of assessed taxpayers claimed amounts higher than R100 000; accounting to 63.2% of the total R25.7 billion in deductions allowed. Of those with travel expenses, 91.7% had taxable income above R250 000, representing 95.1% of this expense.
- **Retirement fund contributions:** 44.2% of assessed taxpayers claimed deduction greater than R50 000; contributing 80.4% of the total R278.7 billion allowed. Among these, 78.9% had taxable income above R150 000, accounting for 96.5% of the claims.
- **Business expenses for employer-provided vehicles:** 78.6% of assessed taxpayers claimed deductions above R50,000, contributing 93.8% of the total R5.1 billion allowed. Of these, 89.5% had taxable income above R250 000, claiming 93.4% of the claims.
- **Medical scheme fees tax credits:** 93.3% of assessed taxpayers claimed between R0 and R15 000, contributing 85.9% to the total deductions. Within this group, 93.6% had taxable income between R150 000 and R2 000 000, accounting for 95.4% of the claims.
- **Additional medical expense credits:** 88.7% of assessed taxpayers claimed between R0 and R20 000, contributing 52.0% of the total deductions. Of these, 80.3% had taxable income between R200 000 and R750 000, representing 70.8% of the claims.

AN OVERVIEW OF THE PERSONAL INCOME TAX SYSTEM FOR THE 2019 TAX YEAR

This analysis provides a summarised overview of the 2019 tax year's personal income tax system based on: information submitted by employers in terms of the annual IRP5 and IT3(a) certificates issued; the tax returns submitted by individuals; and third-party information submitted, such as IT3(b) certificates, and retirement and medical scheme contributions. The total register of individuals is analysed in terms of sources of income, deductions, taxable income, and tax credits.

A total of 14 180 735 registered individuals received total income amounting to R2 932.8 billion, with 13 909 397 individuals earning employment income of R2 726.3 billion. Employee income accounted for approximately 93% of total original income, with salaries and wages making up 70.7% as the largest component, followed by fringe benefits at 9.1%.

Business income of R54.4 billion was received by 192 017 individuals, and farming income of R6.0 billion was received by 19 553 individuals. Interest income of R47.3 billion and rental income of R13.9 billion were received by 510 881 and 185 352 individuals, respectively. Those declaring dividend income of R6.0 billion totalled 333 103, and 101 786 individuals declared capital gains of R57.1 billion.

Exempt income and losses totalled R61.0 billion granted for 639 893 individuals. Retirement contributions of R261.5 billion were deducted by 6 998 889 individuals. General tax rebates of R146.2 billion determined the minimum tax thresholds of 14 158 595 individuals. Medical tax credits of R22.0 billion were allowed for to 2 857 080 individuals. A total of 7 015 317 individuals had a total tax liability of R498.3 billion. Net income after personal income tax totalled R2 451.9 billion that accrued to 14 180 735 registered individuals.

Nearly 50% of individuals earned less than R78 150, accounting for 9.1% of taxable income. The proportion of individuals with taxable income above R78 150 to R500 000 stood at 42.9% with a taxable income share of 51.6% and a tax liability share of 35.1%. Only 0.7% of individuals were in the above R1.5 million taxable income group, with a taxable income share of 11.4% and a tax liability share of 23.9%.

An analysis by age revealed that approximately 83% of individuals were younger than 55 years, with 55.6% concentrated in the 26 to 45 years age group. Individuals under 55 years accounted for 80.3% of total taxable income and contributed 78.8% of the overall tax liability. The gender analysis indicated that women represented 47.0% of individuals, accounted for 40.1% of taxable income, and bore 35.0% of the total tax liability.

AN OVERVIEW OF THE PERSONAL INCOME TAX SYSTEM FOR THE 2020 TAX YEAR

This analysis provides a summarised overview of the 2020 tax year's personal income tax system based on: information submitted by employers in terms of the annual IRP5 and IT3(a) certificates issued; the tax returns submitted by individuals; and third-party information submitted, such as IT3(b) certificates, and retirement and medical scheme contributions. The total register of individuals is analysed in terms of sources of income, deductions, taxable income, and tax credits.

A total of 14 195 663 registered individuals received total income amounting to R3 063.4 billion, with 13 937 924 individuals earning employment income of R2 849.6 billion. Employee income accounted for approximately 93% of total original income, with salaries and wages making up 69.0% as the largest component, followed by fringe benefits at 9.2%.

Business income of R54.2 billion was received by 179 492 individuals and farming income of R4.9 billion was received by 15 491 individuals. Interest income of R48.6 billion and rental income of R13.2 billion were received by 566 310 and 166 611 individuals, respectively. Those declaring dividend income of R5.5 billion totalled 388 262 and 78 420 individuals declared capital gains of R65.7 billion.

Exempt income and losses totalled R65.2 billion for 674 633 individuals. Retirement contributions of R274.2 billion were deducted by 6 980 415 individuals. General tax rebates of R147.4 billion determined the minimum tax thresholds of 14 171 309 individuals. Medical tax credits of R28.4 billion were allowed for 2 813 999 individuals. A total of 7 120 828 individuals had a total tax liability of R531.9 billion. Net income after personal income tax totalled R2 552.0 billion that accrued to 14 195 663 registered individuals.

Nearly 50% of individuals earned less than R79 000, accounting for 9.1% of taxable income. The proportion of individuals with taxable income above R79 000 to R500 000 stood at 41.6% with a taxable income share of 49.5% and a tax liability share of 33.4%. Only 0.8% of individuals were in the above R1.5 million taxable income group, with a taxable income share of 11.9% and a tax liability share of 24.5%.

An analysis by age revealed that approximately 84% of individuals were younger than 55 years, with 56.2% concentrated in the 26 to 45 years age group. Individuals under 55 years accounted for 80.5% of total taxable income and contributed 78.8% of the overall tax liability. The gender analysis indicated that women represented 47.6% of individuals, accounted for 40.7% of taxable income, and bore 35.9% of the total tax liability.

AN OVERVIEW OF THE PERSONAL INCOME TAX SYSTEM FOR THE 2021 TAX YEAR

This analysis provides a summarised overview of the 2021 tax year's personal income tax system based on: information submitted by employers in terms of the annual IRP5 and IT3(a) certificates issued; the tax returns submitted by individuals; and third-party information submitted, such as IT3(b) certificates and, retirement and medical scheme contributions. The total register of individuals is analysed in terms of sources of income, deductions, taxable income, and tax credits.

A total of 13 769 326 registered individuals received total income amounting to R2 941.9 billion, with 13 515 709 individuals earning employment income of R2 753.7 billion. Employee income accounted for approximately 94% of total original income, with salaries and wages making up 68.8% as the largest component, followed by fringe benefits at 9.5%.

Business income of R48.7 billion was received by 152 128 individuals and farming income of R6.0 billion was received by 15 614 individuals. Interest income of R36.0 billion and rental income of R13.2 billion were received by 493 204 and 169 746 individuals, respectively. Those declaring dividend income of R4.1 billion totalled 333 954 and 69 243 individuals declared capital gains of R57.2 billion.

Exempt income and losses totalled R57.2 billion for 580 235 individuals. Retirement contributions of R267.5 billion were deducted by 6 706 799 individuals. General tax rebates of R145.9 billion determined the minimum tax thresholds of 13 742 705 individuals. Medical tax credits of R28.9 billion were allowed for 2 737 220 individuals. A total of 6 544 507 individuals had a total tax liability of R498.8 billion. Net income after personal income tax totalled R2 464.1 billion that accrued to 13 769 326 registered individuals.

Approximately 53 % of individuals earned less than R83 100, accounting for 9.9% of taxable income. The proportion of individuals with taxable income above R83 100 to R500 000 stood at 38.8% with a taxable income share of 48.4% and a tax liability share of 32.6%. Only 0.8% of individuals were in the above R1.5 million taxable income group, with a taxable income share of 11.6% and a tax liability share of 24.2%.

An analysis by age revealed that approximately 83% of individuals were younger than 55 years, with 54.6% concentrated in the 26 to 45 years age group. Individuals under 55 years accounted for 80.0% of total taxable income and contributed 78.6% of the overall tax liability. The gender analysis indicated that women represented 47.9% of individuals, accounted for 41.4% of taxable income, and bore 36.6% of the total tax liability.

AN OVERVIEW OF THE PERSONAL INCOME TAX SYSTEM FOR THE 2022 TAX YEAR

This analysis provides a summarised overview of the 2022 tax year personal income tax system based on the information submitted by employers in terms of the annual IRP5 and IT3(a) certificates issued, the tax returns submitted by individuals and third-party information submitted such as IT3(b) certificates, retirement and medical scheme contributions. The total register of individuals is analysed in terms of sources of income, deductions, taxable income, and tax credits.

A total of 14 111 733 registered individuals received total income amounting to R3 224.7 billion, with 13 866 585 individuals earning employment income of R3 007.3 billion. Employee income accounted for approximately 93% of total original income, with salaries and wages making up 67.8% as the largest component, followed by fringe benefits at 9.1%.

Business income of R56.0 billion received by 145 001 individuals and farming income of R5.7 billion received by 14 401 individuals. Interest income of R33.0 billion and rental income of R14.2 billion were received by 486 981 and 169 374 individuals, respectively. Those declaring dividend income of R4.7 billion totalled 394 919 and 92 167 individuals declared capital gains of R77.6 billion.

Exempt income and losses totalled R69.0 billion for 564 802 individuals. Retirement contributions of R279.8 billion were deducted by 6 620 595 individuals. General tax rebates of R158.0 billion determined the minimum tax thresholds of 14 086 362 individuals. Medical tax credits of R30.5 billion were allowed for 2 784 627 individuals. A total of 6 895 625 individuals had a total tax liability of R557.1 billion. Net income after personal income tax totalled R2 692.2 billion that accrued to 14 111 733 registered individuals.

Approximately 52% of individuals earned less than R87 300, accounting for 9.4% of taxable income. The proportion of individuals with taxable income above R87 300 to R500 000 stood at 39.1% with a taxable income share of 46.5% and a tax liability share of 30.3%. Only 0.9% of individuals were in the above R1.5 million taxable income group, with a taxable income share of 12.8% and a tax liability share of 26.3%.

An analysis by age revealed that approximately 84% of individuals were below 55 years of age, with 56.4% concentrated in the 26 to 45 years age group. Individuals under 55 years accounted for 80.1% of total taxable income and contributed 78.4% of the overall tax liability. The gender analysis indicated that women represented 48.4% of individuals, accounted for 41.6% of taxable income, and bore 36.7% of the total tax liability.

AN OVERVIEW OF THE PERSONAL INCOME TAX SYSTEM FOR THE 2023 TAX YEAR

This analysis provides a summarised overview of the 2023 tax year's personal income tax system based on: information submitted by employers in terms of the annual IRP5 and IT3(a) certificates issued; the tax returns submitted by individuals; and third-party information submitted, such as IT3(b) certificates and, retirement and medical scheme contributions. The total register of individuals is analysed in terms of sources of income, deductions, taxable income, and tax credits.

A total of 14 140 736 registered individuals received income amounting to R3 452.9 billion, with 13 895 259 individuals earning employment income of R3 221.4 billion. Employee income accounted for approximately 94% of total original income, with salaries and wages making up 67.6% as the largest component, followed by fringe benefits at 8.8%.

Business income of R57.7 billion was received by 140 895 individuals and farming income of R5.2 billion was received by 12 961 individuals. Interest income of R54.4 billion and rental income of R14.2 billion were received by 732 533 and 159 483 individuals, respectively. Those declaring dividend income of R7.0 billion totalled 448 101 and 78 078 individuals declared capital gains of R70.0 billion.

Exempt income and losses totalled R70.0 billion for 788 528 individuals. Retirement contributions of R293.0 billion were deducted by 6 706 582 individuals. General tax rebates of R168.3 billion determined the minimum tax thresholds of 14 116 718 individuals. Medical tax credits of R33.4 billion were allowed for 2 947 843 individuals. A total of 7 088 215 individuals had a final tax liability of R600.0 billion. Net income after personal income tax totalled R2 875.9 billion that accrued to 14 140 736 registered individuals.

Nearly 51% of individuals earned less than R91 250, accounting for 9.1% of taxable income. The proportion of individuals with taxable income above R91 250 to R500 000 stood at 39.2% with a taxable income share of 44.3% and a tax liability share of 27.7%. Only 1.0% of individuals were in the above R1.5 million taxable income group, with a taxable income share of 13.9% and a tax liability share of 28.3%.

An analysis by age revealed that approximately 84% of individuals were younger than 55 years, with 56.5% concentrated in the 26 to 45 years age group. Individuals under 55 years accounted for around 80% of total taxable income and contributed 77.9% of the overall tax liability. The gender analysis indicated that women represented 48.4% of individuals, accounted for 42.0% of taxable income, and bore 37.2% of the total tax liability.

AN OVERVIEW OF THE PERSONAL INCOME TAX SYSTEM FOR THE 2024 TAX YEAR

This analysis provides a summarised overview of the 2024 tax year's personal income tax system based on: information submitted by employers in terms of the annual IRP5 and IT3(a) certificates issued; the tax returns submitted by individuals; and third-party information submitted, such as IT3(b) certificates and, retirement and medical scheme contributions. The total register of individuals is analysed in terms of sources of income, deductions, taxable income, and tax credits.

A total of 14 222 040 registered individuals received total income amounting to R3 701.0 billion, with 13 982 383 individuals earning employment income of R3 448.5 billion. Employee income accounted for approximately 93% of total original income, with salaries and wages making up 67.9% as the largest component, followed by fringe benefits at 8.9%.

Business income of R57.6 billion was received by 132 842 individuals and farming income of R4.6 billion was received by 11 467 individuals. Interest income of R82.5 billion and rental income of R13.5 billion were received by 1 075 022 and 142 000 individuals, respectively. Those declaring dividend income of R6.4 billion totalled 407 797 and 74 542 individuals declared capital gains of R68.9 billion.

Exempt income and losses totalled R72.6 billion for 1 043 130 individuals. Retirement contributions of R313.3 billion were deducted by 6 741 643 individuals. General tax rebates of R180.1 billion determined the minimum tax thresholds of 14 194 742 individuals. Medical tax credits of R36.7 billion were allowed for 3 059 498 individuals. A total of 7 296 049 individuals had a total tax liability of R645.7 billion. Net income after personal income tax totalled R3 081.2 billion that accrued to 14 222 040 registered individuals.

Nearly 50% of individuals earned less than R95 750, accounting for 8.8% of taxable income. The proportion of individuals with taxable income above R95 750 to R500 000 stood at 39.3% with a taxable income share of 42.3% and a tax liability share of 25.4%. Only 1.2% of individuals were in the above R1.5 million taxable income group, with a taxable income share of 15.0% and a tax liability share of 30.1%.

An analysis by age revealed that approximately 84% of individuals were younger than 55 years, with 56.0% concentrated in the 26 to 45 year age group. Individuals under 55 years accounted for around 79% of total taxable income and contributed 76.8% of the overall tax liability. The gender analysis indicated that women represented 48.7% of individuals, accounted for 42.3% of taxable income, and bore 37.6% of the total tax liability.

Refer to *Tables A2.11.1 to A2.11.13* for more detail.

PERSONAL INCOME TAX

1. SARS' source of income code is used to classify according to the Standard Industrial Classification (SIC) system. SARS' source code is not fully aligned with the SIC system that Statistics South Africa uses.

2. Includes the following SARS sectors – Bricks, ceramic, glass, cement and similar products; Chemicals and chemical, rubber and plastic products; Clothing and footwear; Coal and petroleum products; Food, drink and tobacco; Leather, leather goods and fur (excl. footwear & clothing); Machinery and related items; Metal (including metal products); Other manufacturing industries; Paper, printing and publishing; Scientific, optical and similar equipment; Textiles; Transport equipment; and Wood, wood products and furniture.

3. Includes the following SARS sectors – Catering and accommodation; Retail trade; Specialised repair services; Vehicles, parts and accessories; and Wholesale trade.

4. Includes the following SARS sectors – Agencies and other services; Financing, insurance, real estate and business services; Long term insurance; and Research and scientific institutes.

5. Includes the following SARS sectors – Educational services; Medical, dental and other health and veterinary services; Personal and household services; Public administration; Recreation and cultural services; and Social and related community services.

6. Includes where the source of income was indicated as Other (as per SARS source code) or where the source of income was left blank on the return.

1. The Agencies and other services sector may be overstated due to it being the default/list sector selected by taxpayers upon registration at SARS.

2. Includes assessed losses of farmers.

3. Includes where the sector was indicated as Other (as per SARS source code) or where the sector was left blank on the return.

1. From the 2015 tax year no medical expenses deductions will appear on assessments as the additional medical expenses tax credit is treated as a rebate against taxes and not a deduction. Medical tax credit (rebates and additional expenses allowed) has been added for comparative purposes. High deductions values could be wrong and are being investigated.

KEY FACTS

The analyses of Company Income Tax (CIT) returns assessed for the 2023 tax year and CIT collections for the 2024/25 fiscal year show that:

- At 17.4%, CIT remained the third-largest contributor to total tax revenue collected in the 2024/25 fiscal year. Although this outcome exceeds the 15.9% and 16.4% share ratios for the 2019/20 and 2020/21 financial years respectively, it has dropped slightly compared to 2023/24 fiscal year. CIT revenue was lower than the 20.7% and 20.6% achieved in the 2021/22 and 2022/23 financial years. The contribution ratio of CIT to total tax revenue is still well below the peak of 26.7% achieved before the 2009/10 global financial crisis.
- CIT collections for the 2024/25 financial year increased slightly from those realised in the 2023/24 financial year by R6.4 billion (2.0%). The year-on-year growth was driven mainly by the improvement in the *Financial Intermediation, Insurance, Real-estate, and Business Services; Electricity, Gas, and Water*; and *Wholesale and Retail Trade* sectors.
- These sectors were boosted by improved electricity supply from April 2024 and better performing logistics networks, providing much-needed relief to producers. The improvement in household finances, with disposable income buoyed by moderating inflation, enabled companies gradually to recover from the previous year's cost pressures, which emanated from intense load-shedding and inefficient network industries. These economic developments were pivotal in boosting revenue collections.
- The *Financial Intermediation, Insurance, Real-estate, and Business Services* sector's performance was boosted by the financial services companies within both the Large business and international (LB&I) and Small, medium, and micro enterprises (SMME) segments. Profitability was buoyed by the Gross Operating Surplus (GOS), which recorded consecutive year-on-year growth of 0.6% in Q1-2025 following another year-on-year growth of 5.0% in Q4-2024. Furthermore, interest rates, which started to decline from September 2024, also contributed positively to the *Finance* sector's performance. A reduction in interest rates to 11.00% in January 2025 provided much-needed relief to companies and consumers, following the stabilising inflation rate, which has remained on average at 4.4% for the whole 2024 calendar year. The inflation rate subsequently declined to 2.7% in March 2025, remaining below SARB's 3–6% target range at the time (since 12 November 2025, it has been revised to 3%, with a tolerance band of plus or minus 1 percentage point).
- The positive performance in the *Electricity, Gas, and Water* sector was predominantly driven by payments from a new generation company paying provisional taxes for the first time, and by a positive performance among renewable energy companies. An increase in alternative energy production (generation) companies, following the high incidences of load-shedding of

previous years, also contributed to the growth. These companies are capitalising on the South African electricity supply crises that have impacted both household and business activities.

- Growth in the *Wholesale and Retail Trade* sector was realised despite retail trade sales contracting year-on-year by 2.1% in March 2025, following an upwardly revised contraction of 7.5% in February 2025. The growth comes after months of no loadshedding since April 2024, as well as the continuous decline in interest and inflation rates.
- Domestic demand is expected to strengthen, supported by firmer consumer confidence. A recovery in real household incomes was driven by a lower inflation rate of 2.7% in March 2025, slightly down from 3.2% recorded in February 2025 and remaining within the SARB's 3–6% target band. Debt-service costs are falling as interest rates continue to be reduced. Moreover, the two-pot savings withdrawals increased households' disposable income.
- More than 4.1 million companies were registered for CIT on 31 March 2025, a contraction of 500 345 (13.7%) versus 31 March 2024. Of these companies, SARS expected 1 474 309 companies to submit income tax returns for the 2023 tax year, of which 83.3% filed and assessed in the same tax year.
- Of the 1 228 437 companies assessed by 31 August 2025 for the 2023 tax year, 21.7% declared a positive taxable income; 54.0% had taxable income equal to zero; and the remaining 24.3% reported an assessed loss.
- The concentrated nature of the South African economy is evident in that only 630 large companies (0.2% of the companies with positive taxable income) each had taxable income of more than R200 million and were liable for 59.6% of the CIT assessed.
- The *Financial Intermediation, Insurance, Real-estate, and Business Services* sector accounted for 279 525 (22.8%) of the assessed companies and was liable for 37.1% of the CIT assessed, contributing the most among all the sectors.
- Since 31 August 2025, of the 1 228 437 companies assessed in respect of the 2023 tax year, 185 022 (15.1%) were assessed as Small Business Corporations (SBCs) and taxed at the applicable graduated income tax rates. The remainder was taxed at either the fixed company tax rate of 27% or at the graduated income tax rates for micro-businesses that elected to pay only Turnover Tax.
- CIT collections improved after the introduction of the rule that provisional tax payments of at least 80% of a company's tax liability for the applicable year of assessment are payable by the end of that year otherwise the company could be liable for penalties, as well as a more rigorous application of paragraph 19(3) of the Fourth Schedule to the Income Tax Act. The third provisional tax payments decreased from 12.9% of the total provisional tax collections in 2009/10 to 3.4% in the 2024/25 financial year.
- During the 2023/24 financial year, 53.0% of the tax paid relates to the 2023 tax year, 45.9% to the 2024 tax year, and 1.0% to earlier tax years.

POST-COVID-19 TAX MEASURES

- Despite the COVID-19 pandemic necessitating a downward revision of the estimated tax revenue for the 2020/21 fiscal year, the dire effect on the economy did not persist. CIT collections rebounded in the 2021/22 fiscal year. This recovery was driven mainly by the *Mining and Quarrying; Financial Intermediation, Insurance, Real-estate, and Business Services;* and *Manufacturing* sectors. However, the *Mining and Quarrying* sector's positive trend retreated from the 2022/23 fiscal year and sharply reversed in the 2023/24 fiscal year and has continued on a downward trend through to the 2024/25 fiscal year, with the *Manufacturing* sector following suit.
- The *Mining and Quarrying* sector continued throughout the 2021/22 and 2022/23 fiscal years to be resilient and remained on a positive trajectory. This was due to the robust global performance of commodity prices, particularly for PGMs, Iron Ore and Coal. However, during the fiscal years 2023/24 and 2024/25, the *Mining and Quarrying* industry was harmed by weak commodity prices and decreased demand for commodities. The lower commodity prices for PGMs, Iron Ore and Coal; a decline in the total value of mineral sales for most of the 2023 calendar year; a marginal improvement of mineral sales in the 2024 calendar year, although still much lower than the 2021 and 2022 calendar years; and mining input costs rising year-on-year to 3.4% in March 2025 were the main drivers of the downturn in this sector. This decline occurred despite the high exchange rate during 2023 and for most of the 2024 calendar years.
- The *Manufacturing* sector contracted in the 2023/24 fiscal year because of supply-side constraints that increased production costs and harmed profitability. Increased global inflation and interest rates resulted in tighter global financial conditions and lower profit margins. However, in the 2024/25 fiscal year, production costs have stabilised, mainly supported by lower inflation and declining interest rates.
- The *Financial Intermediation, Insurance, Real-estate, and Business Services* sector recovered as pandemic lockdown measures eased and has continued on a positive trajectory. Profitability was buoyed by growth in the South African economy, as well as the declining interest and inflation rates. Furthermore, this growth is in line with GOS growth of 0.6% in Q1-2025.
- South Africa's GDP recorded a growth rate of 0.6% in 2024, which was lower than the adjusted growth rates of 0.7% and 1.9% in the 2023 and 2022 calendar years, respectively. The 2024/25 financial year saw a growth of R6.4 billion (2.0%) in CIT collections, which represent a substantial improvement since 2023/24's contraction of R30.8 billion (8.9%).

INTRODUCTION

For income tax purposes, a company that is incorporated or effectively managed in South Africa is considered a South African resident and is liable to pay tax on worldwide income in accordance with the Income Tax Act of 1962. Company Income Tax (CIT) is a tax levied on the taxable income (gross income less exemptions and allowable deductions) of companies and close corporations. Before the 2023/24 fiscal year, CIT was levied at a marginal rate of 28%; however, this rate was adjusted downward to 27% for years of assessments ending on or after 31 March 2023. Small Business Corporations (SBCs) have a special tax dispensation in the form of progressive income tax rates. Micro-businesses that meet specific requirements and have an annual qualifying turnover of R1 million or less are eligible for the turnover tax regime.

For the past 17 years, CIT remained the third largest contributor (after PIT and VAT) in terms of percentage contribution to the total tax revenue and it contributed 17.4% in the 2024/25 fiscal year. Although CIT has maintained its status as the third-largest contributor, its relative contribution to total tax revenue collection has declined from the pre-recession peak of 26.7% in 2008/09 to 15.9% in 2019/20. It has subsequently dropped again to 17.4% in the 2024/25 fiscal year, well below the 20.6% and 18.2% achieved in the 2022/23 and 2023/24 fiscal years, respectively. Although there has been an improvement in the CIT growth, it remains subdued due to the decline of the *Mining and Quarrying* sector.

Worsening this decline were numerous uncertainties, including weak domestic demand, geopolitics, and South Africa's poor port and rail infrastructure. Additionally, the *Mining and Quarrying* sector suffered a sharp decline as the demand for PGMs, mainly in China, decreased because of motor vehicle production shifting from internal combustion engines to electric variants. The changing demand patterns in global automobile markets are making it harder to trade PGMs such as Platinum, Palladium, and Rhodium. Rising year-on-year mining-input costs of 3.4% in March 2025 further weighed down the *Mining and Quarrying* sector.

After the 2008/09 financial crisis, the contribution ratio of CIT to total tax revenue continued to decline, and the lockdown measures to curb the spread of the coronavirus depressed collections further. Contrary to expectations, the COVID-19 pandemic's effect on CIT collections was not as severe as the contraction experienced with the financial crisis, with a reported contraction of R30.2 billion (18.1%) in 2009/10 against a nominal decline of R10.6 billion (4.9%) in the 2020/21 fiscal year. Growth of R119.1 billion (58.3%) and R24.2 billion (7.5%) was achieved in the 2021/22 and 2022/23 fiscal years, respectively. However, this growth sharply reversed in the 2023/24 financial year, when CIT collections recorded a decline of R30.8 billion (8.9%) on the back of lower company profitability. This decline was due to the struggling *Mining and Quarrying*, *Manufacturing*, and *Transport, Storage and Communication* sectors. CIT collections have subsequently grown in the 2024/25 fiscal year by R6.4 billion (2.0%) owing to an improvement in the *Financial Intermediation, Insurance, Real-estate, and Business Services; Electricity, Gas, and Water; and Wholesale and Retail Trade* sectors.

The reduction in the CIT-to-GDP ratio reflects these collection trends. CIT-to-GDP dropped from 6.3% to 3.6% for fiscal years 2008/09 to 2020/21, recovered significantly to 5.1% in 2022/23, and then declined to 4.4% in the 2024/25 financial year (tracking the events elaborated above). CIT performance has also been affected by assessed losses carried forward and the pace of domestic and global economic recovery. Performance should be enhanced by the new rule that allows assessed

losses brought forward from a previous year to be offset only against a maximum of 80% of the current year's taxable income or R1 million, whichever is higher. The new rule applies to any year of assessment starting on or after 1 April 2022.

CIT collections for the 2024/25 financial year grew from the 2023/24 financial year by R6.4 billion (2.0%). This improved performance was mainly as a result of the positive year-on-year growth in the *Financial Intermediation, Insurance, Real-estate, and Business Services; Electricity, Gas, and Water;* and *Wholesale and Retail Trade* sectors, which grew year-on-year.

The growth in Net CIT for the 2024/25 financial year was boosted by the *Financial Intermediation, Insurance, Real-estate, and Business Services* sector's performance as achieved mainly by the financial services companies within the Large Business (Long-term and Short-term insurers) and Other segments. Profitability was buoyed by the GOS performance, which recorded consecutive year-on-year growth of 0.6% in Q1-2025 following a year-on-year growth of 5.0% in Q4-2024. Furthermore, interest rates started to be reduced from September 2024, which also contributed positively to the *Financial Intermediation, Insurance, Real-estate, and Business Services* sector's performance. Further reduction in interest rates to 11.00% in January 2025 provided much-needed relief to companies and consumers, following the stabilising inflation rate, which has remained on average at 4.4% for the whole 2024 calendar year. The inflation rate subsequently declined to 2.7% in March 2025, remaining below SARB's 3–6% target range at the time (since 12 November 2025, it has been revised to 3%, with a tolerance band of plus or minus 1 percentage point).

As with the *Financial Intermediation, Insurance, Real-estate, and Business Services* sector, the *Electricity* sector's positive contribution in the 2024/25 financial year was supported by an increase in alternative energy production (generation) companies, following the high incidences of load-shedding of previous years, as well as increased electricity tariffs on an annual basis. These companies are taking advantage of the South African crises that have affected both household and business activities.

Electricity production (generation) increased by 1.1% year-on-year in March 2025, following a growth of 0.2% in February 2025. It recorded consecutive year-on-year growth from 2023/24 to 2024/25. The growth in production is in line with the growth in consumption, which also recorded year-on-year growth for eight consecutive months since April 2024, but declined in December 2024 by 0.4% and continued to decline by 1.5% in March 2025.

Growth in the *Wholesale and Retail Trade* sector was realised despite retail trade sales, which recorded a year-on-year contraction of 2.1% in March 2025, following a growth of 7.5% in February 2025. The growth comes after months of no load-shedding since April 2024, as well as the reduction in interest and inflation rates.

Domestic demand is expected to strengthen, supported by firmer consumer confidence; a recovery in real household incomes driven by a lower inflation rate of 2.7% in March 2025; and lower debt-service costs due to lower interest rates. Moreover, the two-pot savings withdrawals increased households' disposable income.

In contrast, CIT collections were dragged down by the negative performance of the *Mining and Quarrying* sector, with revenue from Large Corporates contracting by R12.4 billion (29.6%). The *Mining* sector fell short of expectations due to (a) lower commodity prices for Palladium, Iron Ore, and Coal; (b) volatility in the total value of mineral sales from the 2024 calendar year, which remained

much lower than in the 2021 and 2022 calendar years; and (c) mining-input costs rising by 3.4% year-on-year as at March 2025.

The lower payments from the *Mining and Quarrying* sector continued to suffer from the poor performance of PGMs, Iron Ore, as well as Coal commodities, which were negatively impacted by the volatility in commodity prices driven by geopolitical conflicts and economic challenges in major consuming countries such as China and the United States.

Mining production levels show a negative trend, having recorded another year-on-year contraction of 2.8% in March 2025, following a contraction of 9.7% in February 2025. This recent contraction was driven mainly by the negative contribution of PGMs (-3.0%) and Gold (-1.5%).

Trends in the *Mining and Quarrying* sector are presented in Chapter 6, *Table 6.7: Minerals and Petroleum Resource Royalties payments by commodity, 2022/23 to 2024/25*.

Although the current headline CIT tax rate is 27% effective for years of assessment ending on or after 31 March 2023, the effective tax rates by sector are different because of sector-specific tax dispensations and allowable deductions. These include:

- The gold mining formula;
- Long-term insurers;
- Farming deductions and valuations, and
- Accelerated depreciation of capital assets for qualifying expenditure, e.g.
 - Section 12B of the Income Tax Act No. 58 of 1962, relating to the manufacture of renewable energy infrastructure;
 - Section 13quat of the Income Tax Act No. 58 of 1962, concerning qualifying buildings and improvements in urban development zones;
 - Section 11D of the Income Tax Act No. 58 of 1962, with respect to research and development (R&D) expenditure incurred.

More details on sector-specific tax dispensations can be obtained from the Income Tax Act No. 58 of 1962.

SBCs with a gross income of not more than R20 million for a particular year of assessment are eligible for a special tax dispensation in the form of progressive income tax rates rather than the fixed tax rate.

Micro-businesses can choose to pay only turnover tax, provided they have an annual qualifying turnover of R1 million or less in a year of assessment and meet specific requirements. Turnover tax is a separate tax regime for micro-businesses that aims to reduce their administrative burden. Available for micro-businesses, the turnover-tax system replaces Income Tax (including Capital Gains Tax), Provisional Tax, and Dividends Tax (DT). Turnover tax has a progressive tax rate structure with a maximum marginal rate of 3%, with effect from 1 March 2015.

Capital Gains Tax (CGT) is not raised separately from CIT. A capital gain arises when a company disposes of an asset for proceeds that exceed its base cost. The taxable portion of capital gains is included in CIT taxable income at an inclusion rate of 80% for the years of assessment beginning on or

after 1 March 2016. For the years of assessment beginning on or after 1 March 2012, the inclusion rate was 66.6%. Before that, it was 50%. More information about CGT levied on companies can be found in Chapter 6 of this publication.

On 1 April 2012, DT replaced Secondary Tax on Companies (STC). DT is levied on certain categories of shareholders (beneficial owners of dividends) when they receive dividend distributions from companies. DT was introduced at a rate of 15% and was subsequently increased to 20%, effective 22 February 2017.

This chapter on CIT reviews:

- Provisional tax payments;
- Number of companies on the tax register;
- Taxable income and tax assessed;
- Companies with assessed losses or profits; and
- Small Business Corporations.

PROVISIONAL TAX PAYMENTS

All companies are classified as provisional taxpayers and must adhere to the provisional tax payment system. This system requires taxpayers to provide for their final tax liability by paying two provisional tax payments, amounting to at least 80% of the final tax liability, during the applicable year of assessment (or the lesser of 90% of actual taxable income and the basic amount if taxable income does not exceed R1 million). After the tax year-ends, a third voluntary “top-up” payment may be made. This payment system imposes penalties and interest for non-compliance.

The first provisional tax payment is required within six months of the start of the year of assessment. The second provisional tax payment must be made no later than the last business day of the year of assessment. The introduction of the 80%-rule for all years of assessment, beginning on or after 1 March 2009, requires companies with taxable income of more than R1 million to settle at least 80% of their tax liability for the year by the time they make their second provisional tax payment. Companies that fail to comply with this requirement can incur a 20% penalty for the underpayment of provisional tax. The third payment is a voluntary “top-up” payment to avoid paying interest. It may be made within six months from the end of the year of assessment or within seven months from the end of the year of assessment if the year of assessment ends in February.

If SARS considers that the taxable income estimates for a company’s first or second provisional tax return have been understated, the company may be required, in terms of paragraph 19(3) of the Fourth Schedule to the Income Tax Act, to pay provisional tax on an increased taxable income estimate. The additional payment resulting from the paragraph 19(3) provision is captured as either a first or second provisional tax payment, even though it was paid after the due date.

As a result of SARS’s more rigorous application of paragraph 19(3) of the Fourth Schedule to the Income Tax Act, as well as improved compliance with the provisional tax rule (the 80% rule for second provisional tax payments), the value of third provisional tax payments has declined significantly. Third provisional tax payments have remained on average less than R8.0 billion from the 2021 to 2024 tax years. However, third payments increase relatively to R8.8 billion (a contribution of 2.9% for the 2024 tax year). Third payments are still significantly lower than the maximum of 20% permitted for third provisional tax payments and assessment payments, as shown in *Table 3.1* and *Figure 3.1*.

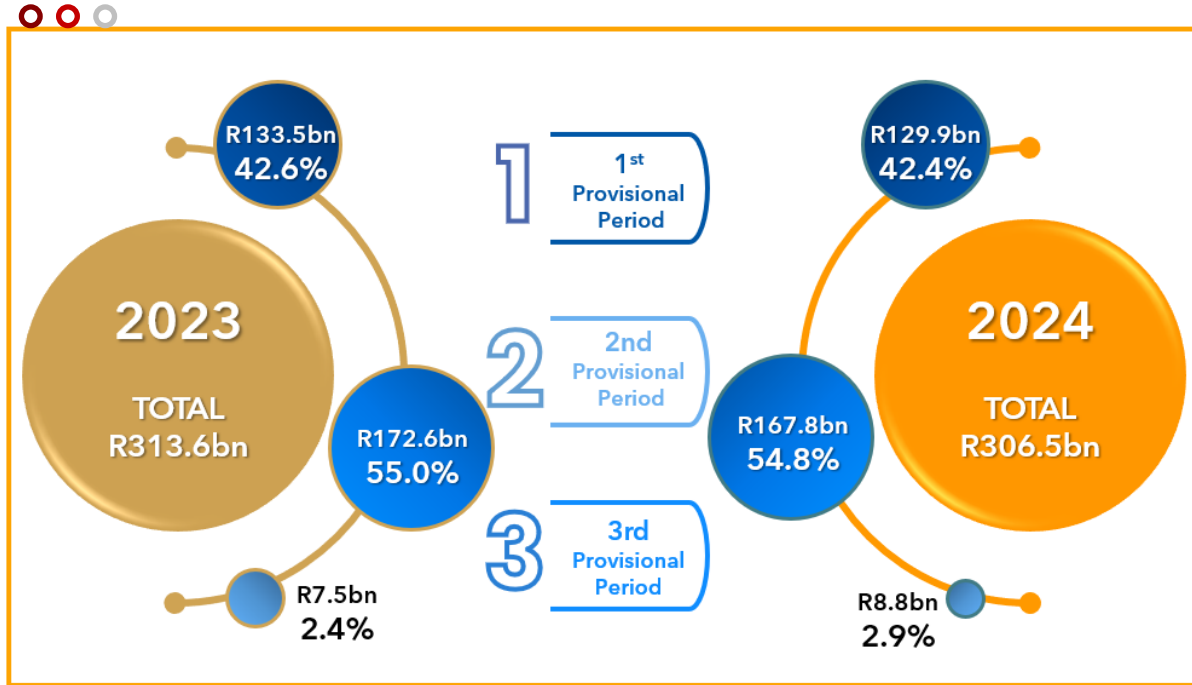

Table 3.1: Provisional tax payments by provisional period by tax year, 2021–2024

Period R million Tax year	1st Provisional period	Percentage change	2nd Provisional period	Percentage change	3rd Provisional period	Percentage change	Total
2021	112 760	33.2%	171 359	50.6%	7 729	-9.0%	291 848
2022	137 836	22.2%	189 093	10.3%	7 949	2.8%	334 878
2023	133 522	-3.1%	172 598	-8.7%	7 488	-5.8%	313 608
2024	129 881	-2.7%	167 802	-2.8%	8 779	17.3%	306 463
Percentage of total							
2021	38.6%		58.7%		2.6%		100.0%
2022	41.2%		56.5%		2.4%		100.0%
2023	42.6%		55.0%		2.4%		100.0%
2024	42.4%		54.8%		2.9%		100.0%

The provisional tax payments system requires that taxpayers make two provisional tax payments, which must account for at least 80% of their final tax liability to avoid penalties and interest, during the applicable year of assessment. The percentage contribution of provisional tax payments, as depicted in *Table 3.1* relates, to the total provisional tax payments made for the applicable year of assessment or tax year, and does not refer to the final tax liability. This is because the final tax liability still needs to be determined, which gives rise to either a refund or an assessment payment.

The percentage contribution of the first provisional tax payments increased from 38.6% in 2021 to 42.4% in the 2024 tax year, whereas the second provisional tax payments decreased slightly from 58.7% in 2021 to 54.8% in the 2024 tax year. These percentages are likely to change as companies continue to submit their provisional tax returns for the respective tax years.

Figure 3.1: Provisional tax payments by provisional period, 2023 and 2024

The introduction of the 80%-rule as well as a more rigorous application of paragraph 19(3) of the Fourth Schedule to the Income Tax Act improved CIT compliance and brought most of the CIT collections into the applicable year of assessment. The 80%-rule and the application of paragraph 19(3) also substantially reduced third provisional payments and payments on assessment.

Figure 3.2 shows the shift from third provisional tax payments to first and second provisional tax payments by provisional period and fiscal year from 2009/10 to 2024/25. Third provisional tax payments declined from 12.9% of the total provisional tax collections in 2009/10 to 3.4% in 2024/25 and have remained on average at 2.9% for the past five fiscal years (see Table 3.1.1).

Figure 3.2: Provisional tax payments by provisional period and fiscal year (%), 2009/10–2024/25

Company Tax-Year

Companies are allowed to select their financial year-ends, and these need not coincide with the fiscal year (i.e., from 1 April to 31 March) or the period from 1 March to the end of February, which is the tax year for individuals and trusts. The year of assessment, or tax year, of a company corresponds with its financial year-end. Companies can choose financial years ending in any month of the year. Hence, not all CIT paid in a tax year is attributable to income earned in the same year. This is because tax returns are submitted and assessed not later than a year after the respective company’s year-end.

For this reason, provisional tax payments for a specific tax year are made over three fiscal years, as illustrated below in Table 3.2.

Table 3.2 illustrates the provisional tax payment timeline as determined by the companies’ financial year-ends.

Table 3.2: Example of a timeline for provisional tax payments

Fiscal year Date due	Company financial year-end 2024											
	Jan	Feb ¹	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

30-Jun-25	2024 3rd											

¹ If the tax year of a company ends at the end of February, the third payment is then due seven months after the end of the tax year. In this case the third payment for 2024 would be due on 30 September 2024.

The five largest groups of CIT provisional taxpayers are those with financial years ending in February, March, June, September, and December. Companies with June and December year-ends contribute approximately 58.0% to the total provisional tax payments for any fiscal year. These are mainly companies in the *Financial Intermediation, Insurance, Real-estate, and Business Services; Manufacturing; Wholesale and Retail Trade;* as well as the *Mining and Quarrying* sectors. Figure 3.3 breaks down 2023 and 2024 provisional tax payments according to the different financial year-ends.

The assessments for a tax year are lagging because of the provision that tax returns must be filed not later than a year after the company’s year-end. However, the provisional tax payment system is designed to ensure that all, or almost all, payments covering a company’s final CIT liability are received earlier. Provisional tax payments for a specific tax year are made over several fiscal years, as illustrated in Table 3.3. During the 2023/24 financial year, about 53.0% of the tax paid related to the 2023 tax year, 45.9% related to the 2024 tax year, and 1.0% related to earlier tax years.

Figure 3.3: Provisional tax payments by companies' financial year-end, 2023 and 2024

Table 3.3: Provisional tax payments by tax year and fiscal year, 2020/21–2024/25

The global financial crisis caused the collection of provisional tax — the most significant contributor to CIT— to drop to its lowest level of R135.1 billion in 2009/10, but it has since recovered. It has grown by a Compound Annual Growth Rate (CAGR) of 6.3% over the past 14 years, from R137.1 billion in 2010/11, to R323.4 billion in 2024/25 (albeit less than the R348.6 billion recorded in the 2022/23 financial year). Total net CIT collections amounted to R323.2 billion in the 2024/25 financial year. Although this was higher in nominal terms than the R167.2 billion collected in 2008/09 (before the global financial crisis), it still represents a decline in real terms.

For the 2021 tax year, 24.6% of assessed companies had assessed losses (mostly incurred during and brought forward since the global financial crisis). This ratio has decreased slightly, as 23.8% of assessed companies recorded assessed losses in 2022. Although company profits started to improve, the ratio of assessed losses increased again in the latter tax years, to 27.4% for the 2024 tax year. In the 2024/25 financial year, companies realised substantial gains. However, it remains to be seen how many companies will recover from an assessed loss to a positive taxable income position.

Table A3.1.1 shows provisional tax payments by company financial year-end, provisional tax period, and fiscal year. Table A3.1.2 shows the same information by tax year. Table A3.2.1 breaks down provisional tax payments by sector and by fiscal year.

Figure 3.4 illustrates the fiscal-year collections recorded in Table 3.3 by disaggregating them by monthly collections. The significant contributions of companies with June and December financial year-ends are evident.

Figure 3.4: Monthly provisional tax payments by companies for fiscal years, 2021/22–2024/25

NUMBER OF COMPANIES ON THE TAX REGISTER AND EXPECTED RETURNS

On 31 March 2025, SARS had more than 4.1 million companies on the register, an increase of 500 345 (13.7%) since the 2023/24 fiscal year. The increase can be partly attributed to the Companies and Intellectual Property Commission (CIPC), which has significantly improved service delivery by digitising company registration processes. This simplification reduces the administrative burden on businesses and creates a more accessible and efficient business environment. The integration of CIPC systems with SARS's systems also ensures that companies are adequately registered for tax. On 31 March 2025, most of the 4.1 million companies on the SARS register were either inactive or dormant, with only 1 377 809 expected to submit tax returns for the 2024 tax year.

The *Tax Statistics* publication follows the definition of filing rate, as indicated in the International Monetary Fund's (IMF) Tax Administration and Diagnostic Tool (TADAT). It defines the filing rate for CIT and PIT as the extent to which returns expected from registered taxpayers are filed. The proportion of returns that have been received by SARS are more appropriately measured against the number of returns expected to be submitted than against the number of taxpayers on the register.

The number of returns expected for a particular tax year is determined by the number of companies that have been assessed for that tax year, plus the number of companies with an "active" status that were assessed in respect of either of the two tax years before the relevant tax year, but that have not yet been assessed for the tax year in question.

The 1 453 523 companies expected to submit returns for the 2021 tax year were slightly fewer than in the 2022 and 2023 tax years, when the expected number was 1 476 897 and 1 474 309, respectively. For 2023, only 83.3% of the companies expected to submit returns had been assessed by 31 August 2025, whereas only 63.0% of the companies expected to submit returns in 2024 were assessed (*Table 3.4*). At the time of data extraction, the number of assessments finalised for 2024 (the most

recent completed tax year) was relatively few because taxpayers have until 12 months after the end of their financial year to submit their returns.

Table 3.4: Number of companies, 2021–2024

Date	Registered ¹	Percentage growth in register	Tax year	Expected to submit returns ²	Assessed	Percentage assessed
31-Mar-22	3 532 646	13.5%	2021	1 453 523	1 299 676	89.4%
31-Mar-23	3 926 252	11.1%	2022	1 476 897	1 315 081	89.0%
31-Mar-24	3 644 147	-7.2%	2023	1 474 309	1 228 437	83.3%
31-Mar-25	4 144 492	13.7%	2024	1 377 809	867 337	63.0%

1. Excludes cases where status is in suspense or address unknown. The tax year for companies is normally the financial year of the company for financial reporting purposes.

2. These are companies that are active and not dormant.

Provisional Tax as an Indicator of the Completeness of Assessments

The value of provisional tax collections for previous tax years (2021–2023) was more than 98.5% of the value of the final liability, as reflected in the issued assessments. Provisional tax collections for a specific tax year are received by SARS well before assessments for a specific tax year are raised. Provisional tax collections enable extrapolations of tax collections and lead to timelier analyses.

Tax assessed as a percentage of provisional tax payments received for a relevant tax year is a good gauge of the completeness and accuracy of the issued assessments.

Table 3.5 shows the tax assessed for a specific tax year against the provisional tax payments received for those tax years. For the 2024 tax year, higher provisional tax payments were paid compared to the actual tax assessed to date (31 August 2025). Of all the years under review, the assessment process for the 2021 and 2022 tax years were almost complete; therefore, the total tax assessed exceeds or is close to the provisional tax payments received.

Table 3.5: Provisional tax payments and tax assessed by tax year, 2021–2024

R million Tax year	Provisional tax payments	Tax assessed	Tax assessed as % of provisional tax payments
2021	291 848	294 131	100.8%
2022	334 878	337 416	100.8%
2023	313 608	308 864	98.5%
2024	306 463	195 590	63.8%

The tables in the remainder of this chapter show tax assessed as a percentage of provisional tax collections, rather than the number of companies assessed as a percentage of companies expected to submit.

TAXABLE INCOME AND TAX ASSESSED

Distribution by Taxable Income Group

Table 3.6 shows the average tax rates, for various taxable income groups, of companies assessed in respect of the 2023 tax year. Although the statutory company tax rate was 28% before it was reduced to 27% for tax years ending on or after 31 March 2023, some companies are liable for CIT at different

tax rates, because of sector-and segment-specific dispensations. The effective tax rates for companies will vary because of various tax rates and allowable deductions (such as those for Long-term Insurance, Oil & Gas and Gold-mining companies). Graduated tax rates are applied to SBCs and the effect can be seen mainly in the R1 to R1 million taxable income grouping.

The taxable income total in the table below is based on taxable income greater than zero. The number of taxpayers and tax assessed totals are the totals for all categories of taxable income. The average tax rate for all categories is less than 28%, even though penalties are included in the tax assessed.

Table 3.6: Number of companies, taxable income and tax assessed, 2023

Taxable income group	Number of taxpayers	Taxable income (R million)	Tax assessed (R million)	Average tax rate ¹
Loss	298 865	-1 756 707	67	N/A
R nil	663 181	–	31	N/A
R1 to R1 million	217 516	41 612	8 168	19.6%
R1 million to R100 million	47 680	346 207	95 374	27.5%
R100 million +	1 195	828 263	205 223	24.8%
Total	1 228 437	1 216 082	308 864	25.4%

¹ The Average tax rate is calculated as tax assessed divided by taxable income.

Figure 3.5 shows the distribution of the number of companies assessed, their taxable income, and the tax assessed for 2023 tax year.

Figure 3.5: Assessed companies, taxable income and tax assessed by taxable income group, 2023

¹ Companies with taxable income greater than R100 million constituted 0.1% of the number of companies (not visible in number bar) contributed 68.1% of taxable income and 66.4% of assessed tax.

Table A3.3.1 depicts taxable income and tax assessed by taxable income group for all assessed companies. For the 2023 tax year, 21.7% of all assessed companies reported positive taxable income, a further 24.3% reported assessed losses, and the remaining 54.0% reported zero taxable income.

Table A3.3.2 shows that 59.6% of the tax assessed in 2023 was paid by large companies with taxable income of more than R200 million. These companies comprise only 0.2% of the companies assessed that had positive taxable income. However, almost 96.5% of all assessed companies that had positive taxable income between R1 and R10 million paid only 13.5% of the tax assessed in 2023. This illustrates the concentrated corporate sector of the South African economy.

Distribution by Sector

On 31 August 2025, the *Financial Intermediation, Insurance, Real-estate, and Business Services* sector had the highest number of taxpayers (22.8% of the assessed total) in the 2023 tax year. This sector accounted for 37.1% of the tax assessed for the same tax year. The sector with the fewest taxpayers (0.5% of the assessed total) for the 2023 tax year was the *Electricity, Gas, and Water* sector, which accounted for 1.9% of the tax assessed (see *Table A3.4.2* and *Figure 3.6*).

Figure 3.6: Companies' tax assessed by economic activity, 2023

Table A3.4.1 shows the taxable income and tax assessed by sector for all companies. *Table A3.4.2* uses SARS's sector codes to classify assessed information according to the Standard Industrial Classification (SIC 5). SARS sector codes are not yet aligned with the SIC 5 system used by Statistics South Africa.

Tables A3.4.3 to *A3.4.5* show the number of companies reporting positive, negative (assessed loss), and zero taxable income.

Tables A3.5.1 to *A3.5.8* show the number of taxpayers and the tax assessed by economic activity (as displayed in *Table A3.4.2*), disaggregated into taxable income groups for each of the tax years.

Figure 3.7 shows the distribution of taxpayers by economic activity and taxable-income groups for the 2023 tax year. It also shows that across all sectors, most companies reported negative or zero taxable income.

Figure 3.7: Distribution of taxpayers by economic activity and taxable income group, 2023

Tracking the Taxable Income and Tax Liability of a Cohort across Ten Consecutive Tax Years, 2014–2023

To track the variances in the taxable income of corporate taxpayers in a ten-year tax period, SARS identified all corporate taxpayers that were assessed for every tax year from 2014 to 2023 and analysed their taxable income and assessed tax. There were 462 929 corporate taxpayers, an increase of 5.9% in the number of taxpayers included in the current cohort across ten consecutive tax years, versus 2013–2022. This shows an improvement in the filing and declaration compliance of this cohort of companies.

The cumulative taxable income (including positive taxable income and assessed losses) of these corporate taxpayers decreased by a CAGR of 236.1%, from R20.7 billion taxable income in 2014 to an assessed loss of R330.3 billion in 2023 tax year. This significant loss was driven by companies in the taxable income group of assessed loss companies generating less than R500 000 per annum (Table A3.8.2). The percentage contribution of companies in this cohort with positive taxable income, which ranged from 28.1% to 32.5% of the total population per tax year, was less than the percentage contribution of companies with an assessed loss, which ranged from 32.1% to 36.6% of the total population per tax year. The taxable income value of companies with positive taxable income increased from R550.8 billion in 2014 to R1 078.8 billion in 2023. Assessed losses also increased during the same period, from R530.2 billion in 2014 to a high of R2 120.1 billion in 2018, and have subsequently declined to R1 409.1 billion in 2023. For the majority of the ten-year cohort tax year period (2014–2023), assessed losses exceeded positive taxable income. Assessed losses are carried

forward by these companies to be offset against future positive taxable income and will affect the tax revenue receivable. Revenue could also be affected by the new assessed loss limitation rules.

Average taxable income in the ten-year period has deteriorated substantially, particularly for companies with taxable income of less than R500 000 per annum. This deterioration is because of the companies' movement from either a positive taxable income position to an assessed loss or a zero taxable income position.

Table 3.7 illustrates the taxable income and tax assessed in the 2014 and 2023 taxable-income groups for the segment of companies assessed for the 2014–2023 period.

Table 3.7: Assessed companies: taxable income, tax assessed, and average tax rate by taxable income group, 2014 and 2023

During the first year of the ten-year tax period, the cumulative taxable income was positive at R20.7 billion in 2014 and has continued to decline since 2015; it declined significantly to a low of R1 402.2 billion net assessed losses in 2018. Although cumulative taxable income has continued on a downward trend till 2023, the declines were not as severe as those of the 2018 tax year. Taxable income for the latter years (refer to Table A3.8.2) declined significantly as a result of weaker domestic and global demand, intensifying power cuts; geopolitical conflicts; high-cost structures; underlying inefficiencies; significant infrastructure constraints; economic challenges in major consuming countries such as China and the United States; and volatile global commodity prices, which harmed corporate profits. More companies moved into an assessed-loss position, particularly during the remaining nine tax years (2015–2023).

Nonetheless, the value of tax assessed for the 462 929 corporate taxpayers in the ten-year cohort increased at a CAGR rate of 6.5%, from R155.3 billion in the 2014 tax year to R273.3 billion in 2023.

Table 3.8 shows assessed company taxpayers and taxable income, according to the company age brackets defined in the 2014 and 2023 tax years.

Grand Total	462 929	20 651	155 297			462 929	-330 252	273 319	

Total CIT assessed increased from R185.1 billion for the 2014 tax year to R308.9 billion for the 2023 tax year, a CAGR increase of 5.9%. The cohort of 462 929 corporate taxpayers' proportional contribution to the total tax assessed increased from 83.9% (R155.3 billion of the 2014 CIT assessed) to 88.5% (R273.3 billion of the 2023 total CIT assessed).

The ten-year segment experienced a slightly higher CAGR rate of 6.5% for the total tax assessed, compared to an overall CAGR rate of 5.9% for all companies. This indicates that this segment is an important contributor to the growth of tax revenue for the period after 2014. This is mainly because of established large companies' improvement and resilience in income-generation despite the prevailing economic challenges. Companies in the taxable income grouping of more than R50 million per annum recorded an increase in tax assessed since 2014. The concentrated nature of the South African economy is again evident: on average, in the ten-year cohort, 1 427 large companies (1.0% of companies with positive taxable income) with taxable income of more than R50 million per annum were liable for 73.5% of the CIT assessed from the cohort.

Tables A3.8.1 to A3.8.4 show the number of taxpayers, cumulative taxable income, cumulative tax assessed, and average tax rates by taxable income group from 2014 to 2023.

COMPANIES WITH ASSESSED LOSSES OR PROFITS

Assessed tax losses for companies may include those incurred during a specific tax year as well as the balance of assessed losses brought forward from previous tax years. If a company, therefore, has a taxable profit for a specific tax year, a company could still be in an assessed loss position if the taxable profit for the year was insufficient to clear the assessed loss brought forward.

The *Financial Intermediation, Insurance, Real-estate, and Business Services* sector contained the largest proportion of companies with assessed losses in 2023 (12.6%), followed by the *Construction* sector (8.7%), and the *Agriculture, Forestry, and Fishing* sector (5.7%).

Table A3.6.1 shows the number of companies with assessed losses or profits by sector.

Figure 3.8.1 shows the value of taxpayers with assessed losses by tax year (2017–2023), and Figure 3.8.2 shows the number of taxpayers with assessed losses by tax year (2017–2023).

Figure 3.8.1: Value of assessed losses for companies by tax year, 2017–2023

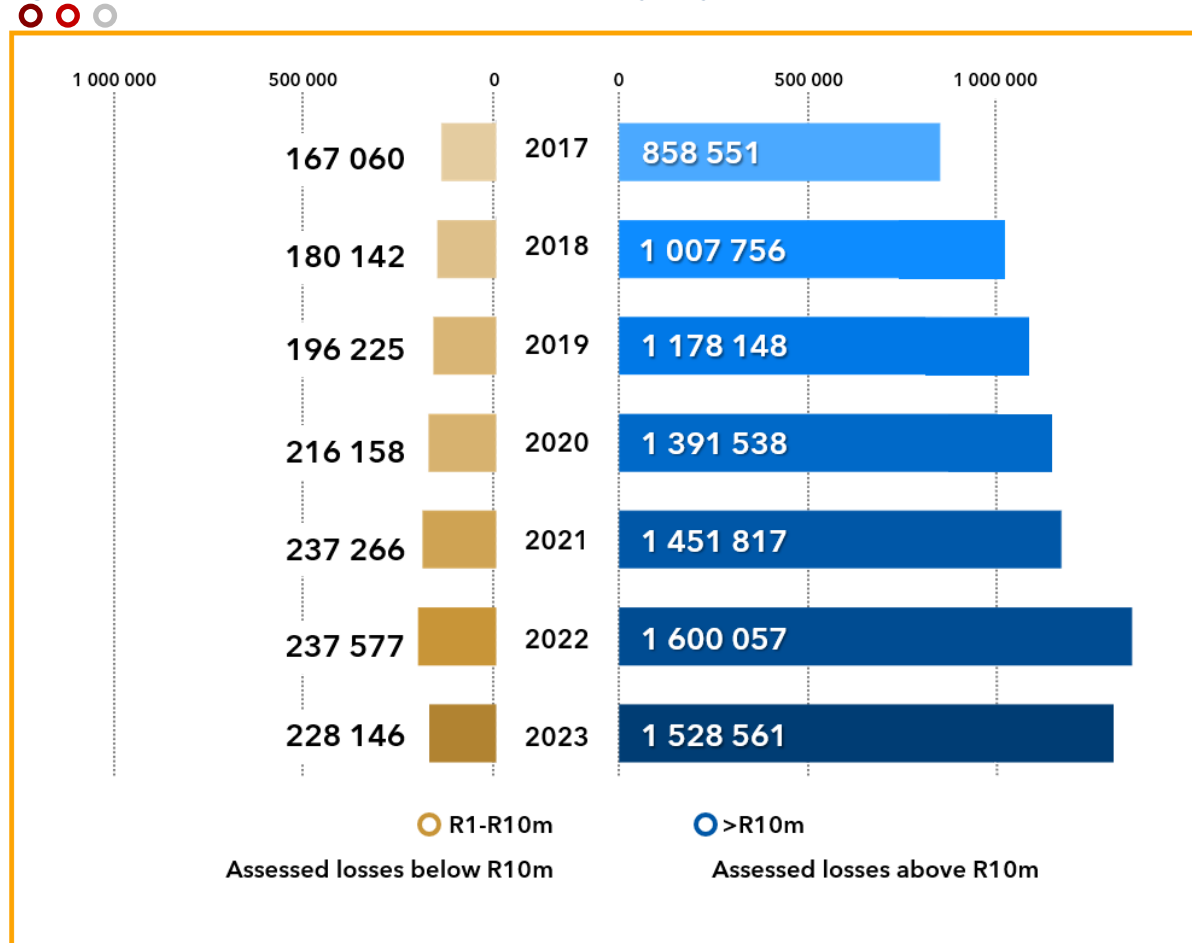

Figure 3.8.2: Number of companies with assessed losses by tax year, 2017–2023

The number of companies reporting assessed losses, as well as their values, increased sharply after the global financial crisis (2008/09). The value of assessed losses for companies with losses greater than R10 million increased significantly at a rate of 17.4% in the 2018 tax year compared to a growth rate of 13.7% in 2017, showing further deterioration in the value of assessed losses. The value of these assessed losses subsequently increased by 18.1% (2020), before slowing to 4.3% (2021). These losses point to a deterioration in the taxable income of companies. The value of these assessed losses also increased during the 2022 tax year, albeit at a lower rate of 10.2%.

The value of assessed losses for companies in the R1 to R10 million range, however, increased marginally by 7.8% in 2018 from a growth rate of 6.7% in 2017. This was followed by an increase in assessed losses of 8.9% (in the 2019 tax year), 10.2% (2020), 9.8% (2021), and slowed to a growth rate of only 0.1% (2022).

The number of companies with assessed losses worth more than R10 million peaked in 2018 at 8 558, from 7 853 in the 2017 tax year. From the 2019 to 2022 tax years, this number increased consistently to close the 2022 tax year at 11 528. However, the number of companies with assessed losses in the R1 to R10 million range peaked in 2018 at 260 688, up from 248 505 in the 2017 tax year. In the 2019 to 2021 tax years, the number of companies with assessed losses in this range continued to increase and rose in the 2021 tax year to 308 094 before dropping to 301 903 in the 2022 tax year. As companies submit their income tax returns for assessment, the numbers for the latter tax years could still fluctuate.

SMALL BUSINESS CORPORATIONS

Companies are taxed as SBCs for a particular tax year if they meet specific criteria, such as:

- Gross income of not more than R20 million;
- Limitations on shareholding in the company; and
- The taxpayer must indicate on the annual tax return that it qualifies to be taxed as an SBC.

SBCs benefit from graduated income tax rates (progressive taxation) rather than the fixed tax rate of 28% (27% for years of assessments ending on or after 31 March 2023). *Table 3.9* shows the increase in the SBCs’ taxable income brackets from the 2021 to the 2024 tax years. The limit of the first SBC bracket increased by 15.2% from R83 100 for the 2021 tax year to R95 750 for the 2024 tax year.

SBCs can also immediately write off all plant or machinery used in manufacturing and are eligible for accelerated write-off of certain other depreciable assets (at a rate of 50%, 30%, and 20%).

Table 3.9: Small Business Corporation tax rates, 2021 and 2024

Tax year	2021	SBC rate for 2021	2024	SBC rate for 2024	Percentage increase in top bracket
Rand					
	0 – 83 100	0%	0 – 95 750	0%	15.2%
Taxable income brackets	83 101 – 365 000	7%	95 751 – 365 000	7%	–
	365 001 – 550 000	21%	365 001 – 550 000	21%	–
	550 001 – and over	28%	550 001 – and over	27%	–

In any calendar year, SBCs could be taxed by applying two different tax year rates. In 2023, they could be taxed at either 2022/23 tax rates or 2023/24 tax rates. This would occur because:

- 2022/23 tax rates (rates in effect from 1 April 2022 to 31 March 2023) apply to SBCs with years of assessment ending from 1 January 2023 to 31 March 2023; and
- 2023/24 tax rates (rates in effect from 1 April 2023 to 31 March 2024) apply to SBCs with years of assessment ending from 1 April 2023 to 31 December 2023.

Table A3.7.1 shows the number of SBC taxpayers and the tax assessed by the taxable income group. *Table A3.7.2* shows the number of SBC taxpayers and the tax assessed by sector. *Table A3.7.3* shows the number of SBC taxpayers and the tax assessed by economic activity. *Tables A3.7.4* to *A3.7.6* show SBCs reporting positive, negative (assessed loss), and zero taxable income. *Table A3.7.7* shows the tax assessed for SBCs by the turnover group.

1. SARS' source of income code is used to classify according to the Standard Industrial Classification (SIC) system. SARS' source of income code is not fully aligned with the SIC system that Statistics South Africa uses.
 2. Includes the following SARS sectors – Bricks, ceramic, glass, cement and similar products; Chemicals and chemical, rubber and plastic products; Clothing and footwear; Coal and petroleum products; Food, drink and tobacco; Leather, leather goods and fur (excl. footwear & clothing); Machinery and related items; Metal (including metal products); Other manufacturing industries; Paper, printing and publishing; Scientific, optical and similar equipment; Textiles; Transport equipment; and Wood, wood products and furniture.
 3. Includes the following SARS sectors – Catering and accommodation; Retail trade; Specialised repair services; Vehicles, parts and accessories; and Wholesale trade.
 4. Includes the following SARS sectors – Agencies and other services; Financing, insurance, real estate and business services; Long term insurance; and Research and scientific institutes.
 5. Includes the following SARS sectors – Educational services; Medical, dental and other health and veterinary services; Personal and household services; Recreation and cultural services; and Social and related community services.
 6. Includes where the source of income was indicated as Other (as per SARS source code) or where the source of income was left blank on the return.

1. SARS' source of income code is used to classify according to the Standard Industrial Classification (SIC) system. SARS' source of income code is not fully aligned with the SIC system that Statistics South Africa uses.

2. Includes the following SARS sectors – Bricks, ceramic, glass, cement and similar products; Chemicals and chemical, rubber and plastic products; Clothing and footwear; Coal and petroleum products; Food, drink and tobacco; Leather, leather goods and fur (excl. footwear & clothing); Machinery and related items; Metal (including metal products); Other manufacturing industries; Paper, printing and publishing; Scientific, optical and similar equipment; Textiles; Transport equipment; and Wood, wood products and furniture.

3. Includes the following SARS sectors – Catering and accommodation; Retail trade; Specialised repair services; Vehicles, parts and accessories; and Wholesale trade.

4. Includes the following SARS sectors – Agencies and other services; Financing, insurance, real estate and business services; Long term insurance; and Research and scientific institutes.

5. Includes the following SARS sectors – Educational services; Medical, dental and other health and veterinary services; Personal and household services; Recreation and cultural services; and Social and related community services.

6. Includes where the source of income was indicated as Other (as per SARS source code) or where the source of income was left blank on the return.

4 VALUE-ADDED TAX

KEY FACTS

In the 2024/25 fiscal year:

- Net Value-Added Tax (VAT) collections totalled R457.8 billion and grew by 2.3% compared to the previous year. Domestic VAT, the biggest contributor to net VAT amounted to R561.4 billion, with an annual growth of 6.8%. The net growth rate (2.3%) was supported by the collection of R261.9 billion in VAT on Imports, which contracted by 1.2% compared to the prior year. VAT refunds, which totalled R365.5 billion, grew by 6.6% and partially offset the Domestic VAT growth.
- The main sectors that contributed to Domestic VAT growth were *Financial Intermediation, Insurance, Real Estate and Business Services; Electricity, Gas and Water*, as well as *Wholesale and Retail Trade, Catering and Accommodation*. Year-on-year growth was impacted by household consumption growth, lower inflation, the two-pot retirement system payouts and SARS compliance efforts, among other factors.
- The largest VAT refund increases were observed in *Financial Intermediation, Insurance, Real Estate and Business Services; Manufacturing and Community, Social and Personal Services* sectors. This growth was however partially offset by the contraction in the *Wholesale and Retail Trade, Catering and Accommodation* sector refunds. The growth in VAT refunds was largely because of VAT credit returns submitted (value and volumes) in relation to increased input costs and zero-rated sales declared, among other factors.
- Registered vendors totalled 900 285 on 31 March 2025, of which 496 858 (55.2%) were active.

Key statistics are:

- The 17.4% share of VAT vendors in the monthly submission category contributed 83.5% to Domestic VAT payments and received 93.2% of the VAT refunds. The 81.1% share of VAT vendors that submitted returns bi-monthly (every two months), contributed 16.4% to Domestic VAT payments and received 6.7% of the VAT refunds.
- Companies and close corporations comprised 82.5% of VAT vendors. Individuals made up 10.4%, estates/trusts 5.2%, partnerships 1.1% and the remaining entities 0.8%.
- The *Financial Intermediation, Insurance, Real Estate and Business Services* sector was the largest sector, constituting 40.6% of the total number of active vendors.
- VAT vendors with a turnover of R1 million or less, i.e., below the mandatory registration threshold, constituted 31.8% of the total number of active vendors.
- On average, for each R1.00 in Domestic VAT payable to SARS, R2.93 in output tax was declared and R1.93 in input tax was claimed. On average, for each R1.00 in VAT refund claimed from SARS, R0.95 in output tax was declared, while R1.95 in input tax was claimed.

INTRODUCTION

This chapter reports on the Domestic VAT payments and VAT refunds associated with the active VAT vendors in the fiscal year. The chapter also covers information about Import VAT. Chapter 5 offers more detail on the latter.

The South African VAT system is destination-based, i.e., only the domestic consumption of goods and services are subject to VAT. Therefore, VAT is payable on the supply of goods and services in South Africa, as well as on the importation of goods and services into South Africa. It is a broad-based tax on consumption rather than a selective tax on specific products.

South African tax legislation requires qualifying businesses (referred to as VAT vendors) to register, charge and collect VAT on their supply of goods and services. The mechanism for charging, collecting, and paying VAT to the government is a self-assessment, subtractive invoice-based system that allows businesses to determine their VAT liability or VAT refundable. VAT continues to be a significant source of revenue for the government and contributed, 24.7% of all the 2025 fiscal year's tax revenue collected by SARS.

The standard rate of VAT in South Africa was increased to 15% with effect from 1 April 2018. Prior to this, VAT had remained at 14% since 1993. VAT is levied at each stage of the production and distribution chain. It is intended to tax all consumption of goods and services at 15% or 0% (for example, some basic food items, are zero-rated to provide relief to low-income groups) with the exception that the supply of certain goods and services are exempt from VAT.

The zero-rate is also applied to goods or services that are exported in line with the destination principle of VAT and is intended to free these goods and services from the incidence of VAT.

As mentioned above, the supply of certain goods and services is exempt from VAT. These are supplies of goods and services on which VAT is not charged either at the standard or zero-rate. If a business only makes exempt supplies, it cannot register as a VAT vendor and cannot charge VAT on those supplies. Furthermore, a business that makes exempt supplies cannot deduct the VAT charged to it as input tax. For example, the rental of residential property and some financial services are exempt from VAT.

Consumers may benefit more from the zero-rating of goods and services compared to exempting goods and services from VAT. This is because VAT charged at the standard rate on the acquisition of goods and services for purposes of making zero-rated supplies is allowed as a deduction (i.e., input tax), which effectively means that no VAT is embedded in the selling price of the goods and services. In contrast, VAT charged at the standard rate on the acquisition of goods and services for making exempt supplies is not allowed as a deduction (i.e., no input tax is claimable) and VAT may not be levied on exempt supplies. Therefore, VAT is embedded in the selling price of the exempt goods and services. Accordingly, in theory the price of the supply of goods and services that is exempt from VAT is higher than the selling price of goods and services that are zero-rated.

A VAT refund arises when a vendor's input tax exceeds its output tax for a tax period. VAT refunds can occur when:

- Input tax can be claimed for zero-rated supplies and there is no output tax against which to set off the input tax. For example, goods and services that are exported.
- Capital investments — input tax on capital items results in large once-off input tax claims.

- Restocking by vendors or the selling of merchandise below cost.

This chapter gives an overview of the following:

- The VAT register.
- Domestic VAT payments and VAT refunds.
- Input tax and output tax.
- The distribution of vendors by turnover group.
- The VAT efficiency factors.
- The 10-year cohort analysis.

THE VAT REGISTER

According to the VAT Act No. 89 of 1991, it is mandatory for a business that carries on an enterprise, where taxable supplies more than R1 million are made or likely to be made, in any consecutive 12-month period to register for VAT. A business can also voluntarily register if the value of its taxable supplies did not or is not likely to exceed R1 million in any consecutive 12-month period.

In 2024/25, there were 900 285 registered VAT vendors, of which 496 858 were active (see *Table 4.1*). For 2021/22, the VAT register recorded growth of 6.9% and 4.4% for the register and active register, respectively. This growth was driven by the recovery from the effect of the Covid-19 pandemic measures. The 2023 and 2024 fiscal years had no material movements. For the 2024/25 period under review, the register contracted by 6.1% as SARS conducted a VAT register clean-up exercise during March 2025. This resulted in the active percentage of the register increasing to 55.2% recording growth of 4.3% from the previous year. For this chapter, a vendor is regarded as active if a payment was received from or a refund made to the vendor during the fiscal year, regardless of the registration status.

Table 4.1: Number of registered VAT vendors, 2021/22 – 2024/25

Fiscal year	Registered ¹	Percentage growth rates	Active vendors	Percentage growth rates	Active percentage of register
2021/22	941,406	6.9%	470,239	4.4%	50.0%
2022/23	953,665	1.3%	477,775	1.6%	50.1%
2023/24	959,000	0.6%	488,124	2.2%	50.9%
2024/25	900,285	-6.1%	496,858	1.8%	55.2%

1. As per register at 31 March of each year. Excludes coded cases where status is in suspense or estate or address unknown.

DOMESTIC VAT PAYMENTS AND VAT REFUNDS

The information about Domestic VAT payments and VAT refunds, shown in *Table A4.1.1* is drawn from the SARS Domestic VAT payments and VAT refunds database. The values shown in the table do not match the actual collections, as published in Chapter 1. For example, for 2024/25, Chapter 1 shows that Domestic VAT collections were R561.4 billion and VAT refunds were R365.5 billion, while in this section of the publication (Chapter 4), Domestic VAT collections were R563.8 billion and VAT refunds were R363.4 billion. The differences emanate from a variety of reasons, including:

- Unallocated Domestic VAT payments and VAT refunds that are included in the published collection figures but are yet to be allocated to specific vendors.

- Debt equalisation by SARS whereby, for example, a VAT refund is set off against a Corporate Income Tax-related debt.
- Journals passed to allocate Domestic VAT payments between different tax periods within the VAT system.

By sector

The SARS sector codes are not yet aligned with the Standard Industrial Classification (SIC 5) system used by Statistics South Africa. *Table A4.1.1* shows the number of VAT vendors, and the value of Domestic VAT payments and VAT refunds for each sector as defined by the SARS sector codes. *Table A4.1.2*, which is the source of the information shown in *Figures 4.1* and *4.2*, reclassifies the SARS sector codes according to the SIC 5 system. The sectors with the highest number of active VAT vendors in 2024/25 were *Financial Intermediation, Insurance, Real Estate and Business Services* sector (40.6%), followed by the *Wholesale and Retail Trade, Catering and Accommodation* (17.8%); and the *Agriculture, Forestry and Fishing* (11.8%) sectors, as shown in *Table A4.1.2*.

The *Financial Intermediation, Insurance, Real Estate and Business Services* sector contributed R241.0 billion (42.7%) to Domestic VAT in 2024/25, the largest contribution among all sectors. This sector received the fourth largest proportion of VAT refunds for the year amounting to R67.0 billion (18.4%).

The *Mining and Quarrying* sector had the second lowest number of active vendors at only 1.0% in 2024/25 and contributed R22.1 billion (3.9%) to the total Domestic VAT payments during the period. However, these vendors received the largest proportion of VAT refunds, amounting to R78.3 billion (21.5%). The large volume of zero-rated mineral exports makes the *Mining and Quarrying* sector a negative contributor to net VAT. *Figure 4.1* shows the Domestic VAT payments by economic activity.

Figure 4.1: Domestic VAT payments by economic activity, 2024/25

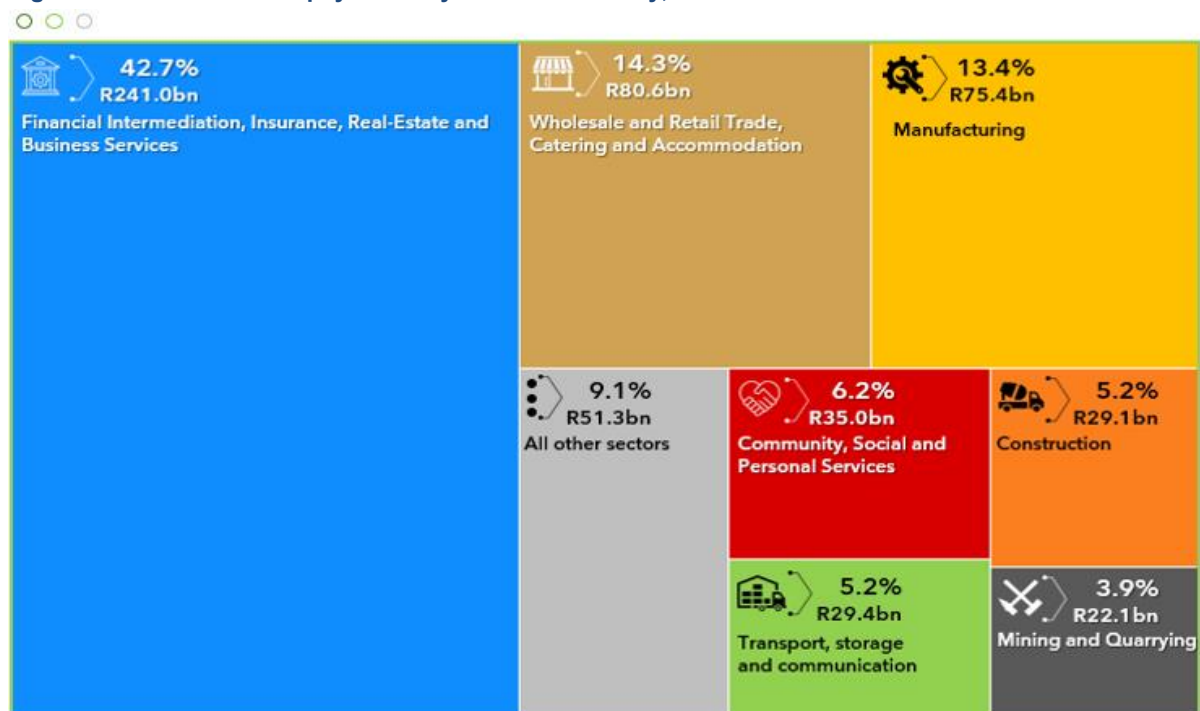

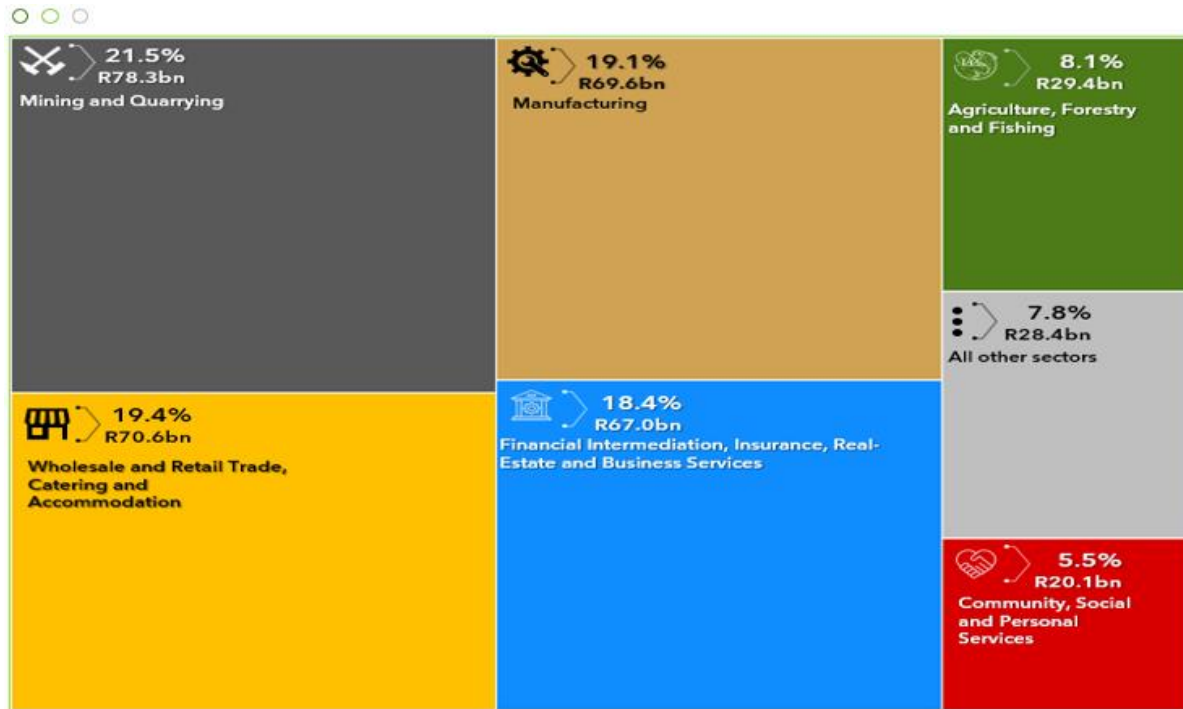

Figure 4.2 below shows that apart from the *Mining and Quarrying* sector, the *Wholesale and Retail Trade, Catering and Accommodation* sector (19.4%), as well as the *Manufacturing* sector (19.1%) also have material refund contributions.

The *Mining and Quarrying* sector; *Manufacturing*; as well as the *Wholesale and Retail Trade, Catering and Accommodation* sectors benefited from zero-rated exports and local zero-rated sales (e.g., goods that are subject to the fuel levy (petrol and diesel), 19 basic food items, etc.).

Figure 4.2: VAT refunds by economic activity, 2024/25

By sector – including Import VAT

Table A4.2.6 provides an overview of declared Import VAT flows by SARS sector codes as per the Bill of Entry declarations. The declared Import VAT recorded in each sector is then classified using the sector indicated by the importer’s associated VAT reference number. Note that import declarations do not always translate immediately into collections (Chapter 5 explains the Customs declaration and payments process).

Although the given Import VAT figures reflect declarations by importers (rather than actual Import VAT payments), as indicated below, there is a close relationship between the two. In 2021/22, Import VAT amounts captured on bills of entry matched 99.6% of actual Import VAT collections. This ratio reached the lowest of 99.0% in 2022/23 (see Table 4.2) but increased to 99.3% for the subsequent fiscal years.

Table 4.2: Import VAT per bills of entry versus actual Import VAT collected, 2021/22 – 2024/25

Fiscal year	Import VAT per bills of entry (R million)	Actual Import VAT collected (R million)	Bills of entry as a percentage of actual collected
2021/22	203,756	204,552	99.6%
2022/23	252,468	254,984	99.0%
2023/24	263,201	265,043	99.3%
2024/25	259,978	261,878	99.3%

After the inclusion of Import VAT for 2024/25, as shown in *Table A4.2.7*, the *Financial Intermediation, Insurance, Real Estate and Business Services* sector remained the largest contributing sector with net VAT payments of R222.7 billion. The inclusion of Import VAT in an overall view of vendors in 2024/25 reflects a more accurate picture of the performance of VAT. For example, the net contribution of the *Wholesale and Retail Trade, Catering and Accommodation* sector increased significantly from R10.0 billion to R109.5 billion.

The overall view of the *Mining and Quarrying* sector, which had the highest net refund outflow in 2024/25 before the inclusion of Import VAT, improved because of the inclusion; the sector's net outflow decreased from R56.2 billion to R49.3 billion. In terms of the VAT system, most of the import VAT is claimed as input tax.

By tax period category type

Most vendors account for and pay their VAT to SARS bi-monthly (every two months). When the value of a vendor's taxable supplies (turnover) in any consecutive 12-month period exceeds or is likely to exceed R30 million, the vendor is required to account for and pay or claim a refund of VAT every month. Some farming enterprises (certain farmers with taxable supplies less than R1.5 million in any consecutive period of 12 months) and micro businesses under the Income Tax Act (with approval) are allowed to pay VAT six-monthly (twice a year).

In 2024/25, 81.1% of vendors submitted returns bi-monthly and 17.4% of vendors submitted monthly returns as is shown in *Figure 4.3*. The 17.4% of vendors who submitted returns monthly contributed 83.5% to Domestic VAT payments and accounted for 93.2% of the VAT refunds paid out (see *Table A4.2.1*).

Table A4.2.1 summarizes the Domestic VAT payments and VAT refunds for each of the tax period category types. *Tables A4.2.2 to A4.2.5* breaks down the Domestic VAT payments and VAT refunds by sector for the different tax period category types. The three largest sectors for the 86 225 vendors who fell in the monthly category in 2024/25 were the *Financial Intermediation, Insurance, Real Estate and Business Services* sector (22.5%), followed by the *Agencies and Other Services* (11.7%) and the Retail trade (11.4%) sectors.

Figure 4.3: Distribution of the number of VAT vendors by tax period category type, 2023/24 and 2024/25

By type of enterprise

Table A4.3.1 shows a summary of Domestic VAT payments and refunds by type of enterprise for 2021/22 to 2024/25. In 2024/25, 82.5% of active VAT vendors were companies and close corporations. They contributed 93.8% to Domestic VAT payments and received 93.3% of the VAT refunded. Although individuals (sole proprietors) composed 10.4% of active VAT vendors, they contributed only 1.6% to Domestic VAT payments and received just 0.6% of the VAT refunded.

INPUT TAX AND OUTPUT TAX

The South African VAT system is based on a subtractive or “credit input” method. This system allows businesses (VAT vendors) to deduct the VAT incurred on allowed business expenses (these VAT amounts are termed *input tax*) from the VAT charged on the supplies they make (VAT charged on supplies of goods and services is termed *output tax*). A VAT vendor may deduct the VAT paid during the preceding stages of the production and distribution chain. Therefore, the burden of VAT rests on the final consumer, while maintaining neutrality in the value-added business chain. However, as indicated above, input tax may not be claimed for some expenses. These include, for example, the VAT charged on the acquisition of motor cars (if the vendor is not in the business of acquiring and supplying motor cars) or entertainment expenses (if the vendor is not in the entertainment business).

VAT returns (the relevant form is the VAT201 return) submitted to SARS reflect amounts payable to SARS, amounts refundable by SARS or a zero liability (such a return is called a *nil* return). The input tax and output tax tables (Tables A4.4.1 to A4.4.3) show the amounts recorded by sector and are extracted from amounts disclosed in VAT returns.

The values for Domestic VAT payments and VAT refunds, shown in Table A4.1.1 do not match the VAT liability or VAT refund disclosed on the VAT returns. Possible reasons for this discrepancy include:

- Adjustments may have been made during the audit and/or verification process.
- Declared VAT payable amounts may not have been paid or partially paid. In this case, the difference between actual payments and the applicable liability may be part of tax debt (process called debt equalisation).
- Refunds may have been delayed because of verification, inspection or audit being finalised.

The total values for output tax and input tax declared are the sum of amounts reflected on all returns given in *Table A4.4.1*). VAT is payable at 0% on the supply of zero-rated goods and services. However, the input tax claimed on the acquisition of these goods and services is included in the input tax totals.

As mentioned earlier, no VAT is charged on the supply of exempt goods and services. Hence, any VAT charged on the acquisition of goods and services for making exempt supplies cannot be claimed. The values of change in the use of goods and services, change in accounting basis, as well as amounts written off or bad debts recovered are added to or subtracted from the total output tax declared and input tax claimed. *Table 4.3* shows output tax by class of supply.

Table 4.3: Output tax by class of supply, 2021/22 – 2024/25

Fiscal year	Standard rate (excl. capital goods, services and accommodation)	Standard rate (only capital goods and services)	Supply of accommodation	Adjustments ¹	Total output tax
R million					
2021/22	1,757,479	44,767	2,417	24,867	1,829,530
2022/23	2,001,771	53,834	4,178	21,223	2,081,007
2023/24	2,164,114	52,935	4,739	29,107	2,250,895
2024/25	2,339,557	54,268	5,455	25,518	2,424,798
Percentage of total					
2021/22	96.1%	2.4%	0.1%	1.4%	100.0%
2022/23	96.2%	2.6%	0.2%	1.0%	100.0%
2023/24	96.1%	2.4%	0.2%	1.3%	100.0%
2024/25	96.5%	2.2%	0.2%	1.1%	100.0%

1. Comprises VAT of Change in use and export of second-hand goods, as well as VAT of Other and imported services.

From 2021/22 to 2024/25, the supply of standard-rated goods and services contributed an average of 96.2% to total output tax, with 2024/25 recording a 96.5% contribution. Over the same period, the contribution of the supply of capital goods remained at 2.6% or lower. The share of capital goods and accommodation supplied remained relatively stable over this period.

Table 4.4: Input tax by class of supply, 2021/22 – 2024/25

Fiscal year	Claimed on capital goods and services	Claimed on capital goods imported	Claimed on other goods and services	Claimed on other goods imported	Claimed on adjustments ¹	Total input tax
R million						
2021/22	106,913	5,797	1,336,343	173,293	15,797	1,638,141
2022/23	123,139	7,164	1,541,050	216,694	17,206	1,905,253
2023/24	139,205	9,215	1,669,562	231,507	19,414	2,068,903
2024/25	135,481	10,935	1,812,656	223,140	19,349	2,201,561
Percentage of total						
2021/22	6.5%	0.4%	81.6%	10.6%	1.0%	100.0%
2022/23	6.5%	0.4%	80.9%	11.4%	0.9%	100.0%
2023/24	6.7%	0.4%	80.7%	11.2%	0.9%	100.0%
2024/25	6.2%	0.5%	82.3%	10.1%	0.9%	100.0%

1. Comprises Change in use; Bad debts and Other.

Other goods and services remain the largest portion of input tax claimed. In 2024/25, this class (or group) of supply accounted for 82.3% (1.6% increase from 2023/24), as seen in *Table 4.4*. Claims related to domestic capital goods and service purchases accounted for 6.2% of the input tax and imports (capital goods and other goods) for 10.6% and the remaining input tax resulted from adjustments. This is the second consecutive financial year that the other goods imported shows a year-on-year contracting contribution. Vendors do not always capture input tax relating to VAT on imports separately from domestic input tax, as they should. This is evident as VAT on imports claimed on VAT returns in 2024/25 amounted to R234.1 billion, while the total value of Import VAT on bill of entry declarations totalled R260.0 billion, as shown in *Table 4.2*. This gap is also explained by importers that are not vendors and, therefore, do not qualify to claim input tax as they do not file VAT returns.

The relationship between output tax and input tax is best illustrated by calculating how much output tax is declared per R1.00 of Domestic VAT payable and how much input tax is claimed per R1.00 of VAT refundable. *Table 4.5* illustrates that input costs, ordinary and capital expenses are different from one period to the next depending on business/economic activity.

Table 4.5: Output/input tax declared for R1.00 Domestic VAT payable and VAT refundable, 2021/22 – 2024/25

Fiscal year	For each R1 of					
	Domestic VAT payable, there is input tax claimed of	Domestic VAT payable, there is output tax declared of	Net Domestic VAT payable	VAT refundable, there is input tax claimed of	VAT refundable, there is output tax declared of	Net VAT refundable
2021/22	-1.91	2.91	1.00	-1.99	0.99	-1.00
2022/23	-2.08	3.08	1.00	-2.08	1.08	-1.00
2023/24	-2.00	3.00	1.00	-1.96	0.96	-1.00
2024/25	-1.93	2.93	1.00	-1.95	0.95	-1.00

For each R1.00 in Domestic VAT declared in 2024/25:

- R2.93 in output tax was declared (R1 993.7 billion ÷ R680.8 billion).
- R1.93 in input tax was claimed (R1 312.9 billion ÷ R680.8 billion); (see *Table A4.4.2*).

For each R1.00 in VAT refund claimed in 2024/25:

- R0.95 in output tax was declared (R435.5 billion ÷ R457.6 billion).
- R1.95 in input tax was claimed (R893.1 billion ÷ R457.6 billion); (see *Table A4.4.3*).

Some sectors deviate significantly from these nationally aggregated ratios. The *Mining and Quarrying* sector, for example, which received refunds of R78.3 billion in 2024/25, declared only R0.40 in output tax and claimed R1.40 in input tax for each R1 of VAT refunds claimed.

Changes in output and input tax ratio per R1.00 of VAT payable or refundable are influenced by changes in the following:

- Standard sales (output tax) for a given ratio of input costs claimed.
- Inventory levels (increase in stock levels associated with higher claims for input costs and depletion of stock or *vice versa*).
- Expense input costs such as administrative, rentals, maintenance and reparations for a given of standard sales.
- Investment expenditure (claim for capital cost).
- Import values (volume and rand values based on exchange value of the rand).
- Zero-rated sales and exports for a given input cost ratio.

Tables A4.5.1 and A4.5.2 show these ratios for each sector.

The input tax and output tax relationship are shown further in *Figure 4.4*. The increase in all components observed in 2024/25 is due to inflation, household consumption growth and SARS compliance efforts, among other factors.

Figure 4.4: Composition of Domestic VAT payable (output/input), 2021/22 – 2024/25

DISTRIBUTION OF VENDORS BY TURNOVER GROUP

Annualised turnover, shown in *Figure 4.5* and *Table A4.6.1*, is calculated using the turnover declared by each vendor during the 12-month period of each fiscal year. The calculation is performed as follows:

- If a vendor that is registered to pay VAT monthly submitted all 12 returns for a one-year period on time, the turnover would be calculated as the sum of the turnover declared on the 12 returns.
- However, if the vendor submitted fewer than the 12 required returns, the projected turnover would be calculated by dividing the turnover for the specific tax periods under review by the number of returns submitted and multiplying by 12 to obtain an annualised turnover. If the vendor, for example, submitted 10 returns, the turnover would be divided by 10 and multiplied by 12.

In 2024/25, 31.8% of vendors had a turnover of R1 million or less, i.e., below the mandatory VAT registration threshold. However, these vendors accounted for only 1.3% of Domestic VAT payments and 4.0% of VAT refunded. In contrast, 4.1% of VAT vendors who had an annual turnover greater than R100 million accounted for 68.3% of Domestic VAT payments and 82.5% of VAT refunded, as shown in *Table A4.6.1*.

Figure 4.5: Distribution of VAT vendors by turnover group, 2024/25

VAT EFFICIENCY FACTORS BASED ON TURNOVER OF VENDORS

The VAT efficiency factor measures the value of VAT payments made relative to the turnover per percentage point of the VAT rate. A higher rate indicates improved tax administration. However, economic and policy outcomes affecting payments relative to turnover are also determined by factors such as the level of VAT refunds that are a function of the level of investment in the economy, the level of zero-rated sales and the change in export earnings.

The VAT efficiency ratios for the period between 2015/16 and 2024/25 remained stable, with small annual changes to this ratio. The 2018/19 fiscal year was slightly elevated due to the 1 percentage point increase in the standard VAT rate while the peak of 2020/21 was caused by the Covid-19 lockdown restrictions. Although the 2024/25 fiscal year ratio remains lower than the 10-year average (0.178), it shows an improvement from the lows recorded during the 2023 and 2024 fiscal years. For 2024/25, VAT refunds grew at 4.6% while VAT Payments grew at a higher rate (7.2%). VAT payments were impacted by lower inflation, the two-pot retirement system payouts, household consumption growth and SARS compliance efforts, amongst other factors.

Figure 4.6: VAT efficiency factors based on turnover, 2015/16 – 2024/25

TRACKING OF PAYMENTS AND REFUNDS OF A COHORT ACROSS 10 CONSECUTIVE YEARS 2015/16 TO 2024/25

A population of active vendors who consistently filed returns, paid Domestic VAT and/or received VAT refunds over a 10-year tax period from 2015/16 to 2024/25 were grouped by turnover intervals per fiscal year. There were 227 770 vendors that met the criteria set for the cohort population. Their distribution, turnover, Domestic VAT and VAT refunds were analysed for the fiscal years from 2015/16 to 2024/25.

The number of vendors per turnover grouping as per the base year changed annually due to some vendors migrating between the turnover groups. The 10-year series on vendor count is found in *Table A4.7.1*. The compound annual growth rate (CAGR) for the number of vendors in the base year 2015/16 and the most recent year 2024/25 is negative for the lower base turnover segments ranging from the R50 001 to R100 000 turnover bracket to the R3 000 001 to R5 000 000 turnover bracket, as shown in *Table A4.7.2*. For 2024/25, the R5 000 001 to 10 000 000 bracket had the highest number of vendors while the three largest turnover groupings (R30 million plus) had a CAGR ranging from 2.7% to 5.4%.

The growth in the number vendors in the nil turnover group recorded the highest CAGR at 9.3% between the base year 2015/16 and the most recent year 2024/25. However, that growth did not occur evenly throughout the decade as shown in the distribution trends in *Table 4.7.1*. For the nil turnover grouping, 2026/17 had the largest contraction (22.6%) while a material increase (85.6%) was recorded for 2024/25, refer to *Figure 4.7* below.

Figure 4.7: Number of vendors in the lowest (Nil) and highest (R100 million+) turnover groups over the period 2015/16 – 2024/25 (10-year cohort)

As is shown in Table A4.7.2, the turnover levels CAGR is similar as the number of vendors growth for most turnover brackets with the exception that the highest growth rate is observed in the R100 million plus bracket. The cumulative turnover of the 10-year cohort increased by a CAGR of 6.7% from R9.5 trillion in 2015/16 to R17.1 trillion in 2024/25. The total Domestic VAT payments for the cohort of the 227 770 vendors increased by a CAGR of 6.7%, from R234.8 billion to R422.2 billion during the same period. VAT refunded to these vendors grew by a CAGR of 7.8% from R140.0 billion to R274.8 billion. This confirms that real growth in the economy has remained subdued over the decade. The 10-year series for the 10-year cohort vendors in respect of turnover, Domestic VAT and VAT refunds are found in Tables A4.7.3 to A4.7.11.

An analysis of the percentage change in vendor count by turnover for 2024/25 compared to 2015/16 shows a decline for those vendors with a non-zero-base turnover of less than R5 million per annum except for the R1 to R50 000 group; compared to an increase in the number of vendors with a base turnover more than R5 million per annum (as seen in Table 4.6). For the last three years, the turnover grouping with the highest number of VAT vendors was the R5 million to R10 million per annum grouping.

Table 4.6: Average Annual Turnover Analysis per turnover bracket, 2015/16 – 2024/25 (10-year cohort)

Turnover group	2015/16			2024/25			% Change in No. of Vendors	% Change in Average Turnover	Average Turnover CAGR
	Number of Vendors	Turnover (R million)	Average Annual Turnover (R)	Number of Vendors	Turnover (R million)	Average Annual Turnover (R)			
A: = 0	3,273	–	–	7,282	–	–	122.5%		
B: 1 to 50 000	3,116	90	28,904	3,694	92	24,998	18.5%	-13.5%	-1.6%
C: 50 001 to 100 000	4,584	339	73,915	3,942	292	74,161	-14.0%	0.3%	0.0%

J: 2 000 001 to 3 000 000	21,673	53,482	2,467,696	18,299	45,194	2,469,769	-15.6%	0.1%	0.0%
K: 3 000 001 to 5 000 000	25,795	100,467	3,894,810	23,421	91,598	3,910,923	-9.2%	0.4%	0.0%
L: 5 000 001 to 10 000 000	28,853	204,646	7,092,710	28,940	207,273	7,162,171	0.3%	1.0%	0.1%
M: 10 000 001 to 14 000 000	11,128	131,653	11,830,814	11,977	141,911	11,848,661	7.6%	0.2%	0.0%
N: 14 000 001 to 20 000 000	9,559	159,788	16,715,994	10,772	180,483	16,754,794	12.7%	0.2%	0.0%
O: 20 000 001 to 30 000 000	8,589	209,856	24,433,115	10,201	249,578	24,466,014	18.8%	0.1%	0.0%
P: 30 000 001 to 50 000 000	8,326	322,689	38,756,807	10,600	413,219	38,982,938	27.3%	0.6%	0.1%
Q: 50 000 001 to 100 000 000	7,679	537,724	70,025,315	10,613	747,114	70,396,104	38.2%	0.5%	0.1%
R: 100 000 001 +	8,999	7,753,852	861,634,871	14,482	14,931,916	1,031,067,260	60.9%	19.7%	2.0%
Total	227,770	9,549,494	41,926,041	227,770	17,071,674	74,951,370	0.0%	78.8%	6.7%

In respect of the average turnover per vendor, a comparison of 2015/16 to 2024/25 shows that the highest increase (19.7%) was recorded by those vendors with a base turnover of more than R100 million per annum. Negative growth was recorded for vendors with average base turnovers between R100 000 and R300 001 and R700 000 to R2 million brackets. Effectively, there was minimal growth of average turnover for the other groupings, ranging between 0.0% to 1.0%. The average turnover CAGR for all turnover groupings ranged from -1.6% to 2.0%. The significant average total turnover percentage change of 78.8% is mainly due to inflationary growth of turnover over the decade for the 227 770 vendors under consideration, as well as the 1 percentage change in the VAT rate effected in 2018/19.

Figure 4.8: Distribution of sector contribution to Domestic VAT payments for 2015/16 - 2024/25

The primary sector's contribution to Domestic VAT has increased marginally from 8.9% in 2015/16 to 9.1% in 2024/25 as seen in *Figure 4.8*. The secondary sector average contribution of 23.3% remained relatively steady throughout the 10-year period except for 2020/21 which was below average mainly due to the COVID-19 pandemic. The *Electricity, Gas and Water* sub-sector recorded the highest growth in the 10-year period from 2.4% in 2015/16 to 4.8% in 2024/25. The average contribution of the tertiary sector 10-year period was 67.1% with the *Financial Intermediation, Insurance, Real Estate and Business Services* sub-sector's contribution declining by 0.8% from 41.4% in 2015/16 to 40.6% in 2024/25. This is the second consecutive year that the primary sector's contribution remains below 10.0% primarily due to the challenges (e.g. low commodity prices, domestic operational challenges, geopolitical shifts) experienced in the *Mining and Quarrying* sub-sector. This detail is available in *Table 14.7.7*.

Figure 4.9: Distribution of sector contribution to VAT refunds for 2015/16 - 2024/25

On average, the tertiary sector accounted for 44.9% of the VAT refunds in the 10-year period with only 2 of the 10 years having below average contributions. These below-average contribution years were for the period 2020/21 to 2021/22. These fiscal years were impacted by the effect of the Covid-19 pandemic as well as a material increase in the primary sector’s VAT refund contribution due to higher refund claims from the *Mining and Quarrying* sub sector. The biggest drivers of VAT refund pay-outs were *Mining and Quarrying*, which forms part of the primary sector, averaging 24.1%; *Manufacturing*, which falls within the secondary sector, with an average share of 21.0%; as well as *Wholesale and Retail Trade, Catering and Accommodation*, which is part of the tertiary sector, with 20.4% average. This is due to large volumes of exports (zero-rated) and local zero-rated sales in these sub sectors. Contrary to the Domestic VAT, the three largest refund sub-sectors are spread between the primary, secondary and tertiary economic activities while Domestic VAT is mostly concentrated in the tertiary sector. These trends are observed in *Table A4.7.9*.

1. SARS' source of income code is used to classify according to the Standard Industrial Classification (SIC) system. SARS' source of income code is not fully aligned with the SIC system that Statistics South Africa uses.

2. Includes the following SARS sectors – Bricks, ceramic, glass, cement and similar products; Chemicals and chemical, rubber and plastic products; Clothing and footwear; Coal and petroleum products; Food, drink and tobacco; Leather, leather goods and fur (excl. footwear & clothing); Machinery and related items; Metal (including metal products); Other manufacturing industries; Paper, printing and publishing; Scientific, optical and similar equipment; Textiles; Transport equipment; and Wood, wood products and furniture.

3. Includes the following SARS sectors – Catering and accommodation; Retail trade, specialised repair services; Vehicles, parts and accessories; and Wholesale trade.

4. Includes the following SARS sectors – Agencies and other services; Financing, insurance, real estate and business services; and Research and scientific institutes.

5. Includes the following SARS sectors – Educational services; Medical, dental and other health and veterinary services; Personal and household services; Public administration; Recreation and cultural services; and Social and related community services.

6. Includes where the source of income was indicated as Other (as per SARS source code) or where the source of income was left blank on the return.

1. The Agencies and other services sector may be overstated because it is the default sector, or first sector, often selected by taxpayers upon registration.

2. Data has been adjusted for selected vendors that were incorrectly classified on the SARS records.

3. Includes where the sector was indicated as Other or where the sector was left blank on the return.

1. SARS source of income code is used to classify vendors according to the Standard Industrial Classification (SIC) system. SARS source of income code is not fully aligned with the SIC system that Statistics South Africa uses.
 2. Includes the following SARS sectors – Bricks, ceramic, glass, cement and similar products; Chemicals and chemical, rubber and plastic products; Clothing and footwear; Coal and petroleum products; Food, drink and tobacco; Leather, leather goods and fur (excl. footwear & clothing); Machinery and related items; Metal (including metal products); Other manufacturing industries; Paper, printing and publishing; Scientific, optical and similar equipment; Textiles; Transport equipment; and Wood, wood products and furniture.
 3. Includes the following SARS sectors – Catering and accommodation; Retail trade; Specialised repair services; Vehicles, parts and accessories; and Wholesale trade.
 4. Includes the following SARS sectors – Agencies and other services; Financing, insurance, real estate and business services; and Research and scientific institutes.
 5. Includes the following SARS sectors – Educational services; Medical, dental and other health and veterinary services; Personal and household services; Public administrator; Recreation and cultural services; and Social and related community services.
 6. Includes where the source of income was indicated as Other (as per SARS source code) or where the source of income was left blank on the return.

1. SARS source of income code is used to classify according to the Standard Industrial Classification (SIC) system. SARS source of income code is not fully aligned with the SIC system that Statistics South Africa uses.

2. Includes the following SARS sectors – Bricks, ceramic, glass, cement and similar products; Chemicals and chemical, rubber and plastic products; Clothing and footwear; Coal and petroleum products; Food, drink and tobacco; Leather, leather goods and fur (excl. footwear & clothing); Machinery and related items; Metal (including metal products); Other manufacturing industries; Paper, printing and publishing; Scientific, optical and similar equipment; Textiles; Transport equipment; and Wood, wood products and furniture.

3. Includes the following SARS sectors – Catering and accommodation; Retail trade; Specialised repair services; Vehicles, parts and accessories; and Wholesale trade.

4. Includes the following SARS sectors – Agencies and other services; Financing, insurance, real estate and business services; and Research and scientific institutes.

5. Includes the following SARS sectors – Educational services; Medical, dental and other health and veterinary services; Personal and household services; Public administration; Recreation and cultural services; and Social and related community services.

IMPORT VAT AND CUSTOMS DUTIES

For the 2024/25 fiscal year...

Number of registered importers

210 974

5 IMPORT VAT AND CUSTOMS DUTIES

KEY FACTS

For the 2024/25 fiscal year:

- Import VAT collections totalled R261.9 billion and recorded a year-on-year contraction rate of 1.2%, following a growth of 3.9% in 2023/24. Collections of Customs Duties totalled R76.7 billion and experienced a year-on-year growth of 8.7%, on the back of a 4.6% contraction in 2023/24.
- Revenue from two of the sub-categories of Duties, namely Specific Excise Duties and *Ad valorem* Excise Duties contributed R9.4 billion (a share of 12.2%) and R16.1 billion (21.0%) respectively to the year's total Duty collection (referencing Sections A and B of Part 2 of Schedule 1 to the Customs and Excise Act, 1964). The majority of the remaining R51.2 billion (66.8%) comprises all other Customs Duties levied, predominantly General Duties (Part 1 of Schedule 1 to the Customs and Excise Act, 1964).
- Import VAT and Customs Duties accounted for 14.1% and 4.1% of the year's Total Tax Revenue respectively, resulting in a 18.2% aggregate. This total was higher than the 18.0% average over the preceding five fiscal years. The combined share of these taxes relative to GDP increased to 4.6% from the preceding five-year average of 4.3%, with Import VAT and Customs Duties contributing 3.5% and 1.0%, respectively.
- The largest driver of the year's Import VAT was *Machinery and Electronics* at 27.0%, down from 28.9% in 2023/24. Notably, *Vehicles, Aircraft and Vessels* accounted for the most significant portion of Customs Duties at 25.6%, down from 26.1% in the prior year.
- Imports from the world zones of Asia and Europe accounted for 82.8% of the combined Total Import Tax contribution, compared to 82.5% in 2023/24. Per country, China and Germany — respectively contributing 30.9% and 7.4% of Total Import Tax — remained the principal suppliers of taxable goods to South Africa.
- The Importer register decreased year-on-year by 40.7% to 210 974 in number, as reflected in *Table 1.1* in Chapter 1. This significant shift in volumes is a result of a clean-up of the Customs Register.
- The overall effective tax rates, as reflected in *Table A5.1.2*, was 9.3% for Import VAT, 2.8% for Customs Duties and 12.1% for Total Import Tax.
- The key economic driver for these collections was nominal merchandise imports into the country, which totalled R1.9 trillion for the 2024/25 FY, declining year-on-year by 3.2%; with most of the key contributing commodities registering year-on-year decreases. Trade during the full calendar year 2024 registered imports to the value of R1.8 trillion, equating to a cumulative year-on-year contraction rate of 5.1%.

- Overall, throughout the fiscal year under review, the subdued economic environment with passive levels of investment and household consumption resulted in the dwindling domestic demand for consumption and capital goods, most of which are key contributors to Customs taxes.
- The importation of renewable energy products declined after reaching a market peak in the 2023/24 FY. Reduced imports of automotive components mirrored subdued activity in the domestic vehicle manufacturing sector, which was underpinned by plummeting vehicle exports during 2024. Meanwhile, increased vehicle imports from China largely compensated for weakening domestic new vehicle sales, with NAAMSA (National Association of Automobile Manufacturers of South Africa) reporting a 3.0% year-on-year decline in new vehicles sales for 2024.
- Conversely, the importation of Textiles and Clothing, along with Footwear and Accessories, experienced a fiscal year of steady growth, namely via imports facilitated through e-commerce services.

INTRODUCTION

The South African Customs Administration plays an integral role in the facilitation of movement of goods and people entering or exiting the country's borders. Customs is the first line of control to secure the state's interests by regulating the movement of goods into, from and through the state's Customs territory. Goods imported into the country are subject to VAT and Customs Duties upon importation based on their Customs value, with tariff and origin of the goods having an impact on the latter as well.

The Customs value of imported goods at the time of entry for home consumption is the transaction value thereof (i.e. the price actually paid or payable for the goods when sold for export to South Africa), adjusted by the addition of any dutiable charges not included in the price actually paid or payable, or the deduction of non-dutiable charges included in the price paid or payable.

For the purposes of Import VAT calculations, this value is 'uplifted' by a further 10% to cover costs such as insurance and freight. No such mark-up is, however, applied in respect of goods that originate from any of the BELN countries (Botswana, Eswatini, Lesotho and Namibia) when cleared for home consumption and only VAT of 15% is calculated on the Customs value.

Import VAT is levied on the importation of goods and services into South Africa in terms of the VAT Act of 1991. This is an indirect consumption tax and there are however, certain goods and services, including specific mineral oils and several basic food items, which are supplied at either zero-rate or are exempt from VAT. The standard rate of VAT in South Africa was 14% from 07 April 1993 until 31 March 2018. In the 2018 National Budget Speech, the Minister of Finance announced a 1 percentage point increase in the VAT rate, bringing the rate to 15% effective from 01 April 2018. This rate increase should be considered when comparing Import VAT across the years.

Customs Duties are imposed under the Customs and Excise Act, 1964. They are levied on imported goods with the aim of raising revenue and protecting the local market. These duties are either levied on an *ad valorem* basis, meaning as a percentage of the value of the goods; or on a specific duty basis,

which applies at a rate of cents per unit (for example: per kilogram, metre or litre). The determination of the rate applicable to each import is set out in the schedules to the Customs and Excise Act and is based on the specific tariff classification of the commodity.

It is important to note that the term “Customs Duties”, when used in this chapter, comprises all duties levied on imports including Specific Excise Duties and *Ad valorem* Duties; and also includes revenue for the SACU member states which is to be distributed to them according to the revenue sharing agreement, further detailed in Chapter 6.

Also important to note is that Total Import Tax, as referred to in this chapter, is the sum of Import VAT and Customs Duties.

This chapter reviews:

- Methodology
- Declarations and Payment process
- Harmonised System sections
- World zones and selected trade blocs
- Country of origin
- Customs port of entry

METHODOLOGY

South Africa is a member of the World Customs Organisation (WCO) and therefore uses the Harmonized Commodity Description and Coding System (HS) for the classification of goods upon importation.

South Africa is also a signatory to the General Agreement on Tariffs and Trade (GATT). The basis for determining Customs values is provided for in the Agreement on implementation of Article VII of the General Agreement on Tariffs and Trade, 1994.

The ‘Free on Board’ contract is currently the basis for customs valuation in South Africa. Section 67(1)(e) of the Customs and Excise Act, 1964, provides for the addition to the price charged for the goods, to the extent that they are not included in such a price; of transportation expenses (from factory to warehouse) and insurance, loading, unloading, handling and associated charges incidental to delivery of the goods to the place of export in the country of exportation.

The effective tax rates reflected in this chapter are calculated by measuring the tax declared as a percentage of the Customs value declared. For example, the effective tax rate of Import VAT for each HS section is calculated as Import VAT declared as a percentage of the Customs value declared for that specific HS section. The same methodology has been applied to calculate the effective tax rate for Customs Duties.

DECLARATIONS AND PAYMENT PROCESS

Customs values are declared on a Bill of Entry (BOE) to Customs at the time of importation. The tables in this chapter reflect the values as processed on these BOE transactions and may therefore differ from the actual collections. This difference is usually a result of the delay between the date of the declaration and the date on which the amount payable (as reflected on the declaration) was settled.

It is important to note that the payment dates differ depending on whether the importer participates in the Customs deferment scheme. An importer who is registered for the Customs deferment scheme maintains an account with SARS. This account is closed every thirty days, and the amount owing must be settled within seven days thereafter. Importers not registered for the Customs deferment scheme are required to settle their liability for Import VAT and Customs Duties with a payment before the goods are released.

BY HARMONISED SYSTEM SECTION

Table A5.1.1 shows the Customs value of imports, Import VAT, Customs Duties and Total Import Tax as classified by the HS section. The table shows that the imports of *Machinery and Electronics* (17.3%) accounts for the largest portion of Customs value in 2024/25, followed by *Mineral Products* (at 15.1%); *Precious Stone and Metals* (10.3%) and *Chemical Products* (10.3%).

A detailed breakdown of the HS sections by tariff level is available online in *Table A5.5*.

Import VAT for 2024/25, as shown in *Figure 5.1*, was collected mostly from the importation of *Machinery and Electronics* (27.0%), *Chemical Products* (12.8%), *Vehicles, Aircraft and Vessels* (10.8%), *Special Provisions* (9.5%), *Base Metals* (6.6%), *Plastics and Rubber* (5.1%), *Textiles and Clothing* (4.9%), and *Mineral Products* (4.6%). The *All Other sections* grouping (18.8%) comprises the remaining 14 HS sections.

Figure 5.1: Import VAT by HS Section, 2024/25

The overall year-on-year contraction rate of 1.2% recorded in Import VAT collections during the 2024/25 FY was underpinned by decreases in key contributing commodities. The contraction was led by *Machinery and Electronics* (year-on-year decline of 7.8%) and *Special Provisions* (-8.0%) and was partially offset by growths in *Food, Beverages and Tobacco* (year-on-year growth of 14.2%), *Textiles and Clothing* (11.8%), and *Vehicles, Aircraft and Vessels* (1.0%), among others.

As discussed in Chapter 4, *Table A4.2.6* provides a fully aligned overview of Import VAT flows by SARS sectors. The Import VAT recorded in each sector is based on BOE declarations and is then classified using the VAT sector indicated by the importer’s VAT reference number.

Table A4.2.7 shows that imports under *Tertiary* economic activities accounted for 60.5% of the Import VAT total in 2024/25, with *Secondary* activities at 34.1% and *Primary* activities at 3.9%, with *Other* activities making up the remaining 1.5%.

Import VAT from the top three contributing economic sectors made up 87.5% of the total; namely the *Wholesale and Retail Trade, Catering and Accommodation* sector (*Tertiary*) at 38.3%, followed by the *Manufacturing* sector (*Secondary*) at 30.5%, and the *Financial Intermediation, Insurance, Real-Estate and Business Services* sector (*Tertiary*) at 18.7%.

As shown in *Table A5.1.2*, the overall effective tax rate for Import VAT in 2024/25 was 9.3% compared to previous year’s 9.3%. Key commodities with the highest effective VAT rates were *Footwear and Accessories* at 18.7%, *Hides, Skins and Leather* at 17.3%, and *Textiles and Clothing* at 16.3%.

The largest contributing HS sections to Customs Duties in 2024/25, as shown in *Figure 5.2*, were *Vehicles, Aircraft and Vessels* (25.6%), *Textiles and Clothing* (16.6%), *Machinery and Electronics* (13.5%), and *Food, Beverages and Tobacco* (12.3%).

The overall year-on-year growth of 8.7% recorded in Customs Duties collections during the 2024/25 FY was underpinned by increases in key contributing commodities, led by *Textiles and Clothing* (with a year-on-year growth of 14.4%), *Food, Beverages and Tobacco* (13.5%), and *Vehicles, Aircraft and Vessels* (7.0%), among others.

Imports under the *Food, Beverages and Tobacco* section made up 99.9% of the Specific Excise Duty total, largely driven by cigarettes (38.0%) sourced mainly from Switzerland, as well as whiskies (22.8%) imported mostly from the United Kingdom.

The sections of *Vehicles, Aircraft and Vessels* (68.7%) as well as *Machinery and Electronics* (26.7%) were the largest contributors to the *Ad valorem* Duty total. Luxury vehicles from Germany, India, Japan, China and United States composed 66.4% of the former's total; while electronic devices, mainly smartphones from China, accounted for 73.6% of the latter's total.

As shown in *Table A5.1.2*, the overall effective Customs Duty rate in 2024/25 was 2.8% compared to previous year's 2.6%. Key commodities with the highest effective Duty rates were *Footwear and Accessories* at 24.6%; *Hides, Skins and Leather* at 21.7%; *Textiles and Clothing* at 16.8% and *Food, Beverages and Tobacco* at 10.4%.

Figure 5.2: Customs Duties by HS Section, 2024/25

Figure 5.3 shows the top eight contributing sections: Machinery and Electronics, Vehicles, Aircraft and Vessels, Chemical Products; Textiles and Clothing, Special Provisions, Base Metals, Food, Beverages and Tobacco, and Plastics and Rubber. Combined, these sections made up 81.6% of the Total Import Tax for 2024/25.

As shown in Table A5.1.2, the overall effective tax rate for Total Import Tax in 2024/25 was 12.1% compared to previous year's 11.9%. Key commodities with the highest effective Total Import Tax rates were Footwear and Accessories at 43.2%, Hides, Skins and Leather at 39.0%, and Textiles and Clothing at 33.1%.

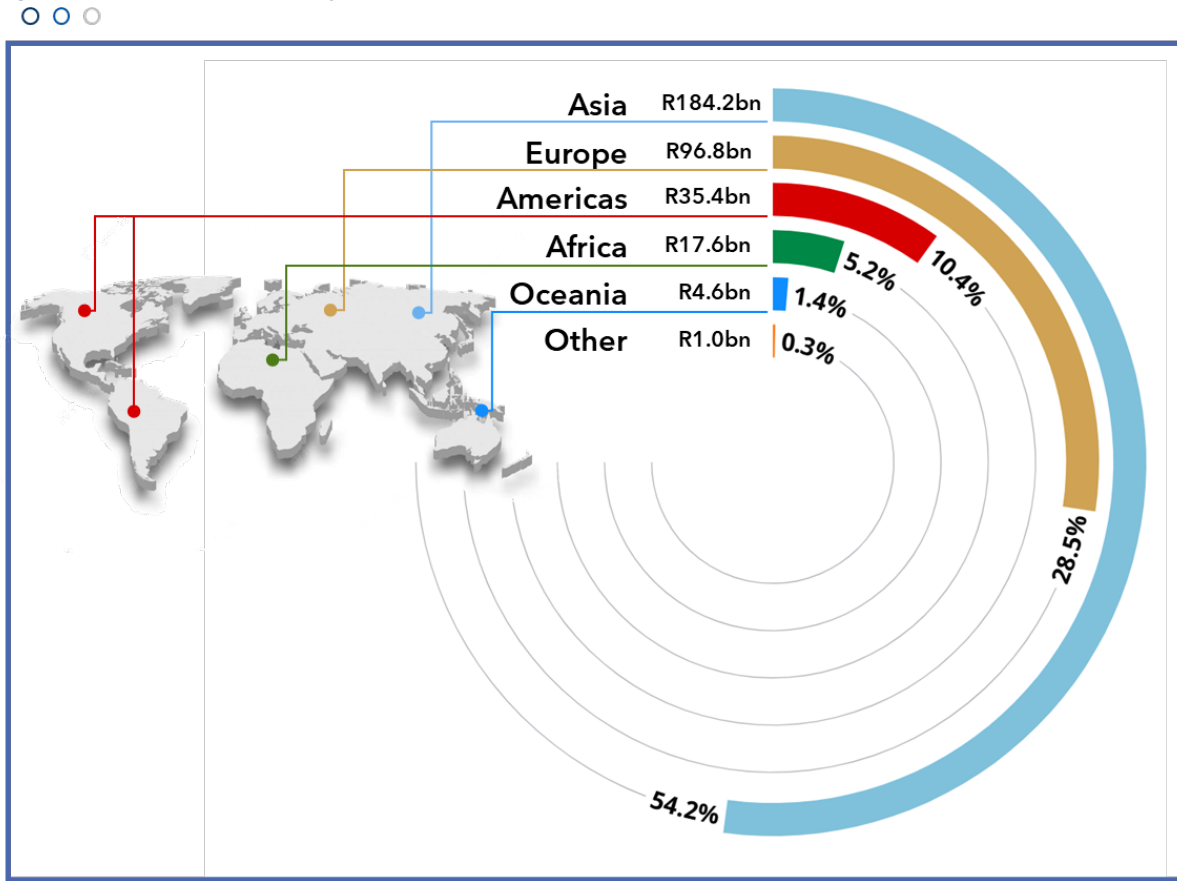

Figure 5.3: Total Import Tax by HS Section, 2024/25

BY WORLD ZONE AND SELECTED TRADE BLOCS

Imports from Asia accounted for 54.2% of the Total Import Tax, followed by Europe at 28.5% and the Americas at 10.4%. *Figure 5.4 and Table A5.2.1* show the combined Total Import Tax contribution of Import VAT and Customs Duties, categorised by World zone and selected trade blocs.

Figure 5.4: Total Import Tax by World Zone, 2024/25

Asia was South Africa's largest import supplier in 2024/25 at 41.3% of total Customs value, 50.2% of Import VAT and 67.3% of Customs Duties; with goods imported from China, India, Thailand and Japan accounting for 80.8% of Asia's contribution to South Africa's Total Import Tax.

Europe, the second largest Total Import Tax contributor, accounted for 19.5% of total Customs value, 30.3% of Import VAT and 22.8% of Customs Duties; with imports from Germany, Italy, United Kingdom, France, Switzerland and Spain constituting a combined 61.4% of Europe's share of South Africa's Total Import Tax.

In calendar year 2024, Africa was the significantly larger of only three world zones with which South Africa recorded a positive trade balance (R372.4 billion), which culminated in a 28.1% contribution to the Customs value as well as 5.2% to the Total Import Tax for 2024/25.

The majority of Africa's Total Import Tax contributions emanated from Import VAT at a 92.3% share, with Eswatini being the continent's biggest contributor to Import VAT at 25.0%, followed by Mozambique at 18.5%.

The Africa world zone - which comprises the rest of Africa including BELN - continues to grow as an important strategic trade partner for South Africa, specifically in light of the African Continental Free Trade Area (AfCFTA) agreement which came into effect on 01 January 2021; following a postponement, due to COVID-19, from the initially scheduled commencement date of 01 July 2020.

AfCFTA is a vehicle for Africa's economic transformation and sets out an ambitious task to facilitate the flow of goods, services, people and capital across the African Union's 55 member states.

By August 2025, 49 countries on the African continent had ratified the Agreement.

South Africa started trading under the agreement since 31 January 2024. The countries that have fulfilled all the requirements for implementation and are currently trading with South Africa are Algeria, Cameroon, Egypt, Ghana, Kenya, Rwanda, Tunisia, Burundi, Morocco, Uganda and The Gambia. Trade with the Southern African Development Community (SADC) countries will continue under the SADC trade agreement.

Once completed, the free-trade area, which is of substantial economic interest to South Africa and the African continent, will provide a market of over 1 billion people with a GDP of over US\$2.6 trillion.

The trade bloc of Brazil, Russia, India, China and South Africa (BRICS) was the largest trade bloc contributor to South Africa's Total Import Tax at 39.7% and accounted for 25.7% of the year's Customs value; with China, India and Brazil among SA's top thirteen suppliers, in terms of revenue.

South Africa's growing trade with fellow continental partners in 2024/25 was further emphasized within the selected trade bloc category where the African Union was South Africa's top supplier in terms of Customs value, with a 25.9% share, while contributing a modest 4.9% to Total Import Tax, mainly from Import VAT.

The European Union (EU) trade bloc recorded 16.8% of the total Customs value and 23.6% of South Africa's 2024/25 Total Import Tax; with imports from Germany, Italy, France and Spain being the major contributors. **Important to note** that the United Kingdom/Great Britain has been included under the EU until the period ending 31 December 2020. From 01 January 2021 onward, the United Kingdom/Great Britain is excluded from the EU trade bloc categorisation.

BY COUNTRY OF ORIGIN

Figure 5.5 shows that the top eight Countries of Origin — China, Germany, United States, India, Thailand, Japan, Italy and United Kingdom — collectively accounted for 62.4% of the Total Import Tax for 2024/25.

Goods imported from China under the *Machinery and Electronics* section contributed the most to the country's Customs value (44.9%) and Import VAT (43.7%) for 2024/25. The key imports from China that accounted largely for Customs Duties were *Textile and Clothing* (25.9%), *Machinery and Electronics* (18.4%), *Vehicles, Aircraft and Vessels* (12.0%), *Footwear and Accessories* (10.0%), and *Base Metals* (10.0%).

Merchandise imported from Germany was led by the *Machinery and Electronics* section, which was the largest contributor to the country's Customs value (at 22.9% share) and second largest contributor to Import VAT (also at 22.9%), whereas the biggest driver of Customs Duties was *Vehicles, Aircraft and Vessels* (72.5%).

In 2024/25, Eswatini was the largest African trade partner among South Africa's top 20 countries that contributed to Total Import Tax. Eswatini ranked 10th in Customs Value at 1.3% and 13th for Import

IMPORT VAT AND CUSTOM DUTIES

VAT at 1.6%, with the latter supported by goods imported under the sections of *Chemical Products* (37.0%), *Food, Beverages and Tobacco* (28.6%), and *Textiles and Clothing* (15.6%).

2024/25 is the second year in which Mozambique appears in South Africa's top 20 contributing countries, as the second highest African Trade partner. Mozambican *Mineral Products* contributed the most to the country's Customs Value (65.3%) and Import VAT (75.3%) for 2024/25. *Food, Beverages and Tobacco* (97.4%) made up most of the country's Customs Duties contribution.

Table A5.3.1 shows the 20 countries that were the leading suppliers of goods contributing to Total Import Tax.

Figure 5.5: Total Import Tax by Country of Origin, 2024/25

BY CUSTOMS PORT OF ENTRY

South Africa's Customs ports of entry comprise airports, sea harbours, border posts and inland offices.

Table A5.4.1 lists the contributions of the following categories in Customs port of entry for the fiscal years 2021/22 to 2024/25, according to their Total Import Tax share by:

- Top 4 Sea Harbours: Durban, Cape Town, Port Elizabeth (Gqeberha) and Richards Bay.
- Top 5 Airports: O.R. Tambo, Cape Town, King Shaka, Lanseria and Port Elizabeth(Gqeberha).
- Top 9 Border Posts and Inland Offices: Johannesburg, East London, Pretoria, Germiston/Alberton, Oshoek, Komatipoort, Groblers Bridge, Beitbridge and Golela.
- Other Offices: all remaining Customs offices across the above categories.

Figure 5.6 shows the contribution of each of these categories to the Total Import Tax in 2024/25.

Figure 5.6: Total Import Tax by Customs Port of Entry Group, 2024/25

Table A5.4.2 lists the contributions of the top ports of entry. Figure 5.7 shows the contribution of the top six offices — Durban Harbour, O.R. Tambo International Airport, Cape Town Harbour, Port Elizabeth (Gqeberha) Harbour, Johannesburg Customs Office and East London Customs Office — which together accounted for 89.1% of the Total Import Tax for 2024/25.

Durban Harbour is the largest and busiest shipping terminal in sub-Saharan Africa and is, therefore, a significant contributor to the South African economy. In 2024/25, goods imported through Durban Harbour constituted 41.3% of the national Customs value total, 47.8% of the Import VAT total and 51.9% of Customs Duties revenue.

Activity at Durban Harbour was driven principally by imports of *Mineral Products* at 20.4% of the port’s Customs value and *Machinery and Electronics* at 25.5% of its Import VAT; while *Vehicles, Aircraft and Vessels* accounted for 32.7% of the port’s Customs Duties collected.

O.R. Tambo International Airport is Africa's second-busiest airport. In 2024/25, the value of the cargo imported through this airport represented 21.9% of the Customs value of goods imported into the country, while contributing 17.3% to the Import VAT total and 10.8% to the Customs Duties total. Goods imported through O.R. Tambo International Airport was driven principally by imports of

IMPORT VAT AND CUSTOM DUTIES

Precious Stones and Metals at 46.7% of the airport's Customs value, while *Machinery and Electronics* at 49.9% of its Import VAT and 46.1% Customs Duties collected.

Important Note : All figures displayed on this table are as per Bills of Entry processed and not actual revenue collected.

1. Customs Duties is inclusive of Specific excise on imports (Duty 1-2A) and Ad valorem excise on imports (Duty 1-2B).
2. Total Import Tax is Import VAT plus Customs Duties.

For the 2024/25 fiscal year...

An aggregate of **R250.0 billion** has been raised since the introduction of CGT in October 2001.

Transfer duties amounted to **R11.4 billion**
 A increase from R9.6 billion in 2023/24.

Mineral and Petroleum Resources Royalty payments amounted to **R10.6 billion**
33.4% decrease from 2023/24

This contraction is attributed due to a significant decline in commodity prices, particularly PGMs, Iron Ore and Coal

Contributions to the SACU pool during 2024/25 **R143.3 billion**

Diesel refunds increased 86.4% from R7.3 billion to R13.6 billion in 2024/25.

This increase was driven by a settlement agreement concluded with a taxpayer in the **electricity sector** which resulted in this sector recording growth of R8.3 billion (444.2%).

6

OTHER TAXES AND COLLECTIONS

KEY FACTS

For the 2024/25 fiscal year:

- Capital Gains Tax (CGT) of R17.2 billion was raised, of which R9.2 billion was attributable to individuals and Trusts, and R8.0 billion to companies. This reflects an overall decline of R4.2 billion (19.5%) from the R21.3 billion raised in 2023/24. An aggregate of R250.0 billion has been raised since the introduction of CGT in October 2001, with R116.5 billion deriving from individuals and Trusts and R133.5 billion from companies;
- Transfer Duty collected totalled R11.4 billion, an increase of R1.8 billion (18.6%) from the R9.6 billion collected in 2023/24, in line with a transaction-volume increase of 3.6% year-on-year and a 10.5% increase in value of dutiable properties.
- Diesel refunds increased from R7.3 billion in 2023/24 to R13.6 billion in 2024/25, an increase of R6.3 billion (86.4%). This increase was materially impacted by a settlement agreement concluded with a taxpayer in the electricity sector which resulted in this sector recording growth of R8.3 billion (444.2%).
- Mineral and Petroleum Resources Royalty (MPRR) payments by extractors contracted by R5.3 billion (33.4%) from R16.0 billion to R10.6 billion due to a significant decline in commodity prices, particularly PGMs, Iron Ore and Coal. This contraction was less severe due to the improved Gold prices, which effectively offset the decline in MPRR payments.
- The SACU common revenue pool (CRP) was estimated at R141.8 billion in the 2025 Budget but the audited actual contributions amounted to R143.3 billion. The CRP outcome exceeded the revised estimate by R1.5 billion (1.1%) due to higher-than-expected specific excise duties and *ad valorem* excise duty collections. Additionally, the 2024/25 CRP registered a growth of R11.9 billion (9.1%) compared to 2024/25.

INTRODUCTION

This chapter focuses on revenue collection trends that provide insight into specific aspects of economic activity during 2024/25. It gives an overview of:

- Capital Gains Tax (CGT);
- Transfer Duty;
- Diesel Refunds;
- Mineral and Petroleum Resources Royalties (MPRR); and
- The Southern African Customs Union.

CAPITAL GAINS TAX

CGT is a tax in respect of the proceeds less base cost (or gains) from the disposal of assets in terms of the Eighth Schedule to the Income Tax Act No. 58 of 1962. It is raised on assessment of the taxpayer and forms part of the normal income tax liability. The revenue due from CGT is declared in PIT or CIT tax returns.

Table 6.1 shows the cumulative amount for CGT raised since its inception on 1 October 2001 to the end of March 2025, which amounted to R250.0 billion.

Determining the tax base of CGT is generally difficult because gains are only taxed on the realisation of assets and the taxable capital gain is taxed at the marginal tax rates applicable to the taxpayers. After the global financial crisis in 2008, taxpayers who were able to postpone the realisation of their assets did so to prevent losses. Taxpayers who sold assets in distress, most notably the selling of holiday homes and equities, experienced capital losses. This resulted in lower amounts of CGT being raised.

From March 2012, the inclusion rate for natural persons and special trusts increased from 25.0% to 33.3% of capital gains, and for companies and trusts the inclusion rate rose from 50.0% to 66.6%. From March 2016, these inclusion rates were raised again to 40.0% for natural persons and special trusts; and to 80.0% for companies and trusts.

TRANSFER DUTY

Transfer Duty is a tax levied in terms of the Transfer Duty Act, 1949, at progressive rates on the value of any property that is acquired by any individual or juristic entity, subject to fair market value and the exemptions provided for in section 9 of the Act. It is the largest source of revenue in the “taxes on property” category as defined in the Government Finance Statistics (GFS) manual.

Transfer duty is levied on a wide range of assets that are defined as property. They include land and fixtures as well as real rights in land, rights to minerals, a share or interest in a residential property company, as well as shares in a share-block company.

When property is acquired, transfer duty is imposed on the person acquiring the property. When rights associated with property are renounced, responsibility for the payment of transfer duty lies with the person in whose favour, or for whose benefit, any interest in or restriction upon the use or disposal of property has been renounced. Transfer duty is payable within six months from the date of acquisition.

The sale of a property directly or through a change in shareholding is subject to either VAT or transfer duty, with VAT taking precedence. If the seller is a registered VAT vendor, and the property forms part of the seller's enterprise, then VAT is payable on the transaction. Where shares are sold, the value of the property is effectively included as part of the consideration for the shares and the transaction is subject to transfer duty under specific anti-avoidance measures. For example, the sale of a vendor's private residence, or the sale of property used by a vendor for the purposes of employee housing is subject to transfer duty as these supplies are made in the course of an exempt activity and not in the course or furtherance of the enterprise carried on by the vendor.

Table 6.2 shows the revised rates effective from 1 March 2020 to 28 February 2023; **Table 6.3** reflects the rate of Transfer Duty payable from 1 March 2023 to current.

12 100 001	+	R937 500 + 13% of the amount above R12 100 000

1. Effective from 01 March 2023

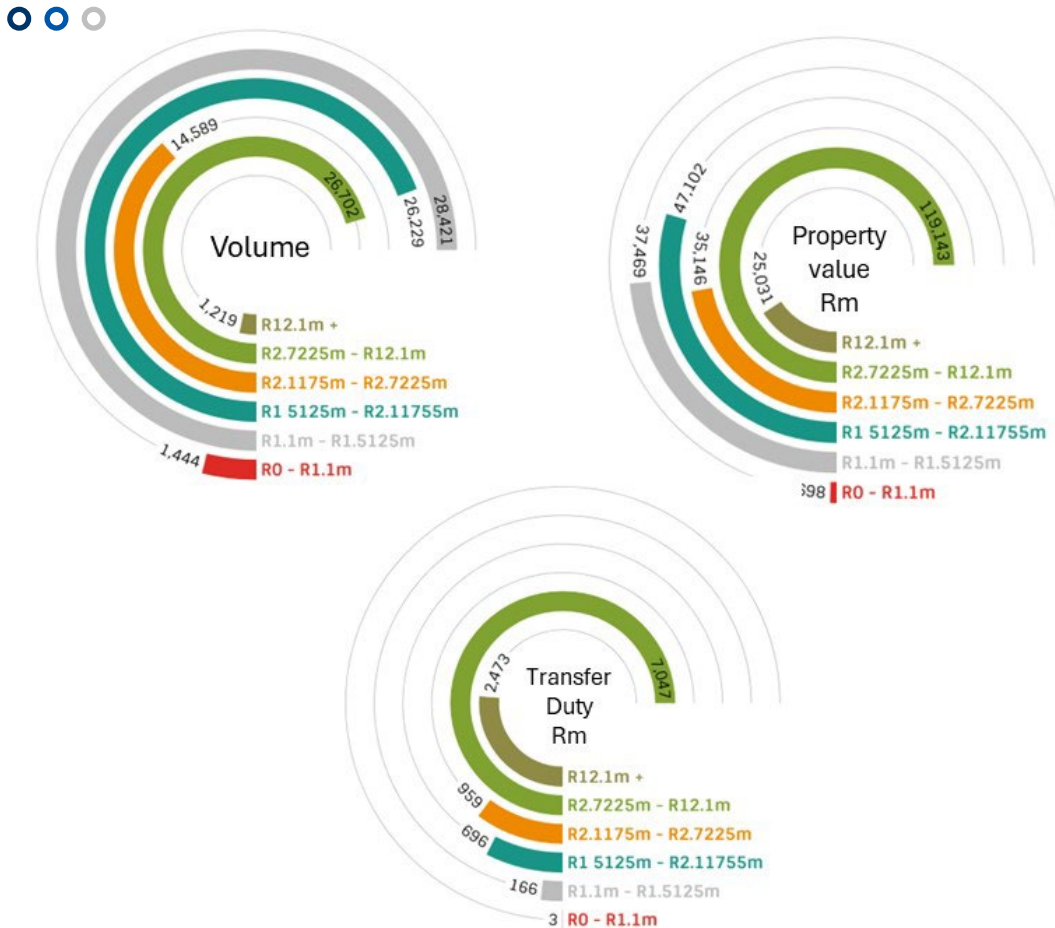

The migration of transfer duty payments onto SARS's electronic eFiling platform in 2013 has improved the accuracy of information on property transactions and associated duties. From 1 March 2015, the threshold of property values liable for transfer duties was increased to R750 000. This was raised to R900 000 from 1 March 2017. The threshold was further revised to R1 000 000 with effect from 1 March 2020. This threshold was further raised to R1 100 000 with effect from 1 March 2023.

For the fiscal year ending 31 March 2025, transfer duty was paid on a total number of 98 674 properties that were transferred with a combined value of R264.6billion. This represents a volume increase from the 95 291 properties transferred in 2023/24 with a combined value of R240.2 billion. This translated into transfer duty collections of R11.4 billion, an increase from the R9.6 billion received in 2023/24, representing a 3.6% annual volume increase and a 10.5% increase in value of transfer duty collection.

The transaction volume increase is driven by the reduced cost of borrowing over the period with the resultant increase in transfer-duty collected. In the current year 98.8%(2023/24: 99%) of the transfer volume accounted for 80%(2023/24: 80.5%) of the transfer duty collected.

The transaction volume and related transfer-duty value-bands for 2024/25 are graphically displayed in figure 6.1 below.

Figure 6.1: Distribution of Transfer Duty Collected by Property Value, 2024/25

The average value of property transferred was R2.7 million (2023/24: R2.5 million) and the average transfer duty paid was R115 198(2023/24: R100 548). Table A6.1.1 shows the transfer duty collected in each value category in 2024/25 and Table A6.1.2 shows the transfer duty collected in 2023/24, including the percentage and cumulative percentage contribution per category.

The Pareto analysis for the past two years reveals that, by **volume**; 98.8% of transfers(2023/24: 99%) contributed to 80% of the transfer duty in 2025 on 91%(2023/24: 92%) of the property value.

The transfer duty declarations require a specification of the nature of property that is being transferred. One of the following descriptions must be used:

- Primary residence – A person’s primary residence is the dwelling where the person usually lives, typically a house or an apartment. A person can only have one primary residence at any given time.

- Other residential property – Property that is used for residential purposes, other than as a primary residence, e.g. holiday home.
- Small holding – Land under 50 hectares that is used for cultivation.
- Farm – An area of land, including buildings, used for growing crops and rearing animals.
- Commercial building – A building that is used for commercial purposes, such as an office building, warehouse or retail space.
- Industrial building – A building used for manufacturing or distribution, e.g. factory or workshop.
- Mining property/rights – Ownership of mining rights to mine in a specific area; and
- Other – If the nature of the property is not described above, then it is classified as other. Table A6.1.3.1. and Table A6.1.3.2 show the breakdown of transfer duty collected by the nature of property. In 2024/25, primary residences made up 80.1%(2022/23: 79.7%) of the total number of transactions, accounting for 76.7%(2023/24: 84.2%) of the total property value and 73.8 % (2023/24: 75.2%) of transfer duties collected for the year.

DIESEL REFUNDS

The diesel refund system came into effect on 4 July 2001 and reimburses users of diesel with respect of fuel levies collected at the source. The refund is intended to promote the international competitiveness of local primary production in fishing, farming, forestry, and mining sectors. The refund also reduces the road-related tax burden of the Road Accident Fund (RAF) levy for certain non-road users such as, offshore activities, harbour vessels, and rail freight.

With effect from 1 October 2007, the diesel refund scheme was extended to include electricity generation by plants with a capacity exceeding 200 megawatts per plant that use distillate fuel solely to generate electricity for peak demand.

Diesel refund rates are different depending on the purpose for which the fuel is used. Primary producers on land (farming, forestry, and mining) qualify for a refund amounting to 100% of the RAF levy and 40% of the general Fuel Levy (FL) in respect of 80% of their eligible diesel fuel usage. Offshore activities which include commercial fishing, coasting vessels, coastal shipping, offshore mining, National Sea Rescue Institute (NSRI) vessels, vessels conducting research for the marine industry, coastal patrol vessels, vessels servicing fibre-optic telecommunications cables, and harbour vessels get full refunds of both the RAF levy and FL. Rail freight (not passenger rail), and certain harbour vessels are refunded the full RAF levy only. Peak power electricity generation plants are refunded 50% of the FL since 1 April 2016 and the full RAF levy.

The rates are revised each year to align the concession in line with the latest FL and RAF levy rates, except for the 2022/23 fiscal year, after it was announced in the 2022 Budget that the rates would remain unchanged to provide tax relief in support of households and the economy; whilst additional FL relief measures were implemented between April and July 2022. For both 2023/24 and 2024/25, no changes were announced in the 2023 and 2024 Budgets, respectively.

Due to the electricity crisis, diesel refund of the RAF levy on diesel used in generating electricity for the food manufacturing process was extended to the foodstuff manufacturers as announced in the

2023 Budget Speech. This was effective from 1 April 2023 to 31 March 2025 to limit the impact of load shedding on food prices. This diesel refund, limited to 80% of the RAF levy, was extended to the manufacturers of foodstuffs for the use of diesel in generating electricity for manufacturing facilities.

The applicable Diesel refund rates for the past five years are shown in Table 6.5:

Table 6.4: Diesel refund rates, 2020/21 – 2024/25

Effective Date	Onland c/l ¹	Offshore c/l ¹	Rail and harbour c/l ¹	Peak Power Plants c/l ¹
01/04/2020	349.0	562.0	207.0	384.5
06/04/2021	366.0	588.0	218.0	403.0
06/04/2022	366.0	588.0	218.0	403.0
05/04/2023	366.0	588.0	218.0	403.0
03/04/2024	366.0	588.0	218.0	403.0

1. Cents per litre

The diesel refund concession is administered through the VAT system and claims are either refunded or may be set off against a vendor's VAT liability. The setoff is provisional and subject to the provisions of the Customs and Excise Act No. 91 of 1964, read with Note 6, Part 3 of Schedule No. 6 to the same Act. The diesel refunds for 2021/22 to 2024/25 are shown in Table 6.6.

Table 6.5: Diesel refunds, 2021/22 - 2024/25

Diesel Refunds (In R million)	2021/22		2022/23		2023/24		2024/25	
	Mega litres	Amount	Mega litres	Amount	Mega litres	Amount	Mega litres	Amount
On land (only 80% of eligible litres qualify)	1,313.3	4,638.1	1,361.5	4,796.8	1,415.2	5,137.5	1,180.4	4,307.4

1. Amount reflected cannot be categorised in the groupings above

Diesel refund claims that reduced VAT liability used to be accounted for as a part of domestic VAT collections. Since 2013/14, these claims have been reclassified and are now included in diesel refunds. Since 2022/23, these claims have added less than R1 billion, adding R908.7 million and R592.5 million for 2022/23 and 2023/24, respectively. For 2024/25, these claims reduced the diesel refund value by R571.8 million (196.5% contraction) because of audits that were concluded during the year under review.

For the 2021/22, the diesel refund payouts grew by R257.2 million (3.6%) driven by the 253.1 mega litres (54.2%) increase of diesel usage in the mining sector. The R839.2 million (11.4%) reduction for 2022/23 was driven by the 231.6 mega litres (44.1%) and 121.5 mega litres (88.9%) decline in diesel usage for the electricity and rail sectors, respectively. The 2023/24 fiscal year showed growth of R772.0 million (11.9%) with the electricity sector diesel usage increasing by 171.8 mega litres (58.5%) and the mining sector usage increasing by 94.2 mega litres (14.6%).

The litres of diesel used increased by 2,650.5 mega litres (134.9%) for the 2024/25 fiscal year, impacted by the settlement agreement with a vendor in the electricity sector. The electricity sector was the only sector with material growth (2,885.3 mega litres or 619.8%) while the mining and agricultural sectors recorded contraction of 181.2 mega litres (24.5%) and 69.3 mega litres (11.7%), respectively.

Diesel refund payouts increased by R6.3 billion (86.4%) for the 2024/25 fiscal year materially impacted by the settlement agreement. The electricity sector is now the largest recipient of the diesel refund payouts and recorded growth of R8.3 billion (444.2%). The mining sector is the second largest sector but had a contraction of R640.7 million (24.0%). The mining sector production levels remained below the pre-Covid level of 2019 with domestic operational challenges, geopolitical shifts and prolonged low platinum group metals pricing, amongst other factors. Similar to the past two fiscal years, the rail and harbour sector received low payouts, R2.8 million but recorded growth of R1.5 million (111.5%). This sector's diesel usage increased marginally by 0.7 mega litres (110.7%) compared to 2023/24.

A total of 144 food manufacturing facilities has been approved to participate in the diesel refund scheme. By 31 March 2025, refunds amounting to R6.5 million have been paid to 20 registered users for 3.8 million litres used to generate electricity during power failures during the qualifying period (1 April 2023 to 31 March 2025).

MINERAL AND PETROLEUM RESOURCES ROYALTIES (MPRR)

Mineral and Petroleum Resources Royalty (MPRR) payments by extractors contracted by R5.3 billion (33.4%) to R10.6 billion due to a significant drop in commodity prices, such as PGMs, Iron Ore and Coal. This decline was partially offset by the increase in Gold prices, enabling MPRR payments from this commodity to increase by R0.4 billion.

Mineral and Petroleum Resources Royalties (MPRR) compensate the State for the permanent loss of non-renewable resources; it is therefore not classified as a tax. On 1 March 2010, the MPRR Act 28 of 2008 came into effect. *Table 6.8* shows the collections by resource type.

Section 4(1) and (2) of the MPRR Act contain a formula that determines the rates for the MPRR by distinguishing between the refined and unrefined conditions of resources and the profitability of operations. They are:

- For refined mineral resources, the rate varies between a minimum of 0.5% and a maximum of 5%; and
- For unrefined mineral resources, it varies between a minimum of 0.5% and a maximum of 7%.

Due to the decline in global demand and prices for commodities, MPRR payments contracted by as much as R5.3 billion (33.4%) to R10.6 billion in the 2024/25 financial year. The major contributors to the contraction were the PGMs, Iron Ore and Coal commodities, whose prices fluctuated throughout the 2023/24 financial year and continued into the 2024/25 financial year. However, the growth trajectory of Gold prices partially offset this volatility.

Platinum, Iron Ore and Coal contributed 8.2%, 24.2% and 25.3%, respectively, to the overall collections of the MPRR payments. Compared to other commodities, these are also the biggest contributors to MPRR payment contraction. The Platinum price dropped quite substantially during the first half of the

financial year, from a high of US\$1 016.95 per ounce in May 2024 to close the year at US\$980.05 per ounce during March 2025. It was also impacted by the volatility of the rand-dollar exchange rate, which averaged R/US\$18.24 during the 2024/25 financial year. In the 2024/25 financial year, the Platinum price was at US\$969.83 per ounce, which was slightly higher than the average price of US\$945.60 per ounce for the 2023/24 financial year.

Iron Ore prices declined during most of the 2024/25 financial year, from US\$112.75 per ounce in April 2024 to the lowest at US\$99.91 per tonne in August 2024. It started to increase in September 2024, and it closed the year at US\$100.10 per tonne in March 2025. The average price of Iron Ore for the 2024/25 financial year was US\$103.96 per tonne, which was significantly lower when compared to the 2022/23 financial year, with US\$119.89 per tonne.

Coal prices slightly declined for most of the 2024/25 financial year, from US\$104.89 per ounce in April 2024 to the lowest at US\$97.99 per tonne in March 2025. The average price of Coal for the 2024/25 financial year was US\$104.52 per tonne, which was slightly lower when compared to the 2023/24 financial year, with US\$107.71 per tonne.

This contraction in collections was not as severe as expected, following a substantial growth in Gold and prices, which partially offset the contraction in MPRR payments. The Gold price had robust growth during most of the 2024/25 financial year. The average Gold price for the 2024/25 financial year was US\$2 585.40 per ounce, which was significantly higher when compared to the 2023/24 (US\$1 988.53 per ounce) and 2022/23 (US\$1 804.34 per ounce) financial years. It recorded a high of US\$2 331.45 per ounce in April 2024 and closed the year at an even higher price of US\$2 983.25 per ounce in March 2025.

Furthermore, Mining sector exports were negatively impacted by challenges to export volumes reaching desired levels due to rail and port operator limitations during the 2024/25 financial year. These factors significantly contributed to the decline in MPRR payments. The contraction was also due to mining production's negative trajectory for most of the 2024/25 fiscal year, the worst being an annual contraction of 9.7% in February 2025.

Table 6.6: MPRR payments by commodity, 2022/23–2024/25

¹ Industrial minerals are geological materials which are mined for their commercial value, which are not mineral fuels and are not sources of metallic minerals. They are used in their natural state or after beneficiation either as raw materials or as additives in a wide range of applications (i.e. industrial minerals are all those minerals other than gold, PGMs, coal, iron ore, chrome, manganese, diamonds, etc.).

² The commodities grouped under Other are: Chrome, Copper, Fluorspar, Nickel, Oil and Gas, Phosphates, Vanadium and Unspecified.

SOUTHERN AFRICAN CUSTOMS UNION

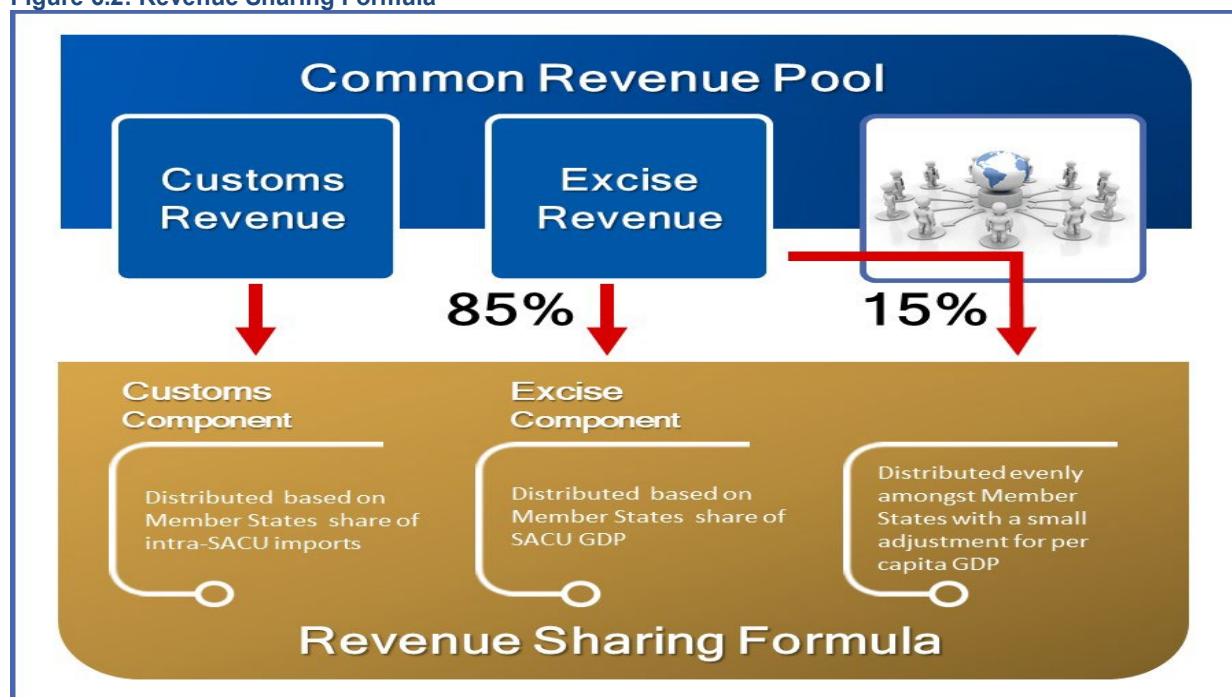

The SACU was formed in 1910 and is the oldest customs union in the world. The Southern African Customs Union (SACU) comprises five member states: the Republic of Botswana, the Kingdom of Eswatini, the Kingdom of Lesotho, the Republic of Namibia, and the Republic of South Africa. Together with South Africa, Lesotho, Namibia, and Eswatini form part of the Common Monetary Area (CMA), and their currency is pegged to the South African Rand.

SACU's objectives include, inter alia, facilitating cross-border movement of goods between member states and promoting integration of member states into the global economy through trade and investment. SACU member states apply a common external tariff and have similar customs and excise legislation. They impose the same excise duties on imported and locally manufactured goods. According to the SACU Agreement, customs and excise duties levied on imports into the region must be collected at the first point of entry into the region. Member States remit customs and excise duty collections into the CRP within three months of the end of the quarter of a financial year, while South Africa, as the manager of the CRP, remits on a continuous basis. The Common Revenue Pool is distributed among SACU members according to a revenue-sharing formula.

The Common Revenue Pool is distributed among SACU members according to a revenue-sharing formula. The revenue sharing formula used to distribute the Common Revenue Pool is derived from three components:

- 1. Customs Component:** The share is based on each country's **share of intra-SACU imports**.
 - Compensates members for the loss of tariff revenue due to the free trade arrangement within SACU. Countries that import more from SACU countries receive a larger share of the pooled customs duties.
- 2. Excise Component:** 85 per cent of excise duties revenue is distributed based on **each country's share of the total SACU GDP**.
 - Reflects the assumption that excise taxes (on goods such as alcohol, fuel, and tobacco) are linked to economic size and consumption. The larger the economic size, the larger the share of the excise revenue.
- 3. Development Component:** Fifteen per cent of excise duties revenue is distributed for development. It is calculated **as being inversely proportional to GDP per capita**.
 - It promotes equity and regional development by favouring **smaller economies**.

Figure 6.2: Revenue Sharing Formula

The SACU Common Revenue Pool (CRP) comprises various components of customs and excise duty revenues, each driven by specific underlying tax bases. The Common Revenue Pool (CRP) comprises revenues collected from:

- ❖ **ordinary customs duties** (Schedule 1 – Part 1), applied to imports originating outside the Union;
- ❖ **specific excise on imports** (Schedule 1– Part 2A), on goods such as alcohol and tobacco;
- ❖ **ad valorem excise duties on imports** (Schedule 1 – Part 2B) on both imported and locally manufactured motor vehicles and luxury goods;
- ❖ **specific excise** on locally manufactured goods, such as alcohol and tobacco.

The CRP excludes revenues collected from trade remedies (anti-dumping duties, safeguard duties and countervailing duties), environmental levies, fuel levy, Road Accident Fund (RAF) levy, health promotion levy, levy of sugar beverages, export duty on scrap metal, diamond export levy, and ordinary levy as well as VAT on Imports.

The SACU Common Revenue Pool (CRP) revenues are driven by fluctuations in the underlying tax bases. In the 2021 Budget, the tax base for specific excise duties shifted from being tied to inflation to household consumption expenditure. This means that the excise duties collected reflect changes in consumer spending, making them more responsive to economic conditions and consumption patterns. Customs duties are primarily derived from nominal imports, which is the total value of imported goods not adjusted for inflation. Similarly, ad valorem duties are derived from nominal GDP, as they are proportional to the value of imported goods, making them sensitive to changes in economic growth and demand for luxury goods. Consequently, the CRP remains sensitive to both domestic and global economic factors.

South Africa’s Trade with the World and BELN

For 2024/25, South Africa’s trade with the rest of the world (RoW), including BELN, registered a trade balance surplus of R197.1 billion due to imports of R1850.1 billion and exports of R2048.0 billion. The trade balance surplus widened in 2024/25 from R145.3 billion reported in 2023/24, as the value of merchandise imports decreased at a faster pace than the value of merchandise and net gold exports. During the 2024/25 fiscal year, total trade reached R3899.0 billion, a decrease of R70.6 billion(-1.8%) from 2023/24. Year-on-year, exports decreased by R9.4 billion(-0.5%), while imports decreased by R61.2 billion(-3.2%).

South Africa’s trade with BELN increased by R16.3 billion(6.3%) in 2024/25, with exports to the member states increasing by R12.2 billion(6.2%) and imports from member states growing by R4.1 billion(6.7%) year-on-year. Exports destined for SACU countries contributed 10.2% of South Africa’s total exports to the rest of the world. South Africa’s imports from SACU countries contributed 3.5% of South Africa’s total imports from the rest of the world by 2024/25.

Table 6.7: South Africa’s Exports to BELN and the World (RoW), 2020/21 – 2024/25

Rmillion	Botswana	Eswatini	Lesotho	Namibia	South Africa's Trade with BELN	South Africa's Trade with RoW	Percentage of total trade with RoW
Exports

2021/22	22.9%	22.0%	27.2%	19.9%	22.3%	25.8%	
2022/23	14.1%	10.6%	10.2%	9.5%	11.6%	10.5%	
2023/24	3.0%	13.5%	7.6%	9.3%	7.1%	0.1%	
2024/25	-0.8%	6.8%	4.2%	15.5%	6.2%	-0.5%	

The South African economy has the largest market within the customs union and is therefore the preferred source of imports for the member states. Primary exports to member states continue to include refined petroleum products, electricity, machinery, electrical equipment, motor vehicles diamonds and maize. These exports reflect South Africa's diversified economy and its role as a major supplier of both industrial and consumer goods within the customs union.

In 2024/25, South Africa exported goods worth R208.6 billion to the member states, showing an annual increase of 6.2% compared to R196.4 billion exported in 2023/24. The increase in exports was mainly driven by electricity and maize, mainly to Botswana and Namibia. Botswana remained the union's key export destination, accounting for an average of 40% of South Africa’s exports to BELN.

Figure 6.3: South Africa's Exports to BELN, FY2021–FY2025

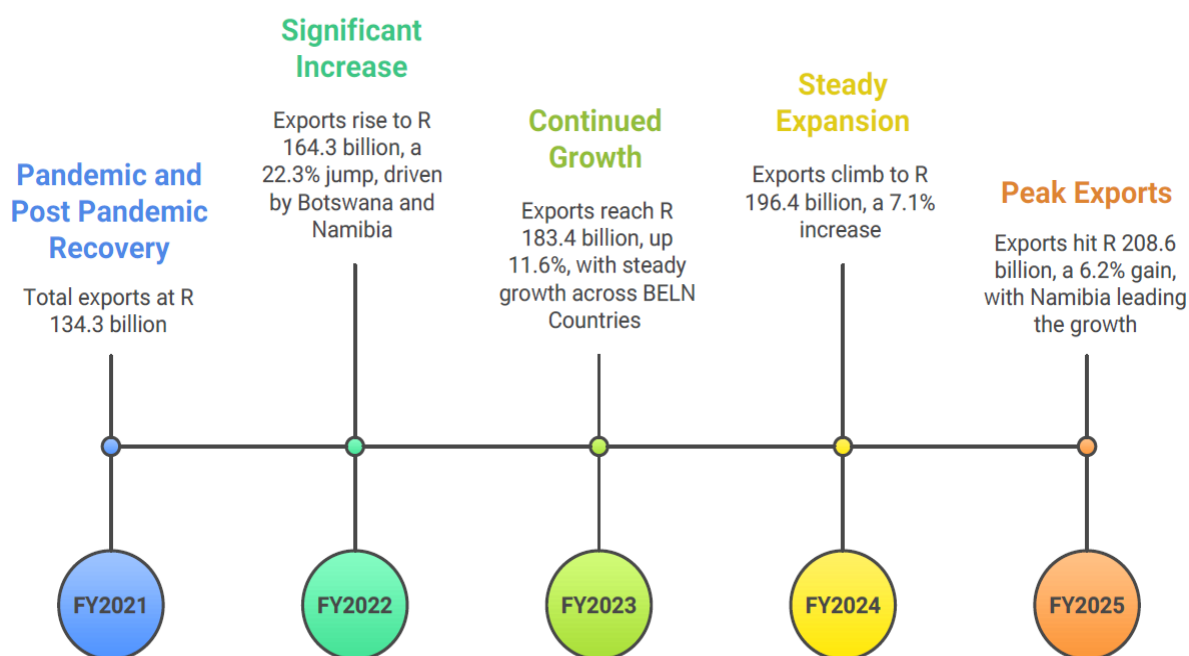

Table 6.8: South Africa's Imports from BELN and the World (RoW), 2020/21 – 2024/25

2022/23	24.9%	8.9%	13.3%	15.7%	14.2%	30.8%	
2023/24	-16.1%	14.0%	5.4%	27.0%	10.7%	1.7%	
2024/25	-12.2%	5.0%	5.2%	18.4%	6.7%	-3.2%	

South Africa's imports from SACU tend to be driven by precious metals and stones from Botswana and Namibia and beverage syrup and sugar from Eswatini. These commodities reflect the natural resources and agricultural products in which other SACU members specialise. In 2024/25, South Africa's imports from the union amounted to R65.0 billion, reflecting a 6.7% year-on-year growth compared to the R60.9 billion imported in 2023/24. This increase was driven by gold and malt beer imports mainly from Namibia.

South Africa's trade with BELN continues to grow and has long outperformed most other trade agreements in Africa, supported by strong economic ties, especially in the export of refined goods and the import of precious metals. Botswana and Namibia remain critical partners, particularly because of their trade in high-value commodities such as precious metals and stones. As the most diversified and industrialised economy in the region, South Africa's imports and trade volumes place it in a position where it continually contributes a significant share.

Figure 6.4: Imports from BELN FY2021–FY2025

Intra-SACU trade data is one of the variables used in the Revenue Sharing Formula, as each member state’s intra-SACU imports are used to determine the customs component of its revenue share. For trade compilation, intra-SACU trade includes goods that:

- ❖ are of SACU origin, or if previously imported from outside SACU, have had all applicable import duties paid;
- ❖ cross internal borders within the SACU region; and
- ❖ are not in transit to another country.

When compiling intra-SACU trade data, the following trade flows are excluded: temporary goods, goods in transit, re-imports and re-exports, as well as goods for inward or outward processing.

Table 6.9: Contributions to the SACU Common Revenue Pool per Member State, 2020/21 – 2024/25

R million	Botswana	Eswatini	Lesotho	Namibia	South Africa	Total Contributions to SACU CRP

2023/24	0.8%	0.3%	0.3%	1.2%	97.5%	100.0%
2024/25	0.9%	0.3%	0.3%	1.4%	97.1%	100.0%
Percentage year-on-year growth						
2021/22	14.6%	36.3%	14.8%	37.2%	35.8%	35.5%
2022/23	7.9%	24.0%	-6.8%	14.9%	20.0%	19.7%
2023/24	2.2%	16.8%	19.4%	-15.2%	-2.3%	-2.4%
2024/25	24.7%	23.9%	10.3%	25.0%	8.7%	9.1%

The SACU common revenue pool (CRP) was estimated at R141.8 billion in the 2025 Budget but the audited actual contributions amounted to R143.3 billion, exceeding the revised estimate by R1.5 billion (1.1%) due to higher-than-expected specific excise duties and ad valorem excise duties collections.

The CRP comprises customs duties of R76.7 billion(53.5%), specific excise duties of R59.7 billion(41.6%), and ad valorem excise duties of R6.9 billion(4.9%). Additionally, the 2024/25 CRP registered a growth of R11.9 billion (9.1%) compared with 2023/24. The pool performance was supported by increased imports of vehicles, machinery, electronics, clothing, footwear, beer, and spirits.

South Africa's contribution to the pool grew by 8.7% year-on-year, underpinned by an increase in ordinary customs duty collections, following a decline of 2.3% in 2023/24. South Africa's customs duties contribution was largely driven by a year-on-year growth in imports of clothing, footwear, refined petroleum products, artificial corundum, and centrifuges. Specific excise also supported South Africa's contribution, mainly driven by beer, wine, and spirits, while excise duties collected on petroleum products declined notably. Meanwhile, ad valorem collections declined due to weaker vehicle imports in 2024/25 compared to 2023/24.

Among the BELN countries, Namibia's contribution to the pool grew by 25.0% year-on-year, following a contraction of 15.2% in 2023/24. This increase was due to a rebound in customs duty and excise duty (revenue from neighbouring countries). Similarly, Botswana's contribution increased by 24.7% due to stronger excise duty (revenue from neighbouring countries) and customs duty collections. On the other hand, Lesotho and Eswatini's collections remitted into the pool were driven by robust growth in customs duty.

Overall, the CRP registered a strong rebound in 2024/25, expanding by 9.1% year-on-year, compared with a 2.4% contraction in 2023/24, with all member states recording positive growth in their contributions. Custom duty contribution by all member states increased by 8.7% year-on-year, with Lesotho and Eswatini recording the strongest growth. This rebound in customs duties reflects a recovery in dutiable imports across the Union, which has a direct impact in the performance of the

OTHER TAXES AND COLLECTIONS

CRP. Specific excise duties grew by 11.5% year-on-year, with contributions from all member states increasing except for Lesotho. This growth points to improved production and consumption of excisable goods in the region.

Note: SACU payments presented in revenue tables in South Africa's budget documents are the sum of the shares received by all member states and including the SACU secretariat's budget.

1. Includes amounts allocated to South Africa and the balance of the "surplus/deficit" for that fiscal year.

Payments out of the CRP are regulated by Article 37 of the 2002 SACU Agreement, which stipulates that payments shall be made to all member states on the first day of each quarter of a fiscal year. The total revenue shares distributed to Member States in 2024/25 amounted to R171.3 billion, inclusive of R25.0 billion forecast adjustments for 2022/23.

Of the R171.3 billion shared among member states, the shares received by South Africa in 2024/25 amounted to R81.4 billion, equal to 47.5%, while the BELN countries collectively received R89.8 billion (52.5%), with Botswana receiving the largest share of that portion.

South Africa contributed 97.1% to the CRP total in 2024/25. This is largely due to South Africa being the largest importer and industrial base in the union. Additionally, this may be attributed to the fact that under the SACU Agreement, customs and excise duties are collected at the first point of entry. South Africa serves as the entry point for most imports into the region, particularly for landlocked member states.

The revenue-sharing formula and revenue shares are calculated based on a forecast of the CRP. The 2002 SACU Agreement provides that adjustments with respect to the differences between forecasted estimates and actual revenues collected in year (t) are to be made in years (t+2). The 2024/25 CRP exceeded the revised estimate by R1.5 billion, and this surplus is going to be included as an error adjustment in the 2026/27 revenue shares.

Forecasting errors are inevitable and may arise due to data revisions, unforeseen economic developments, or unrealised assumptions. Revenue instruments with nominal imports as a base, such as Customs Duties and Import VAT, generally reflect forecast errors owing to the exceptional volatility of imports. Import activities can fluctuate widely due to changes in global trade, exchange rates,

supply chain disruptions, or demand shifts, making it difficult to forecast revenue streams related to imports.

INTENTIONALLY BLANK

GLOSSARY

<i>Ad valorem</i> import duties	These duties are levied on certain selected locally manufactured goods. The duties are levied at the same rate of duty on imported goods of the same class or kind and are levied on those items specified in schedule 1 Part 2B of the Harmonised System.
Auto-assessment	Taxpayer's taxable incomes and tax liabilities are assessed automatically based on data received from third parties (e.g. medical schemes, financial institutions). Taxpayers who are auto assessed do have the opportunity to accept or reject the auto assessment issued by SARS.
Automotive Production and Development Programme (APDP)	The APDP is the successor of the MIDP and is aimed at creating a platform for more local content to be produced under this initiative. This programme was scheduled to run until 2020. Currently, 'APDP Phase 2 post-2021' is underway. See also <i>Motor Industry Development Programme (MIDP)</i> .
BELN countries	Previously known as BLNS. Referring to Botswana, Eswatini (formerly Swaziland), Lesotho and Namibia; with whom South Africa is a signatory to the Southern African Customs Union (SACU) agreement. See also <i>Southern African Customs Union (SACU)</i> .
Capital Gains Tax (CGT)	CGT is based on capital gains made upon the disposal of assets. This tax was introduced in October 2001 and forms part of the income tax system.
Ceasing to be a South African tax resident	From the 2017 tax year individuals were required to indicate their tax resident status on the ITR12 tax return, but not the date on which it changed. From the 2021 tax year, individuals must indicate the date they ceased to be a tax resident of South Africa on their ITR12 tax return.
Company Income Tax (CIT)	Income tax on taxable profits of companies.
Cost of revenue collection	The cost of revenue collection provides an indication of the efficiency with which revenue is collected. It is calculated by dividing SARS' operational costs by tax revenue.

Customs duties / import duties	These are levies imposed on goods imported into South Africa, inclusive of specific excise on imports and <i>Ad valorem</i> import duty. Import duties are imposed as a means to protect local producers. They also include anti-dumping and countervailing duties.
Diamond export levy	The objective of the levy is to stimulate the local diamond polishing industry. The levy rate is 5% calculated on the value of the unpolished or rough diamond as released for export from the Diamond Exchange and Export Centre.
Direct taxes	Taxes charged on taxable income or capital of individuals and legal entities.
Dividends tax	Dividends tax is a tax on shareholders or any beneficial owners of dividends, when they receive dividend distributions from companies. Secondary Tax on Companies (STC) was replaced by Dividends Tax (DT) from 1 April 2012. DT was implemented at a rate of 15% as opposed to the STC rate of 10%.
Donations tax	This tax is currently levied at a flat rate of 20% on the value of the donation. The first R100 000 donated in each year by a natural person is exempt from donations tax. In the case of a taxpayer who is not a natural person, the exempt donations are limited to casual gifts not exceeding R10 000 per year in total. Dispositions between spouses and donations to certain public benefit organisations are exempt from donations tax.
Double Taxation Agreements (DTAs)	The purpose of the agreements between the tax administrations of two countries is to enable the administrations to eliminate double taxation.
Electricity levy	This is a levy applied to electricity generated from non-renewable and nuclear energy sources at 3.5c/kWh from 1 July 2012. Some of this revenue is set aside to fund the rehabilitation of roads damaged as a result of the haulage of coal for electricity generation.
Employees tax	This is a tax that employers must deduct from the employment income of employees such as salaries, wages and bonuses and pay over to SARS monthly. It is withheld daily, weekly, or monthly, when these amounts are paid or become payable to the employees. See <i>Pay-As-You-Earn (PAYE)</i> .
Employment Tax Incentive (ETI)	It is an incentive aimed at encouraging employers to hire young and less experienced work seekers. It reduces an employer's cost of hiring young people through a cost-sharing mechanism with government, while leaving the wage the employee receives unaffected. Employers can claim the ETI and reduce the amount of Pay-As-You-Earn

	(PAYE) tax payable by the amount of the total ETI calculated in respect of all qualifying employees. This incentive came into effect on 1 January 2014.
Environmental levy	This was introduced with the purpose of protecting and conserving the local and global environment. See also <i>Plastic bags levy</i> , <i>Incandescent light bulb levy</i> , <i>Electricity levy</i> and <i>CO₂ tax on motor vehicle emissions</i> .
Estate duty	Estate duty is calculated at a rate of 20% on the dutiable amount of a deceased estate. Certain admissible deductions from the total value of the estate are allowed.
Excise duties	Are levied on certain locally manufactured goods and on their imported equivalents. This duty is levied as a specific duty on tobacco and liquor products, and as an <i>ad valorem</i> duty on cosmetics, televisions, audio equipment and motor cars. Relief from excise duty is available where excisable products are exported.
Export duty on scrap metal	Export duty on scrap metal was implemented on 1 August 2021; and is applicable to scrap metal imported for home consumption and subsequently cleared for export, as well as scrap metal which is locally obtained or manufactured.
Fiscal drag	Fiscal drag or bracket creep occurs when inflation increases wages whereby the taxable income of taxpayers in a progressive income tax system transcend into higher income tax brackets. Therefore fiscal drag has the effect of raising the average tax rates of individuals and thus government tax revenue without tax policy explicitly raising tax rates.
Fiscal year	It is the financial year of government i.e. from 1 April to 31 March of the subsequent year.
Fuel levy	Fuel levy is a Specific excise tax imposed in terms of the Customs and Excise Act. Relief is available through a diesel refund system for farming activities, forestry, mining, offshore vessels, harbour vessels, locomotives used for rail freight, and large electricity generation plants.
Gross Domestic Product (GDP)	A measure of the total national output, income and expenditure in the economy.
Harmonised System (HS)	It is essentially the system according to which all internationally traded products, components or commodities are classified and is also known as the International Convention on the Harmonised Commodity Description and Coding System (Harmonised System). This international system is currently used by the World Customs Organisation (WCO) and more than 200 countries and customs or economic unions, which account for around 98% of world trade.

Incandescent light bulb levy	This levy was introduced as from 1 November 2009 to promote energy efficiency and reduce electricity demand. Energy-saving light bulbs last longer, require less electricity and result in lower greenhouse gas emissions. Since introduced, the environmental levy increased from R3 per bulb to R20 per bulb since 1 April 2024.
Health Promotion Levy	The Health Promotion Levy was implemented on 1 April 2018. It is a new levy imposed on sugary beverages in support of the Department of Health's deliverables to decrease diabetes, obesity and other related diseases
Income tax (IT)	IT is a tax on income and profit and is levied on individuals, companies and trusts. It is the national government's main source of income and is imposed in terms of the Income Tax Act 58 of 1962.
Indirect taxes	Indirect taxes are taxes imposed on goods and services (e.g. VAT) rather than on individuals or companies. See also <i>Direct taxes</i> .
Input VAT	Input VAT is the VAT charged on the purchase price when a vendor buys taxable goods or services from another supplier.
IRP5	An IRP5 is the employee's tax certificate that is issued to him/her by an employer registered for PAYE. It details all sources of income, deductions allowed and taxes withheld. It is used by the employer to reconcile PAYE paid to SARS during the tax year and by the employee to complete his/her income tax return for a specific year.
Marginal income tax rate	The marginal tax rate is the rate of tax on an incremental unit of income.
Medical Scheme Fees Tax Credit	Medical Scheme Fees Tax Credit is a rebate which reduces the normal tax a person pays. This rebate is non-refundable and can't be carried over to the next year of assessment.
Mineral and Petroleum Resources Royalty (MPRR)	The MPRR is a levy imposed on the exploration and extraction of minerals and petroleum resources. This levy took effect from 1 March 2010.
Motor Industry Development Programme (MIDP)	The MIDP is a voluntary incentive scheme designed to save money for the participant in the form of a reduction on import duties due to the incentives of the MIDP. This programme was implemented on 1 September 1995 and has been reviewed twice before ending in 2012. See also <i>Automotive Production and Development Programme (APDP)</i> .
Municipality	A municipality is the governing body of a clearly defined territory and its population.

National Revenue Fund	The Fund is the consolidated account of the national government into which all taxes, fees and charges collected must be paid.
Natural persons	A natural person is a real living human being, as opposed to a legal person.
Non-tax revenue	Non-tax revenue is income received by the government in the form of interest and dividends (from parastatals, public entities) and as a result of administrative charges, licences, fees and sales of goods and services.
Output VAT	Output VAT is the VAT charged by vendors when they sell their own goods and services.
Panel data	Also known as longitudinal data or cross-sectional time series data in some special cases, panel data is data that is derived from a (usually small) number of observations over time on a (usually large) number of cross-sectional units like individuals, households, firms, or governments.
Pay-As-You-Earn (PAYE)	PAYE is income tax withheld by employers from the employment income of employees. This ensures that an employee's income tax liability is settled on a continuing basis. See also <i>Employees' tax</i> .
Personal Income Tax (PIT)	Income tax on the taxable income of individuals
Plastic bags levy	This levy is a tax on certain types of plastic shopping bags. A current levy of 32 cents per bag is charged. The levy aims to encourage the reuse of these bags.
Platinum group metals (PGMs)	PGMs includes six pure metals with high melting points: platinum (Pt), palladium (Pd), rhodium (Rh), iridium (Ir), osmium (Os) and ruthenium (Ru) which tend to occur in the same mineral deposits. In addition to their oxidation and reduction properties, these metals have the ability to stay stable at high temperatures and are extremely resistant to corrosion.
Primary rebate	This rebate is a reduction in income tax that is available to all taxpayers. See also <i>Secondary rebate</i> and <i>Tertiary rebate</i> .
Progressive tax	A progressive tax is a tax in which the effective tax rate increases with increasing income.
Provisional tax (companies)	Provisional tax for companies for any given tax year, is paid in three instalments: the 1 st due six months into the company's tax year; the 2 nd at the end of the tax year; and the 3 rd six months after the end of the tax year (unless the tax year ends at the end of February, then the third is due seven months after the end of the tax year).

Provisional tax (individuals)	Provisional tax for individuals is a system that makes taxpayers provide for their final tax liability by paying two amounts during the course of the year of assessment, and a third payment seven months after the end of the year of assessment.
Paragraph 19(3)	Paragraph 19(3) of the Fourth Schedule to the Income Tax Act allows the Commissioner to call upon the taxpayer to justify an estimate made by the taxpayer, or to provide particulars of income and expenditure or any other particulars that may be required for the year of assessment in respect of which the provisional tax payment is being made. If not satisfied with the estimate, the Commissioner may increase it to an amount that is considered reasonable.
Provisional tax (80% rule)	The 80% rule requires taxpayers with taxable income in excess of R1 million to pay at least 80% of their tax liability by the time they make their second provisional payment to avoid penalties. This change was implemented for taxpayers with year ends after 1 March 2009.
Residence-based tax system	A residence-based tax system is a system where residents are taxed on their worldwide income, irrespective of where their income was earned.
Retirement funding reform	From 1 March 2016 deductions for contributions to retirement funds includes contributions to pension, provident and retirement annuity funds. The formula to determine deductible retirement fund contributions is set out in section 11F (replacement of section 11(k)).
Royalty (CIT)	Any amount that is received or accrues in respect of the use or right of use of or permission to use any intellectual property as defined in section 23I of the Income Tax Act; or the imparting of or the undertaking to impart any scientific, technical, industrial or commercial knowledge or information, or the rendering of or the undertaking to render any assistance or service in connection with the application or utilisation of such knowledge or information.
Secondary rebate	The secondary rebate is an additional rebate in income tax over the primary rebate that is available to taxpayers between the age of 65 and 75 years. See also <i>Primary rebate</i> and <i>Tertiary rebate</i> .
Secondary Tax on Companies (STC)	STC was a tax on dividends declared by a company, which was calculated at the rate of 10% (12.5% prior to 1 October 2007) of the net amount of dividends

	declared. This tax was replaced with Dividends Tax (DT) on 1 April 2012.
Securities Transfer Tax (STT)	STT is a tax levied on every transfer of a security and is levied at a rate of 0.25%. This tax was known as Uncertificated securities tax prior to 1 July 2008.
Skills Development Levy (SDL)	SDL is a compulsory levy to fund training paid by employers. The rate is 1% of total payroll and is payable by employers that are registered with SARS for employees' tax purposes and who have an annual payroll of more than R500 000 (R250 000 before 1 August 2005).
Southern African Customs Union (SACU)	The Southern African Customs Union (SACU) consists of Botswana, Eswatini, Lesotho, Namibia, and South Africa. SACU was established in 1910, making it the world's oldest Customs Union. The customs union collects excise duties on local production and customs duties on members' imports from outside the union, and the resulting revenue is allocated to member countries in quarterly instalments utilizing a revenue-sharing formula.
Southern African Community (SADC)	SADC is an inter-governmental organisation. Its goal is to further socio-economic cooperation and integration as well as political and security cooperation among 15 Southern African states.
Specific excise duty	Specific excise duty is a tax on each unit of output or sale of goods, unrelated to the value of the goods e.g. alcoholic beverages or cigarettes.
Stamp duty	Stamp duty was levied on leases of fixed property and until June 2008 on the registration of transfer of unlisted marketable securities. This tax was abolished with effect from 1 April 2009.
Standard Industrial Classification of all Economic activities (SIC)	SIC is a coherent and consistent classification structure of economic activities based on a set of agreed concepts, definitions, principles and classification rules. The national SIC classification defined and used by Statistics South Africa is based on the International Standard Industrial Classification developed by the United Nations Statistics Division.
Tax Amnesty	Tax Amnesty is a period allowed by tax authorities during which taxpayers who are outside the tax net (but should be registered for tax purposes) can register for tax or taxpayers can disclose previously unreported taxable income with relief from penalties and interest. This is inclusive of the Voluntary Disclosure Program (VDP)
Tax base	The tax base is the aggregated value of income, sales or transactions on which a particular tax is levied.

Tax buoyancy	Tax buoyancy is a measure of the ratio of change in tax revenue to the change in the tax base or GDP.
Tax on retirement funds (TRF)	TRF was a tax levied on the gross interest, net rental and foreign dividend income of retirement funds i.e. pension, provident and retirement annuity funds. This tax was abolished in 2007.
Tax-to-GDP ratio	For public finance comparison purposes, a country's tax burden or tax-to-GDP ratio is computed by taking the total tax payments for a particular fiscal year as a fraction or percentage of the GDP for that year.
Tax revenue	In terms of the System of National Accounts (SNA), tax revenue is defined as "a compulsory, unrequited payment to government".
Tax year	The tax year is the 12-month period for which tax is calculated. For individuals it starts on 1 March and runs until the end of February the following year, and for companies it is normally the financial year of the company for financial reporting purposes.
Taxable income	Taxable income refers to the portion of income of an individual or a company which is subject to tax. This is not the same as actual income, as exemptions may apply and deductions may be claimed, such as medical expenses in the case of individuals or depreciation in the case of companies.
Tertiary rebate	The tertiary rebate is a reduction in income tax that is available to taxpayers age 75 and older in addition to the primary and secondary rebates. See also <i>Primary rebate</i> and <i>Secondary rebate</i> .
Transfer duty	Transfer duty is a tax levied in terms of the Transfer Duty Act no.40 of 1949 at a progressive rate on the value of any property that is acquired by any individual or juristic entity.
Turnover Tax	Turnover Tax is a basic tax that was introduced for micro businesses with a turnover not exceeding R1 million per annum. The objective is to reduce the tax compliance and administrative burden by simplifying and reducing the number of returns that have to be filed. This tax was introduced with effect from 1 March 2009.
Value-Added Tax (VAT)	VAT is levied at a standard rate of 15% on most goods and services subject to certain exemptions, exceptions and zero-ratings, provided for in the VAT Act (1991). VAT is levied on the supply of all goods and services rendered by registered vendors. VAT is also levied on the importation of goods and services into South Africa.
