**Supplier’s declaration for products not having preferential origin status**

The supplier’s declaration, the text of which is given below, must be made out in accordance with the footnotes. However, the footnotes do not have to be reproduced.

**DECLARATION**

I, the undersigned, supplier of the goods covered by the annexed document, declare that:

1. The following materials which do not originate in the Community have been used in the Community to produce these goods.

2. all the other materials used in the Community to produce these goods originate in the Community.

I undertake to make available to the customs authorities any further supporting documents they require.

.............................. (4)

.............................. (5)

.............................. (6)

__________
(1) When the invoice, delivery note or other commercial document to which the declaration is annexed relates to a variety of goods, or goods not incorporating the same proportion of non-originating materials, the supplier must clearly differentiate between them.

Example:
The document covers different models of electric motor of heading 8501 to be used in the manufacture of washing machines of heading 8450. The nature and value of the non-originating materials used in the manufacture of the motors vary from one model to another. The models must be listed separately in column 1 and the information on the other columns must be given for each, so that the manufacture of the washing machines can correctly assess the originating status of each of his products depending on the type of motor it incorporates.

(2) To be completed only where relevant.

Example:
The rule for garments of ex Chapter 62 allows the use of non-originating yarn. Thus if a French garment manufacturer uses fabric woven in Portugal from non-originating yarn, the Portuguese supplier need only enter “yarn” as non-originating materials in column 2 of his declaration, the HS heading and value of the yarn are irrelevant.
A firm manufacturing wire of HS heading 7217 from non-originating iron bars must enter “iron bars” in column 2. If the wire is to be incorporated in a machine for which the rules of origin sets a percentage limit on the value of non-originating material used, the value of the bars must be entered in column 4.

(3) “Value” means the customs value of the materials at the time of import or, if this is not known and cannot be ascertained, the first ascertainable price paid for the materials in the Community.

For each type on non-originating material used, specify the exact value per unit of the goods shown in column 1.

(4) Place and date.

(5) Name and position, name and address of company.

(6) Signature.

The stock balance shall be debited for all finished products whether or not those products are supplied with a declaration of preferential originating status.
(d) Where products are supplied without a declaration of preferential origin, the stock balance of non-originating materials only may be debited for as long as a balance of such materials is available to support such action. Where this is not the case, the stock balance of originating materials shall be debited.
(e) The time at which the determination of origin is made shall be the time of manufacture and must be recorded in the authorisation granted by the Manager responsible for the administration of the rules of origin section in Head Office.
