c) For those tax types where the PRN is not pre-populated on a tax return/declaration, the 19-digit payment reference number can be manually determined by clients with reference to the tax account.

<table>
<thead>
<tr>

<th>8 digits</th>
</tr>
</thead>
<tbody>

e) Separate payments are required if the payment is for different tax types, where the payment is made at a bank and not on eFiling.

f) In instances where the PRN is influenced by the period, separate payments are required if the payment relates to different tax periods to ensure that payments are correctly allocated. Not if the PAN (Payment Advice Notice) is used for the payment.

g) Unreferenced/partial payments received from clients may be allocated to the oldest debt first, on a First-In-First-Out (FIFO) basis.

h) When making payment it is imperative that the correct payment reference number “PRN” is quoted to ensure that payments are easily identified and correctly allocated to item(s) in the account.
