1 PURPOSE

- The purpose of this document is to assist trust representatives in the completion and submission of the ITR12T trust form via SARS eFiling. The guide is structured as follows; firstly the eFiling software is described, elaborating how to register and login onto eFiling. The guide then elucidates the functions embedded in the system and how they can be used for submission purposes. Lastly a step by step detailed submission process is demonstrated with the aid of screen shots.

- This guide in its design, development, implementation and review phases is guided and underpinned by the SARS values, code of conduct and the applicable legislation. Should any aspect of this guide be in conflict with the applicable legislation the legislation will take precedence.

2 INTRODUCTION

- A trust fund consists of cash or other assets which are administrated and controlled by a person acting in a fiduciary capacity, where such person is appointed under a deed of trust or by agreement or under the will of a deceased person.

- The most common reasons for creating a trust are:
  - To protect assets for minor children or other;
  - To ensure that living or future beneficiaries benefit from the assets donated or bequeathed by the founder;
  - A vessel into which assets can be poured and protected.

- A trust is created by a founder, and is governed by a trust deed, which stipulates, inter alia the beneficiaries, the trustees and the terms of the deed. It is formed in various ways based on the nature and type of the trust. The nature of a trust may differ in one of the following ways:
  - In their method of formation namely, during the lifetime of a person or upon his death under a will.
  - In the rights, they confer on beneficiaries. Under a vesting trust, the beneficiaries have a vested right to the income and/or capital of the trust. Under a discretionary trust the trustees have the discretion as to whether and how much of the income or capital of the trust to distribute to the beneficiaries.
  - In their purpose, namely trading trusts, asset protection trusts, charitable trusts or special trusts. Two types of special trusts exist for income tax purposes. A Type A trust is created for the benefit of a person with a disability. A Type B trust is created under the will of a person for the benefit of his relatives.

- Trusts are taxed in terms of section 2(1) of the Rates and Monetary Amounts and Amendment of Revenue Laws Act 2013. This is with the exception of a “Special Trust” which is defined in section 2(1) of the Act. As from 1 March 2017, Trusts other than special trusts are taxed at a rate of 45%. Revenue generated from a trust can either be retained, distributed to the beneficiaries or profits can be deemed to have been received by another person in terms of section 7 of the Income Tax Act. This income becomes taxable in the hands of the person who receives it. The tax implications of the trust and beneficiaries are based on section 25B and section 7 of the Income Tax Act. With reference to the Conduit Pipe Principle, revenue distributed from a trust retains its identity unless (under some circumstances) it is regarded as an annuity.

- The source and nature of the income, the method of transfer of the assets to the trust as well as the status of all the relevant parties have an impact on the tax implications in respect of the receipts or accruals of income by the trustees. This revenue and
additional required information must be recorded accurately on the ITR12T trust form and submitted to SARS.

- SARS has enhanced the trust tax process systems for a more accurate submission and a simplified tax process. One such improvement is regarding the ITR12T form. The ITR12T form has been enhanced to HTML so that it is more dynamic and user friendly. Furthermore some of the fields are pre-populated with third party data for ease in the completion of the return.

- SARS values your contribution as taxpayers and your readiness in fulfilling your tax responsibilities, thus we are constantly enhancing our processes to ensure that the tax systems are functioning optimally and effectively so you can be confident in the process. Being able to complete and submit your trust return via eFiling is one such improvement and this guide will assist you.

3  DESCRIBING THE SARS EFILING SYSTEM

3.1  OVERVIEW

- SARS eFiling is a free, electronic service that allows individual taxpayers, tax practitioners and businesses to submit tax returns, make payments and interact with SARS in a secure online environment from the comfort and convenience of their home or office. To access this software you have to be registered. Once registered, eFilers can submit returns, view their tax status and make payments to SARS electronically 24 hours a day. This section of the guide will aid you in understanding how the software works by listing the benefits of using eFiling.

3.2  BENEFITS OF USING eFILING

- eFilers are given more time to make their submissions.
  - Tax representatives can save the ITR12T form and submit it later, which will give them more time to review the information to be submitted to SARS.

- eFilers have a full history of all submissions, payments and electronic correspondence available at a click of a button.
  - The system allows a tax representative to view the history of submissions made of the ITR12T form on the system for their convenience.

- eFilers can receive SMS and email notifications to remind them when submissions are due.
  - SMS and email notifications assist the tax representatives in the submission process by ensuring that the returns are submitted before the due date.

- The simplicity of the process results in fewer errors and creates a quicker processing cycle for individuals and business.
  - There are embedded functions within the ITR12T form such as pre-populating fields, pop up warning messages when incorrect information is completed and the simplified navigation. These functions will result in few errors during your return process.

- eFilers can use the tax calculator function to receive a pre-assessment of their ITR12T submission before an original assessment is done
  - Tax representatives can access a pre-ITA34 before an original assessment is sent to assist them in determining accuracy of the information, which will be submitted to SARS.
