# e@syFile™ Replatform
RELEASE NOTES

e@syFile™ Employer allows employers and/or payroll administrators to:

- Complete, Submit, and Revise your Employer Reconciliation Declaration (EMP501) with ease.
- Offline Functionality when importing tax certificates and capture EMP501 data offline; go online only when ready to submit to SARS.
- Manage Third Party Appointments (AA88s) effectively.
- Register Employees using the Income Tax Registration (ITREG) function to register employees effortlessly.

Top Tip: The Latest Release notes tell you about the changes which have been made in the software.

What can I expect from the new e@syFile?

While functionality has been retained, you have the following to look forward to:

- Improved and up-to-date technology has been used in the development of the application. Taking advantage of new technology and modern hardware, the new e@syFile offers better performance and an improved user experience
- Easier navigation and data capture experience have been prioritised with a new look-and-feel
- A full installation with every software update is a thing of the past, the introduction of modular updates reduces download size and update time
- Quick links to related functionality has been introduced to remove the need to continuously navigate through multiple menu items
- Enhanced user maintenance functionality to add and remove users and restrict functionality
