Foreword by the Commissioner for the South African Revenue Service

The South African Revenue Service (SARS) has a mandate to collect all revenues, ensure a culture of compliance, and facilitate trade across the country’s borders. Based on this mandate, our Vision 2024 is “to build a smart modern SARS with unquestionable integrity, that is trusted and admired”. Furthermore, our strategic intent is to promote a culture of voluntary compliance among taxpayers and traders.

In 2022, SARS celebrates its 25th anniversary, having been established by legislation in 1997. This year is therefore a major milestone in the history of our organisation. However, SARS also needs to comply with all relevant legislation to execute our mandate and vision. The Use of Official Languages Act (UOLA), 2012, was signed into law in 2013. The Act provides for the regulation and monitoring of the use of official languages by national government for government purposes. It further requires the adoption of a language policy and the establishment of a language unit for national departments, national public entities, and national public enterprises.

SARS adopted such a language policy, gazetted on 23 November 2015, and is presently implementing it. The organisation was identified as one of the government entities that has made strides in sharing, promoting, and encouraging multilingualism, cultural diversity and continuously improving the implementation of its language policy.

The SARS Language Service Unit (LSU) was established in 2016 with a mandate to make a concerted effort to develop previously marginalised South African languages. As

Edward Chr Kieswetter
SARS COMMISSIONER

part of carrying out that mandate, the LSU, under the Office of the Commissioner, has compiled this multilingual tax terminology list in 11 official South African languages. The languages are Sesotho, Setswana, Sepedi, Tshivenda, Xitsonga, isiNdebele, Siswati, isiZulu, isiXhosa, English, and Afrikaans. This Volume 1 multilingual term list has 450 terms and covers a wide spectrum of fields in the financial world, such as tax, wills, and general financial business. This is a significant development as part of SARS 25th anniversary celebration, for which we must acknowledge the excellent work of the members of the LSU.

But the multilingual tax terminology list is also significant for other reasons. One of our strategic objectives is to provide clarity and certainty to taxpayers and traders about their obligations. Another strategic objective is to make it easy and simple for taxpayers and traders to comply with these obligations. Undoubtedly, this multilingual tax terminology will play a vital role in fulfilling these objectives for improved communication and education of taxpayers and traders.

The completion of this tax terminology list would not have been possible without the Department of Sport, Arts and Culture (DSAC) and the Pan South African Language Board (PanSALB). Before any terminology can be published for use, it needs to be authenticated and verified by respective National Language Bodies (NLBs). The authorisation and verification by the National Language Bodies gives SARS the necessary stamp of approval to use the multilingual tax terminology in all forms of SARS media, communication, as well as the important task of taxpayer education.

In the 25th year of SARS existence, this multilingual tax list is our gift to the taxpayers, traders, and the citizens of South Africa. We thank you for your compliance, which is vital for building a capable state that can ensure the well-being of all South Africans.
