CODE	CLEARANCE TYPE	DESCRIPTION
9	Original	Message function code 9 must be used for first time clearance of an import, export or transit consignment, except in the case of a substitution or replacement clearance, where message function code 5 will apply.
4	Change/amendment	Message function code 4 must be used where the content of any original or substitution clearance requires an amendment. An amendment clearance includes the change to any header or line information or the cancellation of a line item.
1	Cancellation	Message function code 1 must be used where the full content of any original or substitution clearance requires to be cancelled. A cancellation clearance implies the cancellation of a complete goods declaration.

Effective Date: 11 November 2024

c) **Operations Ref:** None

d) **Location:**

- i) SAD Box 4 (no title); or
- ii) CD1: Declaration Type > Message Function

e) **Rules and Conditions of Usage:**

- i) Required for all goods declarations.
- ii) Transaction type 4 – amended clearance:
 - A) When amending an original or substitute declaration:
 - I) Always provide full header, totals and all line details.
 - II) In respect of import clearance amendments, always provide Total Duties Due and Total VAT Due.
 - III) Any header level data field information can be amended except the declarant's Local Reference Number (LRN), the Procedure Category Code (PCC), and the District Office.
 - IV) Any line level data field can be amended except the PCC and/or CPC combination. As the case with original declarations in respect of warehoused goods, the previous CPC may be different across line items. In other words, previous CPCs 40, 41, and 44 can be used on a single clearance on multiple line items, respectively.
 - B) When adding a line item:
 - I) Such line must always be added to the end of the goods declaration, considering any lines which may have been cancelled. Example: Using the above scenario – a trader wishes to add an additional line item in a second amendment, he/she must submit a goods declaration reflecting line items 1, 3, 4 and 6.
 - II) If lines are deleted, and a new line is thereafter to be added, such line must not be declared in the space of the deleted lines. Example: If line items 2 and 5 were deleted, a new line must be inserted as line 7, i.e. the amended declaration will therefore contain lines 1, 3, 4, 6 and 7.
 - C) Validation control changes:
 - I) The following errors will result in outright rejection of a goods declaration:

REJECTION ERROR DESCRIPTION
Original declaration not on Customs and Excise information system
Un-finalised amended declaration on original declaration exist
Client unknown
FICA status unknown
No banking information
Drawback error
 - II) The MRN of the original declaration being cancelled must be inserted in the field provided at header level.
 - III) If the Previous Procedure MRN used in a goods declaration is older than two (2) years, motivation from the client for such must be included with the supporting documents.
 - D) Amendments and Offsetting
 - I) Offsetting – for any goods declaration where an amendment thereto results in a combination of both debits/credits across different duty types, the billing of such debits/credits will be offset across all lines to derive a final amount for accounting purposes. This implies that only one (1) amended declaration will be required to cater for the debit and credit.
 - II) However, should separate amended declarations be submitted the system will use the first amended declaration to perform the billing based on nett line items (offsetting), according to (A) above. The second amended declaration (which

Effective Date: 11 November 2024

currently is the refund) will be processed by to the system as a free goods declaration due to the over and under payments already processed.

- III) Nett effect credit amended declarations, including any amended declaration where a credit is due on VAT, will be subject to a refund audit and the submission of supporting documents.
- iii) Transaction type 1 – cancellation:
 - A) Declarants must only supply header and total details on the cancellation clearance.
 - B) The Total Duties Due and Total VAT Due data fields must be inserted on imports.
 - C) Total Lines data field must always reflect zero.
 - D) The MRN of the original declaration being cancelled must be inserted in the field provided at header level.
 - E) BELN will notify users when the following requirements become applicable:
 - I) Cancellation scenario 1: A goods declaration is lodged but goods did not arrive. The cancellation clearance must indicate relevant payment code.
 - II) Cancellation scenario 2: Goods have been declared with incorrect PCC. Indicate relevant payment code.
 - III) Cancellation scenario 3: A goods declaration is lodged, but goods cannot be used according to the PCC/CPC combination declared OR the trader is not entitled to clear goods under the original PCC/CPC combination declared. Indicate relevant payment code.

CODE	DESCRIPTION
R	Refund to trader;
J	Refund to trader's nominee; and
M	Refund to trader's deferment account.

- iv) Transaction type 5 – replacement:
 - A) A replacement 5 clearance is used where an incorrect PCC was declared on an original declaration. It is used in conjunction with Transaction Type 1 being a new clearance replacing a complete original clearance or part of an original clearance.
 - B) The MRN original clearance which is now being replaced (substituted) must be inserted in the previous MRN (For Official Use box) field of the replacement clearance.
 - C) A replacement clearance is used in combination with either a cancellation of a full clearance or, Amendment to a portion of a clearance:
 - I) Full consignment scenario: Where a full consignment is required to be cleared under a different PCC, a replacement clearance is required, followed by a cancellation clearance in respect of the original declaration.
 - II) Partial consignment scenario: Where part of the consignment is required to be cleared under a different PCC and the balance remains as cleared on the original.
 - III) A replacement clearance is required for the portion where the PCC differs from the original and an amendment clearance is required on the original declaration for the portion where the PCC remains as entered. Only one (1) PCC and requested/previous CPC combination is allowed per clearance, except in respect of warehoused goods where the previous CPC may be different across line items. In other words, previous CPCs 40, 41, and 44 can be used on a single clearance on multiple line items, respectively.

b) **Description:**

In other words, previous CPCs 40, 41, and 44 can be used on a single clearance on multiple line items, respectively.
 - iii) In the case of goods already cleared, a PCC can only be changed by cancellation and substitution.
 - iv) Declarants must utilise the table of permissible combinations provided (SC-CF-55-A03). This is important when planning the clearance of goods for importation, transit and exportation –
 - A) Example 1: Imported goods removed under national transit upon arrival, thereafter declared for Home Use must be cleared as follows: B 22-00 then A 11-20. CPCs cannot be changed by an amendment clearance; therefore, declarants and brokers must ensure the appropriate CPC combinations are planned upfront.
 - B) Example 2: Goods exported for refurbishment or repair for subsequent re-importation to South Africa must follow the Temporary Export procedure declaring the goods with CPC I 75-00. This identifies the transaction as requiring a follow-up re-importation clearance once the goods have been refurbished or repaired. The re-importation clearance must occur under CPC I 77-75.

32 * 8 = 256
2 * 16 = 32

P * 128 = 384
7 * 256 = 1 792
5 * 512 = 2 560
* Total = 5 210
5210 ÷ 11 = 473.7

D) The remainder 7 is the check digit. Where the remainder is 10 the check digit is '0'.

Effective Date: 11 November 2024

- iv) In the event of a container being cleared which consists of a non-ISO container number the prefix NONU followed by a hyphen and then the non-ISO container number, for example NONU-AAAA1234567.
