## 1.2 References

### 1.2.1 Referenced Documents

| Document   | Version | Description | Author/s |
|--|---------|-------------|----------|
| Section 26 of the Tax Administration Act, 2011 ( Act No. 28 of 2011) |         |             |          |

### 1.2.2 Acronyms and Definitions

The following definitions and acronyms have been defined to provide assistance in identifying the meaning of SARS's terminology.

| Term                      | Description   |
|---------------------------|---|
| <b>Alpha (A)</b>          | Alphabet A until Z only (Upper and Lower Case)  |
| <b>Alphanumeric (AN)</b>  | Alphabet A until Z (Upper Case and Lower Case), AND Numbers 0 to 9 and a decimal point  |
| <b>CCYYMM</b>             | Century-Year-Month  |
| <b>CCYYMMDD</b>           | Century-Year-Month-Day  |
| <b>Conditional Fields</b> | Fields that must be completed subject to defined conditions, e.g. mandatory if related fields have been completed   |
| <b>Delimited file</b>     | Pipe separated values will be used as the delimited file type   |
| <b>e.g.</b>               | exempli gratia (or for example)   |
| <b>Free Text (FT)</b>     | <p>Free text includes the following:</p> <ul style="list-style-type: none"> <li>○ Alphabet A until Z</li> <li>○ Upper and Lower Case Characters</li> <li>○ Number 0 to 9</li> <li>○ Dash (-)</li> <li>○ Space ( )</li> <li>○ Inverted Commas (“”)</li> <li>○ Back slash(\)</li> <li>○ Forward slash (/)</li> <li>○ Question Mark (?)</li> <li>○ At sign (@)</li> <li>○ Ampersand (&amp;)</li> <li>○ Dollar sign (\$)</li> <li>○ Exclamation Mark (!)</li> <li>○ Hash (#)</li> <li>○ Plus (+)</li> <li>○ Equals (=)</li> <li>○ Semi colon (;)</li> <li>○ Colon (☺)</li> <li>○ Comma (,)</li> <li>○ Apostrophe (')</li> <li>○ Left and Right Brackets (( ))</li> <li>○ Full Stop (.)</li> <li>○ Characters such as ê, ë.</li> </ul> <p>All special characters are allowed, however for XML development purposes the</p> |

| Term                    | Description   |
|-------------------------|---|
|                         | following standard must be adhered to: ISO-8859-1 encoding or informally referred to as Latin-1.      |
| <b>ID</b>               | Identifier  |
| <b>Mandatory Fields</b> | Fields that must be completed as a rule as opposed to being optional                                  |
| <b>NoP</b>              | Nature of Person  |
| <b>Numeric (N)</b>      | Numbers from 0 to 9, a decimal point and negative (-) sign.   |
| <b>Optional Fields</b>  | Fields that can be completed based on applicability and availability. These fields are not mandatory. |
| <b>SARS</b>             | South African Revenue Service   |
| <b>XML</b>              | Extensible Mark-up Language   |

## 2. INTRODUCTION

Since 2007, the South African Revenue Service (SARS) has been modernising and simplifying tax processes in line with international best practice. As part of this process, SARS implemented a 3rd Party Data Platform to enable taxpayers to submit 3rd party supporting data to SARS through the Direct Data Flow channel. The Direct Data Flow Channel utilises either the Connect:Direct™ technology or the Hypertext Transfer Protocol Service via Secure Web link.

To align the Third Party Data submissions with this new strategy, the submission channels were changed from the File Transfer Protocol technology and compact disk to the Direct Data Flow Channel for the submission of the third party data for the 2012 tax year.

A further step is to align the principles of the various Third Party Data products (i.e. IT3b, IT3c, Medical and Insurance Contributions, Dividends Tax, etc). The purpose of this document is to address these discrepancies for the IT3b, IT3c and IT3e data sets and ensure a more uniform reporting across the different products.

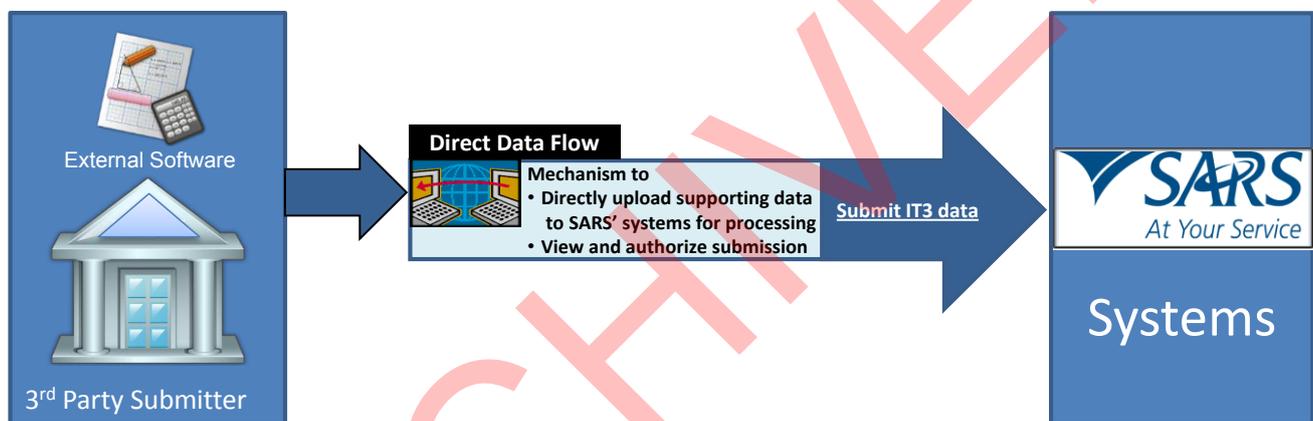

ARCHIVED

### 3. CONCEPTUAL DESIGN

Account holder data can be captured and maintained in the organisation's proprietary system. The submitting entity will be able to generate a file containing all account holders' data and submit this file to SARS.

This file can be submitted using the Direct Data Flow channel. Direct Data Flow channel will be the only channel available in the first phase. The submitting entity must validate the file against the requirements specified in this document before submission to SARS. The submission will then be validated and verified on SARS side before being deemed accepted.

The conceptual design is depicted in Figure 1 below.

**Figure 1: Conceptual design**

**STEP 1:** Compiled data may be submitted to SARS via Direct Data Flow channel to SARS via Connect:Direct™ technology or Hypertext Transfer Protocol Service. SARS will validate each file and respond to inform the submitting entity of the outcome of the validated file.

**Notes:**

- Submission via the Direct Data Flow requires enrolment and activation available on eFiling.

## 4. OBLIGATION TO SUBMIT THIRD PARTY DATA

### 4.1 Persons required to submit third party data

The following persons are required, in terms of section 26 of the Tax Administration Act, 2011, to submit third party data:

- Banks regulated by the Registrar of Banks in terms of the Banks Act, 1990, or the Mutual Banks Act, 1993;
- Co-operative Banks regulated by the Co-operative Banks Development Agency in terms of the Co-operative Banks Act, 2007;
- The South African Postbank Limited (Postbank) regulated in terms of the South African Postbank Limited Act, 2010;
- Financial institutions regulated by the executive officer, deputy executive officer or board, as defined in the Financial Services Board Act, 1990, whether in terms of that Act or any other Act (including a “financial institution” as defined in the Financial Services Board Act, 1990, other than an institution described in paragraph (a)(i) of the definition);
- Companies listed on the JSE, and connected persons in relation to the companies, that issue bonds, debentures or similar financial instruments;
- State-owned companies, as defined in section 1 of the Companies Act, 2008, that issue bonds, debentures or similar financial instruments;
- Organs of state, as defined in section 239 of the Constitution of the Republic of South Africa, 1996, that issue bonds or similar financial instruments;
- Any person (including a co-operative as defined in section 1 of the Income Tax Act, 1962) who purchases any livestock, produce, timber, ore, mineral or precious stones from a primary producer other than on a retail basis;
- Any medical scheme registered under section 24(1) of the Medical Schemes Act, 1998;
- Any person, who for their own account carries on the business as an estate agent as defined in the Estate Agency Affairs Act, 1976, and who pays to, or receives on behalf of, a third party, any amount in respect of an investment, interest or the rental of property; and
- Any person, who for their own account practices as an attorney as defined in section 1 of the Attorneys Act, 1979, and who pays to or receives on behalf of a third party any amount in respect of an investment, interest or the rental of property.

### 4.2 Information required to be submitted

The data that must be included in the submission may be as a result of the following:

#### 4.2.1 IT3(b)

- Interest due to or accrued to the taxpayer;
  - Interest paid or accrued to individuals, trusts or companies as a result of a loan to a business;
  - Interest on loans and mortgage bonds (except loans or bonds due to banks);
  - Interest on funds invested with you;
  - Interest on debentures; and
  - Interest on current savings accounts
- Profit payable as a result of the redemption of bearer instruments;
- Income paid or accrued to property owners as rent, either by a tenant or collected by an agent;
- Royalties or fees paid out in respect of the use of patents, design, trademarks or copyright or the imparting of knowledge connected with the use of a patent in the Republic;
- Foreign dividends paid out or accrued to shareholders.
- Monthly debit and credit movement of transactional accounts. For the purposes of IT3b reporting, a transactional account is defined as an account held at a bank or other financial institution, for the purpose of securely and quickly providing frequent access to funds on demand, through a variety of different channels. The debits and credits must be reported as it is reflected on the account holder's statement.

#### 4.2.2 IT3(c)

- The proceeds from the sale of unit trusts
- The proceeds from the sale of other financial instruments
- The disposal of unit trusts or other financial instruments

#### 4.2.3 IT3(e)

- All farm produce, timber, livestock, ores, minerals or precious stones acquired by you by purchase, barter or exchange (purchase from licensed dealers NOT to be included);
- All farm produce, timber, livestock, ores, minerals or precious stones sold by you as agent for the producer;
- All farm produce, ores or minerals or precious stones shipped by you as forwarding agent for the producer to selling agents outside the Republic;
- Bonuses paid or accrued to members of co-operative companies or societies.

ARCHIVED

## 5. GENERAL RULES FOR IMPORT FILE STRUCTURES

- a. All files submitted after the implementation date must be according to the new requirements regardless of the period.
- b. Each file submitted to SARS must only contain information for one submitting entity, one tax type [only IT3(b) or IT3(c) or IT3(e)] and for one fiscal year.
- c. Each of the files are structured as follows:
  - Submission file header
  - Submitting entity data
  - Account holder demographic data
  - Account holder partner data
  - Account holder financial data
  - File trailer
- d. The sections of the file must be in the sequence specified in the file layout below. This implies the first record in the file will be the general header; the second record will be the submitting entity demographic record, then all the IT3 data information will follow, and lastly the trailer record.
- e. Fields are indicated as mandatory, optional or conditional as specified in this document. Fields that is indicated as mandatory or conditional with warning, implies from a SARS perspective that this field is required, however due to constraints experienced by the submitting entities to provide the required data, the field can be left blank for a pre-defined time period and SARS will accept a record where such a field has not been completed. At the applicable time the field will revert to the intended Mandatory or Conditional type and at such time SARS will reject the records if not completed.
- f. Data fields must not start with a space.
- g. All accounts must be reported on, even if the interest earned is equal to zero cents.
- h. All files must conform to the LATIN-1 character encoding.

- i. A pipe delimited file format will be used, where the fields are separated by a pipe delimiter. For any field where no value is required or no value is available, the pipe delimiter must be followed by another pipe delimiter to indicate that the field is empty.
- j. Each record must start with the field and not the pipe "|". The first pipe must appear after the first field and the end of the record does not get a closing pipe it gets a carriage return to indicate end of record.
- k. Different types of validations as well as the sequence of validations to be performed on files submitted to SARS are as follows:
  - 1.SARS will reject an entire file under the following conditions:
    - File is corrupt, i.e. the file could not be read;
    - File fails structure validations, i.e. error(s) were found in the number of pipe separators in the submission file header, summary or line item level taxpayer data header, body or trailer, or specific field errors were found in the submission file header, summary or line item level taxpayer data header or trailer. Field validations on the file body are addressed in point 2 below.
  - 2.SARS will accept an entire file under the following conditions:
    - Zero fields were rejected;
    - One or more records were found to be duplicates.
  - 3.SARS will partially upload a file under the following conditions:
    - One or more record(s) were rejected.
- l. The fields in the file body are each subjected to the following types of validations and in the sequence as described below:
  1. Required: validates whether the field is required to be completed. Can be mandatory, conditional or optional. If the field is conditional, a condition rule is supplied;
  2. Data type: specifies the type for example, numeric or alpha numeric;
  3. Length type: indicates whether the length of the field can be VAR or fixed;
  4. Length min:max specifies the minimum length and the maximum length a field can have. If the field has a fixed length type, the minimum and maximum lengths is the same. Based on the whether there is a condition rule is met, different minimum and maximum lengths are defined;

5. Data validations: validates whether the field complies to format rules or belongs to a pre-defined set of values; and
6. Logic validations: applies a logic validation on the value of the field.

Note: When records are being validated by SARS systems, the validations will be done in the sequence as described above. Once a field has failed any one of these validations no further validations will be done on that field. For example, if a field passes the required and data type validations (numbers 1 and 2 above) and then fails on length type (number 3), the length, data and logic validations will not be performed and the error on the length type will be recorded in the response file.

- m. File Structure Validations will be done in the sequence provided in the table below. If the file fails file structure validations (File Response Code = 005), then a File Response Reason will be provided in the response file header. In the instance where the file failed validations

| No | Validation  | File Response Reason   |
|----|---|--|
| 1  | Does the file have a header, body and trailer identifier  | Missing required section either header, body, or trailer   |
| 2  | Does the generic header structure pass i.e. are there the correct amount of pipes                                       | Generic header contains the incorrect number of fields   |
| 3  | Does the trailer structure pass i.e. are the number of pipes correct  | Trailer contains the incorrect number of fields  |
| 4  | Does the submission file header structure pass i.e. are the number of pipes correct                                     | Product header contains the incorrect number of fields   |
| 5  | Does the body structure pass i.e. are the number of pipes correct and are the records submitted in the correct sequence | One or more body items contain the incorrect number of fields, or the records were submitted in the incorrect sequence |
| 6  | Validate the generic header data – actual content according to the spec   | Invalid data in generic header   |
| 7  | Validate the submission file header data – actual content according to the spec   | Invalid data in submission file header   |

|   |   |                            |
|---|---|----------------------------|
| 8 | Validate the trailer: Is the correct data used in the correct fields – actual content according to spec | Invalid data in trailer    |
| 9 | Validate the trailer: Do the calculated fields in the trailer add up                                    | Trailer calculation failed |

Note – if file did not pass validation numbers 1 to 6, then the acknowledgement of receipt cannot be issued and instead a rejection message will be sent.

- n. A pipe, “|”, character may not be used within any field value (e.g. as a special character). If it is, it will be regarded as the start of the next field.

ARCHIVED

## 6. FILE LAYOUTS

During the process of the submission of data to SARS a number of messages will be sent back and forth between the SARS systems, eFiling and the Direct Data Flow Channel depending on the data requested by SARS. The maximum number of messages is 3.

The table below indicates for each message, the file number and name to be used to convey that message. It also indicates the sender and recipient for each message. For each of the files, a detail file layout is provided in the sub paragraphs.

| Message Number | Message Description  | File Number | File Name      | Sender                                      | Recipient                         |
|----------------|--|-------------|----------------|---|-----------------------------------|
| 1              | IT3 submission is required as determined by the Commissioner   | 1           | IT3 submission | 3 <sup>rd</sup> Party application / eFiling | SARS systems                      |
| 2              | This response will be the acknowledgement of receiving data submission before any validations have been performed                    | 2           | Response       | SARS systems                                | 3 <sup>rd</sup> Party application |
| 3              | This response is the notification of whether the file was accepted or rejected. If rejected the response includes a rejection reason | 2           | Response       | SARS systems                                | 3 <sup>rd</sup> Party application |

### File Name Structure Requirements

| File Name      | File Name Structure Requirements   |
|----------------|--|
| IT3 submission | Data Type Being Supplied (value of field 8)_ File Layout Version (value of field 4)_ Tax Reference Number (value of field 28)_ Unique File ID (value of field 5)_ Message Create Date (value of field 3) |
| Response       | Data Type Being Supplied_ File Layout Version (value of field 4)_ Tax Reference Number_ Unique File ID_ Message Create Date_ "R"File Response Code   |

### Notes:

- All the field values in the file name must be separated by an "\_" and there must be no spaces between any characters.
- For the purpose of creating the file name the Message Create Date in the file name must be in the format CCYYMMDDThhmmss.
- The file name must be followed by either a .psv or a .txt or a .zip extension.

## 6.1 IT3 Schedule B Data Submission

This section lists all the fields that are required for the IT3 Schedule B file. The table specifies for each field, the required length, provides a description and also indicates the relevant validation rules.

**Note 1:** The number column is used to reference fields in the table for ease of use and does not indicate sequence in the file.

**Note 2:** The “Required”: “Type” field can have one of the following values:

- M = Mandatory: Implying the field must always be completed
- C = Conditional: Implying the field must always be completed under the defined conditions, else it can be left blank
- O = Optional: Implying the field can be completed if possible
- MW = Mandatory with warning: Implying from a SARS perspective this field is mandatory (as defined above), however due to constraints experienced by the submitting entities to provide the required data, the field can be left blank for a pre-defined time period and SARS will accept a record where such a mandatory field has not been completed. At the applicable time the field will revert to the intended Mandatory type and at such time SARS will reject the records if not completed.
- CW = Conditional with warning: Implying that from a SARS perspective, when the conditions are met, this field is mandatory, however due to constraints experienced by the submitting entities to provide the required data, the field can be left blank for a pre-defined time period and SARS will accept a record where such a field has not been completed under the specified conditions. At the applicable time the field will revert to the intended mandatory type when the conditions are met and at such time SARS will reject the records if not completed.

**Note 3:** The values for the “Length Type” column has been shortened to VAR (VAR) and FIX (Fixed) in order to save space.

**Note 4:** In order to enhance readability and understanding of some of the complex validation, the Field names used in the validations has been replaced with characters; e.g. Submission Tax Year (field 24) = X. Where this has been done, the list of field names replaced will appear at the start of the validation. The same character has not necessarily been used throughout for the same field name.

**Note 5:** File name definition – Refer to the file name structure table under section 5.

| No                            | Field Name          | Description   | Required |                | Data Type | Length Type | Length (Min:Max) | Data Validations  | Logic Validations   |
|-------------------------------|---------------------|---|----------|----------------|-----------|-------------|------------------|---|---|
|                               |                     |   | Type     | Condition Rule |           |             |                  |   |   |
| <b>SUBMISSION FILE HEADER</b> |                     |   |          |                |           |             |                  |   |   |
| 1                             | Section Identifier  | To identify the start of the section as well as identifying the type of section   | M        |                | A         | FIX         | 1:1              | <ul style="list-style-type: none"> <li>• Must = H, where H = Header</li> </ul>  |   |
| 2                             | Header Type         | To indicate the type of header in order to differentiate between various types  | M        |                | A         | VAR         | 1:3              | <ul style="list-style-type: none"> <li>• Must = GH, where GH = General Header</li> </ul>  |   |
| 3                             | Message Create Date | Date and time that the message was created  | M        |                | FT        | FIX         | 19:19            | <ul style="list-style-type: none"> <li>• Format must be: CCYY-MM-DDThh:mm:ss</li> <li>• 24h time format must be used</li> </ul>   | <ul style="list-style-type: none"> <li>• Must be less than or equal to today's date</li> </ul>                        |
| 4                             | File Layout Version | The version of the delimited file layout that is being submitted. Sequential number, which increments with one every time that the file layout version changes once files are being submitted to the production environment. This number is provided by SARS. | M        |                | N         | VAR         | 1:4              | <ul style="list-style-type: none"> <li>• <b>Must = 2</b></li> <li>• Value must not contain a decimal point</li> </ul> <p>Note – SARS will only support the version(s) specified above</p> | <ul style="list-style-type: none"> <li>• Must be greater than or equal to 1 and less than or equal to 9999</li> </ul> |

## 6.2 IT3 Schedule C Data Submission

This section lists all the fields that are required for the IT3 Schedule C file. The table specifies for each field, the required length, provides a description and also indicates the relevant validation rules.

**Note 1:** The number column is used to reference fields in the table for ease of use and does not indicate sequence in the file.

**Note 2:** The “Required”: “Type” field can have one of the following values:

- M = Mandatory: Implying the field must always be completed
- C = Conditional: Implying the field must always be completed under the defined conditions, else it can be left blank
- O = Optional: Implying the field can be completed if possible
- MW = Mandatory with warning: Implying from a SARS perspective this field is mandatory (as defined above), however due to constraints experienced by the submitting entities to provide the required data, the field can be left blank for a pre-defined time period and SARS will accept a record where such a mandatory field has not been completed. At the applicable time the field will revert to the intended Mandatory type and at such time SARS will reject the records if not completed.
- CW = Conditional with warning: Implying that from a SARS perspective, when the conditions are met, this field is mandatory, however due to constraints experienced by the submitting entities to provide the required data, the field can be left blank for a pre-defined time period and SARS will accept a record where such a field has not been completed under the specified conditions. At the applicable time the field will revert to the intended mandatory type when the conditions are met and at such time SARS will reject the records if not completed.

**Note 3:** The values for the “Length Type” column has been shortened to VAR (VAR) and FIX (Fixed) in order to save space.

**Note 4:** In order to enhance readability and understanding of some of the complex validation, the Field names used in the validations has been replaced with characters; e.g. Submission Tax Year (field 24) = X. Where this has been done, the list of field names replaced will appear at the start of the validation. The same character has not necessarily been used throughout for the same field name.

**Note 5:** File name definition – Refer to the file name structure table under section 5.

| No                            | Field Name          | Description  | Required |                | Data Type | Length Type | Length (Min:Max) | Data Validations  | Logic Validations  |

| 1                             | Section Identifier  | To identify the start of the section as well as identifying the type of section  | M        |                | A         | FIX         | 1:1              | <ul style="list-style-type: none"> <li>• Must = H, where H = Header</li> </ul>  |  |
| 2                             | Header Type         | To indicate the type of header in order to differentiate between various types   | M        |                | A         | VAR         | 1:3              | <ul style="list-style-type: none"> <li>• Must = GH, where GH = General Header</li> </ul>  |  |
| 3                             | Message Create Date | Date and time that the message was created   | M        |                | FT        | FIX         | 19:19            | <ul style="list-style-type: none"> <li>• Format must be: CCYY-MM-DDThh:mm:ss</li> <li>• 24h time format must be used</li> </ul>   | <ul style="list-style-type: none"> <li>• Must be less than or equal to today's date</li> </ul>                                 |
| 4                             | File Layout Version | The version of the delimited file layout that is being submitted. Sequential number, which increments with one every time that the file layout version changes once files are being submitted to the production environment. This number is provided by SARS.  | M        |                | N         | VAR         | 1:4              | <ul style="list-style-type: none"> <li>• <b>Must = 2</b></li> <li>• Value must not contain a decimal point</li> <li>• Note – SARS will only support the version(s) specified above</li> </ul> | <ul style="list-style-type: none"> <li>• Must be greater than or equal to 1 and less than or equal to 9999</li> </ul>          |
| 5                             | Unique File ID      | The submitting source must create this field when data is submitted to SARS. This field will uniquely identify this file when coupled with the source. This value must not be repeated by the submitting source (e.g. use the date time with some other unique number). This field will also be used to link the records to the original file. The field must be generated by the software from which the entity is submitting the data to SARS. | M        |                | AN        | VAR         | 1:64             | <ul style="list-style-type: none"> <li>• Value must not contain a decimal point</li> </ul>  | <ul style="list-style-type: none"> <li>• Must be unique per submission and across submissions per submitting entity</li> </ul> |

| No | Field Name             | Description   | Required |  | Data Type | Length Type | Length (Min:Max)   | Data Validations   | Logic Validations |
|----|------------------------|---|----------|--|-----------|-------------|--|--|-------------------|
|    |                        |   | Type     | Condition Rule   |           |             |  |  |                   |
|    |                        | When SARS sends the response file, the Unique File ID in the response file must be equal to the Unique File ID obtained from the file name of the submitted file.   |          |  |           |             |  |  |                   |
| 6  | SARS Request Reference | In the scenario where SARS sends a request file to the entity requesting data, SARS provides this reference number to use in the file to be submitted to SARS. SARS also uses this reference number when responding to the taxpayer on files submitted to SARS.   | O        | a) If Data Type Being Supplied = I3C, then this field must be left blank | AN        | VAR         | <ul style="list-style-type: none"> <li>• 0:0 – If this field is left blank</li> <li>• 1:64 – If this field is completed</li> </ul> |  |                   |
| 7  | Test Data Indicator    | <p>This should be used to indicate if the data is for testing or is live data and should be processed. The purpose of the field is to avoid test data accidentally being processed in production and allow the source to test their submission without it being processed.</p> <p><b>Note</b> – If SARS receives a value = T in the production environment or a value = L in the test environment, then the file will be validated, a response file will be returned, but the data will not be processed to the database. then the file will be rejected in its entirety.</p> | M        |  | A         | FIX         | 1:1  | <ul style="list-style-type: none"> <li>• Must = T or L, where T = Test and L = Live</li> </ul> |                   |

| No | Field Name               | Description   | Required |                | Data Type | Length Type | Length (Min:Max) | Data Validations  | Logic Validations  |
|----|--------------------------|---|----------|----------------|-----------|-------------|------------------|---|--|
|    |                          |   | Type     | Condition Rule |           |             |                  |   |  |
| 8  | Data Type Being Supplied | When data is submitted to SARS, this field indicates the type of data that can be found in the file, e.g. Dividends tax, VAT supporting data. When SARS sends a response on a file submitted, SARS indicates the data type on which the response is based.  | M        |                | AN        | FIX         | 3:3              | <ul style="list-style-type: none"> <li>Must = I3C, where I3C = IT3(c) supporting data</li> </ul>                            |  |
| 9  | Channel Identifier       | Identifies the channel from which the file was submitted, e.g. Connect Direct<br>The channel, from which the file was submitted to SARS, must generate this identifier.   | M        |                | AN        | VAR         | 1:10             | <ul style="list-style-type: none"> <li>Must = CD, where CD = Connect Direct, HTTPS = Hypertext Transfer Protocol</li> </ul> |  |
| 10 | Source Identifier        | This identifies the file submitter and contains the security token. This value will be supplied by SARS if the C:D or HTTPS channels are used.<br><br>Note – For testing purposes please refer to the SARS website where a value will be supplied that can be used in the interim. This value will only be applicable for test purposes and will not be accepted in the production environment. | M        |                | FT        | FIX         | 144:144          |   | a) – Validate that this value = the value supplied by SARS |

| No | Field Name  | Description   | Required |                | Data Type | Length Type | Length (Min:Max) | Data Validations  | Logic Validations   |
|----|-------------|---|----------|----------------|-----------|-------------|------------------|---|---|
|    |             |   | Type     | Condition Rule |           |             |                  |   |   |
| 11 | Group ID    | If the amount of data requires that it be sent in multiple files, a unique Group ID must be created on the submitting entity's system to be able to link the multiple files to the one group  | M        |                | AN        | VAR         | 1:64             | <ul style="list-style-type: none"> <li>Although this field is designed using the definition of AN (as specified in section 1.2.2 of this document), SARS will also accept dashes "-" (this is to cater for entities that have chosen to make use of a GUID). Please note this is the only exception to the AN definition that will be permitted and only on this field</li> </ul> | <ul style="list-style-type: none"> <li>Must not be equal to a Group ID used in a previously successfully submitted group file submission per submitting entity</li> </ul> |
| 12 | Group Total | <p>Number of files that make up a group, e.g. if the amount of data requires three files to be submitted, then the Group Total must be 3.</p> <p>For example, where it is required for data to be submitted in one file and the file is too large to accommodate the submission in a single file, the file can be split into smaller more manageable files and this field must then indicate the total number of files that make up the submission.</p> | M        |                | N         | VAR         | 1:4              | <ul style="list-style-type: none"> <li>Value must not contain a decimal point</li> </ul>  | <ul style="list-style-type: none"> <li>Must be greater than or equal to 1 and less than or equal to 9999</li> </ul>   |

## 6.3 IT3 Schedule E Data Submission

This section lists all the fields that are required for the IT3 Schedule E file. The table specifies for each field, the required length, provides a description and also indicates the relevant validation rules.

**Note 1:** The number column is used to reference fields in the table for ease of use and does not indicate sequence in the file.

**Note 2:** The “Required”: “Type” field can have one of the following values:

- M = Mandatory: Implying the field must always be completed
- C = Conditional: Implying the field must always be completed under the defined conditions, else it can be left blank
- O = Optional: Implying the field can be completed if possible
- MW = Mandatory with warning: Implying from a SARS perspective this field is mandatory (as defined above), however due to constraints experienced by the submitting entities to provide the required data, the field can be left blank for a pre-defined time period and SARS will accept a record where such a mandatory field has not been completed. At the applicable time the field will revert to the intended Mandatory type and at such time SARS will reject the records if not completed.
- CW = Conditional with warning: Implying that from a SARS perspective, when the conditions are met, this field is mandatory, however due to constraints experienced by the submitting entities to provide the required data, the field can be left blank for a pre-defined time period and SARS will accept a record where such a field has not been completed under the specified conditions. At the applicable time the field will revert to the intended mandatory type when the conditions are met and at such time SARS will reject the records if not completed.

**Note 3:** The values for the “Length Type” column has been shortened to VAR (VAR) and FIX (Fixed) in order to save space.

**Note 4:** In order to enhance readability and understanding of some of the complex validation, the Field names used in the validations has been replaced with characters; e.g. Submission Tax Year (field 24) = X. Where this has been done, the list of field names replaced will appear at the start of the validation. The same character has not necessarily been used throughout for the same field name.

**Note 5:** File name definition – Refer to the file name structure table under section 5.

| No | Field Name | Description | Required | Data | Length | Length | Data Validations | Logic Validations |
|----|------------|-------------|----------|------|--------|--------|------------------|-------------------|
|----|------------|-------------|----------|------|--------|--------|------------------|-------------------|

|----|------------------------|---|----------|--|-----------|-------------|--|--|--|
|    |                        |   | Type     | Condition Rule   |           |             |  |  |  |
| 5  | Unique File ID         | The submitting source must create this field when data is submitted to SARS. This field will uniquely identify this file when coupled with the source. This value must not be repeated by the submitting source (e.g. use the date time with some other unique number). This field will also be used to link the records to the original file. The field must be generated by the software from which the entity is submitting the data to SARS. When SARS sends the response file, the Unique File ID in the response file must be equal to the Unique File ID obtained from the file name of the submitted file | M        |  | AN        | VAR         | 1:64   | <ul style="list-style-type: none"> <li>Value must not contain a decimal point</li> </ul> | <ul style="list-style-type: none"> <li>Must be unique per submission and across submissions per submitting entity</li> </ul> |
| 6  | SARS Request Reference | In the scenario where SARS sends a request file to the entity requesting data, SARS provides this reference number to use in the file to be submitted to SARS. SARS also uses this reference number when responding to the taxpayer on files submitted to SARS  | O        | a) If Data Type Being Supplied = I3E, then this field must be left blank | AN        | VAR         | <ul style="list-style-type: none"> <li>0:0 – if the field is left blank</li> <li>1:64 – if the field is completed</li> </ul> |  |  |

| No | Field Name               | Description   | Required |                | Data Type | Length Type | Length (Min:Max) | Data Validations  | Logic Validations |
|----|--------------------------|---|----------|----------------|-----------|-------------|------------------|---|-------------------|
|    |                          |   | Type     | Condition Rule |           |             |                  |   |                   |
| 7  | Test Data Indicator      | <p>This should be used to indicate if the data is for testing or is live data and should be processed. The purpose of the field is to avoid test data accidentally being processed in production and allow the source to test their submission without it being processed.</p> <p><b>Note</b> – If SARS receives a value = T in the production environment or a value = L in the test environment, then the file will be validated, a response file will be returned, but the data will not be processed to the database, then the file will be rejected in its entirety.</p> | M        |                | A         | FIX         | 1:1              | <ul style="list-style-type: none"> <li>a) Must = T or L, where T = Test and L = Live</li> </ul>                             |                   |
| 8  | Data Type Being Supplied | When data is submitted to SARS, this field indicates the type of data that can be found in the file, e.g. Dividends tax, VAT supporting data. When SARS sends a response on a file submitted, SARS indicates the data type on which the response is based.  | M        |                | AN        | FIX         | 3:3              | <ul style="list-style-type: none"> <li>Must = I3E, where I3E = IT3(e) supporting data</li> </ul>                            |                   |
| 9  | Channel Identifier       | Identifies the channel from which the file was submitted, e.g. Connect Direct<br>The channel, from which the file was submitted to SARS, must generate this identifier.   | M        |                | AN        | VAR         | 1:10             | <ul style="list-style-type: none"> <li>Must = CD, where CD = Connect Direct, HTTPS = Hypertext Transfer Protocol</li> </ul> |                   |

|     |                         |  | Type     | Condition Rule |           |             |                  |  |  |
| 106 | Section Identifier      | To identify the start of the section as well as identifying the type of section.   | M        |                | A         | FIX         | 1:1              | <ul style="list-style-type: none"> <li>a) Must = "T"</li> </ul>                          |  |
| 107 | Total Number of Records | This is the sum of all records contained in the body of the delimited file. This sum excludes the header and the trailer records   | M        |                | N         | VAR         | 1:15             | <ul style="list-style-type: none"> <li>Value must not contain a decimal point</li> </ul> | <ul style="list-style-type: none"> <li>a) Must be greater than or equal to 1 and less than or equal to 999999999999999</li> <li>b) Must be equal to the total of all lines with a section identifier of B</li> </ul>   |
| 108 | File Hash Total         | <p>Calculation based on all the characters in the file. Must use MD5 calculation.</p> <p><b>Note</b> – If you do not provide this field, the file will be accepted with warning, however SARS will not be able to confirm the integrity of the contents of the file submitted.</p> | MW       |                | AN        | FIX         | 32:32            |  | <ul style="list-style-type: none"> <li>a) Must use MD5 calculation</li> <li>b) Use all sections, except those where the section identifier = T.</li> <li>c) File hash total calculation must equal this field value</li> <li>d) <b>Note</b> – If you do not provide this field, the file will be accepted with warning, however SARS will not be able to confirm the integrity of the contents of the file submitted.</li> </ul> |

## 6.4 File Layout: 2. Response

The table below lists all the fields that are required for the file containing the response to supporting data files submitted to SARS. The table specifies for each field, the required length, provides a description and also indicates the relevant validation rules.

**Note:** The number column is used to reference fields in the table for ease of use in this specification document.

Below is the layout of the PSV response file header that is submitted from SARS to the taxpayer.

| No                                    | Field Name          | Description  | Required |                | Data Type | Length Type | Length (Min:Max) | Data Validations   | Logic Validations   |
|---------------------------------------|---------------------|--|----------|----------------|-----------|-------------|------------------|--|---|
|                                       |                     |  | Type     | Condition Rule |           |             |                  |  |   |
| <b>REQUEST / RESPONSE FILE HEADER</b> |                     |  |          |                |           |             |                  |  |   |
| 1                                     | Section Identifier  | To identify the start of the section as well as identifying the type of section  | M        |                | A         | FIX         | 1:1              | <ul style="list-style-type: none"> <li>Must = H, where H = Header</li> </ul>   |   |
| 2                                     | Header Type         | To indicate the type of header in order to differentiate between various types   | M        |                | A         | FIX         | 1:3              | <ul style="list-style-type: none"> <li>Must = GH, where GH = General Header</li> </ul>   |   |
| 3                                     | Message Create Date | Date and time that the message was created   | M        |                | FT        | FIX         | 19:19            | <ul style="list-style-type: none"> <li>Format must be: CCYY-MM-DDThh:mm:ss</li> <li>24h time format must be used</li> </ul>  | <ul style="list-style-type: none"> <li>Must be less than or equal to today's date</li> </ul>                        |
| 4                                     | File Layout Version | The version of the delimited file layout that is being submitted. Sequential number, which increments with one every time that the file layout version changes once files are being submitted to the production environment. This number is provided by SARS | M        |                | N         | VAR         | 1:4              | <ul style="list-style-type: none"> <li>Must = 2</li> <li>Value must not contain a decimal point</li> <li>Note – SARS will only support the version(s) specified above</li> </ul> | <ul style="list-style-type: none"> <li>Must be greater than or equal to 1 and less than or equal to 9999</li> </ul> |

| No | Field Name             | Description   | Required |   | Data Type | Length Type | Length (Min:Max)   | Data Validations   | Logic Validations   |
|----|------------------------|---|----------|---|-----------|-------------|--|--|---|
|    |                        |   | Type     | Condition Rule  |           |             |  |  |   |
| 5  | Unique File ID         | The submitting source must create this field when data is submitted to SARS. This field will uniquely identify this file when coupled with the source. This value must not be repeated by the submitting source (e.g. use the date time with some other unique number). This field will also be used to link the records to the original file. The field must be generated by the software from which the entity is submitting the data to SARS. When SARS sends the response file, the Unique File ID in the response file must be equal to the Unique File ID obtained from the file name of the submitted file | C        | <ul style="list-style-type: none"> <li>If File Response Code = 001, 002, 003, 004, 005, 006, 011 or 012 then this field is mandatory</li> </ul> | AN        | VAR         | <ul style="list-style-type: none"> <li>a) 0:0 – No condition met</li> <li>b) 1:64 – Condition met</li> </ul>                 | <ul style="list-style-type: none"> <li>Value must not contain a decimal point</li> </ul> | <ul style="list-style-type: none"> <li>Must equal the Unique File ID of the submitted file</li> </ul> |
| 6  | SARS Request Reference | In the scenario where SARS sends a request file to the entity requesting data, SARS provides this reference number to use in the file to be submitted to SARS. SARS also uses this reference number when responding to the taxpayer on files submitted to SARS  | C        | <ul style="list-style-type: none"> <li>If Data Type Being Supplied = I3B, I3C or I3E, then this field must be left blank</li> </ul>             | AN        | VAR         | <ul style="list-style-type: none"> <li>0:0 – If this field is left blank</li> <li>1:64 if this field is completed</li> </ul> |  |   |

| No | Field Name               | Description   | Required |   | Data Type | Length Type | Length (Min:Max)  | Data Validations   | Logic Validations   |
|----|--------------------------|---|----------|---|-----------|-------------|---|--|---|
|    |                          |   | Type     | Condition Rule  |           |             |   |  |   |
| 7  | Test Data Indicator      | <p>This should be used to indicate if the data is for testing or is live data and should be processed. The purpose of the field is to avoid test data accidentally being processed in production and allow the source to test their submission without it being processed.</p> <p><b>Note</b> – If SARS receives a value = T in the production environment or a value = L in the test environment, then the file will be rejected in its entirety</p> | M        |   | A         | FIX         | 1:1   | <ul style="list-style-type: none"> <li>Must = T or L, where T = Test and L = Live</li> </ul>   |   |
| 8  | Data Type Being Supplied | <p>When data is submitted to SARS, this field indicates the type of data that can be found in the file, e.g. Dividends tax, VAT supporting data. When SARS sends a response on a file submitted, SARS uses the Data_Type_Being_Supplied from the file name of the file submitted to SARS</p>  | C        | <ul style="list-style-type: none"> <li>If File Response Code = 001, 002, 003, 004, 005, 006, 011 or 012 then this field is mandatory</li> </ul> | AN        | FIX         | <ul style="list-style-type: none"> <li>a) 0:0 – No condition met</li> <li>b) 3:3 – Condition met</li> </ul> | <ul style="list-style-type: none"> <li>Must = I3B, I3Cor I3E, where I3B = IT3(b) supporting data, I3C = IT3(c) supporting data and I3E = IT3(e) supporting data</li> </ul> |   |
| 9  | Source Identifier        | <p>This identifies the file submitter and contains the security token. This value will be supplied by SARS</p>  | C        | <ul style="list-style-type: none"> <li>If File Response Code = 001, 003, 004, 005, 006, 011 or 012 then this field is mandatory</li> </ul>      | AN        | FIX         | <ul style="list-style-type: none"> <li>0:0 – no condition met</li> <li>144:144 – condition met</li> </ul>   |  | <ul style="list-style-type: none"> <li>Validate that this value = the value supplied by SARS</li> </ul> |

| No | Field Name  | Description  | Required |  | Data Type | Length Type | Length (Min:Max)   | Data Validations   | Logic Validations   |
|----|-------------|--|----------|--|-----------|-------------|--|--|---|
|    |             |  | Type     | Condition Rule   |           |             |  |  |   |
| 10 | Group ID    | If the amount of data requires that it be sent in multiple files, a unique Group ID must be created on the submitting entity's system to be able to link the multiple files to the one group   | C        | <ul style="list-style-type: none"> <li>If File Response Code = 001, 003, 004, 005, 006 or 012 then this field is mandatory</li> </ul>  | AN        | VAR         | <ul style="list-style-type: none"> <li>0:0 – no condition met</li> <li>1:64 – condition met</li> <li>•</li> <li>•</li> </ul> |  |   |
| 11 | Group Total | <p>Number of files that make up a group, e.g. if the amount of data requires three files to be submitted, then the Group Total must be 3.</p> <p>For example, where it is required for data to be submitted in one file and the file is too large to accommodate the submission in a single file, the file can be split into smaller more manageable files and this field must then indicate the total number of files that make up the submission</p> | C        | <ul style="list-style-type: none"> <li>If File Response Code = 001, 003, 004, 005, 006 or 012, then this field is mandatory</li> </ul> | N         | VAR         | <ul style="list-style-type: none"> <li>0:0 – no condition met</li> <li>1:4 – condition met</li> <li>•</li> </ul>             | <ul style="list-style-type: none"> <li>Value must not contain a decimal point</li> </ul> | <ul style="list-style-type: none"> <li>Must be greater than or equal to 1 and less than or equal to 9999</li> </ul> |

| No | Field Name           | Description   | Required |  | Data Type | Length Type | Length (Min:Max)  | Data Validations   | Logic Validations  |
|----|----------------------|---|----------|--|-----------|-------------|---|--|--|
|    |                      |   | Type     | Condition Rule   |           |             |   |  |  |
| 12 | Unique Group Item ID | The number of this file in the group. This number must be an incrementing number beginning at one for each group submission, and incrementing by 1 for each file in the group.<br><br>E.g. if this is the second file of the group this field must be 2 | C        | <ul style="list-style-type: none"> <li>If File Response Code = 001, 003, 004, 005, 006 or 012, then this field is mandatory</li> </ul> | N         | VAR         | <ul style="list-style-type: none"> <li>0:0 – no condition met</li> <li>1:4 – condition met</li> <li></li> </ul>                                   | <ul style="list-style-type: none"> <li>Value must not contain a decimal point</li> </ul>       | <ul style="list-style-type: none"> <li>Must be equal to or greater than 1</li> <li>Must be less than or equal to the Group Total</li> <li>Must be submitted in sequence</li> </ul> |
| 13 | File Response Code   | This is the status for the entire submitted file, reflecting the result of technical and business validations performed on the incoming file  | M        |  | N         | FIX         | 3:3   | <ul style="list-style-type: none"> <li>Refer to Appendix H for the valid code table</li> </ul> |  |
| 14 | File Response Reason | The reason why the file was rejected in its entirety  | C        | <ul style="list-style-type: none"> <li>If File Response Code is equal to 005 this field is mandatory</li> </ul>                        | FT        | VAR         | <ul style="list-style-type: none"> <li>a) 0:0 – No condition met</li> <li>b) 1:100 – Condition met</li> </ul>                                     |  |  |
| 15 | Transaction Date     | The date for which data is required   | C        | <ul style="list-style-type: none"> <li>If Data Type Being Supplied = I3B, I3C, I3E, the field must be left blank</li> </ul>            | FT        | FIX         | <ul style="list-style-type: none"> <li>0:0 – if this field is left blank</li> <li>10:10 – if this field is completed</li> </ul>                   | <ul style="list-style-type: none"> <li>Format CCYY-MM-DD</li> </ul>                            | <ul style="list-style-type: none"> <li>Must be less than or equal to today's date</li> </ul>   |
| 16 | Tax Period           | This is the period for which data is required   | C        | <ul style="list-style-type: none"> <li>If Data Type Being Supplied = I3B, I3C, I3E, the field must be left blank</li> </ul>            | N         | FIX         | <ul style="list-style-type: none"> <li>0:0 – if this field is left blank</li> <li>6:6 – if this field is completed</li> <li></li> <li></li> </ul> | <ul style="list-style-type: none"> <li>Format CCYYMM</li> <li></li> <li></li> </ul>            | <ul style="list-style-type: none"> <li>Must be greater than or equal to 190001 and less than or equal to current tax period</li> </ul>   |

| No  | Field Name           | Description  | Required |   | Data Type | Length Type | Length (Min:Max)  | Data Validations   | Logic Validations  |

| 30   | Total Number of Records | This is the sum of all records contained in the body of the delimited file. This sum excludes the header and the trailer records | M        |   | N         | VAR         | 1:15   | <ul style="list-style-type: none"> <li>Value must not contain a decimal point</li> </ul> | <ul style="list-style-type: none"> <li>Must be greater than or equal to 1 and less than or equal to 9999999999</li> <li>Must be equal to the total of all lines with a section identifier of B</li> </ul>  |
| 31   | File Hash Total         | Calculation based on all the characters in the file. Must use MD5 calculation.   | M        |   | AN        | FIX         | 32:32  |  | <ul style="list-style-type: none"> <li>Must use MD5 calculation</li> <li>Use all sections, except where Section Identifier = T</li> <li>File hash total calculation must equal this field value</li> </ul> |

## 7. CODES

### 7.1 Appendix A – Nature of Person

| Code                           | Description   |
|--------------------------------|---|
| INDIVIDUAL                     | Individual  |
| FOREIGN_INDIVIDUAL             | Foreign Individual  |
| INDIVIDUAL_ESTATE              | Individual Estates (excluding late Estates)   |
| PARTNERSHIP                    | Partnerships  |
| PUBLIC_CO                      | Listed company  |
| PRIVATE_CO                     | Unlisted company  |
| CLOSE_CORPORATION              | Close Corporation   |
| FOREIGN_COMPANY                | Foreign Company   |
| OTHER_CO                       | Other Company   |
| CORP_ESTATE                    | Corporate: Estate/Liquidation   |
| INTERVIVOS_TRUST               | Trust (any type)  |
| GOVERNMENT_ENTITY              | RSA Government, Provincial Administration, Municipalities   |
| RETIREMENT_FUND                | Retirement Fund (Pension, Provident, Benefit, RA etc)   |
| CLUB                           | Clubs   |
| UNINCORPORATED_BODY_OF_PERSONS | Other entity not covered by the list provided (including a portfolio of a Collective Investment Scheme in Securities) |
| ASSOC_NOT_FOR_GAIN             | Association not for gain  |
| STOKVEL                        | Stokvel   |
| SOCIETY                        | Society   |

### 7.2 Appendix B - IT3(b) Source Codes Table

This table provides income source codes that are used for the purpose of IT3(b) extracts.

| Income Source Code | Description   |
|--------------------|---|
| 4201               | Local Interest  |
| 4202               | Dividends/Dividends from a unit trust company/Other dividends – excluding dividends from a foreign source<br><br><b>Note:</b> This Income source code may only be used for local dividends that were declared prior to 1 April 2012 |
| 4210               | Rental income   |
| 4212               | Royalties profit income   |
| 4216               | Dividends from a foreign source subject to SA normal tax  |
| 4218               | Interest from a foreign source  |
| 4112               | Tax paid on foreign Dividends   |
| 4113               | Tax paid on foreign Interests   |

---

### 7.3 Appendix C - IT3(c) Source Codes Table

This table provides income source codes that are used for the purpose of IT3(c) extracts.

| Income Source Code | Description   |
|--------------------|---|
| 4250               | Local capital gains tax - Profit  |
| 4251               | Local capital gains tax - Loss  |
| 4252               | Foreign capital gains tax - Profit  |
| 4253               | Foreign capital gains tax - Loss  |
| 4114               | Tax credit on Capital gains – foreign tax credits – foreign capital gains |

ARCHIVED

## 7.5 Appendix D - IT3(e) Source Codes Table

Table below provides a list of income source codes that are used for the IT3(e) extracts.

| Income Source Code | Description   | Income Source Code | Description   | Income Source Code | Description   |
|--------------------|---|--------------------|---|--------------------|---|
| 102                | Pig farming   | 1422               | Air conditioning and ventilation machinery  | 2316               | Other accommodation, e.g. furnished flats (holiday), rooms without meals, caravans and mobile homes |
| 104                | Livestock farming   | 1424               | Other specialised machinery and parts for specific industries                             | 2398               | Other not specified   |
| 106                | Crop farming  | 1426               | Other machinery and machine spares for general purposes                                   | 2402               | Railway transport and services  |
| 108                | Production of milk  | 1428               | Electrical machinery and apparatus for generation and control (including electric motors) | 2404               | Bus transport (excluding taxis)   |
| 110                | Bee keeper  | 1430               | Radio and electronic components   | 2406               | Taxis   |
| 112                | Mixed farming (no more than 50% in any of above)                | 1432               | Gramophone records and tape recordings  | 2408               | Renting of trucks, cars, trailers and containers (except caravans)                                  |
| 114                | Poultry farming   | 1434               | Other broadcast receiving and sound reproducing equipment                                 | 2410               | Road haulage  |
| 116                | Ostrich farming   | 1436               | Telegraph, telephone and signalling apparatus and equipment                               | 2412               | Sea transport and supporting services   |
| 118                | Breeding of non-food producing animals (excluding horses)       | 1438               | Electronic computers  | 2414               | Air transport and supporting services   |
| 120                | Horse breeder   | 1440               | Insulated wires and cables  | 2416               | Renting of aircraft   |
| 122                | Agricultural services (excluding veterinary services; see 2958) | 1442               | Batteries   | 2418               | Shipping, clearing and forwarding agents  |
| 124                | Vegetable farmer  | 1444               | Electric bulbs and fluorescent tubes  | 2420               | Travel agents   |
| 126                | Wine farmer   | 1446               | Other electrical and electronic goods   | 2422               | Operation of car parks and toll roads   |
| 128                | Fruit farming   | 1498               | Other not specified   | 2424               | Storage and warehousing   |

| Income Source Code | Description                                | Income Source Code | Description  | Income Source Code | Description   |
|--------------------|--|--------------------|--|--------------------|---|
| 130                | Flower and seed growers                    | 1502               | Motor vehicles   | 2426               | Postal services and telecommunications  |
| 132                | Forestry and logging (plantations)         | 1504               | Caravans, trailers and vehicle bodies  | 2498               | Other not specified   |
| 134                | Sugar farming                              | 1506               | Tractors   | 2502               | Discount houses   |
| 136                | Fish breeder                               | 1508               | Motor vehicles parts and accessories (excluding tires and tubes, glass and electrical equipment) | 2504               | Commercial banks  |
| 138                | Tobacco farming                            | 1510               | Specialised automotive engineering workshops working primarily for the motor trade               | 2506               | Building societies  |
| 140                | Wool farming                               | 1598               | Other not specified  | 2508               | Merchant banks  |
| 142                | Game farming                               | 1602               | Ship and boat building and repairs   | 2510               | Hire-purchase, savings and general banks  |
| 192                | Foreign farming                            | 1604               | Locomotives  | 2512               | Land and Agricultural Bank of South Africa  |
| 198                | Other not specified                        | 1606               | Railway carriages and wagons   | 2514               | Stockbrokers  |
| 202                | Coal                                       | 1608               | Motor cycles, pedal cycles and relevant parts  | 2516               | Unit trust schemes  |
| 204                | Crude petroleum and natural gas production | 1610               | Aircraft manufacture and repair  | 2518               | Other financial institutions (including buying associations)                                    |
| 206                | Iron ore                                   | 1698               | Other not specified  | 2520               | Financial services  |
| 208                | Chrome                                     | 1702               | Scientific, laboratory and industrial instruments and systems                                    | 2522               | Short-term insurance  |
| 210                | Copper                                     | 1704               | Orthopaedic appliances and supplies  | 2524               | Registered pension/provident funds  |
| 212                | Manganese                                  | 1706               | Surgical, medical and dental instruments and appliances  | 2526               | Medical benefit/aid societies   |
| 214                | Platinum                                   | 1708               | Photographic, optical and document copying equipment   | 2528               | Insurance brokers and other insurance services (including insurance agents on commission basis) |

| Income Source Code | Description  | Income Source Code | Description   | Income Source Code | Description                                 |
|--------------------|--|--------------------|---|--------------------|---|
| 216                | Gold and uranium   | 1710               | Watches and clocks  | 2530               | Property letting: business premises         |
| 218                | Other metal ore mining   | 1798               | Other not specified   | 2532               | Property letting: residential accommodation |
| 220                | Diamond mining   | 1802               | Jewellery and related articles  | 2534               | Township developers                         |
| 222                | Stone quarrying, clay and sand-pits                                  | 1804               | Musical instruments   | 2536               | Estate agents                               |
| 224                | Chemical and fertiliser mineral mining                               | 1806               | Sporting and athletic equipment   | 2538               | Rent collectors, appraisers and valuers     |
| 226                | Asbestos   | 1808               | Toys and games  | 2540               | Attorneys, notaries and conveyances         |
| 298                | Other not specified  | 1810               | Brushes and brooms  | 2542               | Advocates                                   |
| 302                | Slaughtering, preparing and preserving meat                          | 1812               | Miscellaneous stationers goods (e.g. crayons, pens and pencils)                                     | 2544               | Registered accountants and auditors         |
| 304                | Dairy products (except processing of milk for retail sale; see 2204) | 1814               | Signs and advertising displays  | 2546               | Cost and management accountants             |
| 306                | Canning and preserving of fruit and vegetables                       | 1816               | Other miscellaneous manufacturing industries (including number plates, lamps, paper patterns, etc.) | 2548               | Bookkeeping services                        |
| 308                | Canning, preserving and processing of fish and related products      | 1898               | Other not specified   | 2550               | Programming and data processing services    |

## 7.9 Appendix H - File Response Codes

| Code | Description   |
|------|---|
| 001  | Acknowledgement of receipt  |
| 002  | Rejected: entire file rejected as contains critical errors. The file must be corrected and resubmitted to enable processing   |
| 003  | Successfully uploaded: all records accepted and processed.  |
| 004  | Accepted with warnings: This can be any combination of accepted fields, fields accepted with a warning and duplicate records.   |
| 005  | Rejected: entire file rejected as it contains file structure errors. The file must be corrected and resubmitted to enable processing.   |
| 006  | Partial upload: This can be any combination of accepted fields, rejected fields, fields accepted with a warning or duplicate records.   |
| 011  | Rejected: Entire file rejected as the file was submitted as part of a group and one or more of the files in the group failed the validations associated with the submission of a file as part of a group. |
| 012  | Rejected: Group submission incomplete and service level agreement expired for SARS to wait for all files in a group to be submitted   |

## 7.10 Appendix I - Modulus 10 Validation

The last character is a check digit, calculated by applying the following algorithm:

| Digit   | Formula  |
|---------|--|
| Digit 1 | Multiply by 2 (Add result to total)* See below |
| Digit 2 | Add to total                                   |
| Digit 3 | Multiply by 2 (Add result to total)* See below |
| Digit 4 | Add to total                                   |
| Digit 5 | Multiply by 2 (Add result to total)* See below |
| Digit 6 | Add to total                                   |
| Digit 7 | Multiply by 2 (Add result to total)* See below |
| Digit 8 | Add to total                                   |
| Digit 9 | Multiply by 2 (Add result to total)* See below |

\* When the result of the line item calculation exceeds 9, add the individual digits together to obtain a single digit result (e.g. 18 = 1 + 8 = 9)

Digit 10: Check digit

If the last digit of Total > 0 Then

The Check Digit should be equal to the result of  $10 - (\text{Total} \text{ MOD } 10)$

If the last digit of Total = 0 Then

The Check Digit should be equal to zero

Example:

Tax Reference Number = 0001339050

| Digit        | Formula                | Result |
|--------------|------------------------|--------|
| Digit 1      | 0 x 2                  | 0      |
| Digit 2      | 0                      | + 0    |
| Digit 3      | 0 x 2                  | + 0    |
| Digit 4      | 1                      | + 1    |
| Digit 5      | 3 x 2                  | + 6    |
| Digit 6      | 3                      | + 3    |
| Digit 7      | 9 x 2 = 18 (1 + 8 = 9) | + 9    |
| Digit 8      | 0                      | + 0    |
| Digit 9      | 5 x 2 = 10 (1 + 0 = 1) | + 1    |
| <b>Total</b> |                        | 20     |

Last Digit of Total is not greater than zero 0 so the check digit equal 0 and the number is therefore valid.

---

## 7.11 Appendix J – ID Validation

Format:

{YYMMDD}{G}{SSS}{C}{A}{Z}

YYMMDD : Date of birth.

G : Gender. 0-4 Female; 5-9 Male.

SSS : Sequence No. for DOB/G combination.

C : Citizenship. 0 SA; 1 Other.

A : Usually 8, or 9 [can be other values]

Z : Control digit

Formula to calculate the check digit for a 13 digit identity number:

According to the provisions of the Identification Amendment Act, 2000 (Act No. 28 of 2000, which was promulgated on 13 October 2000) all forms of identity documents other than the green bar-coded identity document are invalid. In accordance with the legislation, the control figure which is the 13th digit of all identity numbers which is calculated as follows using ID Number 800101 5009 087 as an example:

Add all the digits in the odd positions (excluding last digit).  $8 + 0 + 0 + 5 + 0 + 0 = 13$ .....[1]

Move the even positions into a field and multiply the number by 2.

$011098 \times 2 = 22196$

Add the digits of the result in b).

$2 + 2 + 1 + 9 + 6 = 20$ .....[2]

Add the answer in [2] to the answer in [1].

$13 + 20 = 33$

Subtract the second digit (i.e. 3) from 10. The number must tally with the last number in the ID Number. If the result is 2 digits, the last digit is used to compare against the last number in the ID Number. If the answer differs, the ID number is invalid

## 7.13 Appendix L - MD5 Calculation

The following calculation must be used for determining the file hash total.

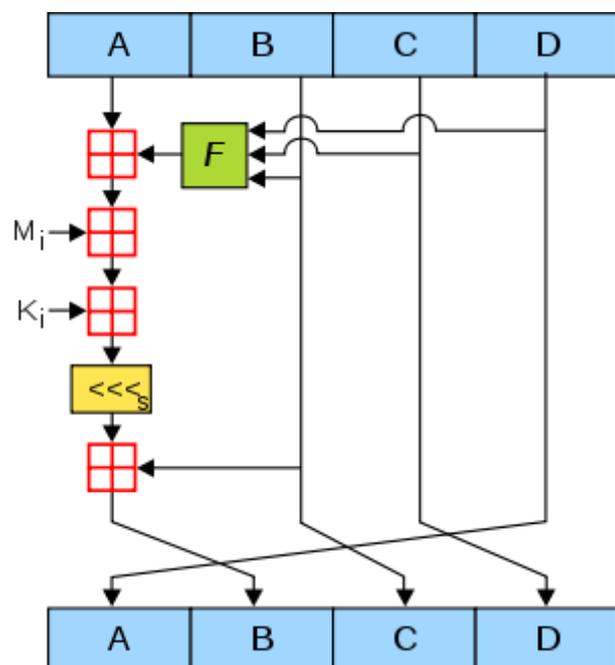

Figure 1. One MD5 operation. MD5 consists of 64 of these operations, grouped in four rounds of 16 operations.  $F$  is a nonlinear function; one function is used in each round.  $M_i$  denotes a 32-bit block of the message input, and  $K_i$  denotes a 32-bit constant, different for each operation.  $\lll_s$  denotes a left bit rotation by  $s$  places;  $s$  varies for each operation.  $\boxplus$  denotes addition modulo  $2^{32}$ .

MD5 processes a VAR-length message into a FIX-length output of 128 bits. The input message is broken up into chunks of 512-bit blocks (sixteen 32-bit little endian integers); the message is padding so that its length is divisible by 512. The padding works as follows: first a single bit, 1, is appended to the end of the message. This is followed by as many zeros as are required to bring the length of the message up to 64 bits fewer than a multiple of 512. The remaining bits are filled up with a 64-bit little endian integer representing the length of the original message, in bits.

The main MD5 algorithm operates on a 128-bit state, divided into four 32-bit words, denoted  $A$ ,  $B$ ,  $C$  and  $D$ . These are initialized to certain FIX constants. The main algorithm then operates on each 512-bit message block in turn, each block modifying the state. The processing of a message block consists of four similar stages, termed *rounds*; each round is composed of 16 similar operations based on a non-linear function  $F$ , modular addition, and left rotation. Figure 1 illustrates one operation within a round. There are four possible functions  $F$ ; a different one is used in each round:

$$\begin{aligned}
 F(X, Y, Z) &= (X \wedge Y) \vee (\neg X \wedge Z) \\
 G(X, Y, Z) &= (X \wedge Z) \vee (Y \wedge \neg Z) \\
 H(X, Y, Z) &= X \oplus Y \oplus Z \\
 I(X, Y, Z) &= Y \oplus (X \vee \neg Z)
 \end{aligned}$$

$\oplus$ ,  $\wedge$ ,  $\vee$ ,  $\neg$  denote the XOR, AND, OR and NOT operations respectively.

---

The MD5 hash is calculated according to this algorithm:

*//Note: All VARs are unsigned 32 bits and wrap modulo  $2^{32}$  when calculating*

**varint**[64] r, k

*//r specifies the per-round shift amounts*

r[ 0..15] := {7, 12, 17, 22, 7, 12, 17, 22, 7, 12, 17, 22, 7, 12, 17, 22}

r[16..31] := {5, 9, 14, 20, 5, 9, 14, 20, 5, 9, 14, 20, 5, 9, 14, 20}

r[32..47] := {4, 11, 16, 23, 4, 11, 16, 23, 4, 11, 16, 23, 4, 11, 16, 23}

r[48..63] := {6, 10, 15, 21, 6, 10, 15, 21, 6, 10, 15, 21, 6, 10, 15, 21}

*//Use binary integer part of the sines of integers (Radians) as constants:*

**for** i from 0 to 63

k[i] := floor(abs(sin(i + 1)) \* (2 pow 32))

**end for**

*//(Or just use the following table):*

k[ 0.. 3] := { 0xd76aa478, 0xe8c7b756, 0x242070db, 0xc1bdcee3 }

k[ 4.. 7] := { 0xf57c0faf, 0x4787c62a, 0xa8304613, 0xfd469501 }

k[ 8..11] := { 0x698098d8, 0x8b44f7af, 0xffff5bb1, 0x895cd7be }

k[12..15] := { 0x6b901122, 0xfd987193, 0xa679438e, 0x49b40821 }

k[16..19] := { 0xf61e2562, 0xc040b340, 0x265e5a51, 0xe9b6c7aa }

k[20..23] := { 0xd62f105d, 0x02441453, 0xd8a1e681, 0xe7d3fbc8 }

k[24..27] := { 0x21e1cde6, 0xc33707d6, 0xf4d50d87, 0x455a14ed }

k[28..31] := { 0xa9e3e905, 0xfcefa3f8, 0x676f02d9, 0x8d2a4c8a }

k[32..35] := { 0xffffa3942, 0x8771f681, 0x6d9d6122, 0xfde5380c }

k[36..39] := { 0xa4beea44, 0x4bdecfa9, 0xf6bb4b60, 0xbebfbcb70 }

k[40..43] := { 0x289b7ec6, 0xea127fa, 0xd4ef3085, 0x04881d05 }

k[44..47] := { 0xd9d4d039, 0xe6db99e5, 0x1fa27cf8, 0xc4ac5665 }

k[48..51] := { 0xf4292244, 0x432aff97, 0xab9423a7, 0xfc93a039 }

k[52..55] := { 0x655b59c3, 0x8f0ccc92, 0xffeff47d, 0x85845dd1 }

k[56..59] := { 0x6fa87e4f, 0xfe2ce6e0, 0xa3014314, 0x4e0811a1 }

k[60..63] := { 0xf7537e82, 0xbd3af235, 0x2ad7d2bb, 0xeb86d391 }

*//Initialize VARs:*

**varint** h0 := 0x67452301

**varint** h1 := 0xEFCDAB89

**varint** h2 := 0x98BADCFE

**varint** h3 := 0x10325476

*//Pre-processing:*

**append** "1" bit to message

**append** "0" bits until message length in bits  $\equiv 448 \pmod{512}$

**append** length to message

*/\* bit (not byte) length of unpadded message as 64-bit little-endian integer \*/*

*//Process the message in successive 512-bit chunks:*

**for each** 512-bit chunk **of** message

break chunk into sixteen 32-bit little-endian words w[j],  $0 \leq j \leq 15$

*//Initialize hash value for this chunk:*

**varint** a := h0

**varint** b := h1

**varint** c := h2

**varint** d := h3

*//Main loop:*

---

```

for from 0 to 63
if  $0 \leq i \leq 15$  then
f := (b and c) or ((not b) and d)
g := i
else if  $16 \leq i \leq 31$ 
f := (d and b) or ((not d) and c)
g := (5×i + 1) mod 16
else if  $32 \leq i \leq 47$ 
f := b xor c xor d
g := (3×i + 5) mod 16
else if  $48 \leq i \leq 63$ 
f := c xor (b or (not d))
g := (7×i) mod 16
temp := d
d := c
c := b
b := b + leftrotate((a + f + k[i] + w[g]), r[i])
a := temp
end for
//Add this chunk's hash to result so far:
h0 := h0 + a
h1 := h1 + b
h2 := h2 + c
h3 := h3 + d
end for
var char digest[16] := h0 append h1 append h2 append h3 //(expressed as little-endian)
//leftrotate function definition
leftrotate (x, c)
return (x << c) or (x >> (32-c));

```

*Note: Instead of the formulation from the original [RFC 1321](#) shown, the following may be used for improved efficiency (useful if assembly language is being used - otherwise, the compiler will generally optimize the above code. Since each computation is dependent on another in these formulations, this is often slower than the above method where the nand/and can be parallelised):*

```

(0 ≤ i ≤ 15): f := d xor (b and (c xor d))
(16 ≤ i ≤ 31): f := c xor (d and (b xor c))

```

## 7.14 Appendix M - Response Codes

| Code | Description   |
|------|---|
| 001  | Mandatory field left blank – Mandatory field does not contain a value.  |
| 002  | Incorrect field length – Field length does not comply with the specification.   |
| 003  | Incorrect field format – Field format does not comply with the specification.   |
| 004  | Invalid field value – Field can only have a defined set of values. The value supplied in the field does not appear in the defined set of values.                |
| 005  | Invalid Logic – Field value does not meet a logic rule i.e. A + B must be equal to this field or Field does not pass Mod 10 test                                |
| 006  | SARS System Rejection – Field failed because it does not meet a data or business rule requirement within a SARS system i.e. Tax Reference number does not exist |
| 500  | Duplicate Record already existing   |
