# FOREWORD

We are pleased to present the 6<sup>th</sup> edition of the Tax Statistics publication. This edition contains tax statistics up to and including the 2012/13 fiscal year ending on 31 March 2013. The *2013 Tax Statistics* will provide commentators with improved insight into tax policy and the guiding principles underpinning revenue in the Medium Term Budget Policy Statement (MTBPS).

Tax statistics further inform debates on fiscal sustainability and seek to promote transparency. This was elegantly illustrated during the SARS presentation of the *2011 Tax Statistics* to the Standing Committee on Finance (SCOF) in May 2012. SARS and National Treasury were commended by the SCOF with the Committee indicating that “*the true power of these statistics is not in any individual data point but rather through the trends and shifts they reveal when used over a period of time and when viewed within a particular policy context.*”

There is a growing acceptance by the media, researchers and policymakers of the intrinsic value that credible tax statistics provide in promoting a far richer and fact-based discourse on fiscal policy. This not only improves policy formulation and informed assessments thereof it also promotes a culture of transparency on fiscal affairs as generally advocated for by the provisions of Section 32 in the Bill of Rights in the Constitution and by the Promotion of Access to Information Act.

Despite the tentative and uneven recovery trajectories of many of South Africa's trading partners following the 2009 global recession, tax statistics in this edition once again confirm the responsiveness of the South African tax administration system. All taxes, with the exception of Corporate Income Tax (CIT) rebounded strongly from the slump in collections observed during the recession. CIT remains depressed though, due to the many companies still carrying assessed losses incurred from which they have not recovered fully to the levels preceding the recession.

interesting trends in employment and income dynamics are being revealed.

and has been increasingly referenced and used by the media, academics, economists, market analysts and various government and non-governmental organisations.

# FOREWORD

Many innovations, prompted by the extensive feedback we received, have been introduced. We therefore wish to thank all contributors and want to encourage further engagement by all stakeholders.

ABC OF THIS EDUCATION

# A BOUT THIS PUBLICATION

We have great pleasure in releasing the [2013 Tax Statistics](#) publication which builds and expands on the previous five editions (2008, 2009, 2010, 2011 and 2012).

This 6<sup>th</sup> edition provides an overview of tax revenue collections and tax return information for the period 2008/09 to 2012/13 and the 2009 to 2012 tax years respectively.

The Tax Statistics publications provide tax revenue data at a more disaggregated level than statistics contained in other publications such as the National Treasury's Budget Reviews and SARS's Annual Reports. The objective of this publication is to make available, comprehensive tax revenue data that may serve to provide context to other published economic and demographic data. The feedback received indicates that this publication also provides valuable insights into socio-economic trends.

The publication is set out as follows:

- *Chapter 1: Revenue collections* provides a summary of aggregate tax revenue collection trends for the period 2008/09 to 2012/13.
  - *Chapter 2: Personal Income Tax (PIT)* gives an overview of assessed personal income tax revenues of registered individual taxpayers. It also provides information on taxable income by income group, age, gender and source of income, as well as on fringe benefits, allowances and deductions.
  - *Chapter 3: Company Income Tax (CIT)* gives an overview of corporate income tax revenues. Information on taxable income by income group, sector and type of business entity is provided.
  - *Chapter 4: Value-Added Tax (VAT)* gives an overview of VAT. It gives a breakdown of VAT receipts and refunds by sector and payment category as well as an overview of data on input and output VAT as derived from VAT returns submitted by vendors.
  - *Chapter 5: Import VAT and Customs duties* provides information on the customs value of imported goods by product type in terms of the Harmonised System (HS), to chapter level, as well as Import VAT, customs/import duty and ad valorem excise duty revenues on imported goods.
  - The *Glossary* and *Index* contains definitions of terms and abbreviations as well as a list of all tables and figures in the publication.

# ABOUT THIS PUBLICATION

## WHAT'S NEW

In response to widespread consultation with stakeholders and feedback from individual users, additions and enhancements have been made to this publication. The data series and available information have been extended and reformatted as follows:

- Info-graphics giving highlights have been added at the beginning of each chapter.
- Additional tables on PIT deductions specifying the number of taxpayers and value of deductions per taxable income group for selected deductions have been included in Chapter 2.
- A variety of new tables on Small Business Corporations (SBCs) have been included in Chapter 3.
- New information on components of output VAT declared and input VAT claimed is included in Chapter 4.
- A brief discussion on the difference between Automotive Production and Development Programme (APDP) and the Motor Industry Development Programme (MIDP) has been included in Chapter 5.

## METHODOLOGY

- All statistics are based on the income, expenses, deductions and items as reported by taxpayers and traders in tax returns and on assessments documents.
- Data have been evaluated for reasonability and any identified outliers have been excluded from these statistics. However, no values have been edited or imputed.
- Nominal figures are used throughout the publication.
- Disaggregated income tax data is based on assessed PIT and CIT returns as extracted from SARS's systems at the end of July 2013. Given the time delay in the submission of tax returns by some taxpayers and the time taken to assess such returns, statistics for later years tend to be less complete than that of earlier years.
- Information on the sector (industry) classification is based on the classification as declared by taxpayers and is based on their main source of income. Trade classification data is based on the classification as declared by the trader, based on the Harmonised System.
- Figures have not been rounded so discrepancies may occur between the numbers of the component items and the totals in the tables.
- A hyphen ("–") in the tables indicates a zero value whilst a zero ("0") indicates that there is an amount that has been rounded-off to zero.
- The tax year for individuals starts on 1 March and ends at the end of February the following year. The tax year for companies coincides with the financial year of the company for financial reporting purposes.
- A distinction is made between a tax year and a fiscal year. The former is shown as a single

# ABOUT THIS PUBLICATION

- Tables numbered with an “A” (e.g. *Table A1.1.1*) are included at the end of the relevant chapter.

An electronic version of the full publication (as well as the Excel tables used in this publication) is available for download on both the websites of the South African Revenue Service (SARS) ([www.sars.gov.za/About/SATaxSystem/Pages/Tax-Statistics.aspx](http://www.sars.gov.za/About/SATaxSystem/Pages/Tax-Statistics.aspx)) and that of National Treasury ([www.treasury.gov.za/publications/tax%20statistics](http://www.treasury.gov.za/publications/tax%20statistics)).

We welcome your comments and suggestions to enhance the publication’s utility in policy evaluation and developing new insights in South Africa’s social and economic context. These can be provided via e-mail to [taxstatistics@sars.gov.za](mailto:taxstatistics@sars.gov.za).

# REVENUE COLLECTIONS

For the 2012/13 fiscal year:

**R813.8 BILLION**

Revenue collected during 2012/13 fiscal year

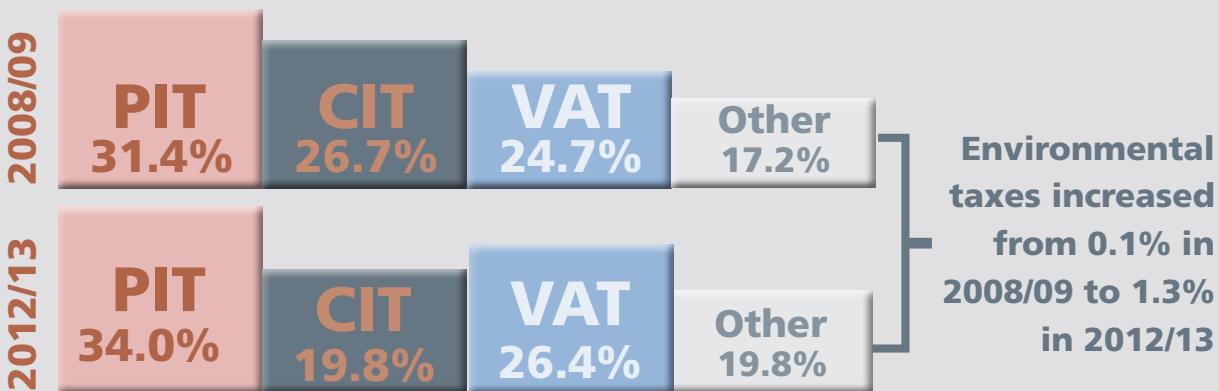

Higher by R71.2 billion against 2011/12

Compound annual growth rate (CAGR) achieved for 2008/09 to 2012/13

## Composition of main sources of tax revenue

## PAYMENT CHANNELS

The value of payments at branch offices reduced drastically from a high of 21.8% in 2008/09 to only 1.8% in 2012/13

**R45.3 BILLION**

 Tax relief provided to individuals during the period 2008/09 to 2012/13

## COST OF REVENUE COLLECTED

Slight decline

1.11%  
2011/12

1.07%  
2012/13

# REVENUE COLLECTIONS

## 1

### REVENUE COLLECTIONS

#### KEY HIGHLIGHTS

For the 2012/13 fiscal year:

- Tax revenue collected amounted to R813.8 billion and grew by R71.2 billion (9.6%) against the previous year;
- The tax-to-GDP ratio increased marginally from 25.0% in 2011/12 to 25.3% in 2012/13. This is close to the long-term average but well below the peaks of more than 27% reached before the global financial crisis;
- The cost of revenue collection has remained relatively constant and in-line with the international benchmark for this ratio. It decreased slightly from 1.11% in 2011/12 to 1.07% in 2012/13;
- As a result of the requirement that employers have to register all employees as taxpayers regardless of tax liability, the individual tax register continued to grow strongly. The number of individuals registered for income tax as at 31 March 2013 increased by 1.7 million (12.5%) from 13.7 million in the previous year to 15.4 million;
- As at 31 March 2013, there were nearly 2.2 million registered companies (of which about 0.8 million were liable to submit returns) and nearly 0.7 million registered Value-Added Tax (VAT) vendors; and
- Capital Gains Tax (CGT) of R7.2 billion was raised in 2012/13 of which R2.2 billion was attributable to individuals and R5.0 billion to companies. This is slightly up from the R6.8 billion raised in 2011/12. A cumulative R50.1 billion has been raised since the inception of CGT in October 2001.

#### INTRODUCTION

In terms of the South African Revenue Service Act (No. 34 of 1997), SARS is mandated to:

- Collect all revenue due;
- Ensure maximum compliance with tax and customs legislation; and
- Provide a customs service that will maximise revenue collection, protect our borders and facilitate trade.

Compared with many of its international counterparts the South African tax system proved fairly resilient during and after the global financial crisis. Following a 4.2% decline in the 2009/10 financial year, tax revenues recovered strongly, albeit on a reduced Compound Annual Growth Rate (CAGR).

# REVENUE COLLECTIONS

Corporate Income Tax (CIT) was responsible for much of the contraction as companies' profit waned in the face of declining global and domestic demand. Assessed losses that were accumulated in the past by some companies were available to be offset against their taxable income in later years. The tax-to-Gross Domestic Product (GDP) ratio declined to its long-term average, well below pre-financial crisis levels.

As a result of the total revenue performance, the South African Government, as part of its counter-cyclical stance, could continue to grant general tax relief to individuals and companies and still maintain sustainable budget deficits during this period of economic hardship.

This revenue sustainability is attributable to responsive tax policy, vigilant measures to improve compliance as well as the SARS Modernisation Programme. Given the tentative global economic recovery since the recession, it has never been more important for SARS to continue to provide sustainable tax revenue that will enable the National Treasury to maintain a healthy fiscal framework.

This chapter gives an overview of:

- South Africa's tax system;
- Tax register;
- Tax relief and rates;
- Budget and consolidated revenue;
- Tax revenue;
- Non-tax revenue; and
- Southern African Customs Union (SACU).

## SOUTH AFRICA'S TAX SYSTEM

South Africa has a residence-based tax system. Residents, subject to certain exclusions, are taxed on their worldwide income irrespective of where such income was earned. Non-residents are taxed only on their income from a South African source. Foreign taxes are credited against South African tax payable on foreign income. The determination of the taxable income of taxpayers may be subject to the provisions of tax treaties between South Africa and other countries.

## TAX REGISTER

One of SARS' strategic objectives is to grow the tax register and thereby broaden the South African tax base. The level of growth in the tax register is influenced by socio-economic conditions, tax policy, legislative amendments and levels of compliance. SARS has sought to increase the number of registered taxpayers through tax education, outreach and enforcement initiatives.

The number of individuals, companies, trusts, employers, VAT vendors as well as importers and exporters registered with SARS is shown in *Table 1.1*. Significant indicators include:

# REVENUE COLLECTIONS

- The number of individuals registered for Personal Income Tax (PIT) has increased 12.5% from 13.7 million in 2011/12 to 15.4 million in 2012/13. Growth during the past three years was mainly due to the new employer filing process introduced by SARS in 2010. This requires employers to register all individuals and issue them with an IRP5 certificate regardless of the amount of income they earn;
- Active companies registered for income tax have increased by 7.9% from just over 2.0 million in 2011/12 to nearly 2.2 million in 2012/13;
- The number of employers registered for Pay-As-You-Earn (PAYE) grew by 1.7% in 2012/13 after two years of decline;
- As a result of more stringent registration requirements and improved risk based vetting of refunds, the number of vendors registered for VAT continued to decline in the period under review; and
- Year-on-year growth of other entities in the register has been moderate.

**Table 1.1: Tax register, 31 March 2009 – 31 March 2013**

Number as at	Individuals <sup>1,2</sup>	Companies (CIT) <sup>1,3</sup>	Trusts <sup>1</sup>	Employers <sup>1</sup> (PAYE)	VAT Vendors <sup>1</sup>	Importers	Exporters
31 Mar 2009	5 540 646	1 834 009	392 260	393 974	737 885	228 350	194 286

31 Mar 2013	15 418 920	2 195 883	312 066	391 254	650 540	265 497	240 709
<b>Percentage year on year growth</b>							
31 Mar 2009	6.5%	15.8%	2.0%	3.8%	-1.0%	9.8%	0.8%
31 Mar 2010	6.9%	2.4%	-15.4%	0.4%	-7.1%	0.5%	7.9%
31 Mar 2011	74.7%	10.6%	-1.6%	-2.3%	-3.1%	4.1%	3.7%
31 Mar 2012	32.5%	-2.1%	-7.7%	-0.4%	-1.8%	3.7%	3.2%
31 Mar 2013	12.5%	7.9%	3.6%	1.7%	-0.3%	7.2%	7.4%

1. Excludes cases where status is in suspense, estate and address unknown.

2. The tax year for individuals starts on 1 March and ends at the end of February the following year. The number of individuals registered for income tax has increased since March 2011 due to the new employer filing process.

3. The tax year for companies is normally the financial year of the company for financial reporting purposes.

## TAX RELIEF AND RATES

### Tax relief

During the past decade the South African Government granted substantial tax relief to personal income taxpayers. Real tax relief was granted after effective tax base broadening reform supported by buoyant revenue collections. For the period 2003/04 to 2008/09 (pre-global financial crisis) revenue collections achieved a CAGR of 15.6%, declining somewhat to 10.8% during the period 2009/10 to 2012/13 (post-global financial crisis).

Between 2008/09 and 2012/13 tax relief of R45.3 billion accrued directly to individual taxpayers. Indirect taxes were increased by R33.7 billion to contain the net outflow from the fiscus to only R21.9 billion. Specific indirect taxes are levied at a rate per unit as opposed to a rate per value (*ad valorem*), and are therefore adjusted annually for inflation to maintain the indirect tax burden in real terms.

# REVENUE COLLECTIONS

Table 1.2 sets out the tax relief over this period with negative values indicating tax relief.

**Table 1.2: Summary effects of tax proposals, 2008/09 – 2012/13**

R million	Direct taxes				Indirect taxes				Total relief
	PIT	CIT <sup>1</sup>	Other	Total	Excise	Fuel levy	Other <sup>2</sup>	Total	
2008/09	-7 700	-6 900	–	-14 600	1 350	1 250	1 500	4 100	-10 500
2009/10	-13 550	-1 000	–	-14 550	2 100	4 890	2 985	9 975	-4 575
2010/11	-5 400	-1 350	–	-6 750	2 250	3 600	450	6 300	-450
2011/12	-8 850	500	-750	-9 100	1 935	1 900	1 150	4 985	-4 115
2012/13	-9 800	1 100	-1 950	-10 650	1 840	4 517	1 985	8 342	-2 308
<b>Total</b>	<b>-45 300</b>	<b>-7 650</b>	<b>-2 700</b>	<b>-55 650</b>	<b>9 475</b>	<b>16 157</b>	<b>8 070</b>	<b>33 702</b>	<b>-21 948</b>

1. Relief for business taxes in 2008/09 and 2009/10 of R2.0 billion for industrial policy was only implemented in October 2010.

2. The electricity levy was postponed and introduced in July 2009. As a result, the R2.0 billion was rolled over from 2008/09 to 2009/10.

More details on the Budget tax proposals for each fiscal year are available in Budget Review documents available on National Treasury's website at the following link:

<http://www.treasury.gov.za/documents/national%20budget/default.aspx>.

## Tax rates

Marginal tax rates have remained mostly unchanged across all tax types during the period April 2008 to March 2013, as shown in Table 1.3. Legislative changes to replace the Secondary Tax on Companies (STC) with Dividends Tax (DT) came into effect on 1 April 2012. STC was imposed on companies at a rate of 10% on the declaration of dividends whereas DT is a tax imposed on shareholders at a rate of 15% on receipt of dividends. Growth in tax revenue has occurred due to increases in the value of taxable economic activities as well as greater compliance rather than an increase in tax rates.

**Table 1.3: Maximum marginal tax rates, 2008/09 – 2012/13**

Percentage	PIT <sup>1</sup>	CIT	STC/DT <sup>2</sup>	VAT	Transfer duty
01 Apr 2008 – 22 Feb 2011	40%	28%	10%	14%	8%
23 Feb 2011 – 31 Mar 2012	40%	28%	10%	14%	8%
01 Apr 2012 – 31 Mar 2013	40%	28%	15%	14%	8%

1. An individual's tax year starts on 1 March and ends at the end of February the following year.

2. Dividends Tax (DT) replaced Secondary Tax on Companies (STC) as from 1 April 2012.

## BUDGET AND CONSOLIDATED REVENUE

National budget revenue includes all revenue streams into the fiscus, both tax revenue and non-tax revenue, as well as the allocations of transfers made to Botswana, Lesotho, Namibia and Swaziland (BLNS) in terms of the Southern African Customs Union (SACU) agreement. SACU disbursements are determined according to a revenue sharing formula that is further elaborated on later in this chapter.

Consolidated revenue also includes revenue collected by the provinces and selected public entities as well as social security contributions. This is illustrated in Figure 1.1.

# REVENUE COLLECTIONS

**Figure 1.1 Illustration of budget revenue and consolidated revenue**

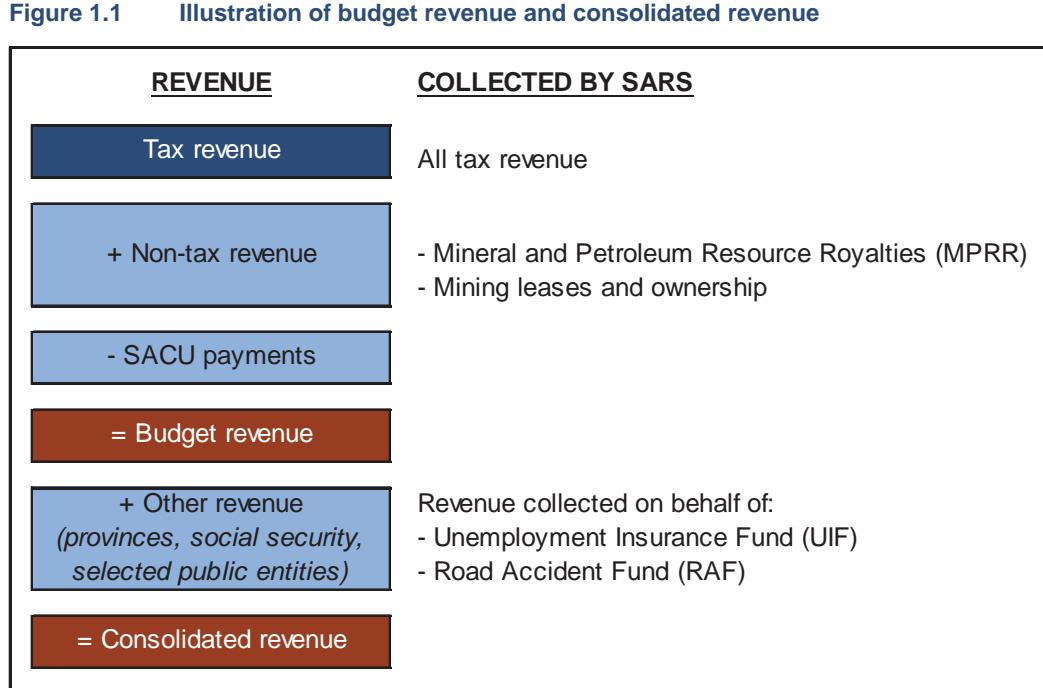

Table 1.4 shows the total budget revenue and consolidated revenue over the past five fiscal years.

**Table 1.4: Total budget revenue and consolidated revenue, 2008/09 – 2012/13**

R million	Tax revenue	% of budget revenue	% of consolidated revenue	Non-tax revenue <sup>1</sup>	Total tax and non-tax revenue	Less: SACU non-tax payments	Budget revenue	Other <sup>2</sup>	Consolidated revenue <sup>3</sup>
2008/09	625 100	102.7%	91.5%	12 616	637 716	-28 921	608 796	74 673	683 468
2009/10	598 705	103.3%	90.2%	8 894	607 600	-27 915	579 684	84 058	663 742
2010/11	674 183	100.7%	89.0%	13 460	687 643	-17 906	669 738	87 776	757 513
2011/12	742 650	100.3%	88.7%	19 193	761 843	-21 760	740 083	96 922	837 005
2012/13	813 826	103.4%	92.9%	15 394	829 220	-42 151	787 069	88 920	875 989

1. Includes interest, dividends, rent on land, sales of goods and services, fines and penalties, sales of capital assets, financial transactions in assets and liabilities and Mineral Petroleum Resource Royalties (MPRR). 2012/13 is unaudited.

2. Includes provinces, social security and selected public entities.

3. The audited figure for consolidated revenue for 2012/13 was not available at the time of publication. The figure used is the estimate as provided in the Budget Review 2013.

In addition to tax revenue, SARS also collects Mineral and Petroleum Resource Royalties (MPRR) as well as Mining leases and ownership which are included in Non-tax revenue. SARS also collects social security contributions in the form of Unemployment Insurance Fund (UIF) contributions and Road Accident Fund (RAF) levies on behalf of those entities. All revenue collected by SARS, irrespective of its nature, is reflected in the Statement of Financial Performance published in the SARS Annual Reports.

## TAX REVENUE

Total tax revenue collected by SARS increased in the post-global financial crisis period from R625.1 billion in 2008/09 to R813.8 billion in 2012/13. CAGR of 6.8% was achieved for the period 2008/09 to 2012/13. This is much lower than the CAGR of 13.2% attained between 1994/95 and 2007/08.

# REVENUE COLLECTIONS

## Tax-to-GDP ratio

The share of a country's output, or GDP that is collected by the Government through taxes is an important economic indicator. It is used internationally, by institutions such as the International Monetary Fund (IMF), the World Bank and the Organisation for Economic Co-operation and Development (OECD), for comparative analysis between countries.

The South African tax-to-GDP ratio decreased from a high of 27.2% in 2008/09, an approximate level it had maintained in the preceding two years, to 24.4% in 2009/10. This decline was caused by revenue contracting during the global financial crisis. Much of this contraction was the result of lower CIT contributions due to declining company profits and assessed losses that were incurred during the recession. In 2012/13 the tax-to-GDP ratio increased slightly to 25.3%. This was driven by increased contributions from PIT and VAT.

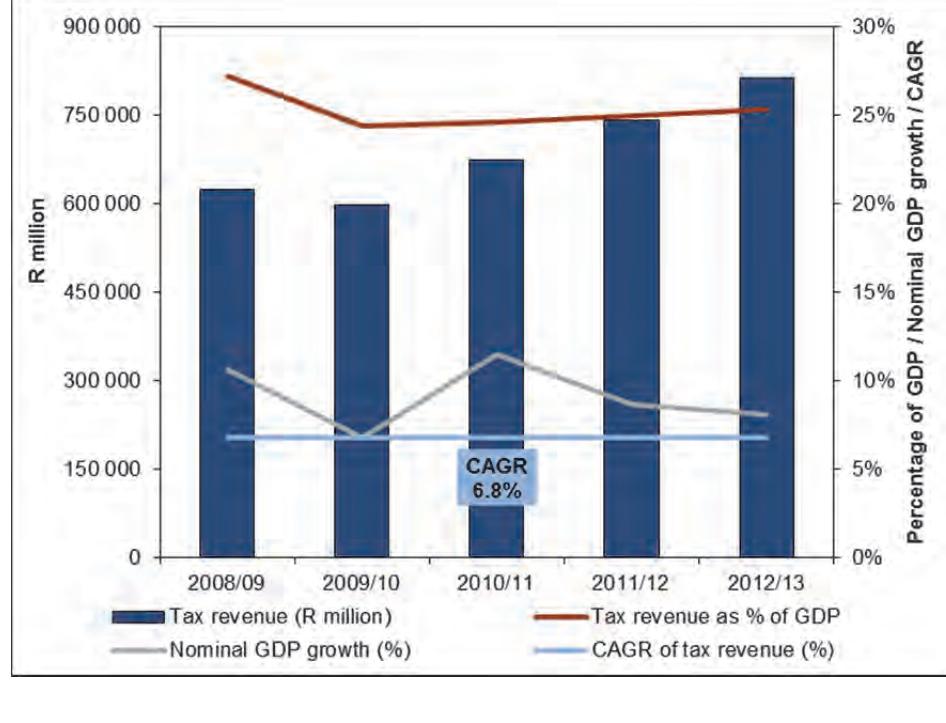

*Table 1.5 and Figure 1.2 illustrate the change in tax revenue, tax revenue as a percentage of GDP and the CAGR since 2008/09.*

**Table 1.5: Tax revenue as a percentage of GDP, 2008/09 – 2012/13**

R million	Tax revenue	Nominal GDP <sup>1</sup>	Tax revenue as % of GDP
2008/09	625 100	2 296 571	27.2%
2009/10	598 705	2 452 538	24.4%
2010/11	674 183	2 735 274	24.6%
2011/12	742 650	2 973 287	25.0%
2012/13	813 826	3 213 433	25.3%

1. Source: Statistics South Africa; Gross Domestic Product (GDP), Quarter 2-2013.

**Figure 1.2 Tax revenue collections, GDP and CAGR, 2008/09 – 2012/13**

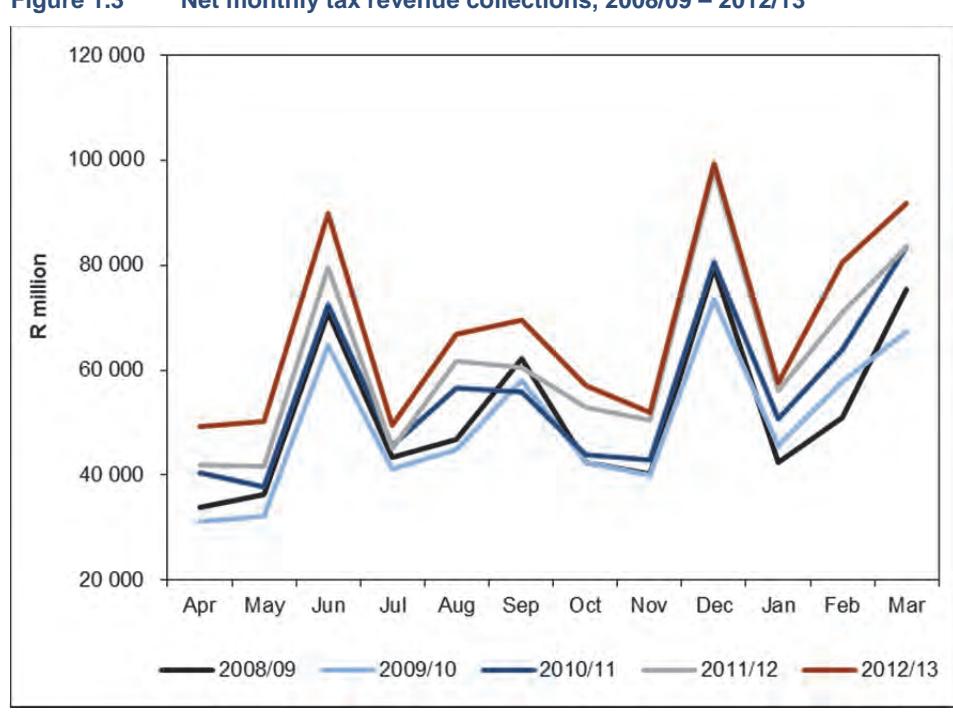

# REVENUE COLLECTIONS

Most of the increases in nominal tax revenue during the past few years have been due to a combination of inflation, rising commodity prices, above-inflation wage settlements, increases in domestic consumption and the value of imports, as well as improvements in tax administration and compliance, rather than increases in tax rates.

Figure 1.3 and Table A1.1.1 show the net monthly and quarterly trends in the collection of tax revenues. The peaks in June, September, December and March are mainly due to provisional CIT payments from companies whose year-ends coincide with these months.

**Figure 1.3** Net monthly tax revenue collections, 2008/09 – 2012/13

## Payment channels of SARS collections

The SARS Modernisation Programme has facilitated the migration of the majority of taxpayers to electronic payment platforms. This has reduced the risk associated with cash collections at branch offices. Payment methods other than branch payments are:

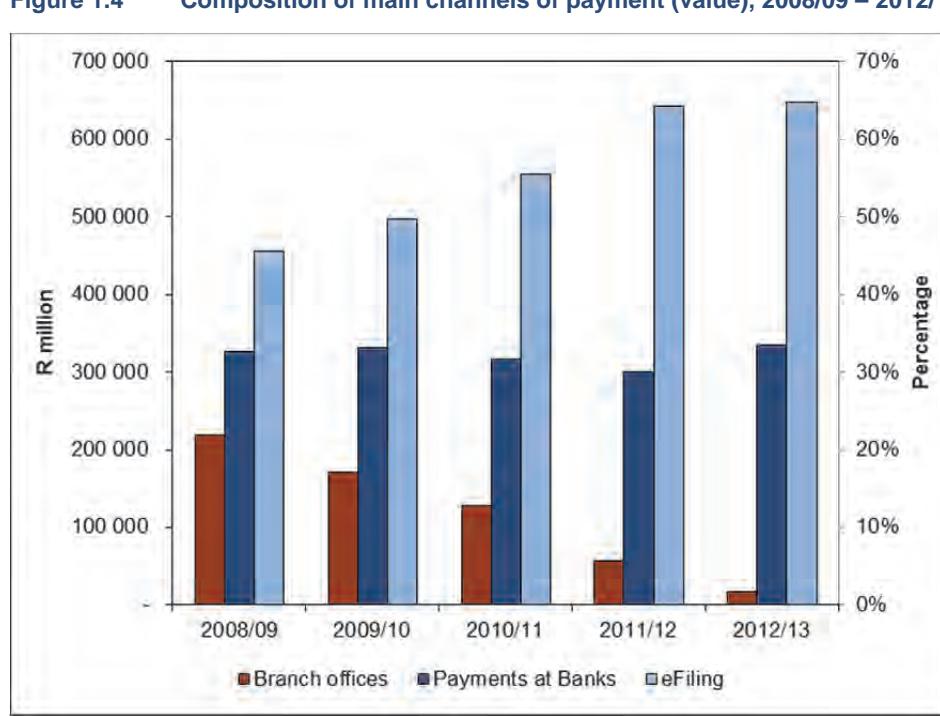

- An *eFiling* channel. This requires a taxpayer to register as an eFiling client in order to make electronic payments using this channel; and
- A *payment at bank* channel. This enables a taxpayer to make either an internet banking transfer or an over-the-counter deposit.

The eFiling channel accounted for 64.8% of the value of all payments in 2012/13. This is significantly higher than the 45.6% of the value of payments that were processed in 2008/09.

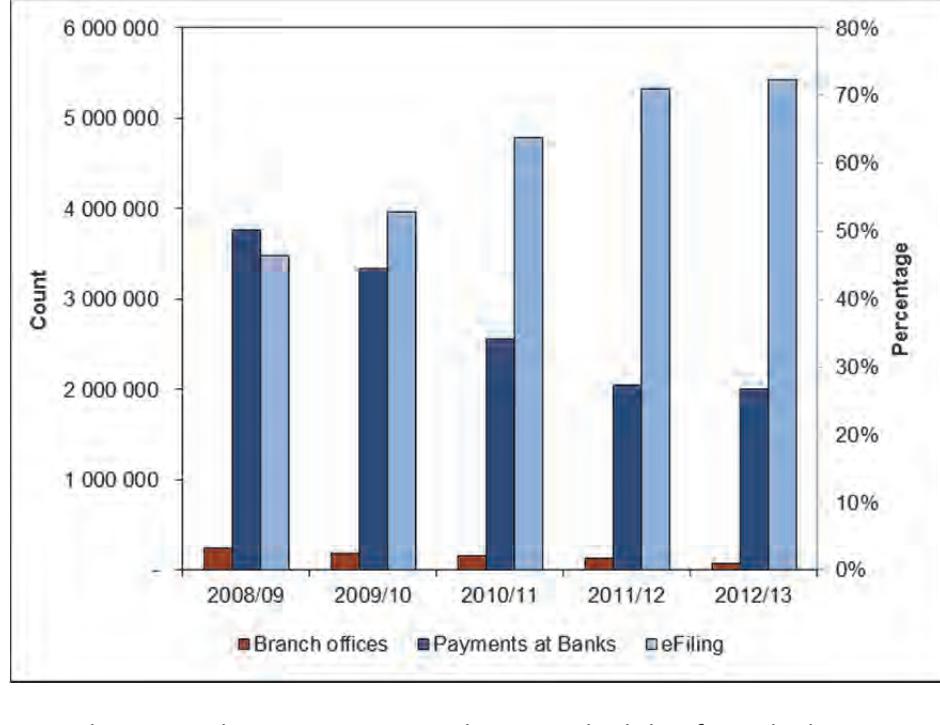

The value and number composition of the main channels of payment are shown in Figures 1.4 and 1.5).

# REVENUE COLLECTIONS

**Figure 1.4 Composition of main channels of payment (value), 2008/09 – 2012/13**

**Figure 1.5 Composition of main channels of payment (number), 2008/09 – 2012/13**

Amendments to the SARS payment rules prescribed that from the beginning of 2011/12 SARS would no longer process VAT or PAYE payments of more than R100 000 at its branch offices. The revised payment rules further stimulated growth in the use of electronic payment channels and contributed to the rapid decline in payments made at branch offices. The value of payments at branch offices fell from a high of 21.8% in 2008/09 to only 1.8% in 2012/13.

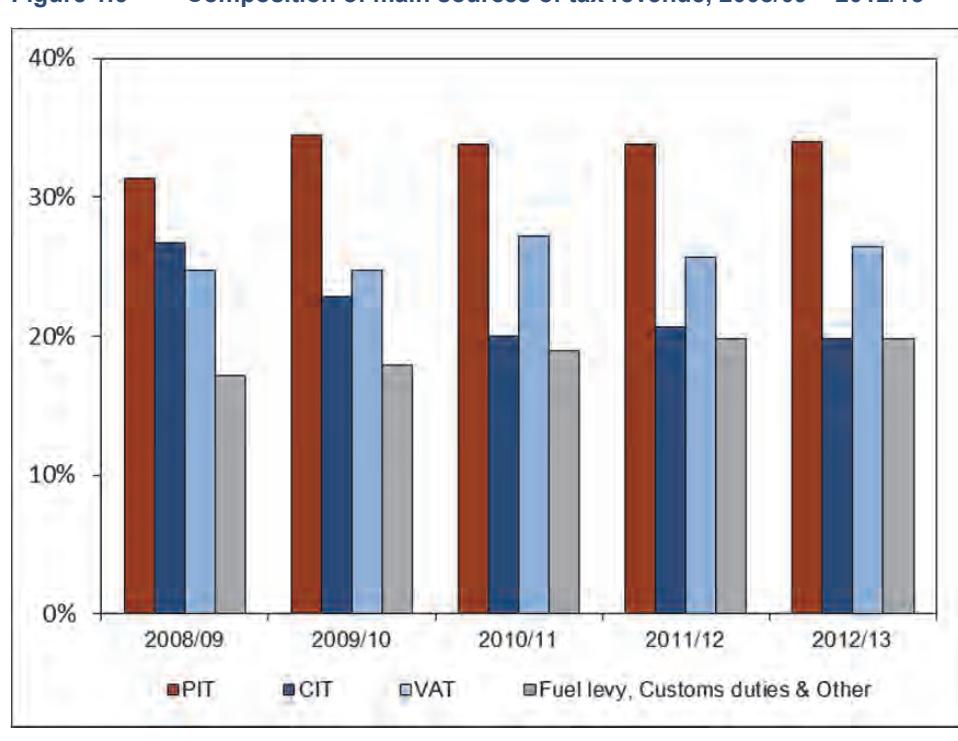

# REVENUE COLLECTIONS

## Main sources of tax revenue

PIT, CIT and VAT account for about 80% of total tax revenue. The Fuel levy, Specific excise and Customs duties account for around 13% and other taxes account for the remainder.

The global financial crisis has caused the relative contributions of the various taxes to change over the past five years (*Figure 1.6* and *Table A1.2.1*). The PIT contribution has increased while the CIT contribution has declined.

**Figure 1.6 Composition of main sources of tax revenue, 2008/09 – 2012/13**

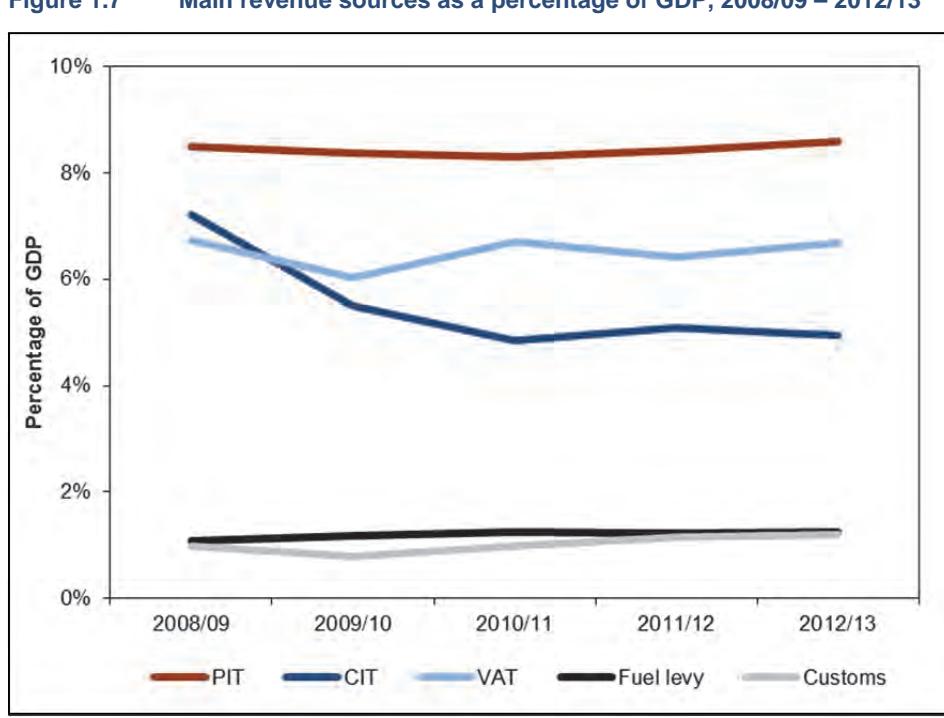

The slump in CIT collections during and after the global financial crisis distorted a well-established contribution trend. The relative contribution of CIT to total tax revenue declined from 26.7% in 2008/09 to 19.8% in 2012/13. The reduced collections from CIT resulted in the higher relative contribution by PIT. PIT has increased from 31.4% of total tax revenue in 2008/09 to 34.0% in 2012/13. The extent of the shift is shown by the fact that while PIT contributed only R28.9 billion more to tax revenue than CIT in 2008/09 it provides R115.8 billion more than CIT in 2012/13. The contribution of VAT dropped from 27.2% in 2010/11 to 26.4% in 2012/13.

*Figure 1.7* shows the main sources of tax revenue as a percentage of GDP. The effects of the global financial crisis and the lag-effects of the recession can be clearly seen especially in the CIT contribution. CIT collections as a percentage of GDP declined from a high of 7.3% in 2008/09 to 5.0% in 2012/13. PIT as a percentage of GDP declined slightly from 8.5% in 2008/09 to 8.3% in 2010/11 but has since recovered to 8.6% in 2012/13. VAT as a percentage of GDP recovered from a low of 6.0% in 2009/10 to 6.7% in 2012/13.

# REVENUE COLLECTIONS

Figure 1.7 Main revenue sources as a percentage of GDP, 2008/09 – 2012/13

## Tax revenue by main category

South Africa subscribes to the Government Financial Statistics (GFS) classification as prescribed by the International Monetary Fund (IMF). Revenue is also classified in terms of the Standard Chart of Accounts (SCOA) developed by National Treasury.

In terms of this classification tax revenue comprises Taxes on income and profits, Taxes on payroll and workforce, Taxes on property, Domestic taxes on goods and services, Taxes on international trade and transactions as well as a State miscellaneous revenue category. *Table A1.3.1* shows the main categories of tax revenue.

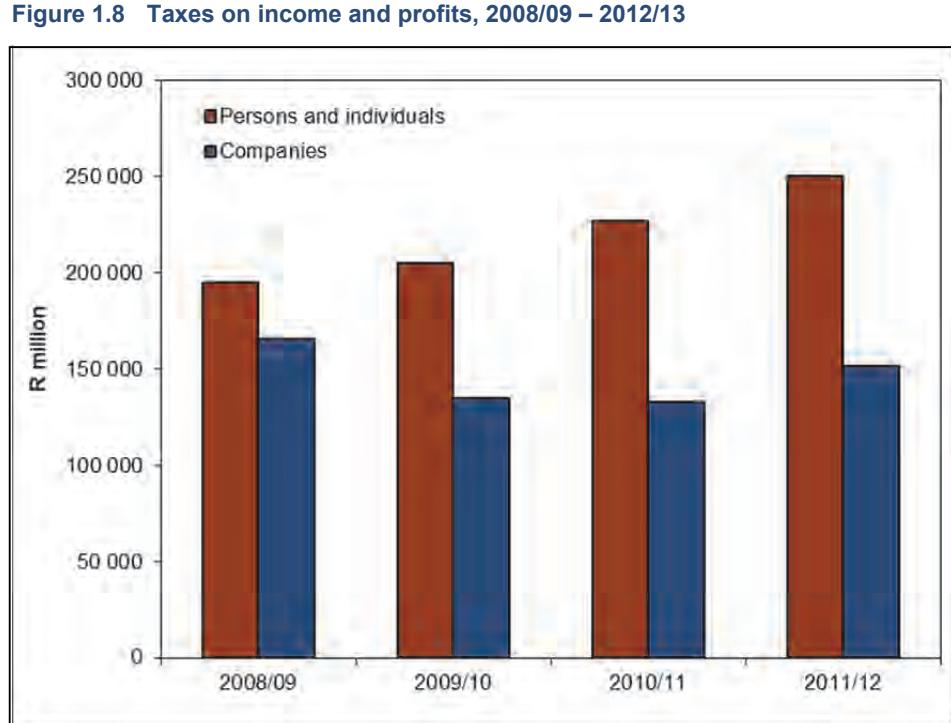

- *Taxes on income and profits* constitute the largest category of tax revenue and accounted for 56.2% of total tax revenue in 2012/13. This category comprises Taxes on persons and individuals, Taxes on companies, STC, DT, Interest on overdue income tax, Tax on retirement funds (abolished in 2007) and Small business tax amnesty levies. *Figure 1.8* shows the main taxes in this category.

*Table A1.4.1* contains a summary of the Taxes on income and profits, while *Tables A1.4.2* and *A1.4.3* provide further details of Taxes on persons and individuals and Taxes on companies.

Chapters 2 and 3 of this publication contain further information about PIT and CIT respectively.

# REVENUE COLLECTIONS

**Figure 1.8 Taxes on income and profits, 2008/09 – 2012/13**

**Capital Gains Tax (CGT)** is a tax on the disposal proceeds of assets. It is raised on assessment and forms part of the normal income tax liability. The revenue collected from CGT is included in PIT or CIT collections depending on the nature of the taxpayer.

The cumulative liability raised for CGT since its inception on 1 October 2001 to the end of March 2013 reached R50.1 billion as shown in *Table 1.6*. The peak of R10.4 billion that occurred in 2009/10 was caused by some taxpayers selling assets in response to the global financial crisis. The resulting decline in asset prices prompted many taxpayers, especially individuals owning residential property, to retain their assets rather than sell them. This has suppressed CGT collections since 2009/10.

However, CGT collections may change in the future as a result of the increase in the inclusion rates. From 1 March 2012 the inclusion rates for natural persons and special trusts increased from 25.0% to 33.3% and for companies the rates rose from 50.0% to 66.6%. These legislative changes increased the maximum effective tax rates from 10.0% to 13.3% for natural persons and from 14.0% to 18.6% for companies.

**Table 1.6: Capital Gains Tax (CGT) raised, 2008/09 – 2012/13**

R million	CGT raised		
	Individuals	Companies	Total
Prior to 2008/09	3 017	5 735	<b>8 752</b>
2008/09	3 807	4 136	<b>7 943</b>

2010/11	2 012	7 049	<b>9 061</b>
2011/12	1 550	5 263	<b>6 813</b>
2012/13	2 166	5 008	<b>7 174</b>
Cumulative	16 909	33 214	<b>50 123</b>

# REVENUE COLLECTIONS

- *Taxes on payroll and workforce* only comprise the Skills Development Levy (SDL). This is a compulsory levy intended to fund training costs incurred by employers. SARS administers the collection of this levy in conjunction with the Department of Labour.
- *Taxes on property* as shown in *Table A1.5.1*, comprise Donations tax, Estate duty, Securities Transfer Tax (STT) and Transfer duty.

**Donations tax** is levied at a flat rate of 20% on the value of the donation. An exemption of R100 000 is available to natural persons.

**Estate duty** is levied at a rate of 20% on the dutiable amount of the estate. Some deductions are allowed on the total value of the estate).

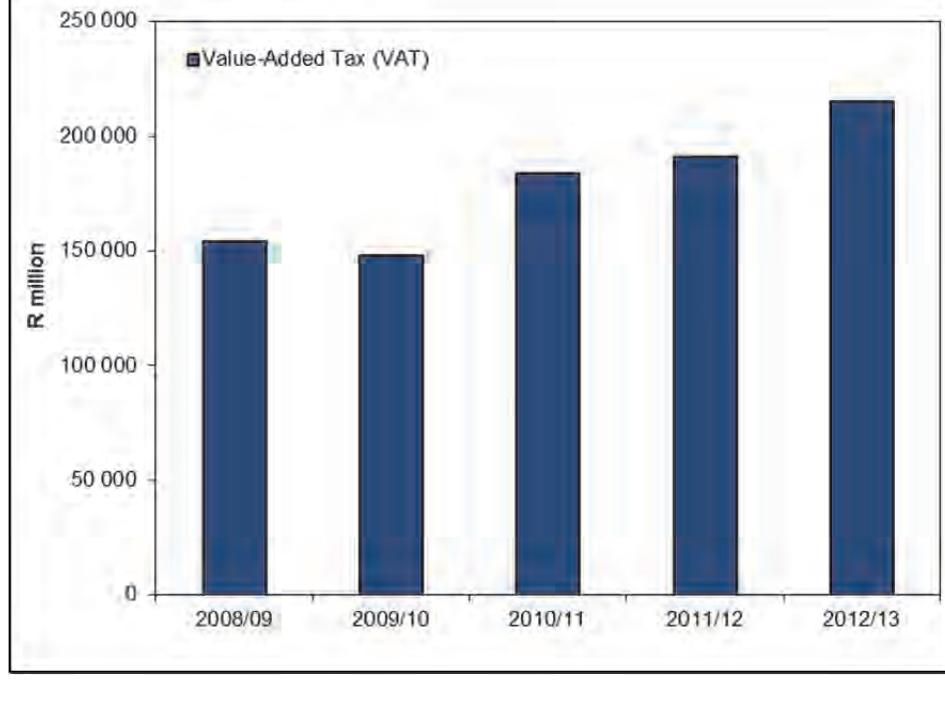

**STT** is levied at a rate of 0.25% on every transfer of a security.

**Transfer duty** is the largest source of revenue in this category and is levied on the acquisition of property at a progressive rate for all persons including companies, close corporations and trusts. From 23 February 2011 a marginal rate of 8% was applied to the portion of the property valued at more than R1.5 million.

- *Domestic taxes on goods and services* consists of VAT, Specific excise duties, *Ad valorem* excise duties, Fuel levy, Universal Services Fund levy, Turnover tax on micro businesses and Environmental taxes. *Table A1.6.1* provides a summary of the Domestic taxes on goods and services collections.

**VAT** is the largest source of revenue in this category at 72.4% in 2012/13 (see *Figure 1.9*). VAT is levied at a rate of 14% on goods and services, with some exemptions and zero-ratings, and it is also levied on the importation of goods and services into South Africa.

**Figure 1.9 Value-Added Tax (VAT), 2008/09 – 2012/13**

# REVENUE COLLECTIONS

Table A1.6.2 gives a breakdown of VAT collections by Domestic VAT payments, Import VAT and VAT refunds. Further details are provided in Chapters 4 and 5.

- *Taxes on international trade and transactions* comprise import related taxes. Import duties are levies imposed on goods imported into South Africa and are intended to protect local producers. This category also includes Miscellaneous customs and excise receipts that have not yet been allocated to the appropriate duty types as well as the Diamond export levy which was imposed to stimulate the local diamond polishing industry.

The strong surge in 2010/11 after the decline in 2009/10 was due to the increased importation of vehicles and capital equipment. Further detail is provided in Chapter 5.

Table A1.7.1 provides a summary of Taxes on international trade and transactions collections.

- *State miscellaneous revenue* comprises revenue received by SARS that cannot be allocated to specific revenue types.

## Environmental taxes

Climate change continues to be a serious global problem that requires a co-ordinated international response to address causes such as “greenhouse gas” emissions. The South African Government has introduced several environmental taxes in response to this problem in an effort to change the behaviour of its citizens.

The following environmental taxes were introduced:

- *International air passenger departure tax* is a tax imposed on international air travel. It was introduced in November 2000 at a rate of R50 per passenger for passengers flying to the BLNS countries and R100 per passenger on other international flights. From 1 October 2011, passengers departing on flights to BLNS countries have been paying a departure tax of R100 per passenger while passengers on other international flights are paying R190 a passenger.
- *Plastic bags levy* was introduced in June 2004, at a rate of 3 cents a bag on some types of plastic shopping bags, with the aim of reducing litter and encouraging plastic bag reuse. The levy was increased to 4 cents a bag from 1 July 2009.
- *Electricity levy* was introduced in July 2009 at a rate of 2 cents per kWh. It is applied to electricity generated from non-renewable sources. The levy was increased to 2.5 cents per kWh from 1 April 2011 and some of the revenue was set aside to fund the rehabilitation of roads damaged as a result of the haulage of coal for electricity generation. In 2012, the levy was increased to 3.5 cents per kWh and additional revenue is now used to fund energy-efficiency initiatives such as the solar water heater programme.
- *Incandescent light bulb levy* was introduced from 1 November 2009 at a rate of R3 per bulb, to promote energy efficiency and reduce electricity demand by encouraging the use of energy-saving light bulbs. Energy-saving light bulbs last longer and require five times less electricity and thereby reduce “greenhouse gas” emissions.

# REVENUE COLLECTIONS

- *CO<sub>2</sub> tax on motor vehicle emissions* was introduced in September 2010 for passenger vehicles and in March 2011 for double cabs. The main objective of this tax is to encourage owners of motor vehicles in South Africa to become more energy efficient and environmentally friendly. Since its introduction, the tax on emissions on passenger vehicles is levied at a rate of R75 per gCO<sub>2</sub>/km for each gram of emissions above 120 gCO<sub>2</sub>/km. For double cabs it is levied at a rate of R100 per gCO<sub>2</sub>/km for each gram of emissions above 175 gCO<sub>2</sub>/km.

*Table 1.7* shows the environmental tax collections during the past five years.

**Table 1.7: Environmental taxes, 2008/09 – 2012/13**

R million	International air departure tax <sup>1</sup>	Plastic bags levy <sup>1</sup>	Electricity levy <sup>1</sup>	Incandescent light bulb levy	CO <sub>2</sub> tax on motor vehicle emissions	Total
2008/09	549	79	-	-	-	628
2009/10	580	111	3 342	64	-	4 096
2010/11	649	150	5 103	151	626	6 679
2011/12	762	161	6 323	144	1 617	9 007
2012/13	873	151	7 984	137	1 567	10 712

1. Air departure tax, Plastic bags levy and Electricity levy have been restated for 2010/11, largely due to a reallocation from Plastic bag levy to Electricity levy.

## Cost of revenue collections

The cost of tax revenue collection is an important indicator of the efficiency of revenue authorities and it is used for comparative analysis when benchmarking countries. This ratio is calculated by dividing the cost of internal operations by the total tax revenue collected. South Africa is in-line with the international benchmark of 1% for this ratio.

During the past five years, the cost of revenue collections varied between a low of 1.04% in 2008/09 to a high of 1.17% in 2009/10. This surge was mainly due to the extensive modernisation investment by SARS combined with the impact of tax revenue contracting during that year. For 2012/13 the ratio is 1.07%. This is slightly lower than the previous year due to operating costs increasing at a lower rate than revenue as shown in *Table 1.8*.

This ratio does not include the Non-tax revenue and social security contributions collected by SARS such as MPRR, UIF and RAF. SARS is therefore more efficient than the ratio reflects.

**Table 1.8: Cost of revenue collections, 2008/09 – 2012/13**

R million	Tax revenue collected	Operating cost <sup>1</sup>	Cost of collection <sup>2</sup>
2008/09	625 100	6 511	1.04%
2009/10	598 705	7 032	1.17%
2010/11	674 183	7 426	1.10%
2011/12	742 650	8 221	1.11%
2012/13	813 826	8 679	1.07%

1. Operating cost as disclosed in the Statement of Financial Performance for the controlling entity in the SARS: Own Accounts Annual Financial Statements.

2. Operating cost as a percentage of tax revenue.

# REVENUE COLLECTIONS

## NON-TAX REVENUE

### Mineral and Petroleum Resource Royalties (MPRR)

MPRR are royalties that represent compensation for the permanent loss of non-renewable commodities and therefore are not taxes. The MPRR Act became effective on 1 March 2010 and collections by commodity until 31 March 2013 are shown in *Table 1.9*. The abnormally high year-on-year growth of 57.9% in 2011/12 is as a result of the Act not being applicable for taxpayers' full financial years during 2010/11.

**Table 1.9: MPRR payments by commodity, 2010/11 – 2012/13**

R million	2010/11	% of total	2011/12	% of total	2012/13	% of total	Year-on-year growth

Other <sup>2</sup>	178	5.0%	183	3.3%	361	7.2%	97.0%
<b>Total</b>	<b>3 555</b>	<b>100.0%</b>	<b>5 612</b>	<b>100.0%</b>	<b>5 015</b>	<b>100.0%</b>	<b>-10.6%</b>

1. Industrial minerals are geological materials which are mined for their commercial value, which are not mineral fuels and are not sources of metallic minerals. They are used in their natural state or after beneficiation either as raw materials or as additives in a wide range of applications (i.e. industrial minerals are all those minerals other than gold, PGMs, coal, iron ore, chrome, manganese, diamonds, etc.).

2. The commodities grouped under Other are: Chrome, Fluorspar, Nickel, Oil and Gas, Phosphates, Vanadium and Unspecified.

### SOUTHERN AFRICAN CUSTOMS UNION (SACU)

South Africa, together with the BLNS countries, is a signatory to the SACU agreement. The SACU countries apply a common external import tariff and have similar customs and excise legislation. For example, they have the same excise duties on imported and locally manufactured goods and the same import duties on imported goods. Excise and customs revenue from the payment of import duties is pooled in a common SACU revenue pool and distributed among the SACU members based on a revenue sharing formula.

The revenue sharing formula has the following three components:

- The *customs component* is calculated from the Cost-Insurance-Freight (CIF) value at the border posts where goods are imported from all other member states into each area as a percentage of the total CIF value of intra-SACU imports;
- The *excise component* is calculated from the value of each member state's GDP in a specific calendar year as a percentage of total SACU GDP in such a year; and

# REVENUE COLLECTIONS

- The *development component* is set at 15% of excise duties. The share accruing to each member country is calculated based on the country's GDP per capita compared to the average of SACU's GDP per capita. The development component ensures that member states whose GDP per capita falls below the SACU's per capita average are compensated by the other relatively better off member states.

South Africa administers the SACU revenue pool and makes quarterly disbursements to the other SACU member states (the BLNS countries). *Table 1.10* shows a summary of contributions to the SACU pool by the member states while *Table 1.11* shows how the revenues are allocated based on the revenue sharing formula.

**Table 1.10: Contributions to the SACU pool, 2008/09 – 2012/13**

1. Includes amounts allocated to South Africa and the balance of the "surplus/deficit" for that fiscal year.

# **REVENUE COLLECTIONS**

Customs duties are paid to South Africa on goods imported by BLNS countries from abroad and transported via South Africa in bond to the BLNS countries. Excise duty is collected at source and paid in South Africa on excisable goods exported from South Africa to BLNS countries.

It should be noted that South Africa collects a significant amount of customs and excise revenues on behalf of BLNS countries and this is reflected under South Africa's contribution.

# PERSONAL INCOME TAX

For the 2012 tax year:

**86.9%**  
Assessed

**Registered individual taxpayers = 13.7 million**  
**Assessed taxpayers = 5.1 million**

Aggregated taxable income of assessed individual taxpayers

**R1.0 trillion**

Tax liability of assessed individual taxpayers

**R206.7 billion**

**40.1%**

Registered in Gauteng

**27.3%**

Employed in Financing, Insurance, real estate & business service sector

**27.5%**

35 - 44 age group

**5.7%**

289 476 Declared business income

**Of those assessed...**

Category	Percentage
Had a zero assessment	13.8%
Owed SARS some tax	16.2%
Received refunds	70.0%

**Largest allowance**

Travel allowance R26.1 billion (31.5% of total allowances assessed)

**Retirement funding**

Contributions to pension and retirement annuity funds of R41.7 billion (31.4% of total deductions granted)

**Medical aid**

Medical aid paid on behalf of employees (76.9% of total fringe benefits assessed)

**R38.0 billion**

**Largest deduction**

Medical expenses

R60.6 billion (45.7% of total deductions granted)

**56.4%**  
Males assessed

**43.6%**  
Females assessed

## 2 PERSONAL INCOME TAX

#### **KEY HIGHLIGHTS**

For the 2012 tax year the Budget as presented in February 2011 included:

- An increase in the threshold for the top Personal Income Tax (PIT) bracket to R580 000;
  - Increases in the primary and secondary rebates to R10 755 and R6 012 respectively;
  - The introduction of an additional tertiary rebate of R2 000 for taxpayers 75 years and above; and
  - Increases in tax thresholds for taxpayers:
    - Below age 65: R59 750;
    - Age 65 to below 75: R93 150; and
    - Age 75 and above: R104 261.

Assessed data for individual taxpayers for the 2012 tax year shows:

- Of the 5 881 019 taxpayers liable to submit returns, 5 108 207 (86.9%) have been assessed. A demographic and geographic analysis of individual taxpayers' assessments reveals;
    - 40.1% were registered in Gauteng;
    - 27.5% were in the 35-44 age group;
    - 56.4% were male;
    - 27.3% were employed in the *Financing, insurance, real-estate & business services* sector; and
    - 289 476 (5.7%) declared business income.
  - The assessed taxpayers had aggregated taxable income of R1.0 trillion and a tax liability of R206.7 billion. This translates into an average tax rate of 20.2%;
  - Income from salaries, wages and remuneration, pension, overtime and annuities accounted for 79.0% of total taxable income;
  - The largest allowance received was the travel allowance at R26.1 billion. This was 31.5% of the total allowances assessed;
  - Medical aid paid on behalf of employees was the largest fringe benefit at R38.0 billion. This was 76.9% of the total fringe benefits assessed; and
  - Medical expenses amounting to R60.6 billion (45.7%) and contributions to retirement funding (pension and retirement annuity funds) amounting to R41.7 billion (31.4%) constituted the largest deductions.

than 13.7 million individual taxpayers.

Personal Income Tax (PIT) is a tax levied on the taxable income (gross income less exemptions and allowable deductions) of individuals and trusts. It is determined for a specific year of assessment. Taxable capital gains form part of taxable income.

Individuals usually receive most of their income as salaries or wages, pension or annuity payments and investment income (interest and dividends). Some individuals, such as sole proprietors and partners, may also have business income which is taxable as personal income.

PIT is South Africa's largest source of tax revenue and contributed 34.0% of total tax revenue collections for 2012/13 (33.8% for 2011/12).

This chapter provides an overview of:

- Personal income tax rates;
  - Provisional tax payments;
  - Tax returns and individual taxpayers' data;
  - Taxable income and tax assessed;
  - Assessed individual taxpayers with business income; and
  - Assessed individual taxpayers' allowances, fringe benefits and deductions.

## PERSONAL INCOME TAX RATES

## Personal income tax brackets and thresholds

The PFI brackets have been substantially adjusted upwards partly to compensate for the effect of inflation (fiscal drag). The top marginal income tax rate of 40% for individuals has remained unchanged for the past decade.

Table 2.1 illustrates the increase in the PIT brackets for the 2009 and the 2012 tax years. The threshold of the top PIT bracket increased from R490 000 in 2009 to R580 000 in 2012. This is an average annual increase of 5.8% over the three years. During this period the ceiling of the lowest PIT bracket increased from R122 000 in 2009 to R150 000 in 2012. This is an annual increase of 7.1% over the three years.

The primary rebate increased by 20.0%. This resulted in a corresponding increase in the income tax

threshold (the level of taxable annual income below which no income tax is payable) for individuals younger than 65 years from R46 000 to R59 750. The value of the secondary rebate increased by 19.3% from R5 040 to R6 012. For individuals aged 65 years to below 75 years, the income tax threshold increased by 25.9% from R74 000 to R93 150. The introduction of a tertiary rebate of R2 000 in the 2011 Budget for taxpayers 75 years and older increased the income tax threshold for these taxpayers to R104 261.

These reforms during the past three years resulted in more people in the lower income categories

being exempt from paying income tax.

# PERSONAL INCOME TAX

Table 2.1: Personal Income Tax (PIT) brackets, 2009 and 2012

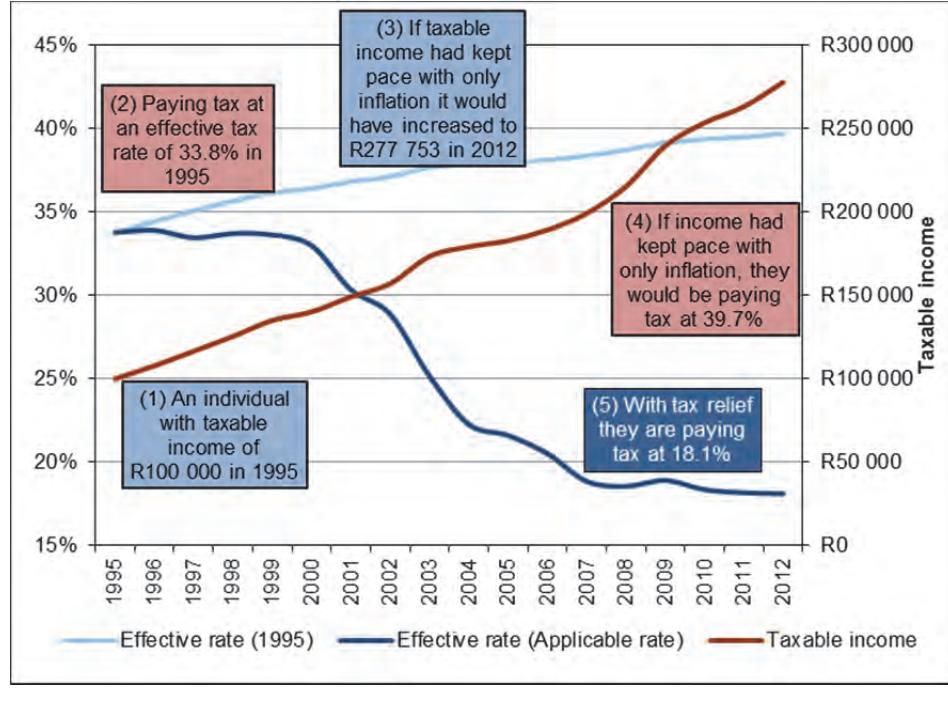

Tax year Rand	2009			2012			Marginal PIT rates	Percentage increase in top bracket	Percentage increase

Age 75 and over <sup>1</sup>			-			104 261		-	

1. A third rebate of R2 000 was introduced in the 2011 Budget for taxpayers 75 years and older.

## Tax relief

The tax burden, aggregated across all taxpayers, as indicated by the tax assessed as a percentage of taxable income, was stable during the period under review at around 20%. This indicates the effectiveness of using tax relief to combat fiscal drag. The extent of this tax relief, including fiscal drag relief<sup>1</sup>, is best illustrated by means of an example.

Figure 2.1 Example of tax relief granted to an individual with taxable income of R100 000 in 1995

<sup>1</sup> Fiscal drag relief is the relief granted to taxpayers to neutralise the impact of inflation on effective tax rates.

# PERSONAL INCOME TAX

Figure 2.1 illustrates the impact of tax relief over a period of 17 years. (1) An individual with taxable income of R100 000 in 1995 (2) was paying tax at an effective tax rate of 33.8%. (3) If their income had just kept pace with inflation (4) this would have increased to 39.7% in 2012 and if no adjustments to the income tax brackets were made. The impact of the actual tax rate adjustments from 1995 for the same scenario results in (5) a significant lowering of the effective tax rate to only 18.1%.

Table 2.2 shows the tax relief granted to individuals since 1995 across a range of income levels. Tax relief is much more prominent in the lower income groups. This is due to the lower income groups receiving proportionally larger tax relief when the thresholds are increased.

**Table 2.2: Tax relief granted to individuals, 1995 and 2012**

Taxable income	Tax at 1995 rates		Tax at 2012 rates	Effective rates		
	1995 <sup>1</sup>	2012 <sup>2</sup>		1995 <sup>1</sup>	2012 <sup>3</sup>	2012
22 000	61 106	2 385	17 040	244	10.8%	27.9%
25 000	69 438	3 225	20 623	1 744	12.9%	29.7%

## PROVISIONAL TAX PAYMENTS

Any person who receives income other than remuneration is a provisional taxpayer. For 2012/13, provisional tax payments contributed 6.1% to net PIT collections. The introduction of the 80% rule for all years of assessment beginning on or after 1 March 2008 (as set out in the Fourth Schedule to the Income Tax Act) requires taxpayers with taxable income of more than R1 million, to settle at least 80% of their tax liability by the time they make their second provisional payment. This requirement increased the combined first and second provisional payments and substantially reduced third provisional payments to levels well below 20%.

The change to the provisional tax payment trends is shown in Table 2.3.

# PERSONAL INCOME TAX

**Table 2.3: Provisional tax payments by provisional period, 2008/09 – 2012/13**

Period R million Fiscal year	1st Provisional period	Percentage change	2nd Provisional period	Percentage change	3rd Provisional period	Percentage change	Total

## TAX RETURNS AND INDIVIDUAL TAXPAYERS DATA

### Tax register

During 2010 SARS changed its policy on registration requirements and stipulated that everyone, who is formally employed, regardless of their tax liability, must be registered for PIT. If an employee is not registered it is the duty of their employer to register them as taxpayers with SARS. This change resulted in the number of individuals on the tax register almost doubling in two years from 5.5 million at 31 March 2009 to 10.3 million as at 31 March 2011. The register has continued to grow. The number of registered taxpayers increased by 3.4 million (32.5%) to more than 13.7 million taxpayers as at 31 March 2012 as shown in *Table 2.4*.

**Table 2.4: Number of individual taxpayers, 2009 – 2012**

Date	Registered <sup>1</sup>	Percentage growth in register	Tax year	Liable to submit returns <sup>2</sup>	Assessed	Percentage assessed
31-Mar-09	5 540 646	6.5%	2009	4 987 491	4 712 709	94.5%
31-Mar-10	5 920 612	6.9%	2010	5 285 734	5 001 558	94.6%
31-Mar-11	10 346 175	74.7%	2011 <sup>3</sup>	5 639 197	5 199 360	92.2%
31-Mar-12	13 703 717	32.5%	2012	5 881 019	5 108 207	86.9%

1. Number of individuals registered as at 31 March of each year.

2. Liable taxpayers are those who are liable to submit a return for a specific tax year. Cases can be on register and active for other years, but may not be active for the specific tax year.

3. Compulsory for all employees of employer to be registered for income tax from 2011.

### Liable and assessed individual taxpayers

The definition of “liable cases per tax year” has been changed to improve its accuracy. Liable cases per tax year are now defined as all those taxpayers who have been assessed for a tax year, plus taxpayers who were assessed in any of the two years prior to the relevant tax year but excluding those whose status changed to “suspended” or “estate” prior to the commencement of the tax year in question.

# PERSONAL INCOME TAX

The definition “liable cases per tax year” includes taxpayers who fall below the R120 000 compulsory return submission threshold but who voluntarily submitted returns.

The number of individuals liable to submit income tax returns increased from nearly 5 million in 2009 to 5.9 million in 2012. At the end of July 2013, when the data was extracted, the percentage of individual taxpayers assessed during the 2009 to 2012 tax years was 94.5%, 94.6%, 92.2% and 86.9% respectively. As the years progress the older years’ percentage assessed moves closer to 100% as outstanding assessments are finalised.

The statistics in the remainder of this chapter are based on assessments issued.

## Improved turnaround times and filing compliance

The SARS Modernisation Programme significantly improved the efficiency of SARS’ operations and specifically accelerated processing turnaround times, raised service levels and increased efficiencies. The success achieved with automation allowed SARS to migrate human resources from labour intensive processes to more skills-intensive activities.

Filing season statistics reflect a notable improvement in filing compliance as well as on-time filing from 2008/09 to 2012/13. The latter increased from 58.0% in 2008/09 to 86.1% for the 2012 filing season (up from 83.2% in 2011). The improvement in compliance was driven by electronic filing, pre-population of returns as well as the introduction of penalties for outstanding returns. Less than 1% of taxpayers still make use of the paper-based channels to submit their returns, a massive improvement from the 98.8% that made use of paper-based channels in 2006.

Faster turnaround times in assessing income tax returns assisted SARS to pay refunds much quicker. Refunds of R14.6 billion were paid during the 2012 filing season. This is 14.8%, or R1.9 billion, higher than the R12.7 billion paid in 2011. SARS paid 94.5% of all refunds within 72 hours during the 2012 filing season compared to 85.4% during the 2011 filing season. The average refund per taxpayer was R6 272 during the 2012 filing season compared to about R6 600 during the 2011 filing season. The number of refunds paid during 2012/13 was 2.7 million compared to 2.4 million during the previous year. Assessments for 2012 resulted in 70.0% of taxpayers receiving refunds, 16.2% owing SARS after assessment and 13.8% having no liability after assessment.

## TAXABLE INCOME AND TAX ASSESSED

Table 2.5 shows a summary of the number of individual taxpayers assessed, their taxable income and tax assessed by taxable income group.

Table 2.5: Summary of assessed individual taxpayers, taxable income and tax assessed, 2009 – 2012

Tax year	Number of taxpayers assessed	Taxable income (R million)	Average taxable income (R)	Tax assessed (R million)	Average tax assessed (R)	Tax assessed as a % of taxable income
2009	4 712 709	818 510	173 681	172 641	36 633	21.1%
2010	5 001 558	867 346	173 415	174 125	34 814	20.1%
2011	5 199 360	962 783	185 173	193 503	37 217	20.1%
2012	5 108 207	1 023 936	200 449	206 668	40 458	20.2%

# PERSONAL INCOME TAX

Tax assessed as a percentage of taxable income was quite stable at 20% and indicates the effectiveness of tax policy on fiscal drag relief to counter inflation. The decline of 1% in the effective rate in 2010 and beyond was mainly due to slower growth in taxable income. This was caused by the negative impact of the global financial crisis on employment and remuneration levels as well as a reduction in average tax rates that was mainly the result of the adjustment of the tax brackets in favour of taxpayers during 2010.

Some recovery in wages was evident as average taxable incomes started to increase since the decline of -0.2% in 2010. It grew by 6.8% in 2011 and 8.2% in 2012. Both increases were higher than inflation during those tax years.

## Distribution of tax liability across taxable income and income groups

Although taxpayers' contribution to the fiscus reflects the income inequalities in the South African society, tax records suggest some upward social mobility.

Table 2.6 shows the distribution of assessed individual taxpayers, taxable income and tax assessed across major taxable income groups. The table shows that for 2012, 42.7% of the assessed individual taxpayers had a taxable income below R120 000. These taxpayers earned 11.2% of taxable income and contributed only 3.0% of the tax assessed. More than 50% of the taxpayers earned between R120 000 and R500 000 in 2012 and were liable for 47.7% of the tax assessed. The number of taxpayers assessed in the two upper brackets grew. This was partially due to inflationary adjustments to salaries and possibly upward social mobility as well as greater compliance. An increasing number of taxpayers have registered to avoid severe administrative penalties. The R120 000 to R500 000 bracket increased by 411 070 (18.9%) taxpayers between the 2009 and 2012 tax years while the upper bracket increased by 101 890 (43.0%) during this period. It should be noted that the aforementioned does not take the impact of inflation into account.

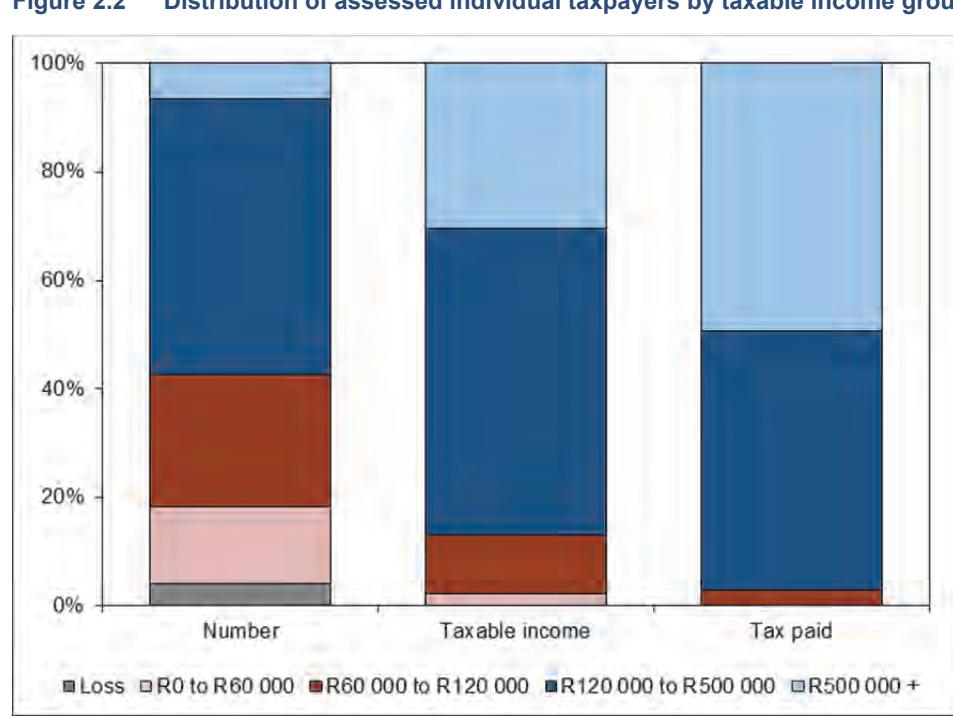

Table 2.6: Distribution of assessed individual taxpayers over major taxable income groups, 2009 – 2012

Percentage	Taxable income group	2009	2010	2011	2012

# PERSONAL INCOME TAX

Figure 2.2 provides graphical representations of the percentage distribution of the number of taxpayers that have been assessed, their taxable income and their tax liability for 2012. Greater detail by taxable income group is provided in *Table A2.1.1*.

**Figure 2.2 Distribution of assessed individual taxpayers by taxable income group, 2012**

Where losses for individuals are reported, these assessed losses may not only reflect the loss for that tax year, but also may include accumulated losses carried forward from previous tax years. If an individual, therefore, had a taxable profit for the year it is possible that he/she could still be in an assessed loss position if the taxable profit for the year was insufficient to clear the assessed loss brought forward.

*Table A2.1.2* shows “income” included in the final taxable income calculation as reflected on the assessment. It should be noted that interest exemptions and Capital Gains Tax (CGT) exclusions have not been taken into account. Income shown in the table is therefore based on taxable income to which all deductions granted have been added. The income shown is therefore not reflective of gross income.

The difference between income and taxable income was 11.5% in 2012. In the 2010 tax year it was 9.8% and in 2009 it was 9.6%. This was mainly a result of the manner in which employer medical scheme contributions on behalf of employees and medical deductions were accounted. This changed in the 2011 tax year.

*Table 2.7* illustrates the distribution of income and the granting of deductions in income groups (as opposed to taxable income groups). The largest portion of the R132.7 billion allowed as deductions in 2012 was granted to taxpayers in the R120 000 to R500 000 income bracket. About 12.4% of their income was granted as a deduction.

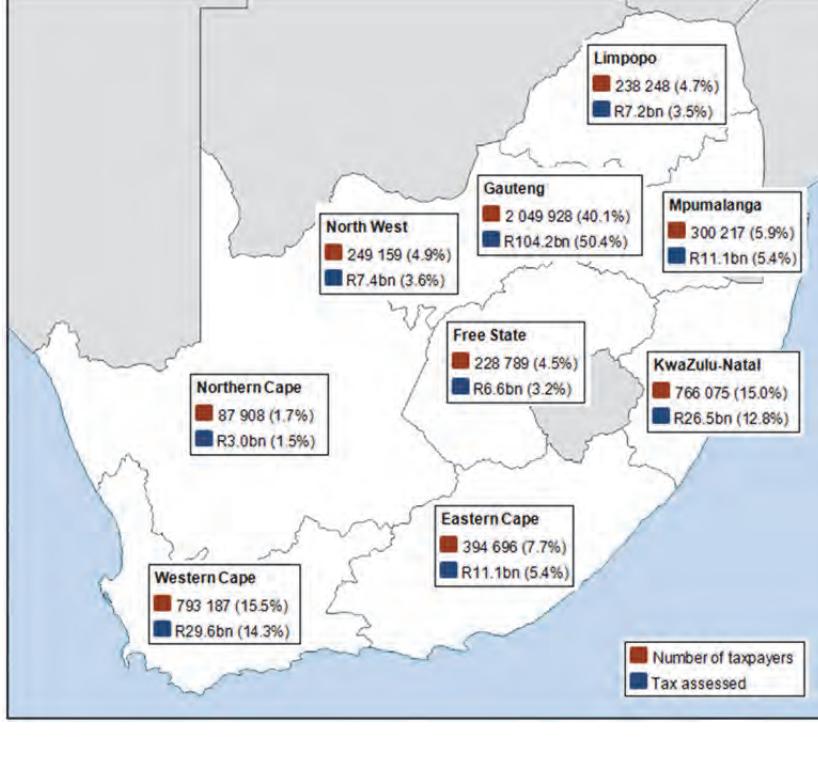

# PERSONAL INCOME TAX

Table 2.7: Assessed individual taxpayers by income group, deductions granted and taxable income, 2012

<b>Total</b>	<b>226 435</b>	<b>25 985</b>	<b>200 449</b>	<b>11.5%</b>

## By province

The distribution of taxpayers, taxable income and tax assessed by province (based on office of registration) in 2012 shows a slight decline in the percentage of taxpayers in the Eastern Cape and Western Cape. The distribution is unchanged in Gauteng, KwaZulu-Natal and the Northern Cape. An increased distribution was noted in the remaining provinces. More than 70% of individual taxpayers were registered in Gauteng, Western Cape and KwaZulu-Natal and they were responsible for 77.6% of the total tax assessed (see *Figure 2.3* and *Table A2.1.3*).

**Figure 2.3** Assessed individual taxpayers and tax assessed by province, 2012

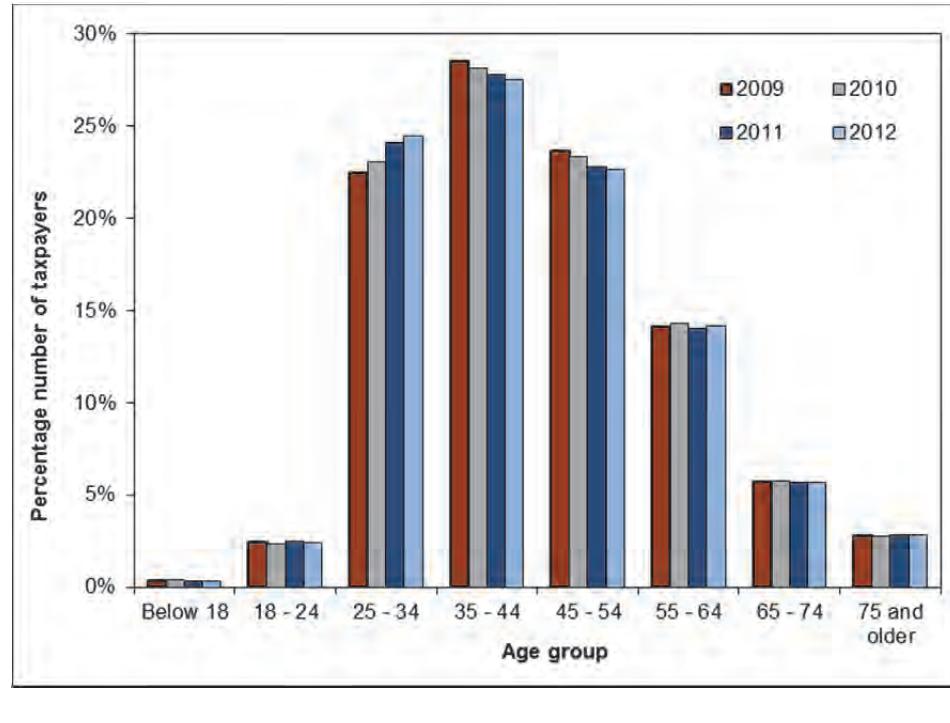

# PERSONAL INCOME TAX

This distribution is not necessarily representative of residence, economic activity or employment in provinces. Taxpayers may reside or be employed in a different province to the office of registration. A taxpayer, for example, may work and reside in Brits (North West), but may be registered at the Pretoria office (Gauteng). This taxpayer's taxable income and tax assessed would therefore be reflected in Gauteng and not in the North West province.

## By age group

Figure 2.4 and Table A2.1.4 show a breakdown of assessed individual taxpayers by age group. The proportions of taxpayers in the 25-34 and 55-64 age groups grew in 2012 while the proportions in the 35-44 and 45-54 year age groups declined. Close to 30% of the assessed taxpayers fall in the 35-44 age group. This group earns close to a third of the total taxable income and is also responsible for close to a third of the total tax assessed.

**Figure 2.4 Percentage of assessed individual taxpayers by age group, 2009 – 2012**

## By gender

The percentage of female taxpayers has been steadily increasing. For 2012, as indicated in Figure 2.5 and Table A2.1.5, females accounted for 43.6% of the assessed individual taxpayers, earned 36.4% of the taxable income and contributed 30.1% of tax assessed.

Females had an average taxable income of R167 489 and were liable for tax of R27 980 at an effective rate of 16.7%. This contrasts with males who had an average taxable income of R225 919 and were liable for tax of R50 100 at an effective rate of 22.2%. Females on average earned 25.9% less than males, as measured by taxable income, and were liable for 44.2% less tax than males.

# PERSONAL INCOME TAX

**Figure 2.5 Male and female assessed individual taxpayers by main taxable income group, 2012**

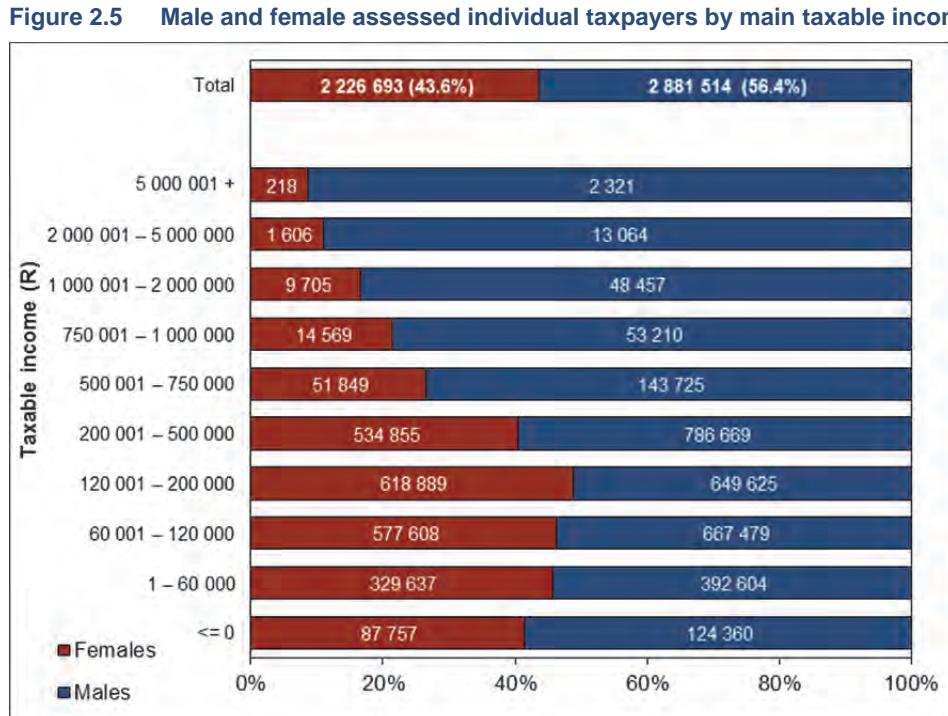

Table A2.1.6 shows that individuals with a taxable income between zero and R120 000 were nearly evenly split between females and males. However, as the taxable income increased the proportion of females to males declined significantly. Only 21.5% of taxpayers with a taxable income of between R750 000 and R1 million in 2012 were female. This proportion declines further to only 8.6% for those with a taxable income of more than R5 million. The number of females as a percentage of the total number of taxpayers assessed increased from 42.4% in 2009 to 43.6% in 2012 as more females than males became liable for submitting tax returns because their earnings grew above the assessment threshold.

## By source of income

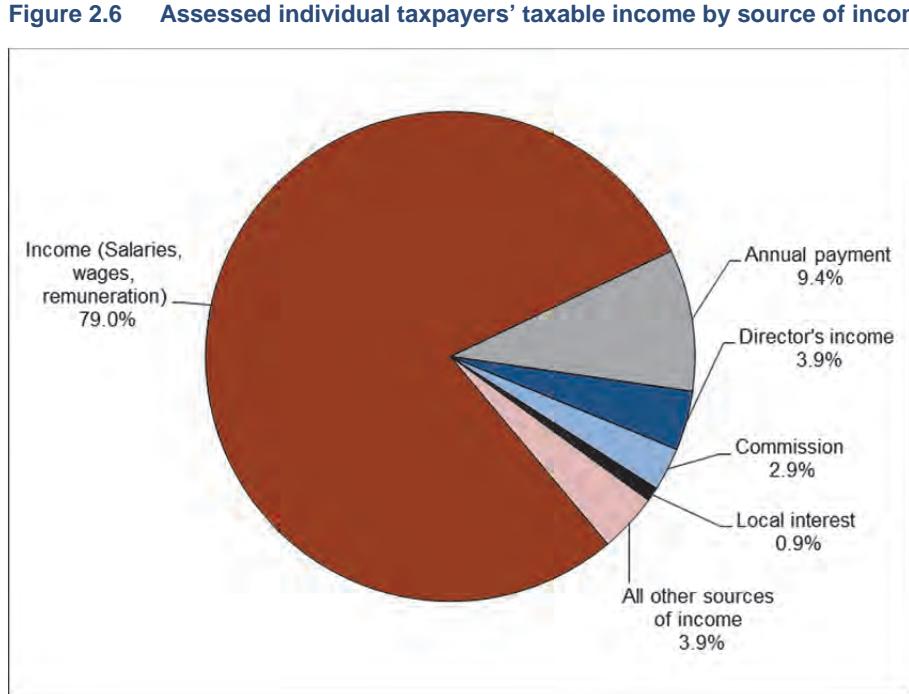

Figure 2.6 and Table A2.2.1 show selected sources of income. Nearly 4.6 million individual taxpayers received income in 2012 from salaries and wages or remuneration, pensions or annuities. More than 3.4 million of these taxpayers also received annual payments in the form of bonuses or leave pay.

It should be noted that during 2010 income source codes 3603, 3607 and 3610 were consolidated into source code 3601. Table A2.2.1 reflects the consolidation of all the previous years for comparative purposes.

In 2012 there were more than 172 000 individual taxpayers that earned interest income which exceeded the exemption limit applicable for interest. The taxable portion of local interest income appears to be declining. Local interest declined significantly in-line with the bank repo rate which was reduced from 9.5% in 2009 to 5.0% in 2012.

# PERSONAL INCOME TAX

Figure 2.6 Assessed individual taxpayers' taxable income by source of income, 2012

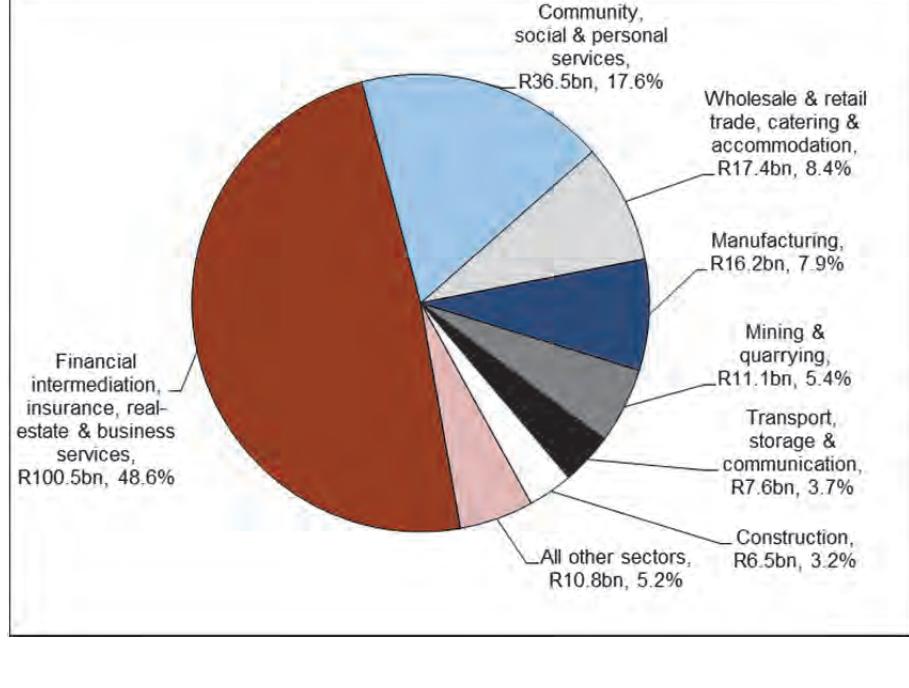

## By sector

Table A2.3.1 shows assessed individual taxpayers' taxable income and tax assessed by SARS sector. Table A2.3.2 uses these SARS sector codes and reclassifies them according to the Standard Industrial Classification (SIC). It should be noted that the source of income codes used by SARS are not yet fully aligned with the SIC system used by Statistics South Africa.

In 2012 assessed individual taxpayers employed in the *Financial intermediation, insurance, real-estate & business services* sector accounted for the largest number of taxpayers at 43.5%. They also made the largest contribution to tax assessed of 48.6% (see Figure 2.7).

Figure 2.7 Assessed individual taxpayers' tax assessed by economic activity, 2012

# PERSONAL INCOME TAX

## ASSESSED INDIVIDUAL TAXPAYERS WITH BUSINESS INCOME

Table A2.4.1 gives a breakdown of the sectors in which assessed individual taxpayers with business income were active. The number of assessed individual taxpayers with business income amounted to 5.7% of the total individual taxpayers in 2012 compared with 7.1% of the total in 2009. This decline was mainly due to the impact of the global financial crisis on small businesses especially as well as an increase in the number of individuals in the formal labour market.

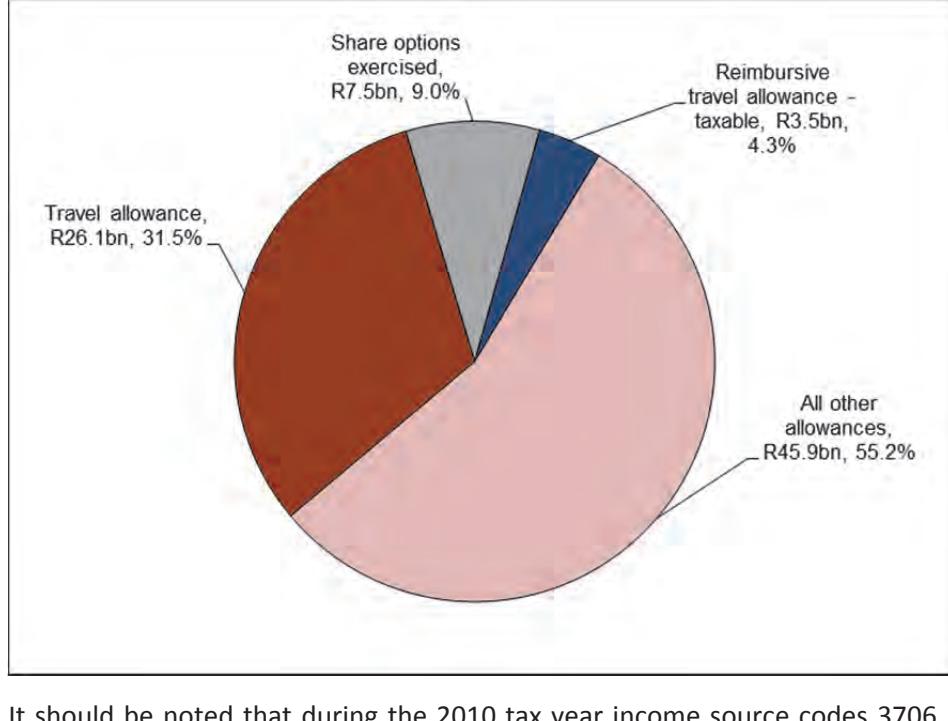

The *Financing, insurance, real-estate & business services* sector contributed 38.3% of total taxable income of assessed individual taxpayers with business income. This sector also contributed 30.0% of the total number of assessed individual taxpayers with business income, followed by the *Retail trade* sector (7.6%) and the *Agriculture, forestry & fishing* sector (4.4%).

## ASSESSED INDIVIDUAL TAXPAYER ALLOWANCES, FRINGE BENEFITS AND DEDUCTIONS

### Assessed individual taxpayers' allowances

The travel allowance continued to be the single largest allowance for individuals despite steadily decreasing in relative terms from 49.6% in 2009 to 31.5% in 2012 (see Figure 2.8). This decline can be explained in part by the policy changes in 2010 that were applied to travel allowances to curb the abuse of travelling expenses as a means to lower taxable income.

Figure 2.8 Assessed individual taxpayers' allowances, 2012

It should be noted that during the 2010 tax year income source codes 3706, 3710, 3711 and 3712 were consolidated into source code 3713. Table A2.5.1 shows this consolidation for all previous years for comparative purposes. The most significant allowances are shown according to taxable income group in Tables A2.5.2 to A2.5.4.

# PERSONAL INCOME TAX

## Assessed individual taxpayers' fringe benefits

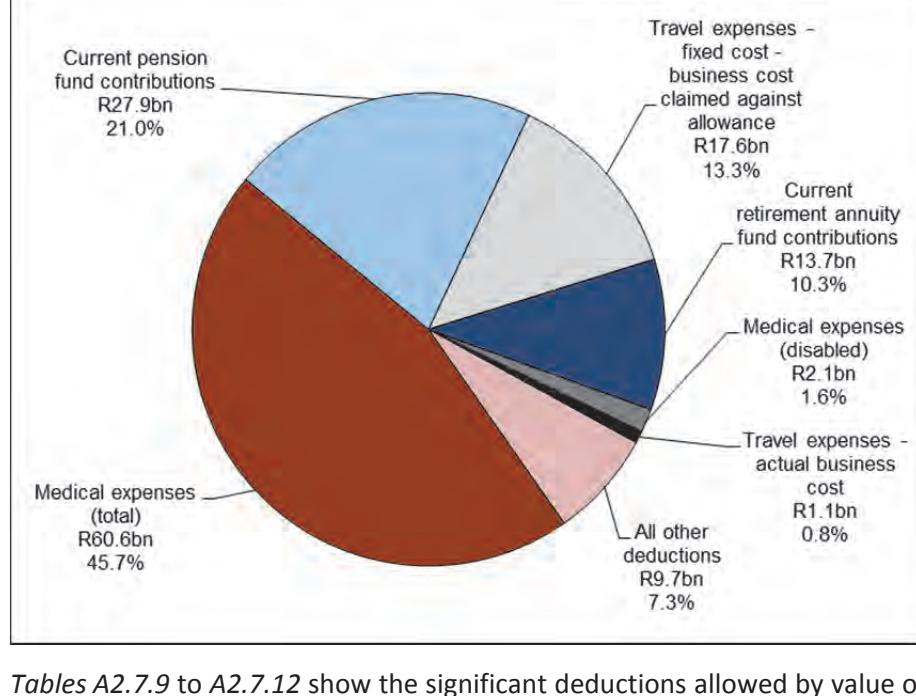

Table A2.6.1 provides a summary of fringe benefits. From 2010 fringe benefit source codes (3803 to 3809) were consolidated into source code 3801. For comparative purposes this consolidated source code is shown at the bottom of the table. Total fringe benefits amounted to R16.0 billion in 2009 and increased to R49.5 billion in 2012.

Medical scheme contributions paid on behalf of employees remained the largest fringe benefit. In 2009 it amounted to R7.4 billion and by 2012 it had increased to R38.0 billion. The abnormal increase from 2011 was due to a change in the treatment of employer contributions to medical schemes paid on behalf of employees. This was also reflected in the increase in medical deductions that were granted. The most significant fringe benefits are shown by taxable income group in Tables A2.6.2 to A2.6.4.

## Assessed individual taxpayers' deductions

Table A2.7.1 provides a summary of individual taxpayers' deductions allowed on assessment. The deductions for pension fund and retirement annuity fund contributions declined slightly to 31.4% in 2012 (See Figure 2.9). The proportion of amounts allowed as deductions for medical expenses (excluding allowable deductions associated with disability) increased slightly from 2009 to 2012. The large increase in 2011 to 45.5% can be attributed to the claiming of medical expenses by the taxpayers that now have a medical fringe benefit as explained above. The most significant deductions are shown by taxable income group in Tables A2.7.2 to A2.7.8.

**Figure 2.9 Assessed individual taxpayers' deductions, 2012**

Tables A2.7.9 to A2.7.12 show the significant deductions allowed by value of the deduction. In 2012, 31.5% of assessed taxpayers had a current pension fund contribution of between R5 000 and R10 000, 55.8% had a current retirement annuity fund contribution of between zero and R5 000, 21.4% had total medical expenses of between R5 000 and R10 000 and 10.1% had travel expenses between R50 000 to R60 000.

1. SARS' source of income code is used to classify according to the Standard Industrial Classification (SIC) system. SARS' source of income code is not fully aligned with the SIC system that Statistics South Africa uses.

2. Includes the following SARS sectors – Bricks, ceramic, glass, cement and similar products; Chemicals and chemical, rubber and plastic products; Clothing and footwear; Coal and petroleum products; Food, drink and tobacco; Leather, leather goods and fur (excl. footwear & clothing); Machinery and related items; Metal (including metal products); Other manufacturing industries; Paper, printing and publishing; Scientific, optical and similar equipment; Textiles; Transport equipment; and Wood, wood products and furniture.

3. Includes the following SARS sectors – Catering and accommodation; Retail trade; Specialised repair services; Vehicles, parts and accessories; and Wholesale trade.

4. Includes the following SARS sectors – Agencies and other services; Financing, insurance, real estate and business services; Long term insurance, and Research and scientific institutes.

5. Includes the following SARS sectors – Educational services; Medical, dental and other health and veterinary services; Personal and household services; Public administration; Recreation and cultural services; and Social and related community services.

6. Includes where the source of income was indicated as Other (as per SARS source code) or where the source of income was left blank on the return.

#### **KEY HIGHLIGHTS**

Scanning electron micrographs from the 2011 survey

- About a third of the 600 526 companies assessed had positive taxable income, a further third had taxable income equal to zero and the remaining third was in an assessed loss position;
  - Company Income Tax (CIT) was the third largest contributor (20.6%) to tax revenue in 2011/12;
  - The concentrated nature of the South African economy is evident as 266 large companies with taxable income of more than R200 million (0.2% of companies with positive taxable income), were liable for 58.2% of the tax assessed of companies with positive taxable income;
  - The *Financial intermediation, insurance, real-estate & business services* sector comprised 254 066 (42.3%) of the assessed companies and was responsible for 36.8% of tax assessed; and
  - Of the 600 526 companies assessed, 103 928 were assessed as Small Business Corporations (SBCs) and paid tax at graduated income tax rates instead of a fixed rate.

## INTRODUCTION

Company Income Tax (CIT) is a tax levied on the taxable income (gross income less exemptions and allowable deductions) of companies and close corporations. All companies and close corporations are required to register as provisional taxpayers. CIT has been the third largest contributor to tax revenue, since 2009/10 when it contributed 22.9%. For 2011/12 and 2012/13 it retained its status as the third largest contributor but its relative contribution declined to 20.6% and 19.8% respectively.

The current headline CIT rate is 28%. Some sectors of the economy have different effective tax rates because of sector-specific tax dispensations and deductions. Examples of these include the gold mining formula, farming deductions and valuations, as well as the accelerated depreciation of capital assets for qualifying sectors. SBCs with a turnover of not more than R14 million qualify for a special tax dispensation in the form of graduated income tax rates instead of a fixed rate. Micro businesses with an annual turnover of less than R1 million may also elect to pay only turnover tax. This tax has a graduated tax rate structure with a maximum marginal rate of 7%. As part of CIT, companies are required to pay Capital Gains Tax (CGT) on the disposal of assets.

- Provisional tax payments;

- Number of companies on register;
  - Taxable income and tax assessed;
  - Companies with assessed losses or profits; and
  - Small business corporations.

# COMPANY INCOME TAX

## PROVISIONAL TAX PAYMENTS

Companies automatically fall into the provisional tax system. This system requires taxpayers to provide for their final tax liability by paying two amounts during the year of assessment and a third voluntary “top-up” payment after the end of the tax year to avoid being charged with penalties and interest.

The first provisional tax payment must be made within six months of the year of assessment while the second payment must be made no later than the last working day of the year of assessment. The introduction of the 80% rule for all years of assessment beginning on or after 1 March 2008, as set out in the Fourth Schedule to the Income Tax Act, requires taxpayers with taxable income of more than R1 million to settle at least 80% of their tax liability by the time they make their second provisional payment. Companies that fail to comply with this requirement incur significant penalties. The third payment is voluntary. It may be made within seven months of the year of assessment if the year of assessment ends in February or within six months of the year of assessment if it ends in any other month.

If SARS believes that the taxable income estimate on a company’s first or second provisional tax return has been understated, the company may be requested, in terms of paragraph 19(3) of the Fourth Schedule to the Income Tax Act, to revise their estimate. This may require an additional payment. The additional payment will then be captured as a first or second provisional payment even though it was paid after the due date.

As a result of a more rigorous application of paragraph 19(3) of the Fourth Schedule of the Income Tax Act as well as improved compliance with the provisional tax rule (80% rule for second provisional tax payments), third provisional payments have declined significantly. They comprised R12.3 billion (9.4%) of provisional tax paid in 2009 but only R3.4 billion (2.2%) in 2012 which is well below the 20% allowed (see *Table 3.1*).

# COMPANY INCOME TAX

**Figure 3.1 Provisional tax payments by provisional period, 2011**

Companies are allowed to select their own financial year-ends. The year of assessment, or tax year, of a company therefore corresponds with its financial year. *Table 3.2* illustrates the provisional payment timeline by companies' financial year-end.

**Table 3.2: Example of timeline for provisional tax payments**

30-Jun-13											2012 3rd	

<sup>1</sup>. If the tax year of a company ends at the end of February, the third payment is then due seven months after the end of the tax year. In this case the third payment for 2012 would be due on 30 September 2012.

# COMPANY INCOME TAX

The significant CIT provisional taxpayers have financial year-ends in March, June, September and December. The June and December year-end companies contributed on average almost 60% of the total provisional tax for a specific fiscal year. *Figure 3.2* shows provisional tax payments by companies' financial year-end.

**Figure 3.2 Provisional tax payments by companies' financial year-end, 2011**

Provisional tax payments for a specific tax year are made over several fiscal years as illustrated in *Table 3.3*. During 2011/12 about 55% of the tax paid related to the 2011 tax year and around 43% to the 2012 tax year.

**Table 3.3: Provisional tax payments by tax year and fiscal year, 2008/09 – 2012/13**

# COMPANY INCOME TAX

The collection of provisional tax has increased by 22.2% since the recession from R135.1 billion in 2009/10 to R165.1 billion in 2012/13. The impact of the global financial crisis still lingers and total CIT collections have still not reached the pre-crisis peak of R167.2 billion in 2008/09.

*Table A3.1.1* shows provisional tax payments by company financial year-end, provisional period and fiscal year. *Table A3.1.2* shows the same information by tax year. *Table A3.2.1* shows a breakdown of provisional tax payments by sector by fiscal year.

## NUMBER OF COMPANIES ON REGISTER

On 31 March 2013 SARS had nearly 2.2 million companies on its tax register. Most of these companies were inactive or dormant. The broadening of the tax base, through education, outreach and enforcement initiatives, has increased the number of companies registered by 16.9% since 31 March 2010.

The definition of “liable cases per tax year” has been changed to improve its accuracy. Liable cases per tax year are now defined as all those companies who have been assessed for a tax year, plus companies who were assessed in any of the two years prior to the relevant tax year but excluding those whose status changed to “suspended” or “estate” prior to the commencement of the tax year in question.

The number of companies liable to submit returns ranged from a high of 764 005 to 735 507 between 2009 and 2012. For 2009, 87.4% of the liable companies had been assessed while only 59.9% had been assessed for 2012 (*Table 3.4*).

Assessments for 2011 resulted in 13.0% of taxpayers receiving refunds, 15.9% owing SARS after assessment and 71.0% having no liability after assessment.

**Table 3.4: Number of companies, 2009 – 2012**

Date	Registered <sup>1</sup>	Percentage growth in register	Tax year	Liable to submit returns <sup>2</sup>	Assessed	Percentage assessed
31-Mar-10	1 878 856	2.4%	2009	759 829	664 399	87.4%
31-Mar-11	2 078 182	10.6%	2010	764 005	647 857	84.8%
31-Mar-12	2 034 719	-2.1%	2011	742 448	600 526	80.9%
31-Mar-13	2 195 883	7.9%	2012	735 507	440 550	59.9%

1. Excludes cases where status is in suspense or estate or address unknown. The tax year for companies is normally the financial year of the company for financial reporting purposes.

2. These are companies that are active and not dormant.

## Provisional tax as an indicator of the completeness of assessments

Provisional tax collections for previous tax years have been found to be close to 100% of the final liability as reflected in issued assessments. Provisional tax collections for a specific tax year are therefore known long before assessments for a tax year are carried out and this enables reliable extrapolations. The tax assessed as a percentage of the provisional tax payments received for the relevant tax year is therefore a more reliable gauge for determining the completeness of the issued assessments.

*Table 3.5* shows the tax assessed for a specific tax year compared with the provisional tax payments received. Between 2009 and 2012 more provisional tax was paid than actual tax assessed.

# COMPANY INCOME TAX

**Table 3.5: Provisional tax payments and tax assessed by tax year, 2009 – 2012**

R million Tax year	Provisional tax payments	Tax assessed	Tax assessed as % of provisional tax payments
2009	131 389	129 653	98.7%
2010	130 733	126 275	96.6%
2011	148 368	139 355	93.9%
2012	153 748	84 955	55.3%

The tables in the remainder of this chapter reflect tax assessed as a percentage of provisional tax payment collections rather than tax assessed as a percentage of companies liable to submit.

## TAXABLE INCOME AND TAX ASSESSED

### By taxable income group

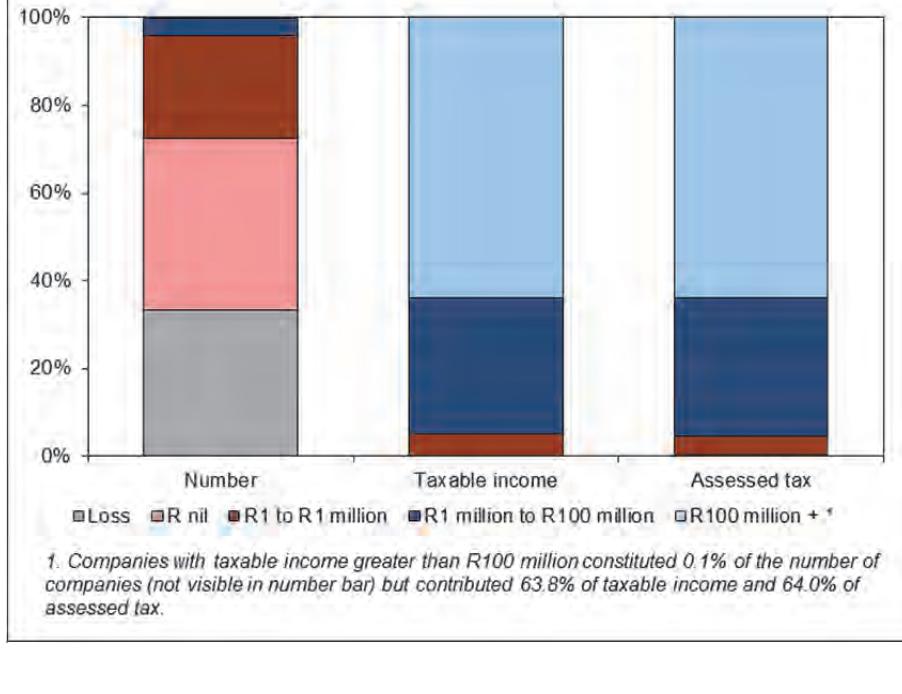

Table 3.6 shows the effective tax rates for companies assessed in 2011. Although the statutory company tax rate is fixed at 28%, some companies are liable for CIT at different rates due to special dispensations and deductions. These include personal service providers, non-resident companies, long-term insurance companies, oil and gas companies, gold mining companies and small business corporations (the impact of which can be seen in the R1 to R1 million grouping).

**Table 3.6: Number of companies, taxable income and tax assessed, 2011**

Number	Number of taxpayers	Taxable income (R million)	Tax assessed (R million)	Effective rate
Loss	199 705	-422 993	548	N/A
R nil	234 969	–	10	N/A
R1 to R1 million	140 837	25 337	5 817	23.0%
R1 million to R100 million	24 534	155 188	43 819	28.2%
R100 million +	481	317 650	89 160	28.1%
<b>Total</b>	<b>600 526</b>	<b>498 176</b>	<b>139 355</b>	<b>28.0%</b>

Figure 3.3 shows the distribution of the number of companies assessed and tax assessed for 2011.

**Figure 3.3 Assessed companies, taxable income and tax assessed by taxable income group, 2011**

1. Companies with taxable income greater than R100 million constituted 0.1% of the number of companies (not visible in number bar) but contributed 63.8% of taxable income and 64.0% of assessed tax.

# COMPANY INCOME TAX

Table A3.3.1 shows taxable income and tax assessed by taxable income group for all assessed companies. About a third of all assessed companies reported positive taxable income, a further third reported assessed losses and the remaining third reported zero taxable income.

Table A3.3.2 shows that 58.2% of the tax assessed in 2011 was paid by large companies with taxable income of greater than R200 million. These companies represent only 0.2% of the total number of companies assessed with positive taxable income.

## By sector

The *Financial intermediation, insurance, real-estate & business services* sector is the largest sector with 42.3% of the total number of assessed companies in 2011. This sector accounts for 36.8% of the tax assessed in 2011 (see Figure 3.4).

**Figure 3.4 Companies' tax assessed by economic activity, 2011**

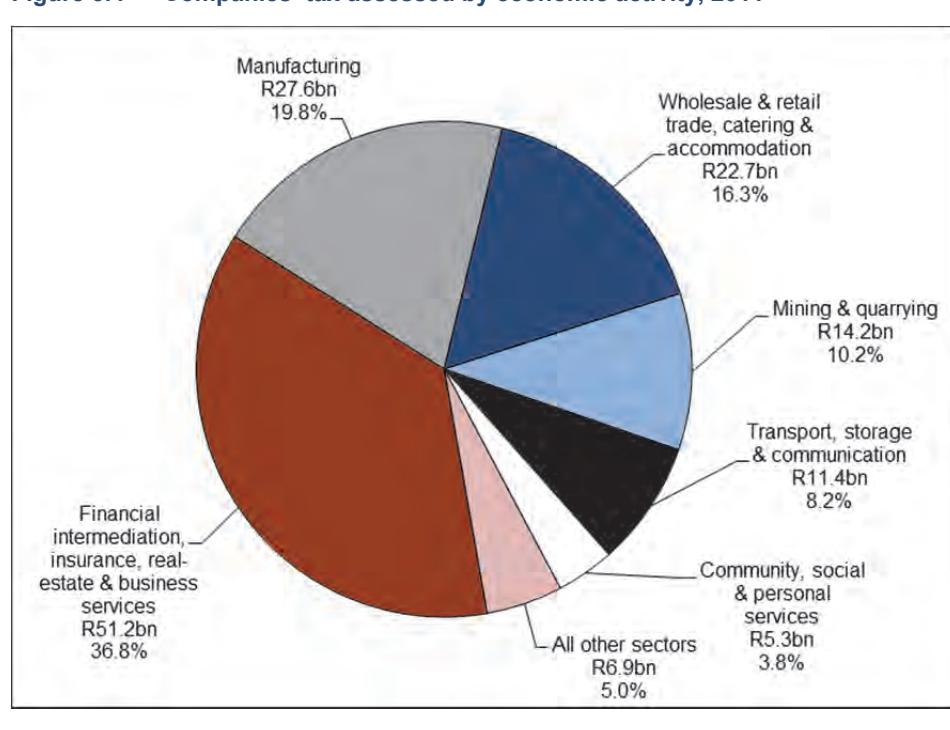

Table A3.4.1 shows the taxable income and tax assessed by sector for all companies while Table A3.4.2 uses these SARS sector codes and reclassifies these codes according to the Standard Industrial Classification (SIC). It should be noted that SARS' sector codes are not yet fully aligned with the SIC system used by Statistics South Africa.

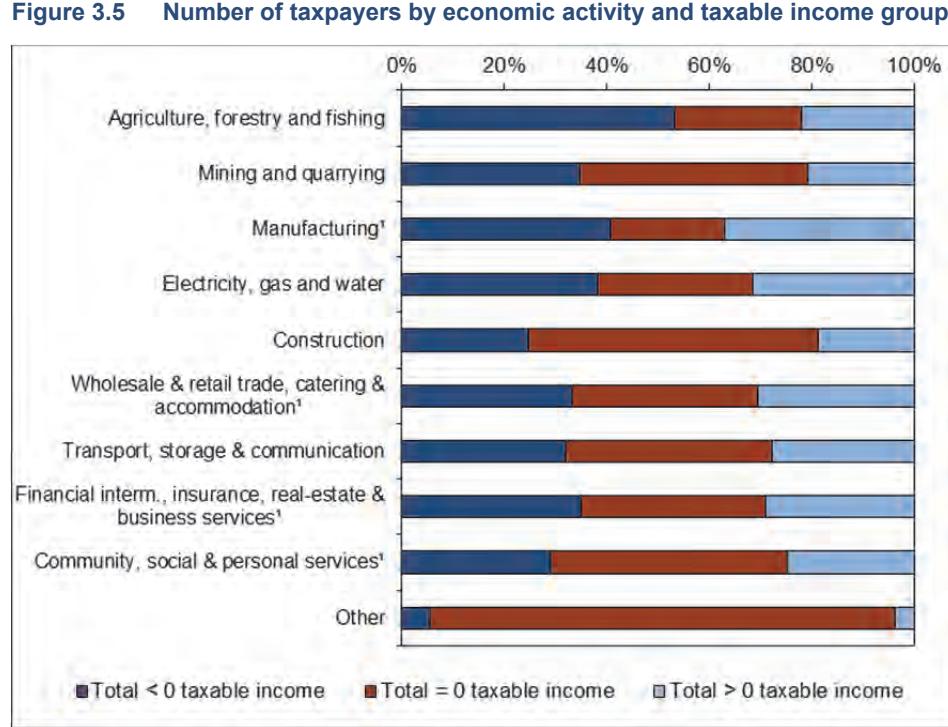

Tables A3.4.3 to A3.4.5 show the number of companies reporting positive, negative (assessed loss) and zero taxable income.

Tables A3.5.1 to A3.5.8 show the number of taxpayers and tax assessed by economic activity, as displayed in Table A3.4.2, and taxable income group for each of the tax years.

Figure 3.5 shows the distribution of taxpayers by economic activity and taxable income groups for 2011.

# COMPANY INCOME TAX

Figure 3.5 Number of taxpayers by economic activity and taxable income group, 2011

## COMPANIES WITH ASSESSED LOSSES OR PROFITS

Where losses for companies are reported, these assessed losses do not only reflect the loss for the tax year, but may also include assessed losses carried forward from previous tax years. If a company therefore had a taxable profit for the year it is possible that it could still be in an assessed loss position if the taxable profit for the year is insufficient to clear the assessed loss brought forward.

The *Financing, insurance, real-estate & business services* sector had the highest number of companies with assessed losses in 2011 (32.7% of all companies with assessed losses) followed by the *Construction* sector (11.9%) and *Retail trade* sector (11.7%).

Table A3.6.1 shows the total number of companies with assessed losses or profits by sector.

## SMALL BUSINESS CORPORATIONS

Companies can elect to be taxed as SBCs if they meet certain criteria. These include amongst others, an annual turnover of less than R14 million and limited shareholding. This choice to be taxed as a SBC must be exercised on an annual basis.

Table 3.7 illustrates the increase in the SBC brackets for the 2009 and the 2012 tax years. The threshold of the first SBC bracket increased from R46 000 in 2009 to R59 750 in 2012, an increase of 29.9%.

SBCs benefit from graduated income tax rates instead of having fixed tax rates. They also qualify to immediately write-off all plant or machinery used in a process of manufacture and also for an accelerated write-off allowance for depreciable assets (50%:30%:20%).

# COMPANY INCOME TAX

**Table 3.7: Small business corporations tax rates, 2009 and 2012**

Tax year	2009			2012			SBC rate	Percentage increase in top bracket
Rand	0	–	46 000	0	–	59 750	0%	29.9%
Taxable income brackets	46 001	–	300 000	59 751	–	300 000	10%	–
	300 001		and over	300 001		and over	28%	–

In any year of assessment SBCs can be taxed on one of two different tax year rates. For example, they can be taxed on 2011 tax rates or 2012 tax rates.

- 2011 tax rates (rates in effect from 1 April 2010 to 31 March 2011) are applicable for SBCs with years of assessment ending between 1 January 2011 and 31 March 2011.
- 2012 tax rates (rates in effect from 1 April 2011 to 31 March 2012) are applicable for SBCs with years of assessment ending between 1 April 2011 and 31 December 2011.

*Table A3.7.1* shows the number of SBC taxpayers and tax assessed by taxable income group. *Table A3.7.2* shows the number of SBC taxpayers and tax assessed by sector. *Table A3.7.3* shows the number of SBC taxpayers and tax assessed and by economic activity. *Tables A3.7.4* to *A3.7.6* show SBCs reporting positive, negative (assessed loss) and zero taxable income. *Table A3.7.7* shows SBCs and tax assessed by turnover group.

1. SARS' source of income code is used to classify according to the Standard Industrial Classification (SIC) system. SARS' source of income code is not fully aligned with the SIC system that Statistics South Africa uses.

2. Includes the following SARS sectors – Bricks, ceramic, glass, cement and similar products; Chemicals and chemical, rubber and plastic products; Clothing and footwear; Coal and petroleum products; Food, drink and tobacco; Leather, leather goods and fur (excl. footwear & clothing); Machinery and related items; Metal (including metal products); Other manufacturing industries; Paper, printing and publishing; Scientific, optical and similar equipment; Textiles; Transport equipment; and Wood, wood products and furniture.

3. Includes the following SARS sectors – Catering and accommodation; Retail trade; Specialised repair services; Vehicles, parts and accessories; and Wholesales trade.

4. Includes the following SARS sectors – Agencies and other services; Financing, insurance, reinsurance, real estate and business services; Long term insurance; and Research and scientific institutes.

5. Includes the following SARS sectors – Educational services; Medical, dental and other health and veterinary services; Personal and household services; Recreation and cultural services; and Social and related community services.

6. Includes where the source of income was indicated as Other (as per SARS source code) or where the source of income was left blank on the return.

Table A3.4.2: Companies: Taxable income and tax assessed by economic activity, 2009 – 2012

Tax year		2009						2010						2011						2012

**435,576 (cf. 48%)** were active

# 4 VALUE-ADDED TAX

## KEY HIGHLIGHTS

Earth - 2012/13 final version

- Net Value-Added Tax (VAT) growth of 12.6% against the previous year resulted from a 10.1% increase in VAT payments and a 9.4% increase in Import VAT (discussed in Chapter 5) and was moderated by a 6% increase in VAT refunds;
  - Growth in Domestic VAT payments was supported by household consumption benefitting from rising short-term lending as the repurchase rate remained at an all-time low of 5% since July 2012. The sectors that contributed to this growth were mainly the *Financial intermediation, insurance, real-estate & business services, Wholesale & retail trade, catering & accommodation* and *Manufacturing* sectors. This was partially offset by declines in the *Electricity, gas and water* and *Transport, storage & communications* sectors;
  - VAT refunds grew in the *Financial intermediation, insurance, real-estate & business services, Wholesale & retail trade, catering & accommodation* and *Manufacturing* sectors; and
  - There were 650 540 registered VAT vendors of which 425 576 (65.4%) were active. A vendor is regarded as active if a payment was received or a refund made to the vendor during the fiscal year. Key statistics were:
    - VAT vendors that submitted returns on a bi-monthly basis (every two months) accounted for 86.9% of active vendors;
    - Although only 9.0% of VAT vendors submitted returns on a monthly basis, they contributed 75.1% of VAT payments and received 87.5% of VAT refunds;
    - Companies and close corporations comprised 70.4% of VAT vendors, individuals 19.1%, estates and trusts 6.9% and partnerships 2.4%. The balance consisted of VAT vendors from other enterprise types;
    - The number of VAT vendors in the *Financial intermediation, insurance, real-estate & business services* sector were the largest, constituting 41.4% of the total number of VAT vendors;
    - VAT vendors with a turnover of R1 million or less constituted 43.6% of the total number of VAT vendors;
    - For each R1 in Domestic VAT collected, R3.32 in output tax was declared and R2.32 in input tax was claimed; and
    - For each R1 in VAT refunded, R1.30 in output tax was declared and R2.30 in input tax was claimed.

# VALUE ADDED TAX

## INTRODUCTION

The South African VAT system is destination-based. Only the consumption of goods and services in South Africa is taxed. VAT is therefore payable on the supply of goods and services in South Africa as well as on the importation of goods into South Africa.

VAT is a significant source of revenue for Government and requires businesses (referred to as vendors that act as agents of the Government) to register and to charge and collect VAT on the supply of goods and services. The mechanism of charging, collecting and paying the VAT to Government is based on self-assessment, which allows the business to determine its liability or refund of tax. It adopts a subtractive or credit input method which allows businesses (vendors) to deduct the VAT incurred on business expenses (input tax) from the VAT collected on the supplies made by the business (output tax). The vendor may deduct the VAT paid during the preceding stages of the production and distribution chain (that is, the burden of the VAT is on the final consumer whilst maintaining neutrality in the business chain).

VAT is a broad-based tax on consumption as opposed to a selective tax on particular products. It is intended to tax all consumption of goods and services (except those that are exempt or zero-rated) in the economy. It is levied at each stage of the production and distribution chain and the tax is ultimately borne by the end consumer.

The current standard rate of VAT in South Africa is 14%. The standard rate is applicable to almost all goods and services supplied in the economy with a limited number of goods and services supplied at the zero-rate or exempt from VAT. The purpose of the zero-rate is to free VAT on exports of goods and services and to provide relief of the tax on certain merit goods and services. For example, in order to assist the poor, some supplies, such as basic food items as well as petrol, diesel and illuminating paraffin are zero-rated.

Exempt supplies are supplies of goods and services where VAT is not charged at either the standard or zero-rate. If a person makes only exempt supplies, that person cannot register as a vendor and therefore, cannot charge VAT on those supplies. Further, any VAT incurred to make exempt supplies cannot be deducted as input tax. For example, the rental of residential property and certain financial services are exempt from VAT.

VAT refunds occur when a vendor's input tax exceeds its output tax. This occurs when:

- Zero-rated supplies are made such as export of goods. Input tax can be claimed for purposes of making such supply but there will be no output tax to offset against the input tax;
- Investing in capital projects. Input tax on capital items results in large once-off input tax claims; or
- Restocking or selling merchandise below cost.

Only actual VAT payments and VAT refunds of registered VAT vendors are covered in this chapter. Import VAT collected from importers is addressed in Chapter 5.

# VALUE ADDED TAX

This chapter gives an overview of:

- VAT register;
- Payments and refunds;
- Input and output tax; and
- Distribution of vendors by turnover group.

## VAT REGISTER

It is mandatory for a business that earned income, in excess of R1 million in any consecutive 12-month period to register for VAT. A business may also voluntarily choose to register if the income earned in the past 12-month period exceeded R50 000.

As a result of more stringent registration requirements and improved risk-based vetting of refunds, the number of vendors registered for VAT continued to decline in the period under review. This was due to the introduction of improved authentication of vendors that further limited the risk to the fiscus. A vendor is regarded as active if a payment was received or a refund made to the vendor during the fiscal year.

In 2012/13 there were 650 540 registered VAT vendors of which 425 576 (65.4%) were active (see *Table 4.1*).

**Table 4.1: Number of registered VAT vendors, 2009/10 – 2012/13**

Fiscal year	Registered <sup>1</sup>	Active vendors	Percentage of registered
2009/10	685 523	493 098	71.9%
2010/11	664 267	466 085	70.2%
2011/12	652 349	439 170	67.3%
2012/13	650 540	425 576	65.4%

1. As per register at 31 March of each year. Excludes coded cases where status is in suspense or estate or address unknown.

## PAYMENTS AND REFUNDS

### By sector

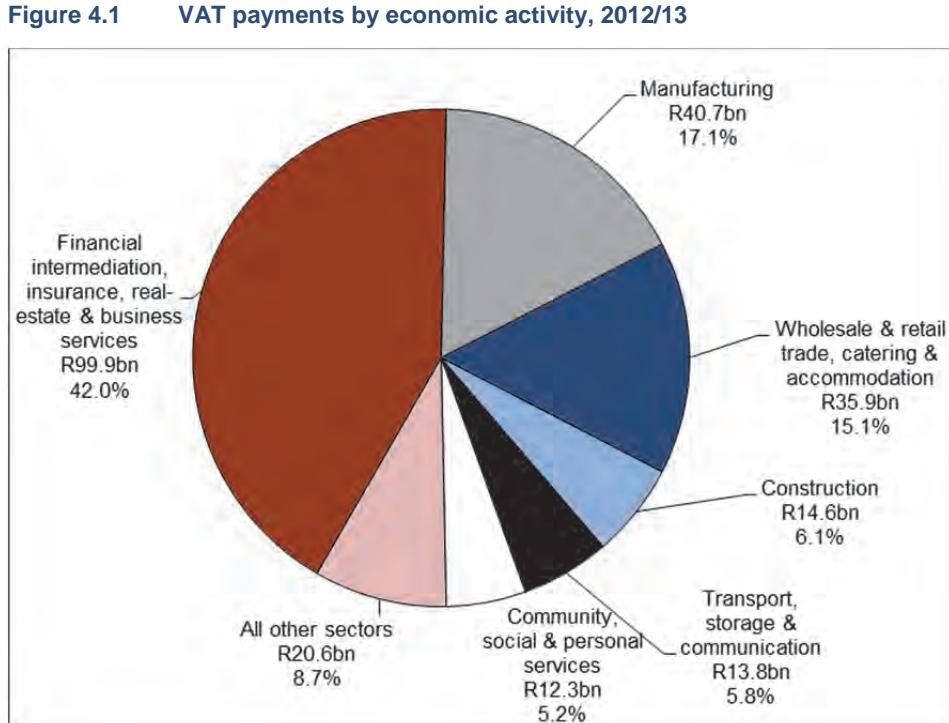

The largest number of VAT vendors in 2012/13 were in the *Financial intermediation, insurance, real-estate & business services* sector (41.4%) followed by *Wholesale & retail trade, catering & accommodation* (20.1%) and *Agriculture, forestry & fishing* (13.6%) sectors.

Vendors in the *Financial intermediation, insurance, real-estate & business services* sector paid the largest contribution by a single sector of R99.9 billion (42.0%) gross domestic VAT payments in 2012/13. At the other end of the scale, only 0.6% of vendors were in the *Mining & quarrying* sector and they contributed 3.1% of the total gross domestic VAT payments for 2012/13. However, they received 23.8% of VAT refunds. The extent of mineral exports (zero-rated sales) makes the *Mining & quarrying* sector a negative contributor to net VAT.

*Figure 4.1* shows the VAT payments by economic activity.

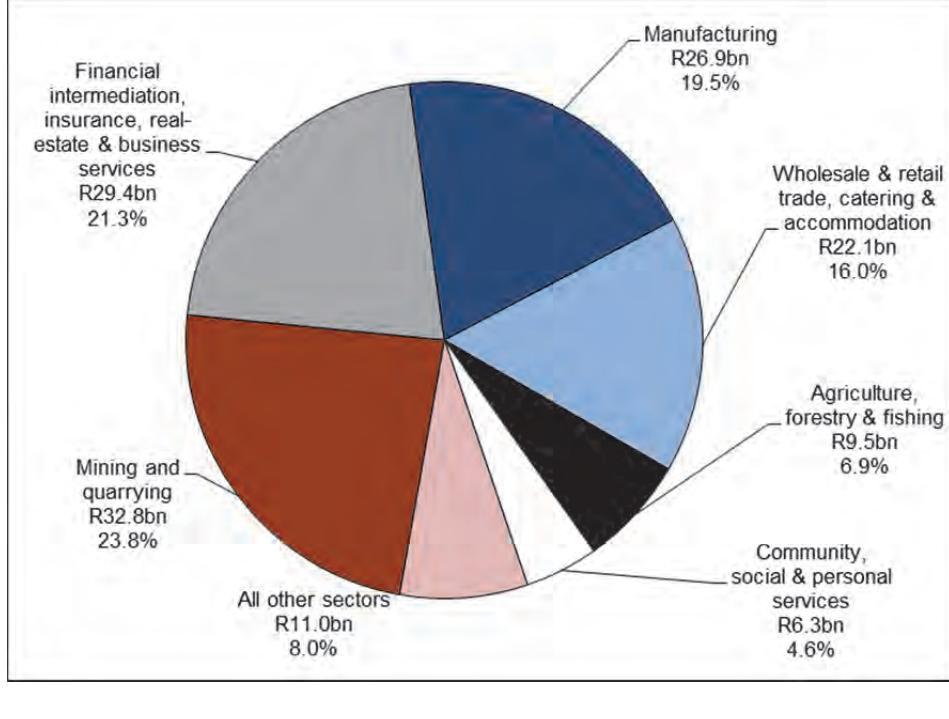

# VALUE ADDED TAX

**Figure 4.1 VAT payments by economic activity, 2012/13**

The largest VAT refunds accrued to the *Mining & quarrying* sector due to zero-rating of exports; the *Financial intermediation, insurance, real-estate & business services* sector as financial services are zero-rated and the *Manufacturing* sector due to capital investment and export activity as significant input tax is claimable (see *Figure 4.2*).

**Figure 4.2 VAT refunds by economic activity, 2012/13**

# VALUE ADDED TAX

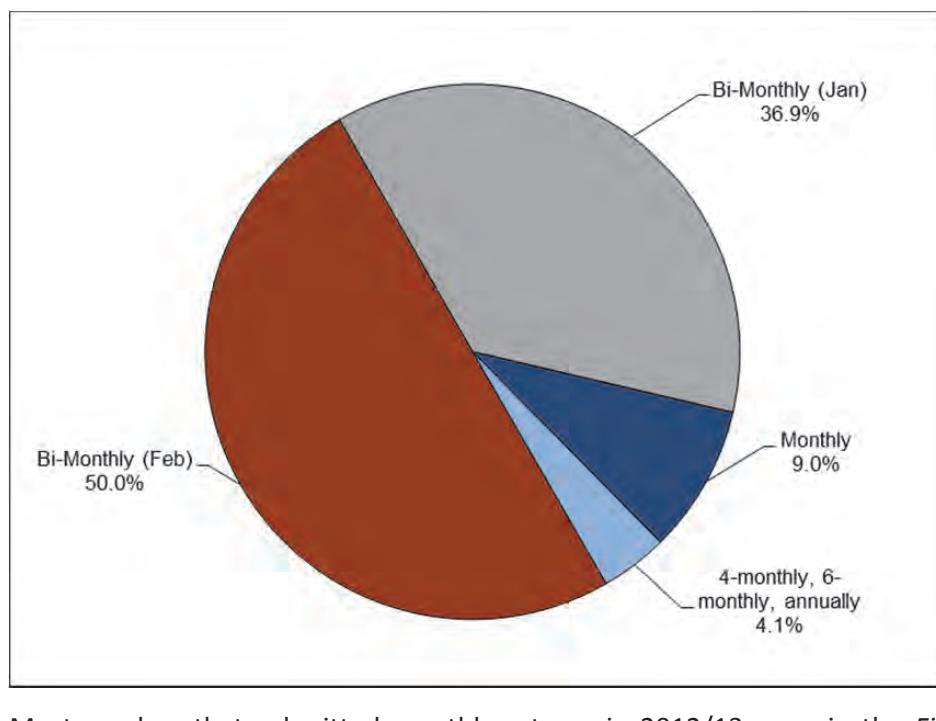

Table A4.1.1 shows the number of VAT vendors, payments and refunds for each sector. Table A4.1.2 uses these SARS sector codes and reclassifies these codes according to the Standard Industrial Classification (SIC). It should be noted that SARS' sector codes are not yet fully aligned with the SIC system used by Statistics South Africa.

## By payment category

Most vendors account for and pay their VAT to SARS bi-monthly (every two months). However, when the value of a vendor's taxable supplies (turnover) in a 12-month period exceeds R30 million the vendor is required to account for and pay VAT on a monthly basis. Some farming enterprises are allowed to pay VAT 6-monthly (twice a year) and small businesses with taxable supplies less than R1.5 million in any consecutive 12-month period may pay their VAT every four months.

Close to 90% of vendors submitted returns on a bi-monthly basis. However, the 9.0% that submitted on a monthly basis contributed 75.1% of VAT payments and accounted for 87.5% of VAT refunds. Figure 4.3 shows the distribution of vendors by payment category.

Figure 4.3 VAT vendors by payment category, 2012/13

Most vendors that submitted monthly returns in 2012/13 were in the *Financing, insurance, real-estate & business services* (25.0%) sector followed by the *Retail trade* (14.4%) sector.

Table A4.2.1 provides a summary of the VAT payments and refunds by payment category. Tables A4.2.2 to A4.2.5 provide a breakdown of the payments and refunds by sector for the different payment categories.

## By type of enterprise

Companies and close corporations accounted for 70.4% of VAT vendors for 2012/13. They contributed 91.0% of the Domestic VAT payments and accounted for 89.6% of the VAT refunds. Although individuals (sole proprietors) comprised 19.1% of VAT vendors, they only contributed 3.0% of the Domestic VAT payments and accounted for 1.6% of refunds.

# VALUE ADDED TAX

Table A4.3.1 shows a summary of Domestic VAT payments and refunds by type of enterprise.

## INPUT AND OUTPUT TAX

The mechanics of the VAT system are based on a subtractive or credit input method which allows businesses (vendors) to deduct the VAT incurred on business expenses (input tax) from the VAT collected on the supplies made by the business (output tax). The vendor may deduct the VAT paid during the preceding stages of the production and distribution chain. There are, however, some expenses for which input tax cannot be claimed. These include the acquisition of motor vehicles and entertainment expenses.

The amount of VAT payable by the vendor or refundable to the vendor is calculated by subtracting the VAT paid to suppliers (input tax) from the VAT charged on supplies made (output tax). VAT returns submitted to SARS result in a payment to SARS, refund by SARS or a nil return.

The input and output tax tables (*Tables A4.4.1 to A4.4.3*) indicate the values reflected in the actual VAT return submissions (VAT201 form).

The values for VAT payments and refunds, shown in *Table A4.1.1*, do not match the actual collections for a variety of reasons. These include:

- Adjustments may be made during the audit process;
- Actual payments may not have been made and form part of debt; or
- Refunds may be delayed due to additional verification procedures.

The total values for output tax and input tax declared are the sum of all returns and includes the intermediate transactions between VAT vendors. Because there is no output tax payable on the supply of zero-rated goods and services, the output tax of these goods and services is zero in the output tax. However, the input tax claimed on these goods and services is included in the input tax totals.

No VAT is charged on the supply of exempt goods and services which means that no claims for input tax (or deemed input tax) can be claimed on these goods and services. Changes in the use of goods and services, changes in accounting practices as well as the writing off or recovery of bad debts is added to or subtracted from the total output tax declared and input tax claimed.

*Table 4.2* shows output tax by class of supply.

**Table 4.2: Output tax by class of supply, 2011/12 – 2012/13**

R million Fiscal year	Standard rate (excl. capital goods and services and accommodation)	Standard rate (only capital goods and/or services)	Supply of accommodation	Adjustments <sup>1</sup>	Total output tax
2011/12	880 213	27 758	1 825	8 639	<b>918 435</b>
2012/13	946 799	29 778	2 009	7 551	<b>986 137</b>
<b>Percentage of total</b>					
2011/12	95.8%	3.0%	0.2%	0.9%	<b>100.0%</b>
2012/13	96.0%	3.0%	0.2%	0.8%	<b>100.0%</b>

<sup>1</sup>. Includes Change in use and export of second-hand goods, as well as Other and imported services.

# VALUE ADDED TAX

During 2012/13 the supply of standard-rated goods and services contributed 96.0% of the total output tax. The supply of capital goods only contributed 3.0%. This is because capital goods are not traded as frequently as non-capital goods.

*Table 4.3 shows input tax by class of supply.*

**Table 4.3: Input tax by class of supply, 2011/12 – 2012/13**

R million Fiscal year	Claimed on capital goods and/or services	Claimed on capital goods imported	Claimed on other goods and/or services	Claimed on other goods imported	Claimed on adjustments <sup>1</sup>	Total input tax
2011/12	99 400	10 664	648 998	58 874	11 384	829 320
2012/13	100 856	9 862	698 770	72 426	8 068	889 981
<b>Percentage of total</b>						
2011/12	12.0%	1.3%	78.3%	7.1%	1.4%	100.0%
2012/13	11.3%	1.1%	78.5%	8.1%	0.9%	100.0%

1. Includes Change in use; Bad debts and Other.

The largest portion of input tax (78.5%) during 2012/13 was claimed for the purchase of other goods and services. Claims as a result of capital purchases accounted for 11.3% of input tax, input tax on imports were responsible for a further 9.2% and the remaining inputs were as a result of adjustments.

*Table 4.4 illustrates that for every R1 of Domestic VAT paid in 2012/13 there was a VAT refund of R0.60.*

**Table 4.4: Relationship between Domestic VAT payments and VAT refunds, 2009/10 – 2012/13**

Rand Fiscal year	For each R1 Domestic VAT payment, there is a VAT refund of
2009/10	0.57
2010/11	0.56
2011/12	0.60
2012/13	0.60

The relationship between output and input tax is best illustrated by calculating how much output tax is declared to finally collect R1 in Domestic VAT and how much input tax is claimed to refund R1 in VAT.

*Table 4.5 illustrates that, irrespective of whether the economy is growing or shrinking, the ratios move in a fairly narrow range. It is merely the number of the declarations that varies according to the level of economic activity.*

**Table 4.5: Output/input tax declared for each R1 Domestic VAT collected and refunded, 2009/10 – 2012/13**

Rand Fiscal year	For each R1					
	Domestic VAT payments there is input claimed of	Domestic VAT payments there is output declared of	Net Domestic VAT payments	VAT refunded there is input claimed of	VAT refunded there is output declared of	Net VAT refunded
2009/10	-2.22	3.22	1.00	-2.29	1.29	-1.00
2010/11	-2.27	3.27	1.00	-2.40	1.40	-1.00
2011/12	-2.34	3.34	1.00	-2.32	1.32	-1.00
2012/13	-2.32	3.32	1.00	-2.30	1.30	-1.00

# VALUE ADDED TAX

For each R1 in domestic VAT collected in 2012/13:

- R3.32 in output tax was declared (R799.0 billion ÷ R240.4 billion); and
- R2.32 in input tax was claimed (R558.6 billion ÷ R240.4 billion).

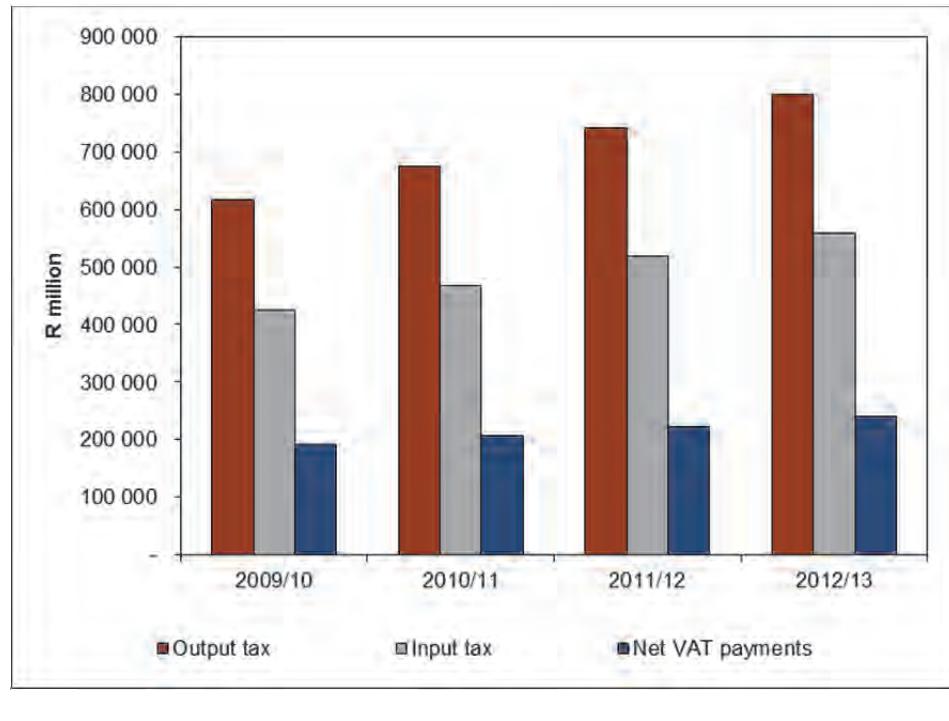

For each R1 in VAT refunded in 2012/13:

- R1.30 in output tax was declared (R187.1 billion ÷ R144.3 billion); and
- R2.30 in input tax was claimed (R331.4 billion ÷ R144.3 billion).

Some sectors differ significantly from these aggregate ratios. The *Mining & quarrying* sector, which claimed the most refunds in 2012/13 (R32.8 billion), declared only R0.50 in output tax and claimed R1.50 in input tax for each R1 in VAT refunds claimed. This was mainly because of the large volume of exports in this sector.

The input and output tax relationship is shown in *Figure 4.4* while *Tables A4.5.1* and *A4.5.2* show these ratios for each sector.

**Figure 4.4      Composition of Domestic VAT payments (output/input), 2009/10 – 2012/13**

## DISTRIBUTION OF VENDORS BY TURNOVER GROUP

Turnover, as shown in *Figure 4.5* and *Table A4.6.1*, is based on a system-calculated annualised turnover for each vendor that uses the turnover as declared during the 12-month period of each fiscal year.

The manner in which the annualised turnover is calculated is described below:

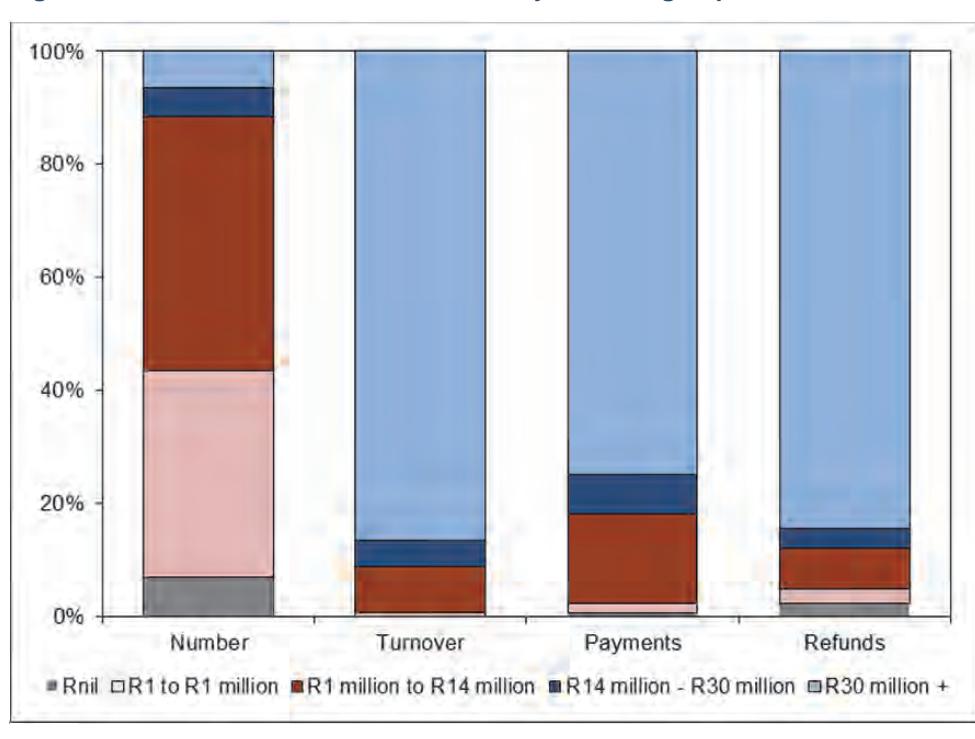

- If a vendor, who is registered to pay VAT on a monthly basis, submitted all 12 returns for a one year period on time, the turnover would be calculated as the sum of the turnover declared on the 12 returns.

# VALUE ADDED TAX

- However, if the vendor submitted fewer than the 12 required returns, the projected turnover would be calculated by dividing the turnover for the specific tax periods under review by the number of returns submitted and multiplying by 12 to obtain an annualised turnover. If the vendor, for example, submitted 10 returns, the turnover would be divided by 10 and multiplied by 12.

In 2012/13, 43.6% of VAT vendors had a turnover of R1 million or less. These vendors, however, accounted for only 2.3% of Domestic VAT payments and 4.8% of VAT refunds. In contrast, 2.2% of VAT vendors that had an annual turnover greater than R100 million accounted for 62.2% of Domestic VAT payments and 76.7% of refunds.

**Figure 4.5 Distribution of VAT vendors by turnover group, 2012/13**

1. SARS' source of income code is used to classify according to the Standard Industrial Classification (SIC) system. SARS' source of income code is not fully aligned with the SIC system that Statistics South Africa uses.

2. Includes the following SARS sectors – Bricks, ceramic, glass, cement and similar products; Chemicals and chemical, rubber and plastic products; Clothing and footwear; Coal and petroleum products; Food, drink and tobacco; Leather, leather goods and fur (excl. footwear & clothing); Machinery and related items; Metal (including metal products); Other manufacturing industries; Paper, printing and publishing; Scientific, optical and similar equipment; Textiles; Transport equipment; and Wood, wood products and furniture.

3. Includes the following SARS sectors – Catering and accommodation; Retail trade; Specialised repair services; Vehicles, parts and accessories; and Wholesale trade.

4. Includes the following SARS sectors – Agencies and other services; Financing, insurance, real estate and business services; and Research and scientific institutes.

5. Includes the following SARS sectors – Educational services; Public administration; Recreation and cultural services; and Social and related community services.

6. Includes where the source of income was indicated as Other (as per SARS source code) or where the source of income was left blank on the return.

# IMPORT VAT AND CUSTOMS DUTIES

For the 2012/13 fiscal year:

9.4%

**Registered number of importers  
= 265 497**

29.0%

## Growth of Import VAT y/y due to

- Strong imports in capital equipment and vehicles
- Gains also from deteriorating domestic currency

Machinery, mechanical appliances and electrical equipment contributed most to Import VAT

## Vehicles, aircraft, vessels & associated transport equipment

70.8%

Main contributor to *Ad valorem* Import duties

32.5%

Accounted for Customs duties

## Of the total Import VAT, Customs duties and *Ad valorem* import duties

The main contributors by world zone are:

# IMPORT VAT AND CUSTOMS DUTIES

## 5 IMPORT VAT AND CUSTOMS DUTIES

### KEY HIGHLIGHTS

For the 2012/13 fiscal year:

- Import Value-Added Tax (VAT) grew by 9.4% compared with the previous year mainly as a result of strong imports in capital equipment and vehicles as well as gains from a deteriorating domestic currency;
- *Machinery, mechanical appliances & electrical equipment* contributed the most to Import VAT at 29.0%;
- *Vehicles, aircraft, vessels & associated transport equipment* accounted for 32.5% of Customs duties and was the main contributor to *Ad valorem* import duties (Duty 1-2B) at 70.8%;
- Imports from Asia and Europe world zones accounted for 81.4% of the combined total Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B);
- On a country basis most imports originated from China and Germany. China accounted for 21.8% of the combined total Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B) and Germany 12.4%; and
- About 73% of all Import VAT collected was claimed as input VAT by vendors. The remaining Import VAT was paid by State departments, vendors making exempt supplies and importers not registered for VAT. Note that there may also have been erroneous classifications of input VAT. Around 61% of the Import VAT claimed as input VAT by vendors was claimed on VAT returns of vendors in a refund position. The balance was set off against output VAT on VAT returns reflecting payment due. As a result, about 45% of Import VAT was claimed on a VAT refund return.

### INTRODUCTION

Value-Added Tax (VAT) is levied on the importation of goods and services into South Africa. Customs duties are imposed on designated imported goods. Additional *Ad valorem* import duties (Duty 1-2B) are levied on a wide range of luxury or non-essential items such as perfumes, firearms and games.

This chapter gives an overview of Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B).

# IMPORT VAT AND CUSTOMS DUTIES

## IMPORT VAT, CUSTOMS DUTIES AND AD VALOREM IMPORT DUTIES (DUTY 1-2B)

Import VAT is levied at a rate of 14% on the importation of goods into South Africa. Some imported goods, such as certain mineral oils and certain basic food items are exempt or zero-rated in terms of the VAT Act of 1991.

The value that is placed on imported goods is deemed to be the value of the goods for the application of Customs duty as well as any additional duty the Customs and Excise Act levies on the importation. For the purposes of Import VAT calculations, the value is uplifted by a further 10%. However, when goods are traded intra-Southern African Customs Union (SACU) the value is not increased by the 10% for Import VAT calculations and the imports are exempt from duties.

Customs values are set by the General Agreement on Tariffs and Trade (GATT) valuation code. This code has six methods of valuation. Most goods are valued using method one which is the actual price paid or payable by the buyer of the goods. The "Free-on-board"<sup>1</sup> price forms the basis for the value but allows for certain deductions, such as interest charged on extended payment terms, as well as additions such as some royalties.

These customs values are declared to Customs on a Bill of Entry (BOE) at the time of importation. The tables in this chapter reflect the values as processed on these BOE transactions and will therefore differ from the actual collections. This is due to timing differences between the date of declaration and the date that the amount payable on the declaration was settled. It is important to note that the settlement dates differ depending on whether or not the importer participates in the Customs deferment scheme.

The differences between the two payment options are:

- An importer who is registered on the Customs deferment scheme has an account with SARS. This account is closed every month and the amount owed has to be settled within seven days of billing;
- An importer who is not registered for the Customs deferment scheme is required to settle the Import VAT and Customs duty liability with a payment before the goods are released.

### By customs section

*Table A5.1.1* shows the customs value of imports, Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B) by Harmonised System<sup>2</sup> (HS) section. The table shows that the *Machinery, mechanical appliances & electrical equipment* HS section accounts for the largest customs value of goods imported in 2012/13 (19.0%), followed by *Mineral products* (16.8%) and *Vehicles, aircraft, vessels & associated transport equipment* (13.2%).

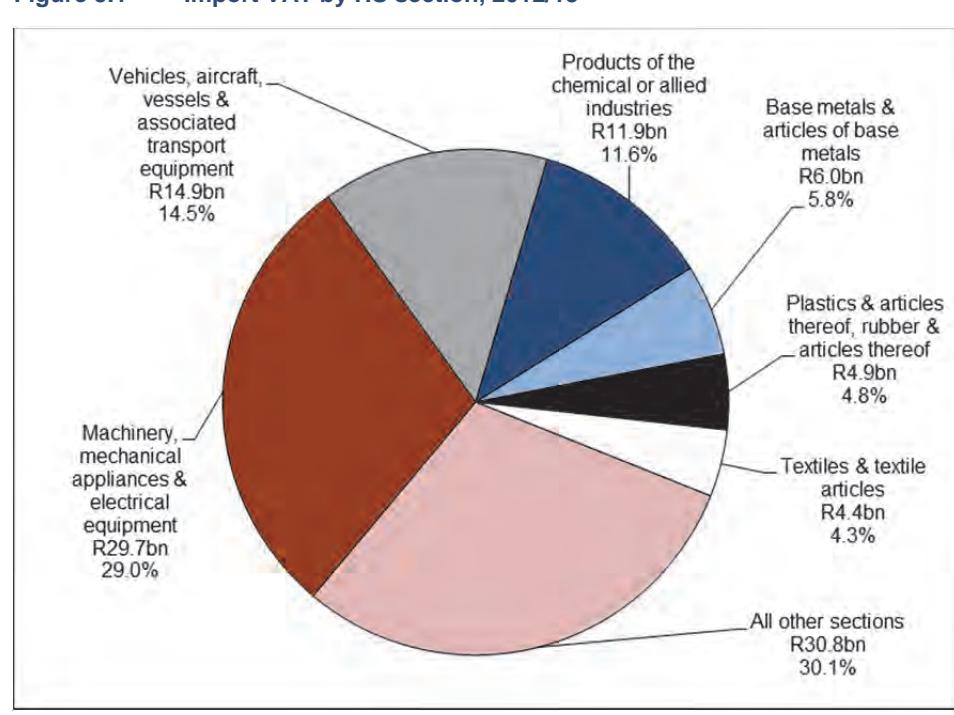

<sup>1</sup> Free-on-board refers to the value for customs duty purposes and includes the transactional value (the price actually paid or payable) plus all costs, charges and expenses up to the point where the goods are loaded onto a ship (or other vehicle) at the port of export.

<sup>2</sup> The Harmonised System Nomenclature, also known as the International Convention on the Harmonised Commodity Description and Coding System (or Harmonised System (HS)), is the system according to which all internationally traded products, components or commodities are classified. This international system is currently used by the World Customs Organisation (WCO) and by over 200 countries and customs or economic unions, which account for 98% of world trade.

# IMPORT VAT AND CUSTOMS DUTIES

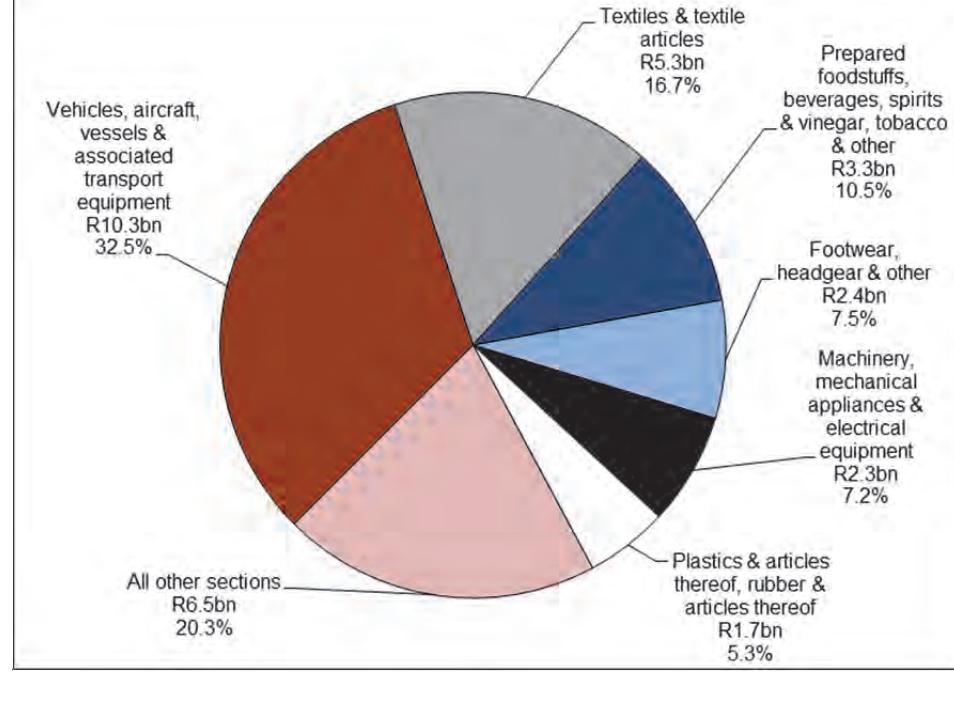

Import VAT for 2012/13, as shown in *Figure 5.1*, was mostly collected from the importation of *Machinery, mechanical appliances & electrical equipment* (29.0%), *Vehicles, aircraft, vessels & associated transport equipment* (14.5%) and *Products of the chemical or allied industries* (11.6%).

**Figure 5.1 Import VAT by HS section, 2012/13**

The largest contributors of Customs duties in 2012/13, as shown in *Figure 5.2*, were *Vehicles, aircraft, vessels & associated transport equipment* (32.5%), *Textiles & textile articles* (16.7%) and *Prepared foodstuffs, beverages, spirits & vinegar, tobacco & other* (10.5%).

**Figure 5.2 Customs duties by HS section, 2012/13**

# IMPORT VAT AND CUSTOMS DUTIES

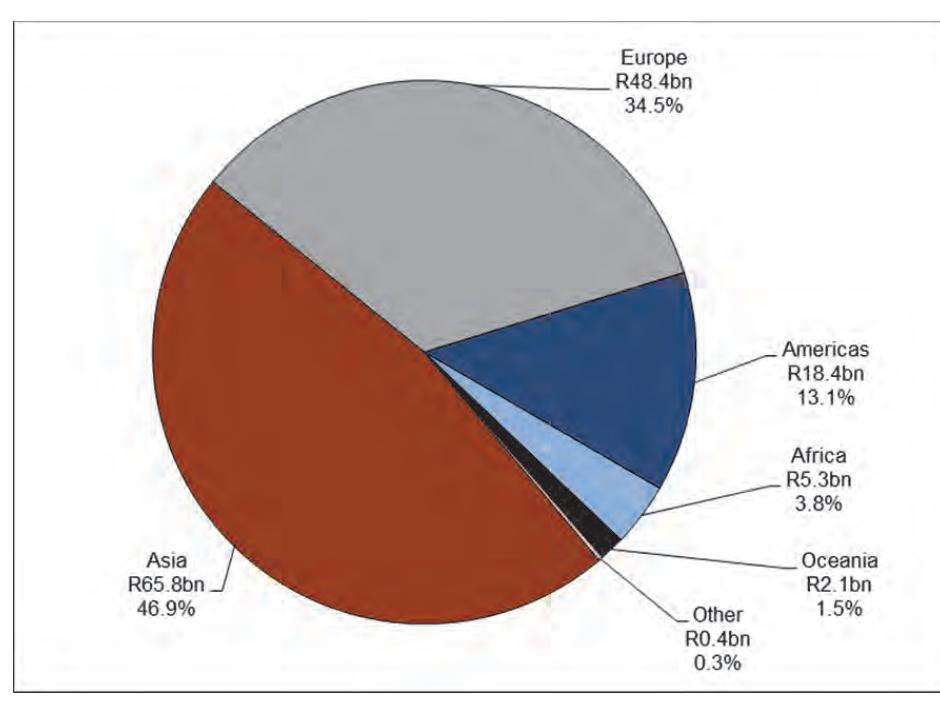

*Ad valorem* import duties (Duty 1-2B) for 2012/13 were mostly collected from the importation of *Vehicles, aircraft, vessels & associated transport equipment* (70.8%) and *Machinery, mechanical appliances & electrical equipment* (25.3%).

## By world zone and selected trade blocs

Imports from Asia accounted for 46.9% of the combined total Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B), followed by Europe at 34.5% and the Americas at 13.1%.

Figure 5.3 and Table A5.2.1 show the combined total of Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B) by world zone as well as selected trade blocs.

**Figure 5.3 Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B) by world zone, 2012/13**

## By country of origin

The top five countries of origin – China, Germany, the United States of America (USA), the United Kingdom (UK) and Japan - account for more than half of the combined total Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B) for 2012/13 (See Figure 5.4).

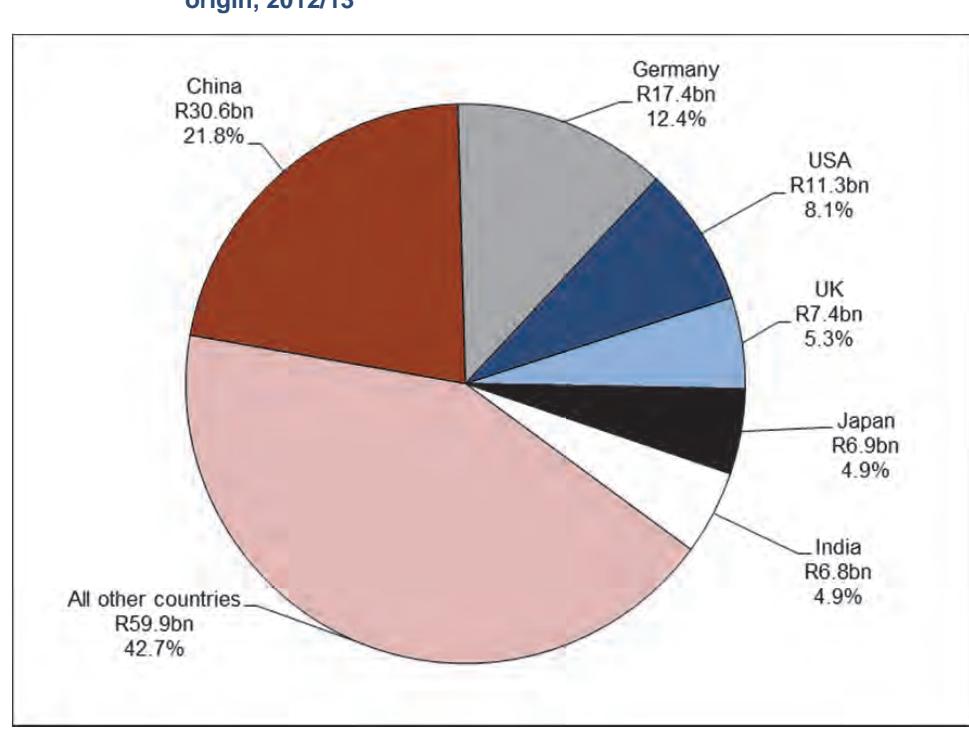

During 2012/13, China and Germany continued to be the largest suppliers of goods coming into South Africa. China accounted for 21.8% of the combined total Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B) and Germany contributed 12.4%. Imported goods from China with the highest customs value and Import VAT were computers. Chinese goods that incurred the most Customs duties were footwear and the largest contributors to *Ad valorem* import duties (Duty 1-2B) were cellular phones.

Imported goods from Germany with the highest customs value and Import VAT were Motor Industry Development Programme (MIDP) automotive parts. German goods that attracted the most Customs duties and *Ad valorem* import duties (Duty 1-2B) were motor vehicles.

# IMPORT VAT AND CUSTOMS DUTIES

Table A5.3.1 shows the 25 countries that were the largest suppliers of goods to South Africa in 2012/13 as determined by the combined total of Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B).

**Figure 5.4 Import VAT, Customs duties and *Ad valorem* import duties (Duty 1-2B) by country of origin, 2012/13**

## The difference between MIDP and APDP

The MIDP was introduced in 1995 to modernise South Africa's motor industry and create a platform to enable it to become a reliable producer and supplier to the global market. Incentives developed under that programme were significant. However, the MIDP ended in 2012.

Its successor, the Automotive Production and Development Programme (APDP), aims to create a platform for the production of greater local content. This programme is scheduled to run until 2020.

There are many differences between the two programmes. The most noteworthy is that the MIDP was export-driven and the APDP is production-driven.

Under the earlier policy, vehicle manufacturers were rewarded for exports with equal-value duty-free credits for imported vehicles and components. The only way to use incentives was to increase imports.

Although the APDP rewards production rather than exports, the benefit of the programme is the same as its predecessor - duty credits. The effectiveness of the APDP will only become clear in 2014 when the benefits of the earlier MIDP are no longer significant.

Table A5.3.1: Import VAT and Customs duties: Customs value, Import VAT, Customs duties and Ad valorem import duties (Duty 1-2B) by country of origin, 2009/10 – 2012/13

1.

Top-25 countries as determined by the total of import VAT, Customs duties and Ad valorem import duties (Duty 1-2B) for 2012/13.

2. As per Bill of Entry (BOE) processed and not actual revenue collected.

3. Duty 1-2B refers to the Ad valorem import duties.

4. Total of import VAT, Customs duties and Ad valorem import duties (Duty 1-2B).

# GLOSSARY

## GLOSSARY

*Ad valorem* import duties

These duties are levied on certain selected locally manufactured goods. The duties are levied at the same rate of duty on imported goods of the same class or kind and are levied on those items specified in schedule 1 Part 2B of the Harmonized System.

African Union (AU)

The AU is a union consisting of 54 African states. The most important decisions of the AU are made by the Assembly of the African Union, a semi-annual meeting of the heads of state and government of its member states. See also *Southern African Development Community (SADC)*.

Air passenger departure tax

Is a tax imposed on international air travel. As from 1 October 2011 fee-paying passengers departing on international flights pay a tax of R190 per passenger. Passengers flying to Botswana, Lesotho, Namibia and Swaziland (BLNS countries) pay R100 per passenger.

Automotive Production and Development Programme (APPD)

This is the successor of the MIDP and is aimed at creating a platform for more local content to be produced under this initiative. This programme is scheduled to run until 2020. See also *Motor Industry Development Programme (MIDP)*.

BLNS countries

South Africa is one of the five signatories to the Southern African Customs Union (SACU) agreement with Botswana, Lesotho, Namibia and Swaziland (so called BLNS countries). See also *Southern African Customs Union (SACU)*.

BRICS

BRICS is an acronym for the powerful grouping of the world's leading emerging market economies, namely Brazil, Russia, India, China and South Africa.

Capital Gains Tax (CGT)

This tax was introduced in October 2001 and forms part of the income tax system and is based on capital gains made upon the disposal of assets.

# **GLOSSARY**

## CIVETS

CIVETS, is an acronym for Columbia, Indonesia, Vietnam, Egypt, Turkey and South Africa. These countries are favoured for several reasons such as a diverse and dynamic economy and a young, growing population.

## CO<sub>2</sub> tax on motor vehicle emissions

The main objective of this tax is to influence the composition of South Africa's vehicle fleet to become more energy efficient and environmentally friendly.

## Company Income Tax (CIT)

Comprises provisional and assessed taxes paid by companies (net of refunds).

## Cost of revenue collection

Is an indication of the efficiency with which revenue is collected.

## Customs duties/import duties

These are levies imposed on goods imported into South Africa. Import duties are imposed as a means to protect certain local producers. They also include anti-dumping and countervailing duties.

## Diamond export levy

The objective of the levy is to stimulate the local diamond polishing industry. The levy rate is 5% calculated on the value of the unpolished or rough diamond as released for export from the Diamond Exchange and Export Centre.

## Direct taxes

Taxes charged on taxable income or capital of individuals and legal entities.

## Donations tax

This tax is levied at a flat rate of 20% on the value of the donation. The first R100 000 donated in each year by a natural person is exempt from donations tax. In the case of a taxpayer who is not a natural person, the exempt donations are limited to casual gifts not exceeding R10 000 per year in total. Dispositions between spouses and donations to certain public benefit organisations are exempt from donations tax.

## Duty 1-2B

Refers to the *Ad valorem* import duties.

## Electricity levy

This is a levy applied to electricity generated from non-renewable and nuclear energy sources at 2.5c/kWh from 1 April 2011. Some of this revenue is set aside to fund the rehabilitation of roads damaged as a result of the haulage of coal for electricity generation.

## **GLOSSARY**

Employees' tax	Is a tax that employers must deduct from the employment income of employees – such as salaries, wages and bonuses - and pay over to SARS monthly. It is withheld daily, weekly, or monthly, when these amounts are paid or become payable to the employees. See <i>Pay-as-you-earn (PAYE)</i> .
Environmental levy	Introduced with the purpose of protecting and conserving the local and global environment. See also <i>Plastic bags levy, Incandescent light bulb levy, electricity levy</i> and <i>CO<sub>2</sub> tax on motor vehicle emissions</i> .
Estate duty	Is calculated at a rate of 20% on the dutiable amount of the estate. Certain admissible deductions from the total value of the estate are allowed.
Excise duties	Are levied on certain locally manufactured goods and on their imported equivalents. This duty is levied as a specific duty on tobacco and liquor products, and as an <i>ad valorem</i> duty on cosmetics, televisions, audio equipment and motor cars. Relief from excise duty is available where excisable products are exported.
Gross Domestic Product (GDP)	A measure of the total national output, income and expenditure in the economy.
Great Recession	Reference to the recession that started in December 2007 in terms of the Great Depression of the 1930s. Generally, the Great Recession lasted longer and was more severe than prior recessions. However, the severity of economic decline has not eclipsed the levels reached by the Great Depression.
Fiscal drag	When salaries are adjusted to compensate for the effect of inflation on the value of money, the taxpayer is pushed into a higher income tax bracket where higher rates apply. In this way the individual's effective tax rate is increased, even though real incomes may not be increasing.
Fiscal year	Is the financial year of government i.e. from 1 April to 31 March of the subsequent year.
Fuel levy	Is a specific excise tax imposed in terms of the Customs and Excise Act. Relief is available through a diesel refund system for farming activities, forestry, mining, offshore vessels, harbour vessels, locomotives used for rail freight, and large electricity generation plants.

# **GLOSSARY**

Harmonised System (HS)	Is essentially, the system according to which all internationally traded products, components, or commodities are classified and is also known as the International Convention on the Harmonised Commodity Description and Coding System (Harmonised System).
Incandescent light bulb levy	Was introduced as from 1 November 2009 to promote energy efficiency and reduce electricity demand. Energy-saving light bulbs last longer, require five times less electricity and result in lower greenhouse gas emissions. The environmental levy of about R3 per bulb (between 1 cent and 3 cents per watt) is levied on incandescent light bulbs at the manufacturing level and on imports.
Income tax	Is a tax on income and profit and is levied on individuals, companies and trusts. It is the national government's main source of income and is imposed by the Income Tax Act 58 of 1962.
Indirect taxes	Are taxes imposed on goods and services (e.g. VAT) rather than on individuals or companies. See also <i>Direct taxes</i> .
Input VAT	Is when a vendor buys goods or services from another supplier, VAT is charged on the purchase price.
IRP5	An IRP5 is the employee's tax certificate that is issued to him/her at the end of each tax year. It details all employer/employee related incomes, deductions and related taxes. It is used by the employee specifically to complete his/her income tax return for a specific year.
Marginal income tax rate	The rate of tax on an incremental unit of income.
Mineral and Petroleum Resource Royalty (MPRR)	It is a levy imposed on exploration and extraction of minerals and petroleum resources. This levy took effect from 1 March 2010.
Motor Industry Development Programme (MIDP)	This programme was implemented on 1 September 1995. This programme has been reviewed twice since then and ended in 2012. The MIDP consists of three distinctive key areas: Light motor vehicle manufacturers; Medium and heavy motor vehicle manufacturers; and Local Component manufacturers. Participants save money in the form of a reduction on import duties due to the incentives of the MIDP programme. See also <i>Automotive Production and Development Programme (APDP)</i> .

# GLOSSARY

National Revenue Fund	The fund is the consolidated account of the national government into which all taxes, fees and charges collected must be paid.
Non-tax revenue	Is income received by the government in the form of interest and dividends (from parastatals, public entities) and as a result of administrative charges, licences, fees, and sales of goods and services.
Output VAT	Is the VAT charged by a vendor when they sell their own goods and services.
Pay-As-You-Earn (PAYE)	Is a tax that employers deduct from the employment income of employees this ensures that an employee's income tax liability is settled in a continuing fashion, at the same time that the income is earned. See also <i>Employees tax</i> .
Personal Income Tax (PIT)	Comprises all assessed and provisional taxes as well as PAYE paid by individuals (net of refunds).
Plastic bags levy	Is a tax on certain types of plastic shopping bags. The levy aims to encourage the reuse of these bags.
Platinum group metals (PGMs)	PGMs are found as a compound which includes six pure metals with high melting points: platinum (Pt), palladium (Pd), rhodium (Rh), iridium (Ir), osmium (Os) and ruthenium (Ru); as well as gold and base metals such as nickel, copper and cobalt. In addition to their oxidation and reduction properties, these metals have the ability to stay stable at high temperatures and are extremely resistant to corrosion.
Primary rebate	Is a reduction in income tax that is available to all taxpayers. See also <i>Secondary rebate</i> and <i>Tertiary rebate</i> .
Progressive tax	Is a system of taxation that collects proportionately more from the rich than from the poor.
Provisional tax (companies)	For any given tax year, are paid in three instalments: the 1 <sup>st</sup> due six months into the company's tax year; the 2 <sup>nd</sup> at the end of the tax year; and the 3 <sup>rd</sup> six months after the end of the tax year (unless the tax year ends at the end of February, then the third is due seven months after the end of the tax year). The majority of provisional tax payments from companies are received during March, June, September and December.

# GLOSSARY

Provisional tax (individuals)	Is a system that makes taxpayers provide for their final tax liability by paying two amounts during the course of the year of assessment, and a third payment 7 months after the end of the year of assessment.
Provisional tax (paragraph 19(3))	Paragraph 19(3) of the Fourth Schedule to the Income Tax Act allows the Commissioner to call upon the taxpayer to justify an estimate made by the taxpayer, or to provide particulars of income and expenditure or any other particulars that may be required for the year of assessment in respect of which the provisional tax payment is being made. If the Commissioner is not satisfied with the estimate, he may increase it to an amount that he considers reasonable.
Provisional tax (80% rule)	The 80% rule requires taxpayers with taxable income in excess of R1 million to settle at least 80% of their tax liability by the time they make their second provisional payment. This change was implemented for companies with year ends after 1 March 2009.
Residence-based tax system	Is a system where residents are taxed on their worldwide income, irrespective of where their income was earned.
Secondary rebate	Is a reduction in income tax that is available to taxpayers between the age of 65 and 75 years. See also <i>Primary rebate</i> and <i>Tertiary rebate</i> .
Secondary Tax on Companies (STC)	Tax on dividends declared by a company, calculated at the rate of 10% (12.5% prior to 1 October 2007) of the net amount of dividends declared.
Securities Transfer Tax (STT)	Is a tax levied on every transfer of a security and is levied at a rate of 0.25%. This tax was known as Uncertificated securities tax prior to 1 July 2008.
Skills Development Levy (SDL)	Is a compulsory levy to fund training by companies. The rate is 1% of a company's total payroll and is payable by employers that are registered with SARS for employees' tax purposes and which have an annual payroll of more than R500 000 (R250 000 before 1 August 2005).
Southern African Customs Union (SACU)	An agreement that allows for the unrestricted flow of goods and services, and the sharing of customs and excise revenue between South Africa, Botswana, Namibia, Lesotho and Swaziland.

# GLOSSARY

Southern African Development Community (SADC)	SADC is an inter-governmental organisation. Its goal is to further socio-economic cooperation and integration as well as political and security cooperation among 15 southern African states. It complements the role of the African Union.
Specific excise duty	Is a tax on each unit of output or sale of goods, unrelated to the value of the goods e.g. alcoholic beverages or cigarettes.
Stamp duty	Was levied on leases of fixed property and until June 2008 on the registration of transfer of unlisted marketable securities. This tax was abolished with effect from 1 April 2009.
Standard Industrial Classification (SIC)	SIC is a system used for classifying industries. The SIC classification is used by Statistics South Africa, the South African Reserve Bank as well as the United Nations Statistics Division.
Tax amnesty	A period allowed by tax authorities during which taxpayers who are outside the tax net, but should be registered for tax purposes, can register for tax or disclose previously unreported taxable income without incurring penalties.
Tax base	The aggregated value of income, sales or transactions on which particular taxes are levied.
Tax buoyancy	It is a measure of the ratio of change in tax revenue given the change in the tax base (GDP).
Tax gap	The difference between the amount of taxes the Government should collect and the amount of taxes the Government actually collects. The tax gap is a result, mostly, of individuals and businesses understating income and overstating deductions and exemptions. Taxpayers who do not file returns on time also contribute to the tax gap.
Tax on retirement funds (TRF)	Was a tax levied on the gross interest, net rental and foreign dividend income of retirement funds i.e. pension, provident and retirement annuity funds. This tax was abolished in 2007.
Tax-to-GDP ratio	For public finance comparison purposes, a country's tax burden or tax-to-GDP ratio is computed by taking the total tax payments for a particular fiscal year as a fraction or percentage of the GDP for that year.

# GLOSSARY

Tax revenue	In terms of the System of National Accounts (SNA), tax revenue is defined as “a compulsory, unrequited payment to government”.
Tax year	Is the 12-month period for which tax is calculated. For individuals it starts on 1 March and ends at the end of February the following year, and for companies it is normally the financial year of the company for financial reporting purposes.
Taxable income	Refers to the income of an individual or a company which is subject to tax. This is not the same as actual income, as exemptions may apply and deductions may be claimed such as medical expenses in the case of individuals or depreciation, in the case of companies.
Tertiary rebate	Is a reduction in income tax that is available to taxpayers age 75 and older. See also <i>Primary rebate</i> and <i>Secondary rebate</i> .
Transfer duties	From 23 February 2011 to date this duty is payable by all persons when they acquire property as per a graduated rate that starts at 3% of the value above R600 000 and ends at a rate of 8% of the value exceeding R1.5 million.
Turnover tax	Is a simple tax that was introduced for micro businesses with a turnover not exceeding R1 million per annum. The objective is to reduce the tax compliance and administrative burden by simplifying and reducing the number of returns that have to be filed. This tax was introduced with effect from 1 March 2009.
Uncertificated securities tax	See <i>Securities Transfer Tax (STT)</i> .
Value-Added Tax (VAT)	Is levied at a standard rate of 14% on most goods and services subject to certain exemptions, exceptions and zero-ratings, provided for in the VAT Act (1991). VAT is levied on the supply of all goods and services rendered by registered vendors. VAT is also levied on the importation of goods and services into South Africa.
