

**A. Licensee particulars**

Warehouse number		Excise Client Code		Accounting Period From: <input type="text"/> To: <input type="text"/>
Licensee				
Company name				
Physical address				
Postal Code				

**B. Carbon dioxide equivalent declaration (section 4(2) of Carbon Tax Act, 2019, methodology):**

**B.1 Alternative method emissions factor:  $(M \times D \times 23) \times Y = X$**

**B.1.1 Use the prescribed Schedule for Carbon Tax Fugitive Emission Factors to calculate the Emission factor in Carbon Dioxide equivalent per tonne (X):**

IPCC Code	Source Activity	CH <sub>4</sub>	M	D	Y	X
				Density factor for coal mining and handling	The number 1000	Emission factor in Carbon Dioxide equivalent per tonne
<b>Totals</b>						

Note: If space is insufficient, complete an annexure sheet.

**B.2 Emissions equivalent:  $(N \times Q) = F$**

**B.2.1 Use the Total of N (mass in tonne) multiplied by total of X (Emission factor) to calculate the Emissions Equivalent (F):**

N	X	F
Total mass in tonne (N)	Emission Factor (Q)	Emissions Equivalent (F)

**C. The Emissions Equivalent figure as reflected in this DA180.01B.2 represented by F as above must be added with the DA180.01B.1 figure F and the sum thereof must be carried forward to the DA 180 section B3 (front page) to be inserted in the Total Fugitive Emissions field represented by F.**
