

SCHEDULE 1

CUSTOMS, EXCISE AND SALES DUTIES AND SURCHARGE

GENERAL NOTES

A. GENERAL RULES FOR THE INTERPRETATION OF THIS SCHEDULE

Classification of goods in this Schedule shall be governed by the following principles:

1. The titles of Section, Chapters and sub-Chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative Section or Chapter Notes and, provided such headings or Notes do not otherwise require, according to the following provisions:
2.
 - (a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this Rule), unassembled or disassembled.
 - (b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of Rule 3.
3. When by application of Rule 2(b) or for any other reason, goods are, prima facie, classifiable under two or more headings, classification shall be effected as follows:
 - (a) The heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.
 - (b) Mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3(a), shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.
 - (c) When goods cannot be classified by reference to 3(a) or 3(b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.
4. Goods which cannot be classified in accordance with the above Rules shall be classified under the heading appropriate to the goods to which they are most akin.
5. In addition to the foregoing provisions, the following Rules shall apply in respect of the goods referred to therein:
 - (a) Camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This Rule does not, however, apply to containers which give the whole its essential character;
 - (b) Subject to the provisions of Rule 5(a) above, packing materials and packing containers presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.
6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related subheading Notes and, mutatis mutandis, to the above Rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this Rule the relative Section and Chapter Notes also apply, unless the context otherwise requires.

B. DUTY ASSESSMENT

1. The expression "free" when used in the Rate of Duty column in Part 1 shall be regarded as a rate duty.
2. Any amount of duty payable shall be calculated to the nearest cent. For the purposes of this paragraph one half cent shall be regarded as a whole cent.
3. When a rate of duty in respect of any goods consists of two or more parts separated by the word "or", each such part shall be deemed to be a separate and complete rate of duty and such rate of duty yielding the higher or highest amount of duty shall be applicable in respect of such goods.
4. A rate of duty applicable under any heading or tariff item to any unit of mass, measure, quantity or any other characteristic shall, unless otherwise provided for in such heading or tariff item, apply proportionately to any part of such unit except in the case of a unit of quantity described in the statistical column in Part 1 of Schedule No. 1 as "u" (number of units).
5. Any duties on imported goods specified in Part 2, 3 and 5 of this Schedule are additional to any duties specified in Part 1 of the said Schedule in respect of such goods.

C. VALUE FOR DUTY PURPOSES

The expression "value for duty purposes" has the meaning assigned thereto in section 65.

D. MASS FOR DUTY PURPOSES

1. When goods are dutiable by mass units, assessment shall be based on their legal mass unless otherwise provided.
2.
 - (a) The legal mass of any goods in blocks, lumps, powders, granules, flakes, liquid and similar bulk forms packed in bags, drums or similar containers, with a net mass per container exceeding 5 kg, but excluding goods provided for otherwise in any tariff heading in Part 1 of Schedule No. 1, shall be deemed not to include the mass of such bags, drums or similar containers.
 - (b) The legal mass of any goods in blocks, lumps, powders, granules, flakes, liquids and similar bulk forms packed in bags, drums or similar containers, with a net mass per container not exceeding 5 kg and any other goods shall be deemed to include the mass of the immediate containers or other wrapping used for packing goods in sets or units or in other marketable quantities but not the mass of cartons or cases or other outer packing in which such sets or units or other marketable quantities are packed for ease of transport or consolidation purposes.
3. The net mass of any goods shall be the actual mass thereof excluding packing material.
4. The gross mass of any goods shall be deemed to include the legal mass and the mass of any outer packing material.
5. The legal mass or the net mass of any goods shall be determined by actual mass measurement or by deducting, in the discretion of the importer, from the gross mass or the legal mass, as the case may be, either the actual deductible tare ascertained by mass measurement or an average deductible tare determined by the Commissioner in respect of such goods.

2. Where, under General Rule 5 for the interpretation of the Harmonised System, packaging is included with the product for classification purposes, it shall be included for the purposes of determining origin.

TERRITORIAL REQUIREMENTS

ARTICLE 14

Principle of territoriality

1. Except as provided for in Articles 3, 4, 5 and 6 of this Protocol and paragraph 3, the conditions for acquiring originating status set out in Title II must be fulfilled without interruption in a SADC EPA State or in the EU.

 - (a) the returning goods are the same goods as those exported; and
 - (b) they have not undergone any operation beyond that necessary to preserve them in good condition while in that country or while being exported.
3. The acquisition of originating status in accordance with the conditions set out in Title II shall not be affected by working or processing done outside the EU or a SADC EPA State on materials exported from the EU or from a SADC EPA State and subsequently re-imported there, provided that:

5. For the purposes of applying the provisions of paragraphs 3 and 4, 'total added value' shall be taken to mean all costs arising outside the EU or a SADC EPA State, including the value of the materials incorporated there.
6. The provisions of paragraphs 3 and 4 shall not apply to products which do not fulfil the conditions set out in the list in Annex II or Annex II(a) or which can be considered sufficiently worked or processed only if the general tolerance laid down in Article 8(4) of this Protocol is applied.
7. The provisions of paragraphs 3 and 4 shall not apply to products of Chapters 50 to 63 of the Harmonised System.
8. Any working or processing of the kind covered by the provisions of this Article and done outside the EU or a SADC EPA State shall be done under the outward processing arrangements, or similar arrangements.

 4. Compliance with paragraphs 1 to 3 shall be considered as satisfied unless the customs authorities have reason to believe the contrary; in such cases, the customs authorities may request the declarant to provide evidence of compliance, which may be given by any means, including contractual transport documents such as bills of lading or factual or concrete evidence based on marking or numbering of packages or any evidence related to the goods themselves.

ARTICLE 16

Accounting segregation

1. Where considerable cost or material difficulties arise in keeping separate stocks of originating and non-originating fungible materials, the customs authorities may, at the written request of those concerned, authorise the so-called 'accounting segregation' method (hereinafter referred to as the 'method') to be used for managing such stocks.
2. The method shall ensure that, at any time, the number of products obtained which could be considered as originating in a SADC EPA State or in the EU is the same as that which would have been obtained had there been physical segregation of the stocks.
3. The customs authorities may grant the authorisation referred to in paragraph 1 subject to any conditions deemed appropriate.
4. The method shall be applied and the application thereof shall be recorded on the basis of the general accounting principles applicable in the country where the product was manufactured.
5. The beneficiary of the method may make out or apply for proofs of origin, as the case may be, for the quantity of products which may be considered as originating. At the request of the customs authorities, the beneficiary shall provide a statement of how the quantities have been managed.
6. The customs authorities shall monitor the use made of the authorisation and may withdraw it whenever the beneficiary makes improper use of the authorisation in any manner whatsoever or fails to fulfil any of the other conditions laid down in this Protocol.

6. An origin declaration may be made out by the exporter when the products to which it relates are exported, or after exportation on condition that it is presented in the importing country no longer than two (2) years after the importation of the products to which it relates.

ARTICLE 25

1. The customs authorities of the exporting country may authorise any exporter who makes frequent shipments of products under the trade cooperation provisions of this Agreement to make out origin declarations irrespective of the value of the products concerned. An exporter seeking such authorisation must offer to the satisfaction of the customs authorities all guarantees necessary to verify the originating status of the products as well as the fulfilment of the other requirements of this Protocol.
2. The customs authorities may grant the status of approved exporter subject to any conditions which they consider appropriate.
3. The customs authorities shall grant to the approved exporter a customs authorisation number which shall appear on the origin declaration.
4. The customs authorities shall monitor the use of the authorisation by the approved exporter.
5. The customs authorities may withdraw the authorisation at any time. They shall do so where the approved exporter no longer offers the guarantees referred to in paragraph 1, does not fulfil the conditions referred to in paragraph 2 or otherwise makes an incorrect use of the authorisation.

ARTICLE 26

Validity of proof of origin

1. A proof of origin shall be valid for ten (10) months from the date of issue in the exporting country, and must be submitted within the said period to the customs authorities of the importing country.
2. Proofs of origin which are submitted to the customs authorities of the importing country after the final date for presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the failure to submit these documents by the final date set is due to exceptional circumstances.
3. In other cases of belated presentation, the customs authorities of the importing country may accept the proofs of origin where the products have been submitted before the said final date.

ARTICLE 27

Submission of proof of origin

Proof of origin shall be submitted to the customs authorities of the importing country in accordance with the procedures applicable in that country. The said authorities may require a translation of a proof of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of this Agreement.

ARTICLE 28

Importation by instalments

Where, at the request of the importer and on the conditions laid down by the customs authorities of the importing country, dismantled or non-assembled products within the meaning of General Rule 2(a) for the interpretation of the Harmonised System falling within Sections XVI and XVII or heading 7308 and 9406 of the Harmonised System are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

ARTICLE 29

Exemptions from proof of origin

1. Products sent as small packages from private persons to private persons or forming part of travellers' personal luggage shall be admitted as originating products without requiring the submission of a proof of origin, provided that such products are not imported by way of trade and have been declared as meeting the requirements of this Protocol and where there is no doubt as to the veracity of such a declaration. In the case of products sent by post, this declaration can be made on customs declaration CN22/CN23 or on a sheet of paper annexed to that document.

2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.
3. Furthermore, the total value of these products shall not exceed EUR 500 in the case of small packages or EUR 1 200 in the case of products forming part of travellers' personal luggage.

ARTICLE 30

Information procedure for cumulation purposes

1. When Articles 3(2), 3(3), 4(2), and 4(3) of this Protocol are applied, the evidence of originating status within the meaning of this Protocol of the materials coming from a SADC EPA State, from the EU, from another ACP EPA State or from an OCT shall be given by a movement certificate EUR.1, an origin declaration or the supplier's declaration, a specimen of which appears in Annex V A, given by the exporter in any of these countries or territories or in the EU from which the materials came. When Article 6(1) of this Protocol is applied, the evidence of originating status shall be given by Form A or a statement on origin.
2. When Articles 3(4), 3(5), 4(6) and 4(7) of this Protocol are applied, the evidence of the working or processing carried out in a SADC EPA State, in the EU, in another ACP EPA State or in an OCT shall be given by the supplier's declaration a specimen of which appears in Annex V B, given by the exporter in any of these countries or territories or in the EU from which the materials came. A separate supplier's declaration shall be made up by the supplier for each consignment of goods on the commercial invoice related to that shipment or in an annex to that invoice, or on a delivery note or other commercial document related to that shipment which describes the materials concerned in sufficient detail to enable them to be identified.
3. When a supplier regularly supplies a particular customer with goods whose status in respect of the rules of preferential origin is expected to remain constant for considerable periods of time, he may provide a single declaration, hereinafter referred to as 'a long-term supplier's declaration', provided that facts or circumstances on which it is granted remain unchanged, to cover subsequent shipments of those goods. A long-term supplier's declaration may be issued for a period of up to one year from the date of issue of the declaration.
4. A long term supplier's declaration may be issued with retroactive effect. In such cases, its validity may not exceed a period of one year from the date on which it came into effect. However it is recognised that the customs authority would have the right to revoke a long term supplier's declaration, should the circumstances change, or when inaccurate or false information has been provided.
5. The supplier shall inform the client immediately when the long-term supplier's declaration is no longer valid in relation to the goods supplied.
6. The supplier's declaration may be made out on a pre-printed form.
7. The suppliers' declarations shall bear the original signature of the supplier in manuscript. However, where the origin and the supplier's declaration are established using electronic data-processing methods, the supplier's declaration need not be signed in manuscript provided the responsible official in the supplying company is identified to the satisfaction of the customs authorities in the State where the suppliers' declarations are established. The said customs authorities may lay down conditions for the implementation of this paragraph.
8. The supplier's declarations shall be submitted to the customs authorities in the exporting country requested to issue the movement certificate EUR.1.
9. The supplier making out a declaration must be prepared to submit at any time, at the request of the customs authorities of the country where the declaration is made out, all appropriate documents proving that the information given on this declaration is correct.
10. Suppliers' declarations made and information certificates issued before the date of entry into force of this Protocol in accordance with Article 26 of Annex II of Council Regulation (EC) No 1528/2007 shall remain valid for a transitional period of twelve (12) months.

ARTICLE 31

Supporting documents

The documents referred to in Articles 20(3) and 24(3) of this Protocol used for the purpose of proving that products covered by a movement certificate EUR.1 or an origin declaration can be considered as products originating in a SADC EPA State, in the EU or in one of the other countries or territories referred to in Articles 4 and 6 of this Protocol and fulfil the other requirements of this Protocol may consist inter alia of the following:

- (a) direct evidence of the processes carried out by the exporter or supplier to obtain the goods concerned, contained for example in his accounts or internal bookkeeping;
- (b) documents proving the originating status of materials used, issued or made out in a SADC EPA State, in the EU or in one of the other countries or territories referred to in Articles 4 and 6 of this Protocol where these documents are used in accordance with national law;

- (d) movement certificates EUR.1 or origin declarations proving the originating status of materials used, issued or made out in a SADC EPA State, in the EU or in one of the other countries or territories referred to in Article 4 and in accordance with this Protocol.

2. The exporter making out an origin declaration shall keep for at least three (3) years a copy of this origin declaration as well as the documents referred to in Article 24(3) of this Protocol.
3. The supplier making out a supplier's declaration shall keep for at least three (3) years copies of the declaration and of the invoice, delivery notes or other commercial document to which this declaration is annexed as well as the documents referred to in Article 30(9) of this Protocol.
4. The customs authorities of the exporting country issuing a movement certificate EUR.1 shall keep for at least three (3) years the application form referred to in Article 20(2) of this Protocol.
5. The customs authorities of the importing country shall keep for at least three (3) years the movement certificates EUR.1 and the origin declarations submitted to them.

ARTICLE 33

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not ipso facto render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.
2. Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

ARTICLE 34

Amounts expressed in Euro

1. For the application of the provisions of Article 24(1)(b) and Article 29(3) of this Protocol in cases where products are invoiced in a currency other than the euro, amounts in the national currencies of the SADC EPA States or of the Member States of the EU equivalent to the amounts expressed in Euro shall be fixed annually by each of the countries concerned.
2. A consignment shall benefit from the provisions of Article 24(1)(b) or Article 29(3) of this Protocol by reference to the currency in which the invoice is drawn up, according to the amount fixed by the country concerned.
3. The amounts to be used in any given national currency shall be the equivalent in that currency of the amounts expressed in Euro as at the first working day of October. The amounts shall be communicated to the European Commission by 15 October and shall apply from 1 January the following year. The European Commission shall notify all countries concerned of the relevant amounts.
4. A country may round up or down the amount resulting from the conversion into its national currency of an amount expressed in Euro. The rounded-off amount may not differ from the amount resulting from the conversion by more than 5 per cent. A country may retain unchanged its national currency equivalent of an amount expressed in euro if, at the time of the annual adjustment provided for in paragraph 3, the conversion of that amount, prior to any rounding-off, results in an increase of less than 15 per cent in the national currency equivalent. The national currency equivalent may be retained unchanged if the conversion would result in a decrease in that equivalent value.
5. The amounts expressed in Euro shall be reviewed by the Committee at the request of the EU or of the SADC EPA States. When carrying out this review, the Committee shall consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in Euro.

ARTICLE 35

Administrative conditions for products to benefit from this Agreement

1. Products originating within the meaning of this Protocol in a SADC EPA State or in the EU shall benefit, at the time of the customs import declaration, from the preferences resulting from the Agreement only on condition that they were exported on or after the date on which the exporting country complies with the provisions laid down in paragraph 2.
2. The SADC EPA States and the EU shall undertake to put in place:
 - (a) the necessary national and regional arrangements required for the implementation and enforcement of the rules and procedures laid down in this Protocol, including where appropriate the

arrangements necessary for the application of Articles 3, 4 and 6 of this Protocol;

They shall make the notifications referred to in Article 36 of this Protocol.

ARTICLE 36

Notification of customs authorities

1. The SADC EPA States and the EU shall provide each other through the European Commission, with the addresses of the customs authorities responsible for issuing and verifying movement certificates EUR.1 and origin declarations or supplier's declarations, and with specimen impressions of the stamps used in their customs offices for the issue of these certificates. Movement certificates EUR.1 and origin declarations or supplier's declarations shall be accepted for the purpose of applying preferential treatment from the date the information is received by the European Commission, the SACU Secretariat and the Ministry of Industry and Trade of Mozambique.
2. The SADC EPA States and the EU shall inform each other immediately whenever there are any changes to the information referred to in paragraph 1.
3. The authorities referred to in paragraph 1 shall act under the authority of the government of the country concerned. The authorities in charge of control and verification shall be part of the governmental authorities of the country concerned.

ARTICLE 37

Mutual assistance

1. In order to ensure the proper application of this Protocol, the EU and the SADC EPA States shall assist each other, through the competent customs administrations, in checking the authenticity of the movement certificates EUR.1, the origin declarations or the supplier's declarations and the correctness of the information given in these documents.
2. The authorities consulted shall furnish the relevant information concerning the conditions under which the product has been made, indicating especially the conditions in which the rules of origin have been respected in the various SADC EPA States, in the EU and the other countries referred to in Articles 4 and 6 of this Protocol concerned.

ARTICLE 38

Verification of proof of origin

1. Subsequent verifications of proof of origin shall be carried out based on risk analysis and at random or whenever the customs authorities of the importing country have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Protocol.
2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the movement certificate EUR.1 and the invoice, if it has been submitted, the origin declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons for the request for verification. Any documents and information obtained suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.
3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.
4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.
5. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in a SADC EPA State, in the EU or in one of the other countries referred to in Articles 4 and 6 of this Protocol and fulfil the other requirements of this Protocol.
6. If in cases of reasonable doubt there is no reply within ten (10) months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.
7. Where the verification procedure or any other available information appears to indicate that the provisions of this Protocol are being contravened, the exporting country on its own initiative or at the request of the importing country shall carry out appropriate enquiries or arrange for such enquiries to be carried out with due urgency to identify and prevent such contraventions and for this purpose the exporting country concerned may invite the participation of the importing country in these verifications.

ARTICLE 39

Verification of suppliers' declarations

1. Verification of suppliers' declarations shall be carried out based on risk analysis and at random or whenever the customs authorities of the country where such declarations have been taken into account to issue a movement certificate EUR.1 or to make out an origin declaration, have reasonable doubts as to the authenticity of the document or the correctness of the information given in this document.
2. The customs authorities to which a supplier's declaration is submitted may request the customs authorities of the State where the declaration was made to issue an information certificate, a specimen of which appears in Annex VI. Alternatively, the customs authorities to whom a supplier's declaration is submitted may request the exporter to produce an information certificate issued by the customs authorities of the State where the declaration was made. A copy of the information certificate shall be preserved by the office which has issued it for at least three (3) years.
3. The customs authorities requesting the verification shall be informed of the results thereof as soon as possible. The results must indicate clearly whether the information given in the supplier's declaration is correct and make it possible for them to determine whether and to what extent this supplier's declaration could be taken into account for issuing a movement certificate EUR.1 or for making out an origin declaration.
4. The verification shall be carried out by the customs authorities of the country where the supplier's declaration was made out. For this purpose, they shall have the right to call for any evidence or to carry out any inspection of the supplier's account or any other check which they consider appropriate in order to verify the correctness of any supplier's declaration.
5. Any movement certificate EUR.1 or origin declaration issued or made out on the basis of an incorrect supplier's declaration shall be considered null and void.

ARTICLE 40

Dispute settlement

1. Where disputes arise in relation to the verification procedures of Articles 38 and 39 of this Protocol which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Protocol, they shall be submitted to the Committee.
2. In all cases the settlement of disputes between the importer and the customs authorities of the importing country shall take place under the legislation of that country.

ARTICLE 41

Penalties

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

ARTICLE 42

Free zones

1. The SADC EPA States and the EU shall take all necessary steps to ensure that products traded under cover of a proof of origin or a supplier's declaration and which in the course of transport use a free zone situated in their territory, are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.
2. By means of an exemption to the provisions contained in paragraph 1, when products originating in a SADC EPA State or in the EU are imported into a free zone under cover of a proof of origin and undergo treatment or processing, the authorities concerned shall issue a new movement certificate EUR.1 at the exporter's request, if the treatment or processing undergone complies with the provisions of this Protocol.

ARTICLE 43

Derogations

1. Derogations from this Protocol may be adopted by the Committee, where the development of existing industries or the creation of new industries in the SADC EPA States justifies them.
 - 1.1 The SADC EPA State or States concerned shall, either before or when submitting the matter to the Committee, notify the EU of its request for a derogation together with the reasons for the request in accordance with paragraph 2.
 - 1.2 The EU shall respond positively to all the SADC EPA States' requests which are duly justified in conformity with this Article and which cannot cause serious injury to an established EU industry.
2. In order to facilitate the examination by the Committee of requests for derogation, the SADC EPA State or States making the request shall, by means of the form given in Annex VII, furnish in support of its request the fullest possible information covering in particular the points listed below:
 - (a) description of the finished product;

- (b) nature and quantity of materials originating in a third country;
- (c) nature and quantity of materials originating in the SADC EPA States or the countries or territories referred to in Articles 4 and 6 of this Protocol or the materials which have been processed there;
- (d) manufacturing processes;
- (e) value added;
- (f) number of employees in the enterprise concerned;
- (g) anticipated volume of exports to the EU;
- (h) other possible sources of supply for raw materials;
- (i) reasons for the duration requested in the light of efforts made to find new sources of supply;
- (j) other observations.

The same rules shall apply to any requests for extension. The Committee may modify the form.

3. The examination of requests shall in particular take into account:

- (a) the level of development or the geographical situation of the SADC EPA State or States concerned;
- (b) cases where the application of the existing rules of origin would significantly affect the ability of an existing industry in a SADC EPA State to continue its exports to the EU, with particular reference to cases where this could lead to cessation of its activities;
- (c) specific cases where it can be clearly demonstrated that significant investment in an industry could be deterred by the rules of origin and where a derogation favouring the realisation of the investment program would enable these rules to be satisfied by stages.

4. In every case an examination shall be made to ascertain whether the rules relating to cumulation of origin do not provide a solution to the problem.

5. In addition, when a request for derogation concerns a least-developed SADC EPA State, its examination shall be carried out with a favourable bias having particular regard to:

- (a) the economic and social impact of the decision to be taken especially in respect of employment;
- (b) the need to apply the derogation for a period taking into account the particular situation of the SADC EPA State concerned and its difficulties.

6. In the examination of requests, special account shall be taken, case by case, of the possibility of conferring originating status on products which include in their composition materials originating in LDCs or developing countries with which one or more SADC EPA States have special relations, provided that satisfactory administrative cooperation can be established.

7. Without prejudice to paragraphs 1 to 6, the derogation shall be granted where the value added to the non-originating products used in the SADC EPA State concerned is at least 45 per cent of the value of the finished product, provided that the derogation is not such as to cause serious injury to an economic sector of the EU or of one or more Member States.

8. The Committee shall take steps necessary to ensure that a decision is reached as soon as possible and in any case not later than seventy five (75) working days after the request is received by the EU Co-chairman of the Committee. If the EU does not inform the SADC EPA States of its position on the request within this period, the request shall be deemed to have been accepted.

9. (a) The derogation shall be valid for a period, generally of five (5) years, to be determined by the Committee.

(b) The derogation decision may provide for renewals without a new decision of the Committee being necessary, provided that the SADC EPA State or States concerned submit, three (3) months before the end of each period, proof that they are still unable to meet the conditions of this Protocol, which have been derogated from. If any objection is made to the extension, the Committee shall examine it as soon as possible and decide whether to prolong the derogation. The Committee shall proceed as provided for in paragraph 8. All necessary measures shall be taken to avoid interruptions in the application of the derogation.

(c) In the periods referred to in subparagraphs (a) and (b), the Committee may review the terms for implementing the derogation should a significant change be found to have taken place in the substantive factors governing the decision to grant the derogation. On conclusion of its review the Committee may decide to amend the terms of its decision as regards the scope of derogation or any other condition previously laid down.

10. Notwithstanding paragraphs 1 to 9, an automatic derogation concerning prepared or preserved Albacore tuna (*Thunnus alalunga*) of HS Heading 1604, manufactured from non-originating Albacore tuna of HS Headings 0302 or 0303, shall be granted to Namibia from the date the Agreement takes effect between Namibia and the EU pursuant to Article 113 of this Agreement within an annual quota of 800 metric tons.

11. Notwithstanding paragraphs 1 to 9, an automatic derogation to in Article 7(2)(c) of this Protocol shall be granted to Mozambique. This derogation shall apply for a duration of five (5) years from the entry into force of this Agreement to shrimps, prawns and lobsters of HS Headings 0306 and 1605 caught in the Exclusive Economic Zone of Mozambique and landed and processed in Mozambique.

ANNEX I

INTRODUCTORY NOTES TO THE LIST IN ANNEX II

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 8 of the Protocol.

Note 2:

1. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonised System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns a rule is specified in columns 3 or 4. Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rules in columns 3 or 4 apply only to the part of that heading as described in column 2.
2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in columns 3 or 4 apply to all products which, under the Harmonised System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in columns 3 or 4.
4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 has to be applied.

Note 3:

1. The provisions of Article 8 of this Protocol concerning products having acquired originating status which are used in the manufacture of other products apply regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the EU or in the SADC EPA States.

Example:

An engine of heading No 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 per cent of the ex-works price, is made from "other alloy steel roughly shaped by forging" of heading No ex 7224.

If this forging has been forged in the EU from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading No ex 7224 in the list. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in the EU. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

2. The rule in the list represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer originating status. Therefore, if a rule provides that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.
3. Without prejudice to Note 3.2 where a rule states that "materials of any heading" may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression "manufacture from materials of any heading, including other materials of heading No " means that only materials classified in the same heading as the product of a different description than that of the product as given in column 2 of the list may be used.
4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of heading Nos 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.3 below in relation to textiles).

Example:

The rule for prepared foods of heading No 1904 which specifically excludes the use of non-originating cereals and their derivatives does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth - even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn - that is the fibre stage.

6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the highest of the percentages given. Furthermore, the individual percentages must not be exceeded in relation to the particular materials they apply to.

Note 4:

1. The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.
2. The term "natural fibres" includes horsehair of heading No 0503, silk of heading Nos 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of heading Nos 5101 to 5105, the cotton fibres of heading Nos 5201 to 5203 and the other vegetable fibres of heading Nos 5301 to 5305.
3. The terms "textile pulp", "chemical materials" and "paper making materials" are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
4. The term "man made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of heading Nos 5501 to 5507.

Note 5:

1. Where for a given product in the list a reference is made to this note, the conditions set out in column 3 shall not be applied to any basic textile materials, used in the manufacture of this product, which, taken together, represent 10 per cent or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4 below).
2. However, the tolerance mentioned in Note 5.1 may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus *Agave*,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- current conducting filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,

- synthetic man-made staple fibres of polyphenylene sulphide,
- synthetic man-made staple fibres of polyvinyl chloride,
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
 - yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped,
 - yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped,
 - products of heading No 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading No 5605.

Example:

A yarn of heading No 5205 made from cotton fibres of heading No 5203 and synthetic staple fibres of heading No 5506 is a mixed yarn. Therefore, non originating synthetic staple fibres that do not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 per cent of the yarn.

Example:

A woollen fabric of heading No 5112 made from woollen yarn of heading No 5107 and synthetic yarn of staple fibres of heading No 5509 is a mixed fabric. Therefore synthetic yarn which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed 10 per cent of the weight of the fabric.

Example:

Tufted textile fabric of heading No 5802 made from cotton yarn of heading No 5205 and cotton fabric of heading No 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading No 5205 and synthetic fabric of heading No 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

3. In the case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped" this tolerance is 20 per cent in respect of this yarn.
4. In the case of products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film", this tolerance is 30 per cent in respect of this strip.

Note 6:

1. In the case of those textile products, which are marked in the list by a footnote referring to this Introductory Note, textile trimmings and accessories which do not satisfy the rule set out in the list in column 3 for the made up products concerned may be used provided that their weight does not exceed 10% of the total weight of all the textile materials incorporated.

Textile trimmings and accessories are those classified in Chapters 50 to 63. Linings and interlinings are not to be regarded as trimmings or accessories.

2. Any non-textile trimmings and accessories or other materials used which contain textiles do not have to satisfy the conditions set out in column 3 even though they fall outside the scope of Note 3.5.
3. In accordance with Note 3.5, any non-originating non-textile trimmings and accessories or other product, which do not contain any textiles, may, anyway, be used freely where they cannot be made from the materials listed in column 3.

For example⁹, if a rule in the list says that for a particular textile item, such as a blouse, yarn must be used, this does not prevent the use of metal items, such as buttons, because they cannot be made from textile materials.

4. Where a percentage rule applies, the value of trimmings and accessories must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

1. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the "specific processes" are the following:
 - (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation.
2. For the purposes of heading Nos 2710, 2711 and 2712, the "specific processes" are the following:
 - (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation;
 - (j) in respect of heavy oils falling within heading No ex 2710 only, desulphurization with hydrogen resulting in a reduction of at least 85 per cent of the sulphur content of the products processed (ASTM D 1266 59 T method);
 - (k) in respect of products falling within heading No 2710 only, deparaffining by a process other than filtering;
 - (l) in respect of heavy oils falling within heading No ex 2710 only, treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250°C with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of heading No ex 2710 (e.g. hydrofinishing or decolourisation) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
 - (m) in respect of fuel oils falling within heading No ex 2710 only, atmospheric distillation, on condition that less than 30 per cent of these products distills, by volume, including losses, at 300°C by the ASTM D 86 method;
 - (n) in respect of heavy oils other than gas oils and fuel oils falling within heading No ex 2710 only, treatment by means of a high-frequency electrical brush-discharge.

For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing products with different sulphur contents, any combination of these operations or like operations do not confer origin.

2. Notwithstanding the provisions of paragraph 1 of this Rule:
 - (a) Where the Harmonised System specifies that a group, set or assembly of article is to be classified within a single heading, such a group, set or assembly shall be treated as one article;
 - (b) Tools, parts and accessories which are imported with an article, and the price of which is included in that of the article or for which no separate charge is made, shall be considered as forming a whole with the article, provided that they constitute the standard equipment customarily included in the sale of articles of that kind;
 - (c) Notwithstanding the provisions of sub-paragraphs (a) and (b) of this paragraph, goods shall be treated as a single article if they are so treated for purposes of assessing Customs duties on like articles by the importing Member state.
3. An un-assembled or dis-assembled article which is imported in more than one consignment because it is not feasible for transport or production reasons to import it in a single consignment, shall be treated as one article.

RULE 6

SEPARATION OF MATERIALS

1. For those products or industries where it would be impracticable for the producers to separate physically materials of similar character but different origin used in the production of goods, such separation may be replaced by an appropriate accounting system which ensures that no more goods are deemed to originate in the Member State than would have been the case if the producer had been able to physically separate the materials.
2. Any accounting system shall conform to such conditions as may be agreed upon by the CMT in order to ensure that adequate control measures shall be applied.

RULE 7

TREATMENT OF MIXTURES

1. In the case of mixtures, not being groups, sets or assemblies of goods dealt with under Rule 5, any product resulting from the mixing together of goods originating in the Member States with goods which would not qualify as originating in the Member States, would not qualify as originating if the characteristics of the product as a whole are not different from the characteristics of the goods which have been mixed.
2. In the case of particular products where it is recognised by the CMT to be desirable to permit mixing of the kind described in paragraph 1 of this Rule, such products shall be accepted as originating in the Member States in respect of such part thereof as may be shown to correspond to the quantity of goods or originating in the Member States used in the mixing, subject to such conditions as may be agreed by the CMT.

RULE 8

TREATMENT OF PACKING

1. Where for purposes of assessing Customs duties, a Member State treats the origin of the goods separately from the origin of the packing, it may also, in respect of its imports consigned from another Member State, determine separately the origin of such packing.
2. Where paragraph 1 of this Rule is not applicable, packing shall be considered as forming a whole with the goods and no part of any packing required for their transport or storage shall be considered as having been imported from outside the Member States when determining the origin of the goods as a whole.

3. For the purposes of paragraph 2 of this Rule, packing with goods which are ordinarily sold at retail shall not be regarded as packing required for the transport or storage of goods.
4. Containers which are purely for the transport and temporary storage of goods and are to be returned shall not be subject to Customs duties and other charges of equivalent effect. Where containers are not returned, they shall be treated separately from the goods contained in them and be subject to Customs duties and other charges of equivalent effect.

RULE 9**DOCUMENTARY EVIDENCE**

1. The claim that goods shall be accepted as originating from a Member State in accordance with the provision of this Annex shall be supported by a certificate given by the exporter or their authorized representative in the form prescribed in Appendix II of this Annex. The certificate shall be authenticated with a seal by an authority designated for this purpose by each Member State.
2. Every producer, where such producer is not the exporter, shall, in respect of goods intended for export, furnish the exporter with a written declaration in conformity with Appendix III of this Annex to the effect that the goods qualify as originating in the member State under the provisions of Rule 2 of this Annex.
3. The competent authority designated by an importing Member State may in exceptional circumstances and notwithstanding the presentation of a certificate issued in accordance with the provisions of this Rule, require, in case of doubt, further verification of the statement contained in the certificate. Member States, through their competent authorities, shall assist each other in this process. Such further verification should be made within three months of the request being made by a competent authority designated by the importing Member State. The form used for this purpose shall be that contained in Appendix IV to this Annex.
4. The importing Member State shall not prevent the importer from taking delivery of goods solely on the grounds that it requires further evidence, but may require security for any duty or other charge which may be payable: provided that where goods are subject to any prohibitions, the conditions for delivery under security shall not apply.
5. Copies of certificates of origin and other relevant documentary evidence shall be preserved by the appropriate authorities of the Member States for at least five years.
6. All Member States shall deposit with the Secretariat the names of Departments and Agencies authorized to issue the certificates required under this Annex, specimen signatures of officials authorized to sign the certificates and the impressions of the official stamps to be used for that purpose, and those shall be circulated to the Member States by the Secretariat.

RULE 10**INFRINGEMENT AND PENALTIES**

1. The Member States undertake to introduce legislation where such legislation does not exist, making such provision as may be necessary for penalties against persons who, in their territories, furnish or cause to be furnished documents which are untrue in any material sense, particularly in support of a claim in another Member State.
2. Any Member State to which an untrue claim is made in respect of the origin of goods shall immediately bring the issue to the attention of the exporting Member State from which the untrue claim is made, in accordance with the provisions on mutual assistance and co-operation in customs matters as contained in Appendix I of Annex II of this Protocol.
3. Continued infringement by a Member State of the provisions of this Annex may be dealt with in accordance with the provisions of Annex VI of this Protocol.

RULE 11**DEROGATIONS**

1. Notwithstanding the provisions of Rules 2 and 3 of this Annex, derogations may be granted by the CMT where the development of existing industries or the creation of new industries is justified.
2. The Member State shall make the request for a derogation for existing or new industries to the CMT.
3. In order to facilitate the examination of the request for derogation, the Member State making the request shall provide the CMT with the fullest possible information as to the reason for the request.
4. The CMT shall respond to each Member State's request which is duly justified and in conformity with this Rule, provided no serious injury is caused to any established industry within the Region.
5. The CMT shall take steps necessary to ensure that a decision is reached as soon as possible and in any case not later than 90 working days after the request is received.
6. The derogation shall be valid for a specific period to be determined by the CMT.

RULE 12**REGULATIONS**

The CMT shall adopt regulations to facilitate the implementation of this Annex.

APPENDIX I TO ANNEX I

INTRODUCTORY NOTES TO THE LIST OF CONDITIONS REGARDING WORKING AND PROCESSING CARRIED OUT ON NON-ORIGINATING MATERIALS THAT CONFERS ORIGINATING STATUS**Note 1:**

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of paragraph 2 of Rule 2 of Annex 1 of this Protocol.

Note 2:

- 2.1: The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonised System and the second column gives the description of goods used in that System for that heading or chapter. For each entry in the first two columns a rule is specified in column 3. Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rules in column 3 apply only to the part of that heading as described in column 2. Optional rules in column 4 only apply to textile and clothing products of HS chapters 50 to 63 exported by MMTZ to SACU under the quota system.
- 2.2: Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in columns 3 or 4 apply to all products which, under the Harmonised System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 2.3: Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in columns 3 or 4.

Note 3:

- 3.1: The provisions of Rule 2 of Annex 1 of this Protocol concerning products having acquired originating status which are used in the manufacture of other products apply regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the Region.

For example*, an engine of heading No. 8407, for which the rule may state that the value of non-originating materials which may be incorporated may not exceed a certain percentage of the ex-works price, is made from 'other alloy steel roughly shaped by forging' of heading No. ex 7224.

If this forging has been forged in the Region from a non-originating ingot, it has already acquired originating status by virtue of the rule applicable to products of HS chapter 72 in the list. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in the Region. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

* This example is given for the purpose of explanation only. It is not legally binding.

- 3.2: The rule in the list represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer originating status. Thus if a rule provides that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.
- 3.3: When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used. For example*, the rule for fabrics of heading Nos. 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.
- 3.4: Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

For example*, in the case of an article of apparel of ex chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth, even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn, that is the fibre stage.

* These examples are given for the purpose of explanation only. It is not legally binding.

Note 4:

- 4.1: The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.
- 4.2: The term "natural fibres" includes horsehair of heading No. 0503, silk of heading Nos. 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of heading Nos. 5101 to 5105, the cotton fibres of heading Nos. 5201 to 5203 and the other vegetable fibres of heading Nos. 5301 to 5305.
- 4.3: The term "textile pulp", "chemical materials" and "paper-making materials" are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.

4.4: The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of heading Nos. 5501 to 5507.

Note 5:

5.1: The conditions set out in column 3 or 4 shall not be applied to any basic textile materials, used in the manufacture of this product, which, taken together, represent 10 per cent or less of the total weight of all the basic textile materials used (See also Notes 5.3 and 5.4 below).

5.2: However, the tolerance mentioned in Note 5.1 may only be applied to mixed products which have been made from two or more basic textile materials.

The following are basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus Agave,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments, artificial man-made filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of polyphenylene sulphide,
- synthetic man-made staple fibres of polyvinyl chloride,
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped,

- products of heading No. 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,

- other products of heading No. 5605.

For example*, a yarn of heading No. 5205 made from cotton fibres of heading No. 5203 and synthetic staple fibres of heading No. 5506 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which may require manufacture from chemical materials or textile pulp) may be used up to a weight of ten per cent of the yarn.

For example*, a woollen fabric of heading No. 5112 made from woollen yarn of heading No. 5107 and synthetic yarn of staple fibres of heading No. 5509 is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin rules (which may require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed ten per cent of the weight of the fabric.

For example*, tufted textile fabric of heading No. 5802 made from cotton yarn of heading No. 5205 and cotton fabric of heading No. 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarn used are themselves mixtures.

For example*, if the tufted fabric concerned has been made from cotton yarn of heading No. 5205 and synthetic fabric of heading No. 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

5.3: In case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped" this tolerance is 20 per cent in respect of this yarn.

5.4: In the case of products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film", this tolerance is 30 per cent in respect of this strip.

Note 6:

6.1: Textile materials, with the exception of linings and interlinings, which do not satisfy the rule set out in the list in column 3 or 4 for made-up product concerned may be used provided that they are classified in a heading other than that of the product and their value does not exceed 8 per cent of the ex-works price of the product.

6.2: Without prejudice to Note 6.3, materials which are not classified within Chapters 50 to 63 may be used freely in the manufacture of textile products, whether or not they contain textiles.

For example*, if a rule in the list provides that for particular textile items yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

6.3: Where a percentage rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

* This example is given for the purpose of explanation only. It is not legally binding.

Note 7:

CHEMICAL PROCESSING RULES TO CONFER ORIGINATING STATUS

Section VI

Products of the Chemical or Allied Industries (Chapter 28-38)

Notes to Section VI:

Note 1

7.1: Rules 1 through 7 of this Section confer origin to a good of any chapter or heading in this Section, except as otherwise specified in those rules.

Note 2

7.2: Notwithstanding Note 1, a good is originating if it meets the applicable change in tariff classification or the percentage value content of non-originating material specified in Appendix I of Annex I of the Protocol on trade.

Rule 1: Chemical Reaction Origin

7.3: For a good of Chapters 28 through 38, which is subject to a chemical reaction, shall be treated as an originating good if the chemical reaction occurred in the territory of one or more of the Parties.

7.4: Note: For purposes of this section, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by

forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

7.5: The following are not considered to be chemical reactions for the purposes of determining whether a product is an originating good:

- (a) dissolution in water or in other solvents;
- (b) the elimination of solvents including solvent water; or
- (c) the addition or elimination of water of crystallisation.

Rule 2: Purification Origin

7.6: For a good of chapters 28 through 38, a good that is subject to purification shall be treated as originating provided that one of the following occurs in the territory of one or more of the Parties:

- (a) Purification of a good resulting in the elimination of 80 per cent of the content of existing impurities; or
- (b) The reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:
 - (i) Pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances;
 - (ii) Chemical products and reagents for analytical, diagnostic or laboratory uses;
 - (iii) Elements and components for use in micro-elements;
 - (iv) Specialised optical uses;
 - (v) Non toxic uses for health and safety;
 - (vi) Biotechnical use;
 - (vii) Carriers used in a separation process; or
 - (viii) Nuclear grade uses.

Rule 3: Mixtures and blends

7.7: A good of chapters 30, 31, 33 through 38 except for heading 38.08, shall be treated as originating if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of one or more of the Parties.

Rule 4: Change in Particle Size

7.8: A good of chapters 30, 31 and 33, shall be treated as originating if the following occurs in the territory of one or more of the Parties: the deliberate and controlled modification in particle size of a good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials is considered to be origin conferring.

Rule 5: Standard Materials

7.9: A good of chapters 28 through 38, shall be treated as originating if the production of these materials occurs in the territory of one or more of the Parties.

7.10: For the purposes of this rule "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses and having precise degrees of purity or proportions, which are certified by the manufacturer.

Rule 6: Isomer Separation

7.11: A good of chapters 28 through 38, shall be treated as originating if the isolation or separation of isomers from mixtures of isomers occurs in the territory of one or more of the Parties.

Rule 7: Separation Prohibition

7.12: A good that undergoes a change from one classification to another in the territory of one or more of the Parties as a result of the separation of one or more materials from a man-made mixture shall not be treated as originating unless the isolated material underwent a chemical reaction in the territory of one or more of the Parties.

ANNEX VII

CONCERNING TRADE IN SUGAR

PREAMBLE

The High Contracting Parties:

HAVING REGARD to the objectives of this Protocol and of its importance as an instrument for facilitating the furtherance of the aims of regional economic integration and the creation of a single market through increased harmonisation of policies and liberalisation of tariffs and removal of NTBs on trade;

NOTING, however, that the world sugar market is highly distorted and conscious of the fact that the world price for sugar is a dumped or subsidised price resulting in the continuing need for most sugar producing countries to impose tariff and non-tariff barriers against the free importation of sugar in order to protect their domestic industries;

RECOGNISING, therefore, that for as long as the world sugar market remains highly distorted, sugar will be a product requiring special dispensation within the framework of the Protocol on Trade so that no sugar industry within SADC will suffer injury;

MINDFUL of the need to establish a stable investment climate leading to both growth and development of SADC economies and of the need to maintain the SADC Region as a reliable bloc of world competitive low cost sugar producers, well positioned to take advantage of the anticipated higher world prices once global liberalisation in sugar trade occurs;

ACKNOWLEDGING accordingly the need to improve and maintain the efficiency of all sugar producers within the SADC region through the interchange of research, training and information;

HEREBY AGREE as follows:

ARTICLE 1

DEFINITIONS

In this Annex, an expression that has been defined has that meaning and, unless the context indicates otherwise:

- "Marketing Year" means a period of twelve months commencing on 1 April and ending on 31 March, and "annual" and "annum" shall have a corresponding meaning;
- "Sugar" means raw sugar, refined sugar and direct consumption crystal sugar;
- "Technical Committee on Sugar (TCS)" means the body comprising representatives of national governments and sugar industries in all Member States;
- "Ton" means a metric ton of sugar, tel quel.

ARTICLE 2

OBJECTIVES

The objectives of this agreement are:

- (a) to promote, within the Region, production and consumption of sugar and sugar-containing products according to fair trading conditions and an orderly regional market in sugar for the survival of the sugar industries, in anticipation of free global trade;
- (b) in support of the long term objective set out in paragraph 1 of Article 3, to provide temporary measures to insulate State Parties' sugar producing industries from the destabilising effects of the distorted global market, and in this regard to harmonise sugar policies and regulate its trade within the Region during the interim period until world trade conditions permit free trade in sugar;
- (c) to create a stable climate for investment, leading to the growth and development of sugar industries in the State Parties;
- (d) to improve the competitiveness of the sugar producing State Parties in the world sugar market;
- (e) to facilitate the sharing of information, research and training with a view to improving the efficiency of growers, millers and refiners of sugar in the Member States;
- (f) to facilitate the development of small and medium sugar enterprises, and
- (g) to create stable market conditions in the Member States so as to encourage the rehabilitation and development of all sugar industries with a view to facilitating direct foreign investment and the creation of employment opportunities.

ARTICLE 3

RECIPROCAL MARKET LIBERALISATION

1. The long term objective of this Annex is to establish full liberalisation of trade in the sugar sector in the SADC region after the year 2012. Such liberalisation will be dependent on a positive review of conditions prevailing in the world sugar market five years after entry into force of this Annex in order to ascertain if the world sugar market has normalised sufficiently to make such liberalisation acceptable.
2. The liberalisation as contemplated in paragraph 1 will be on a reciprocal basis and will also involve the removal of non-tariff barriers in relation to SADC sugar trade. However, in the interim period, market access will be on a non-reciprocal basis into the SACU on the terms outlined in Articles 4 and 6.

ARTICLE 4

NON-RECIPROCAL ACCESS TO THE SACU MARKET

1. Duty free quota access to the SACU sugar market will be allocated to all non-SACU SADC sugar producing members. Access will be established through duty-free quotas allocated to each such member. The quotas will be allocated as follows:
 - a. The base market access quotas are hereby established as the average of the annual quotas allocated to each non-SACU SADC sugar-producing country over the period 2001/2002 to 2007/08. These quotas would apply from the first year in which this quota system became effective. These based quotas are indicated in Appendix 1.
 - b. An annual growth factor will be applied from the second year of implementing the new quota system. The annual percentage growth in the quota will be equal to the actual growth percentage in the SACU sugar market in the preceeding year, and will only be applied to quota tonnage in excess of 20,000 tons. A minimum annual total quota increase of 500 tons will be applicable. This total quota increase shall be distributed among the quota beneficiaries on the basis of their relative base quota allocations. The relative shares in the base quota allocations are indicated in Appendix 1.
 - c. The annual percentage growth in the SACU sugar market is computed as the growth in the combined SACU sales of the South African and Eswatini sugar industries plus imports into SACU.
 - d. From the total annual base quota, an initial quota of 1,500 tons will be allocated to each non-SACU SADC sugar producing country. The balance of the quota will then be allocated to each beneficiary country in accordance with that country's calculated relative share of the average annual quota allocated to non-SACU SADC countries over the period 2001/2002 to 2007/08.
2. The determined quota allocations are not transferable between countries. The principal of "use it or lose it" will apply.
3. Any new sugar producer in SADC will be accommodated within the total quota determined in this Annex.
4. The modalities for the utilisation or distribution of the quota of a country would be determined by the competent sugar quota allocating authority in that country.
5. This provision for non-reciprocal access for non-SACU SADC sugar producers will be reviewed in accordance to scheduled and/or agreed revisions of the SADC Trade Protocol.

ARTICLE 5

CO-OPERATION IN AREAS OF COMMON INTEREST

1. Co-operation in areas of common interest as identified by the TCS will be aimed at facilitating a balanced expansion of national industries with the ultimate objective of promoting the development of a regional competitive industry. Cooperation in the following areas will be established with a view to increasing efficiencies of all SADC sugar producers.
 - (a) The TCS established in terms of Article 7 will initiate dialogue on the usage and upgrading of infrastructure, and adopt rules on the transfer of information in relation to sugar technology and research, training, promotion and marketing.
 - (b) Recognising established official customs co-operation arrangements, the TCS will make recommendations to such bodies on issues related to cross-border trade in sugar in the region aimed at improving information flow on trade in sugar in the region and improving border control.
 - (c) Information on the nature and performance of existing national initiatives will be shared. Information on similar initiatives in other parts of the world will be collected and considered. Such information could be used to design appropriate strategies for small medium enterprise development.
 - (d) Developments occurring in the rest of the world which have implications for sugar industries in the SADC will be identified and monitored, and pro-active regional strategies will be pursued.
2. The TCS will establish terms of reference relating to the implementation of actions in the identified and new areas of co-operation, and may appoint technical working groups to obtain related information and submit recommendations.

ARTICLE 6

IMPLEMENTATION

1. Market access as provided for in Article 4 will be effected from the 2011/12 marketing year.
2. Market access as provided for in Article 4 will be maintained until the review of this Annex.
3. Co-operation in areas of common interest will be effected upon implementation of this Annex.

ARTICLE 7

INSTITUTIONAL FRAMEWORK

1. The TCS will be established to manage the agreed terms for market access and to co-ordinate actions in the areas of cooperation outlined in Article 5.
2. The TCS will establish and maintain a secretariat, the functions of which will be to implement and monitor the market access arrangements, procure and collate statistical information concerning

sugar from State Parties, disseminate such information amongst State Parties, and supply secretarial services to the TCS and its appointed Working Groups.

TITLE II

DEFINITION OF THE CONCEPT OF "ORIGINATING PRODUCTS"

ARTICLE 2

Origin Criteria

1. For the purpose of implementing this Agreement, the following products shall be considered as originating in an EFTA State or SACU:
 - (a) products wholly obtained in a Party within the meaning of Article 4; and
 - (b) products obtained in a Party incorporating materials which have not been wholly obtained there, provided that such materials have undergone sufficient working or processing in the Party concerned within the meaning of Article 5.
2. For the purpose of this Agreement, products originating in an EFTA State shall be considered as originating in Iceland, Norway or Switzerland, and products originating in SACU shall be considered as single SACU origin.

ARTICLE 3

Cumulation of Origin

1. Notwithstanding Article 2, materials originating in an EFTA State or SACU within the meaning of this Annex shall be considered as materials originating in the Party concerned, provided that they have undergone working or processing going beyond that referred to in Article 6.
2. Products originating in another Party within the meaning of this Annex, which are exported from one Party to another, shall retain their origin when exported in the same state or without having undergone in the exporting Party working or processing going beyond that referred to in Article 6.
3. For the purpose of paragraph 2, where materials originating in two or more of the Parties are used and those materials have undergone working or processing in the exporting Party not going beyond that referred to in Article 6, the origin is determined by the material with the highest customs value or, if this is not known and cannot be ascertained, with the highest first ascertainable price paid for that material in that Party.

ARTICLE 4

Wholly Obtained Products

1. The following shall be considered as wholly obtained in an EFTA state or in SACU:

- (l) goods produced there exclusively from the products specified in (a) to (k).

ARTICLE 5

Sufficiently Worked or Processed Products

1. For the purposes of Article 2, products which are not wholly obtained are considered to be sufficiently worked or processed when the conditions set out in the list in Appendix 2 are fulfilled.
The conditions referred to above indicate, for all products covered by the Agreement, the working or processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials. It follows that if a product which has acquired originating status by fulfilling the conditions set out in the list is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.
2. Notwithstanding paragraph 1, non-originating materials which, according to the conditions set out in the list, should not be used in the manufacture of a product may nevertheless be used, provided that:
 - (a) their total value does not exceed 15 per cent of the ex-works price of the product; and

3. Paragraphs 1 and 2 shall apply subject to the provisions of Article 6.

ARTICLE 6

Insufficient Working or Processing

1. Without prejudice to paragraph 2, the following operations shall be considered as insufficient working or processing to confer the status of originating products, whether or not the requirements of Article 5 are satisfied:
 - (a) preserving operations to ensure that the products remain in good condition during transport and storage;

 - (a) when a product composed of a group or assembly of articles is classified under the terms of the Harmonized System in a single heading, the whole constitutes the unit of qualification; and
 - (b) when a consignment consists of a number of identical products classified under the same heading of the Harmonized System, each product must be taken individually when applying the provisions of this Annex.

Sets

Sets, as defined in General Rule 3 of the Harmonized System, shall be regarded as originating when all component products are originating. Nevertheless, when a set is composed of originating and non-originating products, the set as a whole shall be regarded as originating, provided that the value of the non-originating products does not exceed 15 per cent of the ex-works price of the set.

ARTICLE 10

Neutral Elements

In order to determine whether a product originates, it shall not be necessary to determine the origin of the following which might be used in its manufacture:

- (a) energy and fuel;
- (b) plant and equipment;
- (c) machines and tools; and
- (d) goods which do not enter and which are not intended to enter into the final composition of the product.

TITLE III
TERRITORIAL REQUIREMENTS

ARTICLE 11

Principle of Territoriality

1. Except as provided for in Article 3 and paragraph 3 of this Article, the conditions for acquiring originating status set out in Title II must be fulfilled without interruption in an EFTA State or in SACU.
2. Except as provided for in Article 3, where originating goods exported from an EFTA State or from SACU to another country return, they must be considered as non-originating, unless it can be demonstrated to the satisfaction of the customs authorities that:
 - (a) the returning goods are the same as those exported; and
 - (b) they have not undergone any operation beyond that necessary to preserve them in good condition while in that country or while being exported.
3. The acquisition of originating status in accordance with the conditions set out in Title II shall not be affected by working or processing done outside an EFTA State or SACU on materials exported from an EFTA State or SACU and subsequently reimported there, provided that:
 - (a) the said materials are wholly obtained in an EFTA State or in SACU or have undergone working or processing beyond the operations referred to in Article 6 prior to being exported; and
 - (b) it can be demonstrated to the satisfaction of the customs authorities that:
 - (i) the reimported goods have been obtained by working or processing the exported materials; and
 - (ii) the total added value acquired outside the EFTA State concerned or SACU by applying the provisions of this Article does not exceed ten per cent of the ex-works price of the end product for which originating status is claimed.
4. For the purposes of paragraph 3, the conditions for acquiring originating status set out in Title II shall not apply to working or processing done outside an EFTA State or SACU. But where, in the list in Appendix 2, a rule setting a maximum value for all the non-originating materials incorporated is applied in determining the originating status of the end product, the total value of the non-originating materials incorporated in the territory of the Party concerned, taken together with the total added value acquired outside the EFTA State concerned or SACU by applying the provisions of this Article, shall not exceed the stated percentage.
5. For the purposes of applying the provisions of paragraphs 3 and 4, "total added value" shall be taken to mean all costs arising outside the EFTA State concerned or SACU, including the value of the materials incorporated there.
6. The provisions of paragraphs 3 and 4 shall not apply to products which do not fulfil the conditions set out in the list in Appendix 2 or which can be considered sufficiently worked or processed only if the general tolerance fixed in paragraph 2 of Article 5 is applied.
7. The provisions of paragraphs 3 and 4 shall not apply to products of Chapters 50 to 63 of the Harmonized System.
8. Any working or processing of the kind covered by the provisions of this Article and done outside an EFTA State or SACU shall be done under the outward processing arrangements, or similar arrangements.

ARTICLE 12

Direct Transport

1. The preferential treatment provided for under this Agreement applies only to products, satisfying the requirements of this Annex, which are transported directly between an EFTA State and SACU. However, products may be transported through other territories, provided that they remain under the surveillance of the customs authorities in the country of transit or in temporary warehousing and do not undergo operations other than unloading, reloading, splitting up of consignments or any operation designed to preserve them in good condition.

Originating products may be transported by pipeline across territory other than that of the Parties.
2. Evidence that the conditions set out in paragraph 1 have been fulfilled shall be supplied to the customs authorities of the importing country.

ARTICLE 13

Exhibitions

1. Originating products, sent for exhibition outside the Parties and sold after the exhibition for the importation into an EFTA State or SACU shall benefit on importation from the provisions of this

Agreement provided it is shown to the satisfaction of the customs authorities that:

- (a) an exporter has consigned these products from an EFTA State or SACU to the country in which the exhibition is held and has exhibited them there;
 - (b) the products have been sold or otherwise disposed of by that exporter to a person in an EFTA State or SACU;
 - (c) the products have been consigned during the exhibition or immediately thereafter in the State in which they were sent for exhibition; and
 - (d) the products have not, since they were consigned for exhibition, been used for any purpose other than demonstration at the exhibition.
2. A proof of origin must be issued or made out in accordance with the provisions of Title IV and submitted to the customs authorities of the importing country in the normal manner. The name and address of the exhibition must be indicated thereon. Where necessary, additional documentary evidence of the conditions under which they have been exhibited may be required.
 3. Paragraph 1 shall apply to any trade, industrial, agricultural or crafts exhibition, fair or similar public show or display which is not organised for private purposes in shops or business premises with a view to the sale of foreign products, and during which the products remain under customs control.

TITLE IV

"DUPLICATE"
3. The endorsement referred to in paragraph 2 shall be inserted in the "Remarks" box of the duplicate movement certificate EUR. 1.
4. The duplicate, which must bear the date of issue of the original movement certificate EUR. 1, shall take effect as from that date.

ARTICLE 18

Issue of Movement Certificate EUR. 1 on the Basis of a Proof of Origin Issued or Made out Previously

When originating products are placed under the control of a customs office in an EFTA State or in SACU, it shall be possible to replace the original proof of origin by one or more movement certificates EUR. 1 for the purpose of sending all or some of these products elsewhere within an EFTA State or SACU. The replacement movement certificate(s) EUR. 1 shall be issued by the customs office under whose control the products are placed.

If the declaration is handwritten, it shall be written in ink in printed characters.
5. Invoice declarations shall bear the original signature of the exporter in manuscript. However, an approved exporter within the meaning of Article 22 shall not be required to sign such declarations provided that he gives the customs authorities of the exporting country a written undertaking that he accepts full responsibility for any invoice declaration which identifies him as if it had been signed in manuscript by him.
6. An invoice declaration may be made out by the exporter when the products to which it relates are exported, or after exportation on condition that it is presented in the importing country no longer than two years after the importation of the products to which it relates.

ARTICLE 20

Exemptions from Proof of Origin

1. Products sent as small packages from private persons to private persons or forming part of travellers' personal luggage shall be admitted as originating products without requiring the submission of a proof of origin, provided that such products are not imported by way of trade and have been declared as meeting the requirements of this Annex and where there is no doubt as to the veracity of such declaration. In the case of products sent by post, this declaration can be made on the customs declaration CN22/CN23 or on a sheet of paper annexed to that document.
2. Imports which are occasional and consists solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.

3. The amounts to be used in any given national currency shall be the equivalent in that currency of the amounts expressed in euro as at the first working day of October and shall apply from 1 January the following year. The Parties shall be notified of the relevant amounts.
4. The amounts expressed in euro shall be reviewed by the Sub-Committee on Customs and Origin Matters established in accordance with Article 34 (hereinafter referred to as "the Sub-Committee") at the request of a Party. When carrying out this review, the Sub-Committee shall consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in euro.

ARTICLE 22

The customs authorities of the exporting country may authorise any exporter, hereafter referred to as "approved exporter", who makes frequent shipments of products under this Agreement to make out invoice declarations irrespective of the value of the products concerned. An exporter seeking such authorisation must offer to the satisfaction of the customs authorities all guarantees necessary to verify the originating status of the products as well as the fulfilment of the other requirements of this Annex.
2. The customs authorities may grant the status of approved exporter subject to any conditions which they consider appropriate.
3. The customs authorities shall grant to the approved exporter a customs authorisation number which shall appear on the invoice declaration.
4. The customs authorities shall monitor the use of the authorisation by the approved exporter.
5. The customs authorities may withdraw the authorisation at any time. They shall do so where the approved exporter no longer offers the guarantees referred to in paragraph 1, no longer fulfils the conditions referred to in paragraph 2 or otherwise makes an incorrect use of the authorisation.

ARTICLE 23

3. In other cases of belated presentation, the customs authorities of the importing country may accept the proofs of origin when the products have been submitted before the said final date.

ARTICLE 24

Submission of Proof of Origin

Proofs of origin shall be submitted to the customs authorities of the importing country in accordance with the procedure applicable in that country. The said authorities may require a translation of a proof of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of this Agreement.

ARTICLE 25

Where, at the request of the importer and on the conditions laid down by the customs authorities of the importing country, dismantled or non-assembled products within the meaning of General Rule 2(a) of the Harmonized System falling within Sections XVI and XVII or headings 7308 and 9406 of the Harmonized System are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

ARTICLE 26

ARTICLE 28

Discrepancies and Formal Errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not IPSO FACTO render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.
2. Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

TITLE V

ARRANGEMENTS FOR ADMINISTRATIVE CO-OPERATION

Notifications

The customs authorities of the EFTA States and SACU shall provide each other, through the EFTA Secretariat and the SACU Secretariat, with specimen impressions of stamps used in their customs offices for the issue of movement certificates EUR. 1, with the information on the composition of the authorisation number for approved exporters, with a specimen of an original movement certificate EUR. 1 form and with the addresses of the customs authorities responsible for verifying movement certificates EUR. 1 and invoice declarations.

ARTICLE 30

3. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the movement certificate EUR. 1 and the invoice, if it has been submitted, the invoice declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons for the enquiry. Any documents and information obtained suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.
4. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.
5. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.
6. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as product originating in an EFTA State or in SACU and fulfil the other requirements of this Annex.
7. If, in cases of a reasonable doubt, there is no reply within ten months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

ARTICLE 31

Dispute Settlement

1. Where disputes arise in relation to the verification procedures of Article 30 which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Annex, they shall be submitted to the Sub-Committee. 1. The EFTA States and SACU shall take all necessary steps to ensure that products traded under cover of a proof of origin which in the course of transport use a free zone situated in their territory, are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.
2. By means of an exemption to the provisions contained in paragraph 1, when products originating in an EFTA State or in SACU are imported into a free zone of the exporting country under cover of a proof of origin and undergo treatment or processing, the authorities concerned shall issue a new movement certificate EUR.1 at the exporter's request, if the treatment or processing undergone is in conformity with the provisions of this Annex.

APPENDIX 1 TO ANNEX V

INTRODUCTORY NOTES TO THE LIST IN APPENDIX 2

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 5 of this Annex.

Note 2:

- 2.1. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonized System and the second column gives the description of the goods used in that system for that heading or chapter. For each entry in the first two columns, a rule is specified in column 3 or 4. Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rules in column 3 or 4 apply only to the part of that heading as described in column 2.
- 2.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefor given in general terms, the adjacent rules in column 3 or 4 apply to all products which, under the Harmonized System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column 3 or 4.

- 2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 is to be applied.

Note 3:

- 3.1. The provisions of Article 5 of the Annex, concerning products having acquired originating status which are used in the manufacture of other products, shall apply, regardless of whether this status has been acquired inside the factory where these products are used or in another factory in a State Party.

Example:

An engine of heading 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 per cent of ex-works price, is made from "other alloy steel roughly shaped by forging" of heading ex 7224.

If this forging has been forged in the State Party concerned from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading ex 7224 in the list. The forging can then count as originating in the value-calculation for the engine, regardless of whether it was produced in the same factory or in another factory in the State Party concerned. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 3.2. The rule in the list represents the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.
- 3.3. Without prejudice to Note 3.2, where a rule uses the expression "Manufacture from materials of any heading", then materials of any heading(s) (even materials of the same description and heading as the product) may be used, subject, however, to any specific limitations which may also be contained in the rule.

However, the expression "Manufacture from materials of any heading, including other materials of heading" or "Manufacture from materials of any heading, including other materials of the same heading as the product" means that materials of any heading(s) may be used, except those of the same description as the product as given in column 2 of the list.

- 3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of headings 5306 to 5308 provides that natural fibres may be used and that chemical materials among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other, or both.

- 3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

Example:

The rule for prepared foods of heading 1904, which specifically excludes the use of cereals and their derivatives, does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth - even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn - that is, the fibre stage.

- 3.6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded, in relation to the particular materials to which they apply.

Note 4:

- 4.1. The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed, but not spun.
- 4.2. The term "natural fibres" includes horsehair of heading 0503, silk of headings 5002 and 5003, as well as the wool-fibres and fine or coarse animal hair of headings 5101 to 5105, cotton fibres of

headings 5201 to 5203, and the other vegetable fibres of headings 5301 to 5305.

- 4.3. The terms "textile pulp", "chemical materials" and "paper-making materials" are used in the list to describe the materials, not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 4.4. The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings 5501 to 5507.

Note 5:

- 5.1. Where, for a given product in the list, a reference is made to this Note, the conditions set out in column 3 shall not be applied to any basic textile materials used in the manufacture of this product and which, taken together, represent ten per cent or less of the total weight of all the basic textile materials used . (See also Notes 5.3 and 5.4 below).
- 5.2.1. However, the tolerance mentioned in Note 5.1 may be applied only to mixed products which have been made from two or more basic textile materials.
- 5.2.2. The following are the basic textile materials:
- silk,

 - wool,

 - coarse animal hair,

 - fine animal hair,

 - horsehair,

 - cotton,

 - paper-making materials and paper,

 - flax,

 - true hemp,

 - jute and other textile bast fibres,

 - sisal and other textile fibres of the genus Agave,

 - coconut, abaca, ramie and other vegetable textile fibres,

 - synthetic man-made filaments,

- artificial man-made filaments,
- current-conducting filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of poly(phenylene sulphide),
- synthetic man-made staple fibres of poly(vinyl chloride),
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester, whether or not gimped,
- products of heading 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading 5605.

Example:

A yarn, of heading 5205, made from cotton fibres of heading 5203 and synthetic staple fibres of heading 5506, is a mixed yarn. Therefore, non-originating synthetic staple fibres which do not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp) may be used, provided that their total weight does not exceed ten per cent of the weight of the yarn.

Example:

A cotton yarn, of heading 5204, made from cotton yarn of heading 5205 and synthetic yarn of staple fibres of heading 5509, is a mixed yarn. Therefore, synthetic yarn of which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp), or woollen yarn which does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning), or a combination of the two, may be used, provided their total weight does not exceed ten per cent of the weight of the fabric.

Example:

Tufted textile fabric, of heading 5802, made from cotton yarn of heading 5205 and cotton fabric of heading 5210, is only mixed product if the cotton fabric is itself a mixed fabric made from yarns classified in two separate headings, or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading 5205 and synthetic fabric of heading 5407, then, obviously, the yarns used are two separate basic textile materials and tufted textile fabric is, accordingly, a mixed product.

- 5.3. In the case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped", this tolerance is 20 per cent in respect of this yarn.
- 5.4. In the case of products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film", this tolerance is 30 per cent in respect of this strip.

Note 6:

- 6.1. Where, in the list, reference is made to this Note, textile materials (with the exception of linings and interlinings), which do not satisfy the rule set out in the list in column 3 for the made-up product concerned, may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed eight per cent of the ex-works price of the product.
- 6.2. Without prejudice to Note 6.3, materials, which are not classified within Chapters 50 to 63, may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example:

If a rule in the list provides that, for a particular textile item (such as trousers), yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

- 6.3. Where a percentage-rule applies, the value of materials, which are not classified within Chapters 50 to 63, must also be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

- 7.1. The purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the "specific processes" are the following:
- (a) vacuum-distillation;
 - (b) re-distillation by a very thorough fractionation process;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; de-colourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation.
- 7.2. The purposes of headings 2710, 2711 and 2712, the "specific processes" are the following:
- (a) vacuum-distillation;
 - (b) re-distillation by a very thorough fractionation process;

- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all of the following operations; processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; de-colourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (ij) isomerisation;
- (k) in respect of heavy oils of heading ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at least 85 per cent of the sulphur-content of the products processed (ASTM D 1266-59 T method);
- (l) in respect of products of heading 2710 only, deparaffining by a process other than filtering;
- (m) in respect of heavy oils of heading ex 2710 only, treatment with hydrogen, at a pressure of more than 20 bar and a temperature of more than 250° C, with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment, with hydrogen, of lubricating oils of heading ex 2710 (e.g. hydrofinishing or decolourisation), in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
- (n) in respect of fuel oils of heading ex 2710 only, atmospheric distillation, on condition that less than 30 per cent of these products distils, by volume, including losses, at 300 °C by the ASTM D 86 method;
- (o) in respect of heavy oils other than gas oils and fuel oils of heading ex 2710 only, treatment by means of a high-frequency electrical brush-discharge;
- (p) in respect of crude products (other than petroleum jelly, ozokerite, lignite wax or peat wax, paraffin wax containing by weight less than 0.75 per cent of oil) of heading ex 2712 only, de-oiling by fractional crystallisation.
- 7.3. For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations, such as cleaning, decanting, desalting, water-separation, filtering, colouring, marking, obtaining a sulphur-content as a result of mixing products with different sulphur contents, any combination of these operations or like operations, do not confer origin.

Issuing of a certificate of origin on the basis of a proof of origin issued or made out previously

1. When originating goods are placed under the control of a customs office in a Member State of SACU or MERCOSUR, it shall be possible to replace the original proof of origin by one or more certificate/s of origin for the purpose of sending all or some of these goods elsewhere within the Member States of SACU or MERCOSUR. The replacement certificate of origin shall be issued by the competent governmental authority under whose control the products are placed.
2. In the case of MERCOSUR, this article shall apply only to the Signatory Parties that have decided on its implementation and that have duly notified the Joint Committee thereof.

Article 20

Validity of certificate of origin

1. The certificate of origin shall be valid for six months from the date of issue in the exporting country, and must be submitted within the said period to the customs authorities of the importing country.
2. Certificates of origin which are submitted to the customs authorities of the importing country after the final date for presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the failure to submit these documents by the final date set is due to exceptional circumstances.
3. In other cases of belated presentation, the customs authorities of the importing country may accept the certificates of origin where the products have been submitted before the said final date.

Article 21

Submission of certificate of origin

Certificates of origin shall be submitted to the customs authority of the importing country in accordance with the procedures applicable in that country. The said authorities may require a translation of a certificate of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of the Agreement.

Article 22

Importation by instalments

Where, at the request of the importer and on the conditions laid down by the customs authority of the importing country, dismantled or non-assembled products within the meaning of General Rule 2(a) of the Harmonized System falling within Sections XVI and XVII, Chapter 90 or headings 7308 and 9406 of the Harmonized System are imported by instalments, a single certificate of origin for such products shall be submitted to the customs authority upon importation of the first instalment.

Article 23

Exemptions from certificate of origin

1. Products sent as small packages from private persons to private persons or forming part of travellers' personal luggage shall be admitted as originating products without requiring the submission of a certificate of origin, provided that such products are not imported by way of trade and have been declared as meeting the requirements of this Annex and where there is no doubt as to the veracity of such a declaration. In the case of products sent by post, this declaration can be made on the customs declaration CN22/CN23 or on a sheet of paper annexed to that document.
2. For the purposes of paragraph 1:
 - (a) imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is intended; and
 - (b) in case of small packages or products forming part of travellers' personal luggage, the total value of these products shall not exceed the value stipulated in the national legislation of the Signatory Party concerned.

Article 24¹⁰

Supporting documents

1. The documents referred to in this Article 16(3) used for the purpose of proving that products covered by a certificate of origin can be considered as products originating in MERCOSUR or in SACU and fulfil the other requirements of this Annex may consist *inter alia* of the following:
 - (a) direct evidence of the processes carried out by the exporter or supplier to obtain the goods concerned, contained for example in his accounts or internal book-keeping;
 - (b) documents proving the originating status of materials used, issued or made out in MERCOSUR or in SACU where these documents are used in accordance with domestic law;
 - (c) documents proving the working or processing of materials in MERCOSUR or in SACU, issued or made out in a MERCOSUR or in SACU, where these documents are used in accordance with domestic law; or
 - (d) certificates of origin proving the originating status of materials used, issued or made out in MERCOSUR or in SACU in accordance with this Annex.

Article 25

Preservation of certificate of origin and supporting documents

1. The exporter applying for the issue of a certificate of origin shall keep for at least three years the documents referred to in Article 16(3).
2. The competent authority of the exporting country responsible for issuing certificates of origin shall keep for at least three years the application form referred to in Article 16(2).
3. The customs authority of the importing country shall ensure the availability, for at least three years, of the certificates of origin submitted for preferential treatment.

¹⁰ The term "the other requirements", mentioned in this Article, does not include the requirements of direct transport and exhibition, since those requirements shall be checked by the customs authorities of the importing country.

Article 26

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the certificate of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not, *ipso facto*, render the certificate of origin null and void if it is duly established that this document does correspond to the products submitted.
2. Obvious formal errors on a certificate of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.¹¹

Title V

Arrangements for Administrative Co-operation**Article 27****Notifications**

The customs or competent authorities of SACU and MERCOSUR shall provide each other, through the SACU and the MERCOSUR Secretariats respectively, with specimen impressions of official stamps and signatures (used in their offices) for the issue of certificates of origin and with the addresses of the customs or competent authorities responsible for verifying the authenticity of the certificates of origin and the correctness of the information given therein.

Article 28**Verification of certificate of origin¹²**

1. In order to ensure the proper application of this Annex, MERCOSUR and SACU shall assist each other, through the customs or competent authorities, in checking the authenticity of the certificates of origin and the correctness of the information given in these documents.
2. Subsequent verifications of certificates of origin shall be carried out at random or whenever the customs or competent authority of the importing country have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Annex.
3. For the purposes of implementing the provisions of paragraph 1, the customs or competent authority of the importing country shall return the certificate of origin, if it has been submitted, or a copy of these documents, to the customs or competent authority of the exporting country giving, where appropriate, the reasons for the enquiry. Any documents and information obtained suggesting that the information given on the certificate of origin is incorrect shall be forwarded in support of the request for verification.

¹¹ Obvious formal errors include, but are not limited to, typing errors, and exclude, deliberate errors.

¹² The term "the other requirements", mentioned in paragraphs 2 and 6 of this Article, does not include the requirements of direct transport and exhibition, since those requirements shall be checked by the customs authorities of the importing country.

4. The verification shall be carried out by the customs or competent authority of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.
5. If the customs authority of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.
6. The customs or competent authority requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in MERCOSUR or in SACU and fulfil the other requirements of this Annex.
7. If in cases of reasonable doubt there is no reply within ten months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authority shall, except in exceptional circumstances, refuse entitlement to the preferences.
8. The requesting customs or competent authority shall inform the customs or competent authority of the exporting country of its decision on the basis of the verification in question.

Article 29**Dispute settlement**

1. Where disputes arise in relation to the verification procedures of Article 27 which cannot be settled between the customs or competent authority requesting a verification and the customs or competent authority responsible for carrying out this verification or where they raise a question as to the interpretation of this Annex, they shall be submitted to the Joint Administration Committee, without prejudice to the Parties' or the Signatory Parties' rights to have recourse to the Dispute Settlement mechanism of this Agreement.
2. In all cases the settlement of disputes between the importer and the customs or competent authority of the importing country shall be under the legislation of the said country.

Article 30**Penalties**

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

Article 31**Free Zones**

1. The treatment to be afforded to goods from Free Zones will be subject to a decision to be reached as foreseen in the Understanding on Free Zones attached to this Annex as Appendix IV.
2. In the interim, MERCOSUR and SACU shall take all necessary steps to ensure that products traded under cover of a proof of origin, which in the course of transport use a free zone situated in their territory, are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.

Title VI**Final Provisions****Article 32****Review**

The Joint Administration Committee shall review this Annex no later than three years after the entry into force of the Agreement, or in the event of a new round of negotiations intended to deepen or broaden the scope of the Preferential Trade Agreement and, as appropriate, propose to the Parties amendments to the criteria for the determination, application and administration of origin.

Article 33**Traditional provisions for goods in transit or storage**

The provisions of the Agreement may be applied to goods which comply with the provisions of this Annex and which on the date of entry into force of the Agreement are either in transit or are in MERCOSUR or in SACU in temporary storage in customs warehouses or in free zones, subject to the submission to the customs or competent authority of the importing country, within six months of the said date, of a certificate of origin issued retrospectively by the customs or competent authority of the exporting country together with the documents showing that the goods have been transported directly in accordance with the provisions of Article 11.

Appendix

Appendix I, II, III and IV are part of this Annex.

ANNEX III**APPENDIX I****Introductory notes to the list in Appendix II****Note 1:**

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 5 of Annex III.

Note 2:

- 2.1 The first two columns in the list describe the product obtained. The first column gives the chapter number, heading number or sub-heading used in the Harmonized System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns, a rule is specified in column 3 or 4. Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rules in column 3 or 4 apply only to the part of that heading as described in column 2.
- 2.2 Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in column 3 or 4 apply to all products which, under the Harmonized System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 2.3 Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column 3 or 4.
- 2.4 Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 is to be applied.

Note 3:

- 3.1 The provisions of Article 5 of Annex III, concerning products having acquired originating status which are used in the manufacture of other products, shall apply, regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the territory of a Signatory Party.
- 3.2 The rule in the list represents the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.
- 3.3 Without prejudice to Note 3.2, where a rule uses the expression "Manufacture from materials of any heading", then materials of any heading(s) (even materials of the same description and heading as the product) may be used, subject, however, to any specific limitations which may also be contained in the rule.
- 3.4 Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded, in relation to the particular materials to which they apply.

Note 4:

- 4.1 For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the "specific processes" are the following:
- (a) vacuum-distillation;
 - (b) re-distillation by a very thorough fractionation-process;
 - (c) cracking;
 - (d) reforming
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation; and/or
 - (i) isomerisation.
- 4.2 For the purposes of headings 2710, 2711 and 2712, the "specific processes" are the following:
- (a) vacuum-distillation;
 - (b) re-distillation by a very thorough fractionation-process;
 - (c) cracking;
 - (d) reforming;
 - (e) Extraction by means of selective solvents;
 - (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation;
 - (j) in respect of heavy oils of heading ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at least 85 per cent of the sulphur-content of the products processed (ASTM D 1266-59 T method);
 - (k) in respect of products of heading 2710 only, de-paraffining by a process other than filtering;
 - (l) in respect of heavy oils of heading ex 2710 only, treatment with hydrogen, at a pressure of more than 20 bar and a temperature of more than 250 degrees C, with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment, with hydrogen, of lubricating oils of heading ex 2710 (e.g. hydrofinishing or decolourisation), in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;

- (m) in respect of fuel oils of heading 2710 only, atmospheric distillation, on condition that less than 30 per cent of these products distils, by volume, including losses, at 300 degrees C by the ASTM D 86 method;
- (n) in respect of heavy oils other than gas oils and fuel oils of heading ex 2710 only, treatment by means of a high-frequency electrical brush-discharge; and/or
- (o) in respect of crude products (other than petroleum jelly, ozokerite, lignite wax or peat wax, paraffin wax containing by weight less than 0.75 per cent of oil) of heading ex 2712 only, de-oiling by fractional crystallisation.

4.3 For the purposes of headings 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations, such as cleaning, decanting, desalting, water-separation, filtering, colouring, marking, obtaining a sulphur-content as a result of mixing products with different sulphur contents, any combination of these operations or like operations, do not confer origin.

4.4 Chemical processing rules to confer originating status

Section VI of the HS tariff classification: Products of the Chemical or Allied Industries (Chapter 28-38)

Rule 1: Chemical Reaction Origin

A good of Chapters 28 through 38, which is subject to a chemical reaction, shall be treated as an originating good if the chemical reaction occurred in the territory of one or more of the Signatory Parties.

Note: For the purposes of this section, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of determining whether a product is an originating good:

- (a) dissolution in water or in other solvents;
- (b) the elimination of solvents including solvent water; or
- (c) the addition or elimination of water of crystallization.

Rule 2: Purification Origin

A good of Chapters 28 through 38, that is subject to purification, shall be treated as originating provided that one of the following occurs in the territory of one or more of the Signatory Parties:

- (a) purification of a good resulting in the elimination of 80 per cent of the content of existing impurities; or
- (b) the reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:
 - (i) pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances;
 - (ii) chemical products and reagents for analytical, diagnostic or laboratory uses;
 - (iii) elements and components for use in micro-elements;
 - (iv) specialized optical uses;
 - (v) non toxic uses for health and safety;
 - (vi) biotechnical use;
 - (vii) carriers used in a separation process; or
 - (viii) nuclear grade uses.

APPENDIX II to ANNEX III:

List of working or processing required to be carried out on non-originating materials in order that the product manufactured can obtain originating status

Note: The products mentioned in the list may not all be covered by this Agreement. It is therefore necessary to consult the other parts of this Agreement. The working or processing mentioned hereunder will only be applicable to products specified in Annex I and Annex II of this Agreement.

APPENDIX IV**Understanding on Free Zones**

SACU and MERCOSUR agree to continue their work to develop a common approach to the treatment of products manufactured or produced in Free Zones. In doing so, they will ensure balance in the PTA and consider the specific role and impact of Free Zones in the economic development of the Signatory Parties. For the purpose:

1. Within ninety (90) days after signing of the Preferential Trade Agreement (PTA) between MERCOSUR and SACU, the Signatory Parties will designate focal points (names, titles, positions, contacts) for carrying out the commitments established in this Understanding.
2. Within thirty (30) days after the designation of the focal points, MERCOSUR and SACU will create a Joint Working Group to:
 - (a) analyse the rules, operations and overall procedures of Free Zones in MERCOSUR and SACU,
 - (b) facilitate missions, that may include Embassy officials, to visit Free Zones in the respective territories of the Parties in order to verify *in loco* the conditions under which they operate (including customs controls), and
 - (c) make recommendations on the treatment of goods from Free Zones under the PTA, taking into account the importance of effective customs controls and compliance with rules of origin of the PTA.
3. Within the Joint Working Group, MERCOSUR and SACU will exchange requests for documents and information they may consider necessary for the assessments on their Free Zones. Both sides will respond to questions and requests within a reasonable period of time after receiving them.
4. The Joint Working Group shall submit its findings and proposals to the Joint Administration Committee for a decision.

Sufficiently worked or processed products

1. For the purposes of Article 2 of this Protocol, products which are not wholly obtained are considered to be sufficiently worked or processed when the conditions set out in Annex II are fulfilled.
2. Notwithstanding paragraph 1, the products which are listed in Annex II(a) can be considered to be sufficiently worked or processed, for the purposes of Article 2 of this Protocol, when the conditions set out in that Annex are fulfilled.

3. The conditions referred to in paragraphs 1 and 2 above indicate, for all products covered by this Agreement, the working or processing which must be carried out on non originating materials used in manufacturing and apply only in relation to such materials. Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out in either Annex II or Annex II(a), is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non originating materials which may have been used in its manufacture.
4. Notwithstanding paragraphs 1 and 2, non originating materials which, according to the conditions set out in Annex II and Annex II(a) should not be used in the manufacture of a given product may nevertheless be used, provided that:
 - (a) their total value does not exceed 15 per cent of the ex works price of the product;
 - (b) any of the percentages given in Annex II and Annex II(a) for the maximum value of non originating materials are not exceeded through the application of this paragraph.

6. Paragraphs 1 to 5 shall apply subject to the provisions of Article 9 of this Protocol.

 - (b) breaking up and assembly of packages;
 - (c) washing, cleaning; removal of dust, oxide, oil, paint or other coverings;

ARTICLE 10

Unit of qualification

1. The unit of qualification for the application of the provisions of this Protocol shall be the particular product which is considered as the basic unit when determining classification using the nomenclature of the Harmonised System.

Accordingly, it follows that:

- (a) when a product composed of a group or assembly of articles is classified under the terms of the Harmonised System in a single heading, the whole constitutes the unit of qualification;
 - (b) when a consignment consists of a number of identical products classified under the same heading of the Harmonised System, each product must be taken individually when applying the provisions of this Protocol.
2. Where, under General Rule 5 for the interpretation of the Harmonised System, packaging is included with the product for classification purposes, it shall be included for the purposes of determining origin.

Article 11

Accessories, spare parts and tools

Accessories, spare parts and tools dispatched with a piece of equipment, machine, apparatus or vehicle, which are part of the normal equipment and included in the price thereof or which are not separately invoiced, shall be regarded as one with the piece of equipment, machine, apparatus or vehicle in question.

 - (b) plant and equipment;
 - (c) machines and tools;
 - (d) goods which do not enter and which are not intended to enter into the final composition of the product.

1. Except as provided for in Articles 3, 4, 4A, 5 and 6 of this Protocol and paragraph 3, the conditions for acquiring originating status set out in Title II must be fulfilled without interruption in a SACU Member State or Mozambique or in the UK.
2. Except as provided for in Articles 3, 4, 4A, 5 and 6 of this Protocol, where originating goods exported from a SACU Member State or Mozambique or from the UK to another country return, they must be considered as non originating, unless it can be demonstrated to the satisfaction of the customs authorities that:
 - (a) the returning goods are the same goods as those exported; and
 - (b) they have not undergone any operation beyond that necessary to preserve them in good condition while in that country or while being exported.
3. The acquisition of originating status in accordance with the conditions set out in Title II shall not be affected by working or processing done outside the UK or a SACU Member State or Mozambique on materials exported from the UK or from a SACU Member State or Mozambique, as the case may be, and subsequently re imported there, provided that:
 - (a) the said materials are wholly obtained in the UK or in a SACU Member State or Mozambique, respectively, or have undergone working or processing beyond the operations referred to in Article 9 of

- this Protocol prior to being exported; and
- (b) it can be demonstrated to the satisfaction of the customs authorities that:
- (i) the re imported goods have been obtained by working or processing the exported materials; and
 - (ii) the total added value acquired outside the UK or a SACU Member State or Mozambique, respectively, by applying the provisions of this Article does not exceed 10 % of the ex works price of the end product for which originating status is claimed.
4. For the purposes of paragraph 3, the conditions for acquiring originating status set out in Title II shall not apply to working or processing done outside the UK, a SACU Member State or Mozambique, respectively. But where, in the list in Annex II or Annex II(a), a rule setting a maximum value for all the non originating materials incorporated is applied in determining the originating status of the end product, the total value of the non originating materials incorporated in the territory of the party concerned, taken together with the total added value acquired outside the UK, a SACU Member State or Mozambique, respectively by applying the provisions of this Article, shall not exceed the stated percentage.
5. For the purposes of applying the provisions of paragraphs 3 and 4, total added value shall be taken to mean all costs arising outside the UK, a SACU Member State or Mozambique, respectively, including the value of the materials incorporated there.
6. The provisions of paragraphs 3 and 4 shall not apply to products which do not fulfil the conditions set out in the list in Annex II or Annex II(a) or which can be considered sufficiently worked or processed only if the general tolerance laid down in Article 8(4) of this Protocol is applied.
7. The provisions of paragraphs 3 and 4 shall not apply to products of Chapters 50 to 63 of the Harmonised System.
8. Any working or processing of the kind covered by the provisions of this Article and done outside the UK, a SACU Member State or Mozambique, respectively, shall be done under the outward processing arrangements, or similar arrangements.

ARTICLE 15

1. The products declared for home use in a Party shall be the same products as exported from the other Party in which they are considered to originate. They shall not have been altered, transformed in any way or subjected to operations other than to preserve them in good condition or than adding or affixing marks, labels, seals or any documentation to ensure compliance with specific domestic requirements of the importing Party, prior to being declared for home use.
2. Storage of products or consignments may take place provided they remain under customs supervision in the country(ies) of transit.
3. Without prejudice to the provisions of Title V, the splitting of consignments may take place where carried out by the exporter or under his responsibility, provided they remain under customs supervision in the country(ies) of splitting.

ARTICLE 16

1. Where considerable cost or material difficulties arise in keeping separate stocks of originating and non originating fungible materials, the customs authorities may, at the written request of those concerned, authorise the so called accounting segregation method (hereinafter referred to as the method) to be used for managing such stocks.
2. The method shall ensure that, at any time, the number of products obtained which could be considered as originating in a SACU Member State or Mozambique or in the UK is the same as that which would have been obtained had there been physical segregation of the stocks.
3. The customs authorities may grant the authorisation referred to in paragraph 1 subject to any conditions deemed appropriate.
4. The method shall be applied and the application thereof shall be recorded on the basis of the general accounting principles applicable in the country where the product was manufactured.
5. The beneficiary of the method may make out or apply for proofs of origin, as the case may be, for the quantity of products which may be considered as originating. At the request of the customs authorities, the beneficiary shall provide a statement of how the quantities have been managed.
6. The customs authorities shall monitor the use made of the authorisation and may withdraw it whenever the beneficiary makes improper use of the authorisation in any manner whatsoever or fails to fulfil any of the other conditions laid down in this Protocol.

3. In other cases of belated presentation, the customs authorities of the importing country may accept the proofs of origin where the products have been submitted before the said final date.

ARTICLE 27

Submission of proof of origin

Proof of origin shall be submitted to the customs authorities of the importing country in accordance with the procedures applicable in that country. A long term supplier's declaration may be issued for a period of up to one year from the date of issue of the declaration.
4. A long term supplier's declaration may be issued with retroactive effect. In such cases, its validity may not exceed a period of one year from the date on which it came into effect. However it is recognised that the customs authority would have the right to revoke a long term supplier's declaration, should the circumstances change, or when inaccurate or false information has been provided.
5. The supplier shall inform the client immediately when the long term supplier's declaration is no longer valid in relation to the goods supplied.
6. The supplier's declaration may be made out on a pre printed form.
7. The suppliers' declarations shall bear the original signature of the supplier in manuscript. However, where the origin and the supplier's declaration are established using electronic data processing methods, the supplier's declaration need not be signed in manuscript provided the responsible official in the supplying company is identified to the satisfaction of the customs authorities in the State where the suppliers' declarations are established. The said customs authorities may lay down conditions for the implementation of this paragraph.
8. The supplier's declarations shall be submitted to the customs authorities in the exporting country requested to issue the movement certificate EUR.1.

ARTICLE 33

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not ipso facto render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.
2. Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

conversion of that amount, prior to any rounding off, results in an increase of less than 15 per cent in the national currency equivalent. The national currency equivalent may be retained unchanged if the conversion would result in a decrease in that equivalent value.

5. The amounts expressed in Euro shall be reviewed by the Committee at the request of the UK, a SACU Member State or Mozambique. When carrying out this review, the Committee shall consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in Euro.

Notification of customs authorities

1. The SACU Member States, Mozambique, and the UK, shall provide each other with the addresses of the customs authorities responsible for issuing and verifying movement certificates EUR.1 and origin declarations or supplier's declarations, and with specimen impressions of the stamps used in their customs offices for the issue of these certificates. Movement certificates EUR.1 and origin declarations or supplier's declarations shall be accepted for the purpose of applying preferential treatment from the date the information is received by the UK, the SACU Secretariat and the Ministry of Industry and Trade of Mozambique.
2. The SACU Member States, Mozambique, and the UK shall inform each other immediately whenever there are any changes to the information referred to in paragraph 1.
3. The authorities referred to in paragraph 1 shall act under the authority of the government of the country concerned. The authorities in charge of control and verification shall be part of the governmental authorities of the country concerned.

ARTICLE 37

Mutual assistance

1. In order to ensure the proper application of this Protocol, the UK, the SACU Member States and Mozambique shall assist each other, through the competent customs administrations, in checking the authenticity of the movement certificates EUR.1, the origin declarations or the supplier's declarations and the correctness of the information given in these documents.
2. The authorities consulted shall furnish the relevant information concerning the conditions under which the product has been made, indicating especially the conditions in which the rules of origin have been respected in the various SACU Member States or Mozambique, in the UK and the other countries referred to in Articles 4, 4A and 6 of this Protocol concerned.

ARTICLE 38

Verification of proof of origin

1. Subsequent verifications of proof of origin shall be carried out based on risk analysis and at random or whenever the customs authorities of the importing country have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Protocol.
2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the movement certificate EUR.1 and the invoice, if it has been submitted, the origin declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons for the request for verification. Any documents and information obtained suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.

suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.

3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.
4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.
5. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in a SACU Member State, Mozambique, the UK or in one of the other countries referred to in Articles 4, 4A and 6 of this Protocol and fulfil the other requirements of this Protocol.
6. If in cases of reasonable doubt there is no reply within ten (10) months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.
7. Where the verification procedure or any other available information appears to indicate that the provisions of this Protocol are being contravened, the exporting country on its own initiative or at the request of the importing country shall carry out appropriate enquiries or arrange for such enquiries to be carried out with due urgency to identify and prevent such contraventions and for this purpose the exporting country concerned may invite the participation of the importing country in these verifications.

ARTICLE 39

Verification of suppliers' declarations

1. Verification of suppliers' declarations shall be carried out based on risk analysis and at random or whenever the customs authorities of the country where such declarations have been taken into account to issue a movement certificate EUR.1 or to make out an origin declaration, have reasonable doubts as to the authenticity of the document or the correctness of the information given in this document.
2. The customs authorities to which a supplier's declaration is submitted may request the customs authorities of the State where the declaration was made to issue an information certificate, a specimen of which appears in Annex VI. Alternatively, the customs authorities to whom a supplier's declaration is submitted may request the exporter to produce an information certificate issued by the customs authorities of the State where the declaration was made. A copy of the information certificate shall be preserved by the office which has issued it for at least three (3) years.
3. The customs authorities requesting the verification shall be informed of the results thereof as soon as possible. The results must indicate clearly whether the information given in the supplier's declaration is correct and make it possible for them to determine whether and to what extent this supplier's declaration could be taken into account for issuing a movement certificate EUR.1 or for making out an origin declaration.
4. The verification shall be carried out by the customs authorities of the country where the supplier's declaration was made out. For this purpose, they shall have the right to call for any evidence or to carry out any inspection of the supplier's account or any other check which they consider appropriate in order to verify the correctness of any supplier's declaration.
5. Any movement certificate EUR.1 or origin declaration issued or made out on the basis of an incorrect supplier's declaration shall be considered null and void.

ARTICLE 40

Dispute settlement

1. Where disputes arise in relation to the verification procedures of Articles 38 and 39 of this Protocol which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Protocol, they shall be submitted to the Committee.
2. In all cases the settlement of disputes between the importer and the customs authorities of the importing country shall take place under the legislation of that country.

ARTICLE 41

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

ARTICLE 42

Free zones

1. The SACU Member States, Mozambique, and the UK shall take all necessary steps to ensure that products traded under cover of a proof of origin or a supplier's declaration and which in the course of transport use a free zone situated in their territory, are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.
2. By means of an exemption to the provisions contained in paragraph 1, when products originating in a SACU Member State, Mozambique or the UK are imported into a free zone under cover of a proof of origin

and undergo treatment or processing, the authorities concerned shall issue a new movement certificate EUR.1 at the exporter's request, if the treatment or processing undergone complies with the provisions of this Protocol.

ARTICLE 43

Derogations

1. Derogations from this Protocol may be adopted by the Committee, where the development of existing industries or the creation of new industries in the SACU Member States or Mozambique justifies them.
 - 1.1 The SACU Member State concerned or Mozambique shall, either before or when submitting the matter to the Committee, notify the UK of its request for a derogation together with the reasons for the request in accordance with paragraph 2.
- 1.2 The UK shall respond positively to all the SACU Member States and Mozambique's requests which are duly justified in conformity with this Article and which cannot cause serious injury to an established UK industry.
2. In order to facilitate the examination by the Committee of requests for derogation, the SACU Member State or States or Mozambique making the request shall, by means of the form given in Annex VII, furnish in support of its request the fullest possible information covering in particular the points listed below:
 - (a) description of the finished product;
 - (b) nature and quantity of materials originating in a third country;
 - (c) nature and quantity of materials originating in the SACU Member States, Mozambique, or the countries or territories referred to in Articles 4, 4A and 6 of this Protocol or the materials which have been processed there;
 - (d) manufacturing processes;
 - (e) value added;
 - (f) number of employees in the enterprise concerned;
 - (g) anticipated volume of exports to the UK;
 - (h) other possible sources of supply for raw materials;
 - (i) reasons for the duration requested in the light of efforts made to find new sources of supply;
 - (j) other observations.The same rules shall apply to any requests for extension. The Committee may modify the form.
3. The examination of requests shall in particular take into account:
 - (a) the level of development or the geographical situation of the SACU Member State or States or Mozambique concerned;
 - (b) cases where the application of the existing rules of origin would significantly affect the ability of an existing industry in a SACU Member State or States or Mozambique to continue its exports to the UK, with particular reference to cases where this could lead to cessation of its activities;
 - (c) specific cases where it can be clearly demonstrated that significant investment in an industry could be deterred by the rules of origin and where a derogation favouring the realisation of the investment program would enable these rules to be satisfied by stages.
4. In every case an examination shall be made to ascertain whether the rules relating to cumulation of origin do not provide a solution to the problem.
5. In addition, when a request for derogation concerns a least developed SACU Member State or Mozambique, its examination shall be carried out with a favourable bias having particular regard to:
 - (a) the economic and social impact of the decision to be taken especially in respect of employment;
 - (b) the need to apply the derogation for a period taking into account the particular situation of the SACU Member State concerned or Mozambique and its difficulties.
6. In the examination of requests, special account shall be taken, case by case, of the possibility of conferring originating status on products which include in their composition materials originating in LDCs or developing countries with which one or more SACU Member States or Mozambique have special relations, provided that satisfactory administrative cooperation can be established.
7. Without prejudice to paragraphs 1 to 6, the derogation shall be granted where the value added to the non-originating products used in the concerned SACU Member State or Mozambique is at least 45 per cent of the value of the finished product, provided that the derogation is not such as to cause serious injury to an economic sector of the UK
8. The Committee shall take steps necessary to ensure that a decision is reached as soon as possible and in any case not later than seventy five (75) working days after the request is received by the UK Co

chairman of the Committee. If the UK does not inform the SACU Member States or Mozambique of its position on the request within this period, the request shall be deemed to have been accepted.

- 9.(a) The derogation shall be valid for a period, generally of five (5) years, to be determined by the Committee.
- (b) The derogation decision may provide for renewals without a new decision of the Committee being necessary, provided that the SACU Member State concerned or Mozambique submit, three (3) months before the end of each period, proof that they are still unable to meet the conditions of this Protocol, which have been derogated from. If any objection is made to the extension, the Committee shall examine it as soon as possible and decide whether to prolong the derogation. The Committee shall proceed as provided for in paragraph 8. All necessary measures shall be taken to avoid interruptions in the application of the derogation.
- (c) In the periods referred to in subparagraphs (a) and (b), the Committee may review the terms for implementing the derogation should a significant change be found to have taken place in the substantive factors governing the decision to grant the derogation. On conclusion of its review the Committee may decide to amend the terms of its decision as regards the scope of derogation or any other condition previously laid down.
10. Notwithstanding paragraphs 1 to 9, an automatic derogation concerning prepared or preserved Albacore tuna (*Thunnus alalunga*) of HS Heading 1604, manufactured from non originating Albacore tuna of HS Headings 0302 or 0303, shall be granted to Namibia from the date the Agreement takes effect between Namibia and the UK within an annual quota of 254 metric tons.
11. Notwithstanding paragraphs 1 to 9, an automatic derogation to in Article 7(2)(c) of this Protocol shall be granted to Mozambique. This derogation shall apply for a duration of five (5) years from the entry into force of this Agreement to shrimps, prawns and lobsters of HS Headings 0306 and 1605 caught in the Exclusive Economic Zone of Mozambique and landed and processed in Mozambique.

TITLE VI

CEUTA AND MELILLA

ARTICLE 44

Special conditions

The term EU used in this Protocol does not cover Ceuta and Melilla. Products originating in Ceuta and Melilla are not considered to be products originating in the EU for the purposes of this Protocol.

TITLE VI

FINAL PROVISIONS

ARTICLE 45

Revision and application of rules of origin

1. In accordance with Article 101 of this Agreement, the Joint Council shall examine annually, or whenever the SACU Member State, Mozambique or the UK so request, the application of the provisions of this Protocol and their economic effects with a view to making any necessary amendments or adaptations.
2. The Joint Council shall take into account among other elements the effects on the rules of origin of technological developments.
3. The decisions taken shall be implemented as soon as possible.
4. In accordance with Article 50 of this Agreement, the Committee shall, inter alia, take decisions on derogations from this Protocol, under the conditions laid down in Article 43 of this Protocol.

ARTICLE 46

Annexes

The Annexes to this Protocol shall form an integral part thereof.

ARTICLE 47

Implementation of the Protocol

The UK, SACU Member States and Mozambique shall each take the steps necessary to implement this Protocol.

ANNEX I**Introductory notes to the list in Annex II**

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 8 of the Protocol.

Note 2:

1. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonised System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns a rule is specified in columns 3 or 4. Where, in some cases, the entry in the first column is preceded by an 'ex', this signifies that the rules in columns 3 or 4 apply only to the part of that heading as described in column 2.
2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in columns 3 or 4 apply to all products which, under the Harmonised System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in columns 3 or 4.
4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 has to be applied.

Note 3:

1. The provisions of Article 8 of this Protocol concerning products having acquired originating status which are used in the manufacture of other products apply regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the UK, the SACU Member States or Mozambique, respectively.

Example:

An engine of heading No 8407, for which the rule states that the value of the non originating materials which may be incorporated may not exceed 40 per cent of the ex works price, is made from other alloy steel roughly shaped by forging of heading No ex 7224.

If this forging has been forged in the UK from a non originating ingot, it has already acquired originating status by virtue of the rule for heading No ex 7224 in the list. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in the UK. The value of the non originating ingot is thus not taken into account when adding up the value of the non originating materials used.

2. The rule in the list represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer originating status. Therefore, if a rule provides that non originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.
3. Without prejudice to Note 3.2 where a rule states that materials of any heading may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression 'manufacture from materials of any heading, including other materials of heading No' means that only materials classified in the same heading as the product of a different description than that of the product as given in column 2 of the list may be used.
4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of heading Nos 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.3 below in relation to textiles).

Example:

The rule for prepared foods of heading No 1904 which specifically excludes the use of non originating cereals and their derivatives does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non woven materials, if the use of only non originating yarn is allowed for this class of article, it is not possible to start from non woven cloth even if non woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn that is the fibre stage.

6. Where, in a rule in the list, two percentages are given for the maximum value of non originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non originating materials used may never exceed the highest of the percentages given. Furthermore, the individual percentages must not be exceeded in relation to the particular materials they apply to.

Note 4

1. The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.
2. The term "natural fibres" includes horsehair of heading No 0503, silk of heading Nos 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of heading Nos 5101 to 5105, the cotton fibres of heading Nos 5201 to 5203 and the other vegetable fibres of heading Nos 5301 to 5305.
3. The terms "textile pulp, chemical materials and paper making materials" are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
4. The term man made staple fibres is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of heading Nos 5501 to 5507.

Note 5:

1. Where for a given product in the list a reference is made to this note, the conditions set out in column 3 shall not be applied to any basic textile materials, used in the manufacture of this product, which, taken together, represent 10 per cent or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4 below).
2. However, the tolerance mentioned in Note 5.1 may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus Agave,

- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man made filaments,
- artificial man made filaments,
- current conducting filaments,
- synthetic man made staple fibres of polypropylene,
- synthetic man made staple fibres of polyester,
- synthetic man made staple fibres of polyamide,
- synthetic man made staple fibres of polyacrylonitrile,
- synthetic man made staple fibres of polyimide,
- synthetic man made staple fibres of polytetrafluoroethylene,
- synthetic man made staple fibres of polyphenylene sulphide,
- synthetic man made staple fibres of polyvinyl chloride,
- other synthetic man made staple fibres,
- artificial man made staple fibres of viscose,
- other artificial man made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped,
- products of heading No 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading No 5605.

Example:

A yarn of heading No 5205 made from cotton fibres of heading No 5203 and synthetic staple fibres of heading No 5506 is a mixed yarn. Therefore, non originating synthetic staple fibres that do not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 per cent of the yarn.

Example:

A woollen fabric of heading No 5112 made from woollen yarn of heading No 5107 and synthetic yarn of staple fibres of heading No 5509 is a mixed fabric. Therefore synthetic yarn which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed 10 per cent of the weight of the fabric.

Example:

Tufted textile fabric of heading No 5802 made from cotton yarn of heading No 5205 and cotton fabric of heading No 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading No 5205 and synthetic fabric of heading No 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

3. In the case of products incorporating yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped this tolerance is 20 per cent in respect of this yarn.
4. In the case of products incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film, this tolerance is 30 per cent in respect of this strip.

Note 6:

1. In the case of those textile products, which are marked in the list by a footnote referring to this Introductory Note, textile trimmings and accessories which do not satisfy the rule set out in the list in column 3 for the made up products concerned may be used provided that their weight does not exceed 10 % of the total weight of all the textile materials incorporated.

Textile trimmings and accessories are those classified in Chapters 50 to 63. Linings and interlinings are not to be regarded as trimmings or accessories.

2. Any non textile trimmings and accessories or other materials used which contain textiles do not have to satisfy the conditions set out in column 3 even though they fall outside the scope of Note 3.5.
3. In accordance with Note 3.5, any non originating non textile trimmings and accessories or other product, which do not contain any textiles, may, anyway, be used freely where they cannot be made from the materials listed in column 3.

For example (1), if a rule in the list says that for a particular textile item, such as a blouse, yarn must be used, this does not prevent the use of metal items, such as buttons, because they cannot be made from textile materials.

4. Where a percentage rule applies, the value of trimmings and accessories must be taken into account when calculating the value of the non originating materials incorporated.

(1) This example is given for the purpose of explanation only. It is not legally binding.

Note 7:

1. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the specific processes are the following:
 - (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation.
2. For the purposes of heading Nos 2710, 2711 and 2712, the specific processes are the following:
 - (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;

- (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (i) isomerisation;
- (j) in respect of heavy oils falling within heading No ex 2710 only, desulphurization with hydrogen resulting in a reduction of at least 85 per cent of the sulphur content of the products processed (ASTM D 1266 59 T method);
- (k) in respect of products falling within heading No 2710 only, deparaffining by a process other than filtering;
- (l) in respect of heavy oils falling within heading No ex 2710 only, treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250 °C with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of heading No ex 2710 (e.g. hydrofinishing or decolourisation) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
- (m) in respect of fuel oils falling within heading No ex 2710 only, atmospheric distillation, on condition that less than 30 per cent of these products distils, by volume, including losses, at 300 °C by the ASTM D 86 method;
- (n) in respect of heavy oils other than gas oils and fuel oils falling within heading No ex 2710 only, treatment by means of a high frequency electrical brush discharge.

For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing products with different sulphur contents, any combination of these operations or like operations do not confer origin.

Notwithstanding paragraph 1 of this Article, the transportation of products constituting a single consignment may take place through other State Parties territories, where appropriate, with transshipment or temporary storage in those territories, provided that the products remain under the supervision of the Customs Authorities of the State Party of transit or storage and that they are not subject to other operations other than unloading or reloading or any other operation intended to ensure their preservation as such.
3. Originating products may be transported by pipeline across territories other than those of the State Parties acting as exporting and importing State Parties.
4. Proof that the conditions referred to in paragraph 1 of this Article have been fulfilled shall be by providing the Customs Authorities of the importing State Party with either:
 - (a) a single transport document covering the passage through the State Party of transit; or
 - (b) a certificate issued by the Customs Authorities of the State Party of transit, containing:
 - (i) an accurate description of the products;
 - (ii) date of unloading and reloading of the products, with, where applicable, the names of the ships or other means of transport used; and
 - (iii) certifying the conditions under which the products remained in the transit State Party;
 - (c) or, failing that, any other relevant document.

1. The Committee on Trade in Goods shall, in accordance with Article 31 of the Protocol on Trade in Goods, establish a Sub-Committee on Rules of Origin.
2. An importer that has been granted preferential tariff treatment shall keep documentation relating to the importation of the Product, including a copy of the Certificate of Origin, for at least five (5) years after the date on which preferential treatment was granted.
3. A State Party may deny preferential tariff treatment to a Product that is the subject of an origin verification when the importer, Exporter, or Producer of the Product that is required to maintain records or documentation under this Article:
 - (a) fails to maintain records or documentation relevant to determining the origin of the Product in accordance with the requirements of this Annex; or

- (b) denies access to those records or documentation.
4. The Designated Competent Authority of the exporting State Party issuing a Certificate of Origin shall keep for at least five (5) years the copy of the issued Certificate.
 5. The Designated Competent Authority of the importing State Party shall keep for at least five (5) years the Certificate of Origin submitted to them.

Article 33 Discrepancies and Formal Errors

1. The discovery of slight discrepancies between the statements made in the Certificate of Origin and those made in the documents submitted to the Customs Authorities or Designated Competent Authority for the purpose of carrying out the formalities for importing the products shall not, because of that fact, render the Certificate of Origin null and void if it is established that the Certificate of Origin corresponds to the products submitted.
2. Obvious formal errors such as typing errors on a Certificate of Origin shall not cause the Certificate of Origin to be rejected if the errors do not create doubts concerning the correctness of the statements made in the document.

PART IV**ADMINISTRATIVE COOPERATION****Article 34 Notifications**

1. The State Parties shall cooperate in the uniform administration and interpretation of this Annex and, through their Designated Competent Authorities, assist each other in verifying the origin of the products on which a Certificate of Origin is based
2. For purposes of facilitating the verification or assistance referred to in paragraph 1 of this Article, the Designated Competent Authorities of the State Parties shall, through the Secretariat, exchange their respective addresses and the specimen of the stamps and signatures used in their offices for the issuance of the Certificates of Origin.
3. For purposes of paragraph 1 of this Article, the Designated Competent Authority of the exporting State Party shall assume all expenses in carrying out the obligations provided thereof.
4. It is further understood that the Designated Competent Authority of the State Parties shall, from time to time, consider the overall operation and administration of the verification process, including forecasting of workload and setting priorities. If there is an unusual increase in the number of requests, the Designated Competent Authority of the State Parties shall establish priorities and take the necessary steps to manage the workload, taking into account operational requirements.
5. State Parties shall notify each other immediately, through the Secretariat, with respect to any changes in requirements stated in paragraph 2 of this Article.
6. State Parties shall notify each other immediately, through the Secretariat, of the Approved exporters as provided in Article 20 of this Annex

Article 35 Mutual Assistance

1. In order to ensure the proper application of this Annex, State Parties shall assist each other, through the Customs Authorities or Designated Competent Authorities, in checking the authenticity of the Certificate of Origin, the Origin Declaration or the supplier's declarations and the correctness of the information given in these documents.
2. State Parties' authorities shall, upon request, furnish the relevant information concerning the conditions under which the Product has been made, indicating especially the conditions in which the rules of origin were complied with in the requested State Parties.

Article 36 Verification of Proof of Origin

1. Subsequent verifications of proof of origin shall be carried out at random or based on risk analysis or whenever the Customs Authorities of the importing State Party have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Annex.
2. For purposes of implementing the provisions of paragraph 1 of this Article, the Customs Authorities of the importing State Party shall return the Certificate of Origin and the invoices, if they have been submitted, or a copy of these documents, to the Customs Authorities of the exporting State Party giving, where appropriate, the reasons for the request for verification. Any documents and information obtained suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.
3. The verification shall be carried out by the Customs Authorities of the exporting State Party and the results of such verification shall be communicated to the requesting authority or State Party as soon as possible and in any case no later than six (6) months. These results must indicate clearly whether the documents are authentic and whether the Products concerned can be considered as Products originating in a State Party. For this purpose, the Customs Authorities of the exporting State Party shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check the authorities may consider appropriate.
4. If the Customs Authorities of the importing State Party decide to suspend the granting of preferential treatment to the Products concerned while awaiting the results of the verification, release of the Products shall be offered to the importer subject to any precautionary measures considered necessary.

5. In the case of any reasonable doubt, or where there is no reply within six (6) months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting authority or State Party may, except in exceptional circumstances, refuse entitlement to the preferences.
6. Where the verification procedure or any other available information appears to indicate that the provisions of this Annex are being contravened, the exporting State Party on its own initiative or at the request of the importing State Party shall carry out appropriate enquiries or arrange for such enquiries to be carried out with due urgency to identify and prevent such contraventions and for this purpose the exporting State Party concerned may invite the participation of the importing State Party in these enquiries.

APPENDIX IV TO ANNEX 2 ON RULES OF ORIGIN

INTRODUCTORY NOTES TO THIS APPENDIX REGARDING WORKING AND PROCESSING CARRIED OUT ON NON-ORIGINATING MATERIALS THAT CONFERS ORIGINATING STATUS

GENERAL

Note 1

- 1.1 The rules set out in Column 3 of this Appendix are the minimum conditions required for the concerned Products to be considered as sufficiently worked or processed within the meaning of paragraph 2 of Article 6 of Annex 2 on Rules of Origin.
- 1.2 All examples given in these Introductory Notes are for the purpose of explanation only. They are not legally binding to State Parties.

Note 2

- 2.1 The first two columns in the Appendix describe the Product obtained. The first column gives the Chapter, Heading or Sub-heading as it is used in the Harmonized System (HS). The second column gives the description of Goods as it is used in the HS for that Chapter, Heading or Sub-heading. For each entry in the first two columns a rule is specified in Column 3. Where, in some cases, the entry in the first column is preceded by an *ex*, this signifies that the rules in Column 3 apply only to the part of that Chapter, Heading or Sub-as described in Column 2.
- 2.2 Where a Chapter or several Headings are grouped together in Column 1 and the description of Products in Column 2 is therefore given in general terms, the adjacent rules in Column 3 apply to all Products which, under the HS are classified in the Headings of the Chapter or in any of the Headings or Sub-headings grouped together in Column 1.
- 2.3 Where there are different rules in Column 3 applying to different within a Heading or Sub-Heading, each indent contains the description of that part of the Heading or Sub-heading covered by the adjacent rules in Column 3.
- 2.4 Where a Chapter, Heading or Sub-heading, in Column 1, or any text of this Appendix, is in square brackets that is an indication that the rule for that Chapter, Heading or Sub-heading in Column 3, or that text, is yet to be agreed by the AfCFTA Negotiating Institutions.
- 2.5 Where a Chapter, Heading or Sub-heading, in Column 1, or any text of this Appendix, is in square brackets that is an indication that the rule for that Chapter, Heading or Sub-heading in Column 3, or that text, is yet to be agreed by the AfCFTA Negotiating Institutions.

Note 3

- 3.1 The provisions of Article 4(b) of Annex 2 on Rules of Origin concerning Products having acquired originating status which are used in the manufacture of other Products apply regardless of whether this status has been acquired inside the factory where these Products are used or in a factory in another State Party.

Example 1: An engine of Heading 84.07, for which the rule may state that the value of non-originating Materials which may be incorporated may not exceed a certain percentage of the ex-works price, is made from

other alloy steel roughly shaped by forging of Heading ex 72.24.

If this forging has been undertaken in a State Party from a non-originating ingot, it has already acquired originating status by virtue of the rule applicable to Products of HS Chapter 72 in this Appendix. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in the another State Party. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating Materials used.

- 3.2 The rule in Column 3 represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status. Conversely, the carrying out of less working or processing cannot confer originating status. Thus if a rule provides that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.
- 3.3 When a rule in Column 3 specifies that a Product may be manufactured from more than one material, this means that any one or more Materials may be used. It does not require that all the Materials listed must be used.

Example 2: The rule for fabrics of Headings 52.08 to 52.12 provides that natural fibres may be used and that chemical Materials, among other Materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

- 3.4 Where a rule in Column 3 specifies that a Product must be manufactured from a particular Material, the condition obviously does not prevent the use of other Materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

Example 3: In the case of an article of apparel of ex Chapter 62 made from non-woven Materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth, even if non-woven cloths cannot normally be made from yarn. In such cases, the starting Material would normally be at the stage before yarn, that is, the fibre stage.

SPECIFIC PROCESSES

Note 4

- 4.1 For the purposes of Headings 27.07 and 27.13 the following are the specific processes :
- a) vacuum distillation;
 - b) redistillation by a very thorough fractionation process;
 - c) cracking;
 - d) reforming;
 - e) extraction by means of selective solvents;
 - f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolorisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - g) polymerisation;
 - h) alkylation; and
 - i) isomerisation.
- 4.2 For the purposes of Headings 27.10, 27.11 and 27.12, the following are the specific processes :
- a) vacuum distillation;
 - b) redistillation by a very thorough fractionation process;
 - c) cracking;
 - d) reforming;
 - e) extraction by means of selective solvents;
 - f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolorisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - g) polymerisation;

- h) alkylation;
- i) isomerisation;
- j) in respect of heavy oils falling within Heading ex 27.10 only, desulphurisation with hydrogen resulting in a reduction of at least 85 per cent of the sulphur content of the Products processed (ASTM D 1266-59 T method);
- k) in respect of Products falling within Heading 27.10 only, deparaffining by a process other than filtering;
- l) in respect of heavy oils falling within Heading ex 27.10 only, treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250 °C with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of Heading ex 27.10 (e.g. hydrofinishing or decolorisation) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
- m) in respect of fuel oils falling within Heading ex 27.10 only, atmospheric distillation, on condition that less than 30 per cent of these Products distils, by volume, including losses, at 300 °C by the ASTM D 86 method; and
- n) in respect of heavy oils other than gas oils and fuel oils falling within Heading ex 27.10 only, treatment by means of a high-frequency electrical brush-discharge.
- 4.3 For the purposes of Heading 27.07 and 27.13 simple operations such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing products with different sulphur contents, any combination of these operations or like operations do not confer origin.

TEXTILES**Note 5**

- 5.1 The term *natural fibres* is used in this Appendix to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.
- 5.2 The term *natural fibres* includes horsehair of Heading 05.03, silk of Headings 50.02 and 50.03 as well as the wool fibres, fine or coarse animal hair of Headings 51.01 to 51.05, the cotton fibres of Headings 52.01 to 52.03 and the other vegetable fibres of Headings 53.01 to 53.05.
- 5.3 The terms *textile pulp*, *chemical Materials* and *paper-making Materials* are used in this Appendix to describe the Materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 5.4 The term *man-made staple fibres* is used in this Appendix to refer to synthetic or artificial filament tow, staple fibres or waste, of Headings 55.01 to 55.07.

Note 6

- 6.1 The rules set out in Column 3 shall not be applied to any basic textile Materials, used in the manufacture of this Product, which, taken together, represent [X] per cent or less of the total weight of all the basic textile Materials used. (See also Notes 6.3 and 6.4 below).
- 6.2 However, the tolerance mentioned in Note 6.1 may only be applied to mixed Products which have been made from two or more basic textile Materials. The following are the basic textile Materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making Materials and paper,
- flax,
- true hemp,

- jute and other textile bast fibres,
- sisal and other textile fibres of the genus Agave,
- synthetic man made staple fibres of polyimide,
- synthetic man made staple fibres of polyacrylonitrile,
- synthetic man made staple fibres of polyamide,
- synthetic man made staple fibres of polyester,
- synthetic man made staple fibres of polypropylene,
- synthetic man-made filaments, artificial man-made filaments,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man made staple fibres of polytetrafluoroethylene,
- synthetic man made staple fibres of polyphenylene sulphide,
- synthetic man made staple fibres of polyvinyl chloride,
- other synthetic man made staple fibres,
- artificial man made staple fibres of viscose,
- other artificial man made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped,
- Products of Heading 56.05 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other Products of Heading 56.05.

Example 4: A yarn of Heading 52.05 made from cotton fibres of Heading 52.03 and synthetic staple fibres of Heading 55.06 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which may require manufacture from chemical Materials or textile pulp) may be used up to a weight of [ten X] per cent of the yarn.

Example 5: A woollen fabric of Heading 51.12 made from woollen yarn of Heading 51.07 and synthetic yarn of staple fibres of Heading 55.09 is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin rules (which may require manufacture from chemical Materials or textile pulp) or woolen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or other otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed [ten X] per cent of the weight of the fabric.

Example 6: Tufted textile fabric of Heading 58.02 made from cotton yarn of Heading 52.05 and cotton fabric of Heading 52.10 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarn used are themselves mixtures.

Example 7: Where the tufted fabric concerned has been made from cotton yarn of Heading 52.05 and synthetic fabric of Heading 54.07, then, obviously, the yarns used are two separate basic textile Materials and the tufted textile fabric is accordingly a mixed Product.

6.3 In case of Products incorporating yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped this tolerance is [X] per cent in respect of this yarn.

6.4 In the case of Products incorporating strip consisting of a core of aluminum foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film, this tolerance is [X] per cent in respect of this strip.

Note 7

7.1 Textile Materials, with the exception of linings and interlinings, which do not satisfy the rule set out in Column 3 for the made-up Product concerned may be used provided that they are classified in a Heading

other than that of the Product and that their value does not exceed [X] per cent of the ex-works price of the Product.

7.2 Without prejudice to Note 6.3, Materials which are not classified within Chapters 50 to 63 may be used freely in the manufacture of textile Products, whether or not they contain textiles.

Example 8: Where a rule in the Appendix provides that for particular textile items yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

7.3 Where a percentage rule applies, the value of Materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating Materials incorporated.

CHEMICAL PROCESSING RULES TO CONFER ORIGINATING STATUS

Note 8

Notes to Section VI of the Harmonized System

Products of the Chemical or Allied Industries (Chapters 28 to 38)

8.1 Rules 1 through 7 of this Section confer origin to goods of any Chapter, Heading or Sub-heading in this Section, except as otherwise specified in those rules.

8.2 Notwithstanding Note 8.1, goods shall be originating if they meet the applicable change in tariff classification or the percentage value content of non-originating material specified in Column 3 of the Appendix.

Rule 1: Chemical Reaction Origin

8.3 Goods of Chapters 28 through 38, which are subject to a chemical reaction, shall be treated as originating if the chemical reaction occurred in the territory of one or more of the State Parties.

8.4 For purposes of this section, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

8.5 The following are not considered to be chemical reactions for the purposes of determining whether a Product is an originating good:

- (a) dissolution in water or in other solvents;
- (b) the elimination of solvents including solvent water; or
- (c) the addition or elimination of water of crystallization.

Rule 2: Purification Origin

8.6 Goods of Chapters 28 through 38 that are subject to purification shall be treated as originating provided that one of the following occurs in the territory of one or more of the State Parties:

- (a) Purification of goods resulting in the elimination of [80 X] percent of the content of existing impurities; or
 - (viii) Nuclear grade uses.
- (b) The reduction or elimination of impurities resulting in goods suitable for one or more of the following applications:
 - (i) Pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances;
 - (ii) Chemical Products and reagents for analytical, diagnostic or laboratory uses;
 - (iii) Elements and components for use in micro-elements;
 - (iv) Specialised optical uses;
 - (v) Non toxic uses for health and safety;
 - (vi) Biotechnical use;
 - (vii) Carriers used in a separation process; or

Rule 3: Mixtures and Blends

8.7 Goods of Chapters 30, 31, 33 through 38, except for Heading 38.08, shall be treated as originating if the deliberate and proportionally controlled mixing or blending (including dispersing) of Materials to conform to predetermined specifications which results in the production of goods having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input Materials, occurs in the territory of one or more of the State Parties.

Rule 4: Change in Particle Size

- 8.8 Goods of Chapters 30, 31 and 33, shall be treated as originating if the following occurs in the territory of one or more of the State Parties: the deliberate and controlled modification in particle size of goods, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in goods having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input Materials is considered to be origin conferring.

Rule 5: Standards Materials

- 8.9 Goods of Chapters 28 through 38, shall be treated as originating if the production of these Materials occurs in the territory of one or more of the State Parties.
